Biochemical Society Focused Meetings

Molecular Biology of Archaea

University of St Andrews, U.K., 19–21 August 2008

Edited by Stephen Bell (Oxford, U.K.) and Malcolm White (St Andrews, U.K.).

- Methanococcus maripaludis*: an archaeon with multiple functional MCM proteins?
Alison D. Walters and James P.J. Chong 1–6
- How is the archaeal MCM helicase assembled at the origin? Possible mechanisms
Nozomi Sakakibara, Lori M. Kelman and Zvi Kelman 7–11
- Molecular mechanisms of archaeal RNA polymerase
Dina Grohmann, Angela Hirtreiter and Finn Werner 12–17
- Mutational studies of archaeal RNA polymerase and analysis of hybrid RNA polymerases
Michael Thomm, Christoph Reich, Sebastian Grünberg and Souad Najj 18–22
- Distribution of CRISPR spacer matches in viruses and plasmids of crenarchaeal acidothermophiles and implications for their inhibitory mechanism
Shiraz Ali Shah, Niels R. Hansen and Roger A. Garrett 23–28
- The universal Kae1 protein and the associated Bud32 kinase (PRPK), a mysterious protein couple probably essential for genome maintenance in Archaea and Eukarya
Arnaud Hecker, Marc Graille, Edwige Madec, Danièle Gabelle, Eric Le Cam, Herman van Tilbergh and Patrick Forterre 29–35
- Reactions to UV damage in the model archaeon *Sulfolobus solfataricus*
Sabrina Fröls, Malcolm F. White and Christa Schleper 36–41
- Molecular biology of the pRN1 plasmid from *Sulfolobus islandicus*
Georg Lipps 42–45
- Chaperones and protein folding in the archaea
Andrew T. Large, Martin D. Goldberg and Peter A. Lund 46–51
- Role of multiprotein bridging factor 1 in archaea: bridging the domains?
Bart de Koning, Fabian Blombach, Hao Wu, Stan J.J. Brouns and John van der Oost 52–57
- SulfoSYS (*Sulfolobus* Systems Biology): towards a silicon cell model for the central carbohydrate metabolism of the archaeon *Sulfolobus solfataricus* under temperature variation
Sonja-Verena Albers, Nils-Kåre Birkeland, Arnold J.M. Driessen, Susanne Gertig, Patrick Haferkamp, Hans-Peter Klenk, Theresa Kouril, Andrea Manica, Trong K. Pham, Peter Ruoff, Christa Schleper, Dietmar Schomburg, Kieran J. Sharkey, Bettina Siebers, Pawel Sierocinski, Ralf Steuer, John van der Oost, Hans V. Westerhoff, Patricia Wieloch, Phillip C. Wright and Melanie Zaparty 58–64

Recognition of deaminated bases by archaeal family-B DNA polymerases Bernard A. Connolly	65–68
Reverse gyrase and genome stability in hyperthermophilic organisms Giuseppe Peruginò, Anna Valenti, Anna D’Amaro, Mosè Rossi and Maria Ciaramella	69–73
Molecular biology of Hel308 helicase in archaea Isabel L. Woodman and Edward L. Bolt	74–78
Studies on the base excision repair (BER) complex in <i>Pyrococcus furiosus</i> Shinichi Kiyonari, Saki Tahara, Maiko Uchimura, Tsuyoshi Shirai, Sonoko Ishino and Yoshizumi Ishino	79–82
Lessons from structural and biochemical studies on the archaeal exosome Sophia Hartung and Karl-Peter Hopfner	83–87
Homologous recombination in <i>Sulfolobus acidocaldarius</i> : genetic assays and functional properties Dennis W. Grogan	88–91
Genetic analyses in the hyperthermophilic archaeon <i>Sulfolobus islandicus</i> Qunxin She, Changyi Zhang, Ling Deng, Nan Peng, Zhengjun Chen and Yun Xiang Liang	92–96
Expanding and understanding the genetic toolbox of the hyperthermophilic genus <i>Sulfolobus</i> Michaela Wagner, Silvia Berkner, Malgorzata Ajon, Arnold J.M. Driessen, Georg Lipps and Sonja-Verena Albers	97–101
RecA family proteins in archaea: RadA and its cousins Sam Haldenby, Malcolm F. White and Thorsten Allers	102–107
Selected oral communications	
The haloarchaeal chromosome replication machinery Stuart A. MacNeill	108–113
Genetics, biochemistry and structure of the archaeal virus STIV Jennifer Fulton, Brian Bothner, Martin Lawrence, John E. Johnson, Trevor Douglas and Mark Young	114–117
Two unique membrane-bound AAA proteins from <i>Sulfolobus solfataricus</i> Justyna Serek-Heuberger, Cédric F.V. Hobel, Stanislaw Dunin-Horkawicz, Beate Rockel, Jörg Martin and Andrei N. Lupas	118–122
Role of <i>vapBC</i> toxin–antitoxin loci in the thermal stress response of <i>Sulfolobus solfataricus</i> Charlotte R. Cooper, Amanda J. Daugherty, Sabrina Tachdjian, Paul H. Blum and Robert M. Kelly	123–126
The interaction of <i>Nanoarchaeum equitans</i> with <i>Ignicoccus hospitalis</i> : proteins in the contact site between two cells Tillmann Burghardt, Benjamin Junglas, Frank Siedler, Reinhard Wirth, Harald Huber and Reinhard Rachel	127–132
Small RNAs of the halophilic archaeon <i>Haloferax volcanii</i> Jörg Soppa, Julia Straub, Mariam Brenneis, Angelika Jellen-Ritter, Ruth Heyer, Susan Fischer, Michaela Granzow, Björn Voss, Wolfgang R. Hess, Brian Tjaden and Anita Marchfelder	133–136

