Biochemical Society Focused Meetings

Pancreatic β -Cell: Birth, Life and Death

King's College London School of Medicine, London, U.K., 3–4 December 2007

Edited by Stephanie Amiel (King's College London, U.K.), David Dunger (University of Cambridge, U.K.), Decio Eizirik (Université Libre de Bruxelles, Belgium), Peter Jones (King's College London, U.K.), Jo Liljestone (Juvenile Diabetes Research Foundation, U.K.), Guy Rutter (Imperial College London, U.K.), James Shaw (Newcastle University Medical School, U.K.) and David Tosh (Bath, U.K.).

The pancreatic β -cell: birth, life and death Guy A. Rutter and F. Susan Wong	267–271
Definitive endoderm: a key step in coaxing human embryonic stem cells into transplantable β -cells Henrik Semb	272–275
Control of pancreatic development by intercellular signals Bertrand Duvillié, Volodymyr Stetsyuk, Gaëlle Filhoulaud, Ghislaine Guillemain and Raphaël Scharfmann	276–279
EGF receptor in pancreatic β -cell mass regulation Päivi Miettinen, Päivi Ormio, Elina Hakonen, Meenal Banerjee and Timo Otonkoski	280–285
Experimental models of β -cell regeneration Claire Bonal, Isabelle Avril and Pedro L. Herrera	286–289
Insulin signalling in islets Shanta J. Persaud, Dany Muller and Peter M. Jones	290–293
Granule docking and cargo release in pancreatic β -cells Sebastian Barg, Anders Lindqvist and Stefanie Obermüller	294–299
Why expression of some genes is disallowed in β -cells Roel Quintens, Nico Hendrickx, Katleen Lemaire and Frans Schuit	300–305
Glucokinase (<i>GCK</i>) and other susceptibility genes for β -cell dysfunction: the candidate approach Anna L. Gloyn, Nicholas D. Tribble, Martijn van de Bunt, Amy Barrett and Paul R.V. Johnson	306–311
Commonality in the genetic control of Type 1 diabetes in humans and NOD mice: variants of genes in the IL-2 pathway are associated with autoimmune diabetes in both species Dan B. Rainbow, Laura Esposito, Sarah K. Howlett, Kara M. Hunter, John A. Todd, Laurence B. Peterson and Linda S. Wicker	312–315
CD8 ⁺ T-cells and their interaction with other cells in damage to islet β -cells F. Susan Wong, L. Khai Siew and Li Wen	316–320

Use of a systems biology approach to understand pancreatic β -cell death in Type 1 diabetes Decio L. Eizirik, Fabrice Moore, Daisy Flamez and Fernanda Ortis	321–327
Cytokine signalling in the β -cell: a dual role for IFN γ Conny Gysemans, Hanne Callewaert, Lutgart Overbergh and Chantal Mathieu	328–333
Role of NF- κ B in β -cell death Danielle Melloul	334–339
Macrophages, cytokines and β -cell death in Type 2 diabetes Jan A. Ehses, Marianne Böni-Schnetzler, Mirjam Faulenbach and Marc Y. Donath	340–342
Oxidative stress: the vulnerable β -cell Sigurd Lenzen	343–347
Fatty acids and glucolipotoxicity in the pathogenesis of Type 2 diabetes Miriam Cnop	348–352
Transdifferentiation of pancreatic ductal cells to endocrine β -cells Susan Bonner-Weir, Akari Inada, Shigeru Yatoh, Wan-Chun Li, Tandy Aye, Elena Toschi and Arun Sharma	353–356
Selected oral communications	
TCF7L2 controls insulin gene expression and insulin secretion in mature pancreatic β -cells Merewyn K. Loder, Gabriela da Silva Xavier, Angela McDonald and Guy A. Rutter	357–359
Regulation of the <i>GPR40</i> locus: towards a molecular understanding Gabriela Ridner, Reut Bartoov-Shifman, Tatyana Zalogin, Tali Avnit-Sagi, Keren Bahar, Revital Sharivkin, Lia Kantorovich, Sara Weiss and Michael D. Walker	360–362
Stem cells and metabolic diseases Andreia S. Bernardo and Kevin Docherty	363–365

Mechanics and Control of Cytokinesis

Royal College of Surgeons, Edinburgh, U.K., 9–12 January 2008

Edited by Gwyn Gould (Glasgow, U.K.) and Iain Hagan (Manchester, U.K.).

