Jubilee Lecture

miRNPs: versatile regulators of gene expression in vertebrate cells

Joan A. Steitz and Shobha Vasudevan

931–935

Early Career Research Award

The emerging complexity of protein ubiquitination

David Komander

937–953

Biochemical Society Focused Meetings

The Dynamic Cell

Appleton Tower, University of Edinburgh, U.K., 1–4 April 2009

Edited by Ian Dransfield (Edinburgh, U.K.), Margarete Heck (Edinburgh, U.K.), Kairbaan Hodivala-Dilke (Cancer Research UK, London, U.K.), Robert Insall (Beatson Institute for Cancer Research, Glasgow, U.K.), Andrew McAinsh (Marie Curie Research Institute, Oxford, U.K.) and Barbara Reaves (Bath, U.K.).

Lipid rafts as functional heterogeneity in cell membranes

Daniel Lingwood, Hermann-Josef Kaiser, Ilya Levental and Kai Simons

955–960

How and why does the endoplasmic reticulum move?

Becky Bola and Viki Allan

961–965

Potential roles of myosin VI in cell motility

Margarita V. Chibalina, Claudia Puri, John Kendrick-Jones and Folma Buss

966–970

Dividing the goods: co-ordination of chromosome biorientation and mitotic checkpoint signalling by mitotic kinases

Geert J.P.L. Kops

971–975

Regulation of kinetochore–microtubule attachments by Aurora B kinase

Dan Liu and Michael A. Lampson

976–980

The assembly of lipid droplets and its relation to cellular insulin sensitivity

Pontus Boström, Linda Andersson, Lu Li, Rosie Perkins, Kurt Højlund, Jan Borén and Sven-Olof Olofsson

981–985

Hepatitis C virus: viral proteins on the move

John McLauchlan

986–990

Fat on the move: intracellular motion of lipid droplets Michael A. Welte	991–996
Structural basis of EB1 effects on microtubule dynamics Frédéric M. Coquelle, Benjamin Vitre and Isabelle Arnal	997–1001
The role of TOG domains in microtubule plus end dynamics Kevin C. Slep	1002–1006
Regulation of microtubule dynamic instability Babet van der Vaart, Anna Akhmanova and Anne Straube	1007–1013
Microsignalosomes: spatially resolved receptor signalling Bebhinn Treanor, Naomi E. Harwood and Facundo D. Batista	1014–1018
The delivery of endocytosed cargo to lysosomes J. Paul Luzio, Michael D.J. Parkinson, Sally R. Gray and Nicholas A. Bright	1019–1021
Dissecting dynamin's role in clathrin-mediated endocytosis Marcel Mettlen, Thomas Pucadyil, Rajesh Ramachandran and Sandra L. Schmid	1022–1026
Rab7 and the CMT2B disease Laura Cogli, Francesco Piro and Cecilia Bucci	1027–1031
The dynamic Rab11-FIPs Conor P. Horgan and Mary W. McCaffrey	1032–1036
Structural aspects of Rab6-effector complexes Humberto Fernandes, Edward Franklin, Rosario Recacha, Anne Houdusse, Bruno Goud and Amir R. Khan	1037–1041
The 'super-resolution' revolution Ilan Davis	1042–1044
Selected oral communications	
Walking, hopping, diffusing and braking modes of kinesin-5 Kuniyoshi Kaseda, Andrew D. McAinsh and Robert A. Cross	1045–1049
A novel function of lipid droplets in regulating longevity Alexander A. Goldberg, Simon D. Bourque, Pavlo Kyryakov, Tatiana Boukh-Viner, Christopher Gregg, Adam Beach, Michelle T. Burstein, Gayane Machkalyan, Vincent Richard, Sonia Rampersad and Vladimir I. Titorenko	1050–1055
Lipid order and molecular assemblies in the plasma membrane of eukaryotic cells Marek Cebecauer, Dylan M. Owen, Anna Markiewicz and Anthony I. Magee	1056–1060
GRAF1-dependent endocytosis Gary J. Doherty and Richard Lundmark	1061–1065
Bicaudal-D and its role in cargo sorting by microtubule-based motors Martin Dienstbier and Xuan Li	1066–1071
The role of vesicle trafficking in epithelial cell motility Sarah J. Fletcher and Joshua Z. Rappoport	1072–1076

Bipolar Disorder: Molecular and Cellular Biology

Royal Holloway, University of London, Egham, U.K., 23–24 April 2009

Edited by Robin Williams (Royal Holloway, Egham, U.K.) and Talvinder Sihra (University College London, U.K.).

Employing multiple models, methods and mechanisms in bipolar disorder research

Robin S.B. Williams **1077–1079**

Neural network dysfunction in bipolar depression: clues from the efficacy of lamotrigine

Charles H. Large, Elena Di Daniel, Xingbao Li and Mark S. George **1080–1084**

Risk and resilience in bipolar disorder: rationale and design of the Vulnerability to Bipolar Disorders Study (VIBES)

Sophia Frangou **1085–1089**

The role of lithium in modulation of brain genes: relevance for aetiology and treatment of bipolar disorder

S. Hossein Fatemi, Teri J. Reutiman and Timothy D. Folsom

1090–1095

DTI studies of corpus callosum in bipolar disorder

Marcella Bellani, Ping-Hong Yeh, Michele Tansella, Matteo Balestrieri, Jair C. Soares and Paolo Brambilla **1096–1098**

Cellular consequences of inositol depletion

Rania M. Deranieh and Miriam L. Greenberg **1099–1103**

Is the brain arachidonic acid cascade a common target of drugs used to manage bipolar disorder?

Richard P. Bazinet **1104–1109**

PtdIns(3,4,5)P₃ and inositol depletion as a cellular target of mood stabilizers

Regina Teo, Jason King, Emma Dalton, Jonathan Ryves, Robin S.B. Williams and Adrian J. Harwood **1110–1114**

Valproic acid- and lithium-sensitivity in *prs* mutants of *Saccharomyces cerevisiae*

Anna Kleineidam, Stefano Vavassori, Ke Wang, Lilian M. Schweizer, Peter Griac and Michael Schweizer **1115–1120**

Knockout mice in understanding the mechanism of action of lithium

Galila Agam, Yuly Bersudsky, Gerard T. Berry, Diederik Moechars, Yael Lavi-Avnon and R.H. Belmaker **1121–1125**

Structure–function studies for the panacea, valproic acid

Nicole Terbach and Robin S.B. Williams **1126–1132**

Validating GSK3 as an *in vivo* target of lithium action

W. Timothy O'Brien and Peter S. Klein **1133–1138**

Selected oral communication

Investigation of the H⁺-*myo*-inositol transporter (HMIT) as a neuronal regulator of phosphoinositide signalling

Elena Di Daniel, James N. Kew and Peter R. Maycox **1139–1143**

Correction **1145**