ESCRTs: from Cell Biology to Pathogenesis

Robinson College, Cambridge, U.K., 26–28 August 2008

Edited by Katherine Bowers (University College London, U.K.), Juan Martin-Serrano (King's College London, U.K.) and Paul Whitley (Bath, U.K.).

The role of ESCRT proteins in attenuation of cell signalling Lina M. Rodahl, Susanne Stuffers, Viola H. Lobert and Harald Stenmark	137–142
Regulation of Vps4 ATPase activity by ESCRT-III Brian A. Davies, Ishara F. Azmi and David J. Katzmann	143–145
ESCRT proteins, endosome organization and mitogenic receptor down-regulation Philip Woodman	146–150
Evolution and assembly of ESCRTs Sara Ghazi-Tabatabai, Takayuki Obita, Ajaybabu V. Pobbati, Olga Perisic, Rachel Y. Samson, Stephen D. Bell and Roger L. Williams	151–155
Structure and function of ESCRT-III Suman Lata, Guy Schoehn, Julianna Solomons, Ricardo Pires, Heinrich G. Göttlinger and Winfried Weissenhorn	156–160
Piecing together the ESCRTs James H. Hurley, Young Jun Im, Hyung Ho Lee, Xuefeng Ren, Thomas Wollert and Dong Yang	161–166
ESCRTs and human disease Suraj Saksena and Scott D. Emr	167–172
Down-regulation of epidermal growth factor receptor signalling within multivesicular bodies Emily R. Eden, Ian J. White and Clare E. Futter	173–177
ESCRT proteins and the regulation of endocytic delivery to lysosomes J. Paul Luzio, Siân C. Piper, Katherine Bowers, Michael D.J. Parkinson, Paul J. Lehner and Nicholas A. Bright	178–180
The ESCRT pathway and HIV-1 budding Yoshiko Usami, Sergei Popov, Elena Popova, Michio Inoue, Winfried Weissenhorn and Heinrich G. Göttlinger	181–184
HIV assembly and budding in macrophages Mark Marsh, Kristina Theusner and Annegret Pelchen-Matthews	185–189
Selected oral communications	
The mechanism of Ca ²⁺ -dependent recognition of Alix by ALG-2: insights from X-ray crystal structures Hironori Suzuki, Masato Kawasaki, Tatsutoshi Inuzuka, Mayumi Okumura, Takeshi Kakiuchi, Hideki Shibata, Soichi Wakatsuki and Masatoshi Maki	190–194
The ESCRT machinery: new functions in viral and cellular biology Jeremy G. Carlton and Juan Martin-Serrano	195–199
Alix and ALG-2 make a link between endosomes and neuronal death Anne-Laure Mahul-Mellier, Flavie Strappazzon, Christine Chatellard-Cause, Béatrice Blot, David Béal, Sakina Torch, Fiona Hemming, Anne Petiot, Jean-Marc Verna, Sandrine Fraboulet and Rémy Sadoul	200–203