Cytokinesis: the final stop for the chromosomal passengers Mar Carmena	367–370
Control of cortical contractility during cytokinesis Michael Werner and Michael Glotzer	371–377
Control of the cytokinetic apparatus by flux of the Rho GTPases Ann L. Miller, George von Dassow and William M. Bement	378–380
Mechanical and genetic separation of aster- and midzone-positioned cytokinesis Henrik Bringmann	381–383

Cytokinesis and the establishment of early embryonic cell polarity David R. Burgess	384–386
Co-ordination of cytokinesis with chromosome segregation Manuel Mendoza and Yves Barral	387–390
Mechanisms regulating targeting of recycling endosomes to the cleavage furrow during cytokinesis Glenn C. Simon and Rytis Prekeris	391–394
Membrane traffic and polarization of lipid domains during cytokinesis Arnaud Echard	395–399
Girds ‘n’ cleeks o’ cytokinesis: microtubule sticks and contractile hoops in cell division David M. Glover, Luisa Capalbo, Pier Paolo D’Avino, Melanie K. Gatt, Matthew S. Savoian and Tetsuya Takeda	400–404
Control of mitotic exit and cytokinesis by the APC/C Catherine Lindon	405–410
An overview of the fission yeast septation initiation network (SIN) Andrea Krapp and Viesturs Simanis	411–415
The spindle position checkpoint: how to deal with spindle misalignment during asymmetric cell division in budding yeast Roberta Fraschini, Marianna Venturetti, Elena Chiroli and Simonetta Piatti	416–420
The structural mechanics of cell division in <i>Trypanosoma brucei</i> Sue Vaughan and Keith Gull	421–424
Progress towards understanding the mechanism of cytokinesis in fission yeast Thomas D. Pollard	425–430
Cell division screens and dynamin Mary Kate Bonner and Ahna R. Skop	431–435
 Selected oral communications	
The role of Cdc14 phosphatases in the control of cell division Dawn M. Clifford, Chun-Ti Chen, Rachel H. Roberts, Anna Feoktistova, Benjamin A. Wolfe, Jun-Song Chen, Dannel McCollum and Kathleen L. Gould	436–438
Anillin: a pivotal organizer of the cytokinetic machinery Gilles R.X. Hickson and Patrick H. O’Farrell	439–441
Endosome positioning during cytokinesis Guillaume Montagnac and Philippe Chavrier	442–443

Biochemical Society Irish Area Section Annual Meeting

Ubiquitin and Ubiquitin-Like Modification in Health and Disease

Royal College of Surgeons in Ireland, Dublin, Ireland, 22–23 November 2007

Edited by **Caroline Jefferies (Royal College of Surgeons in Ireland).**

- SUMO, hypoxia and the regulation of metabolism
Terence A. Agbor and Cormac T. Taylor 445–448
- Insights from vaccinia virus into Toll-like receptor signalling proteins and their regulation by ubiquitin: role of IRAK-2
Andrew G. Bowie 449–452
- Targeting IRFs by ubiquitination: regulating antiviral responses
Rowan Higgs and Caroline A. Jefferies 453–458
- Natural killer cell evasion by an E3 ubiquitin ligase from Kaposi's sarcoma-associated herpesvirus
Mair Thomas, Mark Wills and Paul J. Lehner 459–463
- The suppressors of cytokine signalling E3 ligases behave as tumour suppressors
Joanne Elliott, Michelle B. Hookham and James A. Johnston 464–468
- Disruption of ubiquitin-mediated processes in diseases of the brain and bone
Robert Layfield and Mark S. Searle 469–471
- Role of the *VHL* (von Hippel-Lindau) gene in renal cancer: a multifunctional tumour suppressor
Michelle J. Nyhan, Gerald C. O'Sullivan and Sharon L. McKenna 472–478
- Development and implementation of split-GFP-based bimolecular fluorescence complementation (BiFC) assays in yeast
Emma Barnard, Neil V. McFerran, Alan Trudgett, John Nelson and David J. Timson 479–482

