## GlaxoSmithKline Award Lecture

Caspase activation cascades in apoptosis

Susan E. Logue and Seamus J. Martin

1-9

## Biochemical Society Focused Meeting

### Bringing Together Biomolecular Simulation and Experimental Studies

Manchester Interdisciplinary Biocentre, Manchester, U.K., 10-11 September 2007

Edited by Mike Sutcliffe (Manchester, U.K.).

Biomolecular simulation: historical picture and future perspectives

Wilfred F. van Gunsteren and Jožica Dolenc

11-15

Atomistic insight into the origin of the temperature-dependence of kinetic isotope effects and H-tunnelling in enzyme systems is revealed through combined experimental studies and biomolecular simulation

Sam Hay, Christopher Pudney, Parvinder Hothi, Linus O. Johannissen, Laura Masgrau, Jiayun Pang, David Leys, Michael J. Sutcliffe and Nigel S. Scrutton

16-21

Computational enzymology: modelling the mechanisms of biological catalysts

Adrian J. Mulholland

22-26

Coarse-grained simulation: a high-throughput computational approach to membrane proteins

Mark S.P. Sansom, Kathryn A. Scott and Peter J. Bond

27-32

Managing and sharing experimental data: standards, tools and pitfalls

Norman W. Paton

33-36

Structure determinations of human and chimaeric antibodies by solution scattering and constrained molecular modelling

Stephen J. Perkins and Alexandra Bonner

37-42

### Selected oral communications

Histidine protonation and the activation of viral fusion proteins

Daniela S. Mueller, Thorsten Kampmann, Ragothaman Yennamalli, Paul R. Young, Bostjan Kobe and Alan E. Mark

43-45

Molecular probes: insights into design and analysis from computational and physical chemistry

Felicity L. Mitchell, Gabriel E. Marks, Elena V. Bichenkova, Kenneth T. Douglas and Richard A. Bryce

46-50

Calculating enzyme kinetic parameters from protein structures <b>Matthias Stein, Razif R. Gabdoulline and Rebecca C. Wade</b>	51–54
Exploiting glycogen synthase kinase 3 $\beta$ flexibility in molecular recognition <b>Michael P. Mazanetz, Ian M. Withers, Charles A. Laughton and Peter M. Fischer</b>	55–58

## Independent Meeting

---

### Seventh International Meeting on AAA Proteins

Royal Agricultural College, Cirencester, U.K., 9–13 September 2007

**Edited by John Mayer (Nottingham, U.K.) and Paul Freemont (Imperial College London, U.K.).**

---

AAA proteins and the life process <b>Andreas Förster, Paul Freemont and R. John Mayer</b>	59–61
Insights into adaptor binding to the AAA protein p97 <b>Heidi O. Yeung, Patrik Kloppsteck, Hajime Niwa, Rivka L. Isaacson, Steve Matthews, Xiaodong Zhang and Paul S. Freemont</b>	62–67
From the common molecular basis of the AAA protein to various energy-dependent and -independent activities of AAA proteins <b>Teru Ogura, Yuka Matsushita-Ishiodori, Ai Johjima, Masayo Nishizono, Shingo Nishikori, Masatoshi Esaki and Kunitoshi Yamanaka</b>	68–71
AAA+ proteins: diversity in function, similarity in structure <b>Jamie Snider and Walid A. Houry</b>	72–77
Roles for the AAA+ motifs of DnaA in the initiation of DNA replication <b>Tsutomu Katayama</b>	78–82
Dissecting the ATP hydrolysis pathway of bacterial enhancer-binding proteins <b>Daniel Bose, Nicolas Joly, Tillmann Pape, Mathieu Rappas, Jorg Schumacher, Martin Buck and Xiaodong Zhang</b>	83–88
Regulation and action of the bacterial enhancer-binding protein AAA+ domains <b>Baoyu Chen, Tatyana A. Sysoeva, Saikat Chowdhury and B. Tracy Nixon</b>	89–93
The <i>Sulfolobus solfataricus</i> AAA protein Sso0909, a homologue of the eukaryotic ESCRT Vps4 ATPase <b>Cédric F.V. Hobel, Sonja V. Albers, Arnold J.M. Driessen and Andrei N. Lupas</b>	94–98
The AAA peroxins Pex1p and Pex6p function as dislocases for the ubiquitinated peroxisomal import receptor Pex5p <b>Harald W. Platta, Mykhaylo O. Debelyy, Fouzi El Magraoui and Ralf Erdmann</b>	99–104
Roles of VCP in human neurodegenerative disorders <b>Akira Kakizuka</b>	105–108
Dynamic and functional assembly of the AAA peroxins, Pex1p and Pex6p, and their membrane receptor Pex26p involved in shuttling of the PTS1 receptor Pex5p in peroxisome biogenesis <b>Yukio Fujiki, Non Miyata, Naomi Matsumoto and Shigehiko Tamura</b>	109–113

The MCM helicase: linking checkpoints to the replication fork <b>Susan L. Forsburg</b>	<b>114-119</b>
Common and specific mechanisms of AAA+ proteins involved in protein quality control <b>Axel Mogk, Tobias Haslberger, Peter Tessarz and Bernd Bukau</b>	<b>120-125</b>
Role(s) of Cdc48/p97 in mitosis <b>Hemmo Meyer and Oliver Popp</b>	<b>126-130</b>
Molecular mechanism of force generation by dynein, a molecular motor belonging to the AAA+ family <b>Naoki Numata, Takahide Kon, Tomohiro Shima, Kenji Imamula, Toshifumi Mogami, Reiko Ohkura, Keiko Sutoh and Kazuo Sutoh</b>	<b>131-135</b>
The MCM complex: (just) a replicative helicase? <b>Alessandro Costa and Silvia Onesti</b>	<b>136-140</b>