Genetic analysis of ESCRT function in <i>Drosophila</i> : a tumour model for human <i>Tsg101</i> Hans-Martin Herz and Andreas Bergmann	204–207
The role of CHMP2B in frontotemporal dementia Hazel Urwin, Shabnam Ghazi-Noori, John Collinge and Adrian Isaacs	208–212

mTOR Signalling, Nutrients and Disease

Medical Sciences Teaching Centre, University of Oxford, U.K., 15–16 September 2008

Edited by Richard Boyd (Oxford, U.K.), Deborah Goberdhan (Oxford, U.K.) and Richard Lamb (Cancer Research UK, London, U.K.).

mTOR: dissecting regulation and mechanism of action to understand human disease Deborah C.I. Goberdhan and C.A. Richard Boyd	213–216
A complex interplay between Akt, TSC2 and the two mTOR complexes Jingxiang Huang and Brendan D. Manning	217–222
Activation of mTORC1 in two steps: Rheb-GTP activation of catalytic function and increased binding of substrates to raptor Joseph Avruch, Xiaomeng Long, Yenshou Lin, Sara Ortiz-Vega, Joseph Rapley, Angela Papageorgiou, Noriko Oshiro and Ushio Kikkawa	223–226
mTORC1 signalling and mRNA translation Christopher G. Proud	227–231
Nutrient-dependent regulation of autophagy through the target of rapamycin pathway Yu-Yun Chang, Gábor Juhász, Pankuri Goraksha-Hicks, Andrew M. Arsham, Daniel R. Mallin, Laura K. Muller and Thomas P. Neufeld	232–236
Amino acid transporters: <i>éminences grises</i> of nutrient signalling mechanisms? Peter M. Taylor	237–241
Amino-acid-induced signalling via the SPS-sensing pathway in yeast Per O. Ljungdahl	242–247
Amino acid sensing and mTOR regulation: inside or out? Deborah C.I. Goberdhan, Margret H. Ögmundsdóttir, Shubana Kazi, Bruno Reynolds, Shivanthy M. Visvalingam, Clive Wilson and C.A. Richard Boyd	248–252
Starvation in the midst of plenty: making sense of ceramide-induced autophagy by analysing nutrient transporter expression Aimee L. Edinger	253–258
Therapeutic targeting of mTOR in tuberous sclerosis Julian R. Sampson	259–264
PI3K inhibitors for cancer treatment: where do we stand? Sauveur-Michel Maira, Frédéric Stauffer, Christian Schnell and Carlos García-Echeverría	265–272
Selected oral communications	
TOR signalling regulates mitotic commitment through stress-activated MAPK and Polo kinase in response to nutrient stress Janni Petersen	273–277

A new player in the orchestra of cell growth: SREBP activity is regulated by mTORC1 and contributes to the regulation of cell and organ size Thomas Porstmann, Claudio R. Santos, Caroline Lewis, Beatrice Griffiths and Almut Schulze	278–283
Translational responses to growth factors and stress Megan Cully and Julian Downward	284–288
Rag proteins regulate amino-acid-induced mTORC1 signalling Yasemin Sancak and David M. Sabatini	289–290
Prolyl hydroxylases as regulators of cell metabolism Houda Boulahbel, Raúl V. Durán and Eyal Gottlieb	291–294
Placental mTOR links maternal nutrient availability to fetal growth Sara Roos, Theresa L. Powell and Thomas Jansson	295–298

Independent Meeting

2nd Neuroscience Ireland Conference

National University of Ireland, Galway, Co. Galway, Ireland, 28–29 August 2009

Edited by Karen Doyle (National University of Ireland, Galway, Ireland).

Considerations and recent advances in neuroscience Adrienne M. Gorman and Karen M. Doyle	299–302
Neuroinflammatory changes increase the impact of stressors on neuronal function Alessia Piazza and Marina A. Lynch	303–307
Mutant models for genes associated with schizophrenia Lieve Desbonnet, John L. Waddington and Colm M.P. O’Tuathaigh	308–312
Is depression associated with dysfunction of the central reward system? Chantal Martin-Soelch	313–317
When pain after surgery doesn’t go away... Siún Burke and George D. Shorten	318–322
Medium spiny neurons for transplantation in Huntington’s disease Claire M. Kelly, Stephen B. Dunnett and Anne E. Rosser	323–328
The effects of blood–brain barrier disruption on glial cell function in multiple sclerosis Stephen McQuaid, Paula Cunnea, Jill McMahon and Una Fitzgerald	329–331