Independent Meeting

RNA UK 2008

The Burnside Hotel, Bowness on Windermere, Cumbria, U.K., 18–20 January 2008

Edited by **David Elliot (Newcastle, U.K.), Sarah Newbury (Sussex, U.K.) and Alison Tyson-Capper (Newcastle, U.K.).**

- Substances that can change alternative splice-site selection
Chiranthani Sumanasekera, David S. Watt and Stefan Stamm 483–490
- Control of mRNA decay by phosphorylation of tristetraprolin
Heike Sandler and Georg Stoecklin 491–496
- Recognition of nonsense mRNA: towards a unified model
Oliver Mühlemann 497–501

Selected oral communications

- Regulation of the ELAV target *ewg*: insights from an evolutionary perspective
Matthias Soller, Min Li and Irmgard U. Haussmann 502-504
- Regulation of gene expression by the RNA-binding protein Sam68 in cancer
Prabhakar Rajan, Luke Gaughan, Caroline Dalglish, Amira El-Sherif, Craig N. Robson, Hing Y. Leung and David J. Elliott 505-507
- Alternative splicing in plants
Craig G. Simpson, Dominika Lewandowska, John Fuller, Monika Maronova, Maria Kalyna, Diane Davidson, Jim McNicol, Dorota Raczynska, Artur Jarmolowski, Andrea Barta and John W.S. Brown 508-510
- The use of Affymetrix GeneChips as a tool for studying alternative forms of RNA
Andrew P. Harrison, Joanna Rowsell, Renata da Silva Camargo, William B. Langdon, Maria Stalteri, Graham J.G. Upton and Jose M. Arteaga-Salas 511-513
- Nonsense-mediated mRNA decay
Jikai Wen and Saverio Brogna 514-516
- Polyadenylation and degradation of mRNA in mammalian mitochondria: a missing link?
Agnieszka J. Bobrowicz, Robert N. Lightowlers and Zofia Chrzanowska-Lightowlers 517-519
- Control of mRNA degradation in trypanosomes
Christine Clayton, Angela Schwede, Mhairi Stewart, Ana Robles, Corinna Benz, June Po, Martin Wurst, Rafael Quieroz and Stuart Archer 520-521
- Human papillomavirus type 16 late gene expression is regulated by cellular RNA processing factors in response to epithelial differentiation
Sarah A. Cumming, Thanaporn Cheun-Im, Stephen G. Milligan and Sheila V. Graham 522-524
- Targeting of transcripts encoding membrane proteins in polarized epithelia: RNA-protein binding studies of the SGLT1 3'-UTR
Christopher M. Pedder, Dianne Ford and John E. Hesketh 525-527
- Function and regulation of the mammalian Musashi mRNA translational regulator
Angus M. MacNicol, Anna Wilczynska and Melanie C. MacNicol 528-530
- Regulation of B- and T-cell differentiation by a single microRNA
Martin Turner and Elena Vigorito 531-533
- Gene expression is reduced *in trans* by inosine-containing dsRNA
A.D.J. Scadden 534-536
- Role of the C-terminal domain of RNA polymerase II in expression of small nuclear RNA genes
Sylvain Egloff and Shona Murphy 537-539
- Comet and cup genes in *Drosophila* spermatogenesis: the first demonstration of post-meiotic transcription
Carine Barreau, Elizabeth Benson and Helen White-Cooper 540-542
- Complexity of *COX-2* gene regulation
Kelly A. Harper and Alison J. Tyson-Capper 543-545

Coupling transcription to RNA processing via the p68 DEAD box RNA helicase androgen receptor co-activator in prostate cancer Emma L. Clark, Frances V. Fuller-Pace, David J. Elliott and Craig N. Robson	546–547
Can donor splice site recognition occur without the involvement of U1 snRNP? Michela Raponi and Diana Baralle	548–550
The role of Snu114p during pre-mRNA splicing Lily Novak Frazer, Verity Nancollis and Raymond T. O’Keefe	551–553
