Novartis Medal Lecture

AMP-activated protein kinase: a cellular energy sensor with a key role in metabolic disorders and in cancer

D. Grahame Hardie

1–13

Biochemical Society Focused Meetings

Molecular Biology of Archaea II

Robinson College, Cambridge, U.K., 16–18 August 2010

Edited by Stephen Bell (Oxford, U.K.) and Finn Werner (University College London, U.K.).

- Homologous recombination in the archaea: the means justify the ends
Malcolm F. White **15–19**
- The archaeal PCNA proteins
Miao Pan, Lori M. Kelman and Zvi Kelman **20–24**
- Archaeal RNA polymerase: the influence of the protruding stalk in crystal packing and preliminary biophysical analysis of the Rpo13 subunit
Magdalena Wojtas, Bibiana Peralta, Marina Ondiviela, Maria Mogni, Stephen D. Bell and Nicola G.A. Abrescia **25–30**
- Cation- π interactions induce kinking of a molecular hinge in the RNA polymerase bridge-helix domain
Hans Heindl, Pamela Greenwell, Noam Weingarten, Tamas Kiss, Gabor Terstyanszky and Robert O.J. Weinzierl **31–35**
- Plasmids, viruses and virus-like membrane vesicles from Thermococcales
Nicolas Soler, Marie Gaudin, Evelyne Marguet and Patrick Forterre **36–44**
- Assembling the archaeal ribosome: roles for translation-factor-related GTPases
Fabian Blombach, Stan J.J. Brouns and John van der Oost **45–50**
- CRISPR-based immune systems of the Sulfolobales: complexity and diversity
Roger A. Garrett, Shiraz A. Shah, Gisle Vestergaard, Ling Deng, Soley Gudbergsdottir, Chandra S. Kenchappa, Susanne Erdmann and Qunxin She **51–57**
- Positive supercoiling in thermophiles and mesophiles: of the good and evil
Anna Valenti, Giuseppe Perugino, Mosè Rossi and Maria Ciaramella **58–63**
- Assembly and function of the archaeal flagellum
Abhrajyoti Ghosh and Sonja-Verena Albers **64–69**

The role of the DNA sliding clamp in Okazaki fragment maturation in archaea and eukaryotes Thomas R. Beattie and Stephen D. Bell	70–76
An additional glucose dehydrogenase from <i>Sulfolobus solfataricus</i> : fine-tuning of sugar degradation? Patrick Haferkamp, Simone Kutschki, Jenny Treichel, Hatim Hameda, Karsten Sewczyk, Daniel Hoffmann, Melanie Zaparty and Bettina Siebers	77–81
A thaumarchaeal provirus testifies for an ancient association of tailed viruses with archaea Mart Krupovic, Anja Spang, Simonetta Gribaldo, Patrick Forterre and Christa Schleper	82–88
	 <small>online data</small>
Translation initiation in Archaea: conserved and domain-specific features Dario Benelli and Paola Londei	89–93
Insights into chaperonin function from studies on archaeal thermosomes Peter Lund	94–98
Archaeal promoter architecture and mechanism of gene activation Nan Peng, Xiang Ao, Yun Xiang Liang and Qunxin She	99–103
Structure and function of the primase domain of the replication protein from the archaeal plasmid pRN1 Georg Lipps	104–106
Potential role of cellular ESCRT proteins in the STIV life cycle Jamie C. Snyder and Mark J. Young	107–110
Selected oral communications	
Bacterial and eukaryotic systems collide in the three Rs of <i>Methanococcus</i> Richard P. Parker, Alison D. Walters and James P.J. Chong	111–115
Nucleoid-associated proteins in Crenarchaea Rosalie P.C. Driessen and Remus Th. Dame	116–121
FRET (fluorescence resonance energy transfer) sheds light on transcription Dina Grohmann, Daniel Klose, Daniel Fielden and Finn Werner	122–127
Studying biomolecular complexes with pulsed electron–electron double resonance spectroscopy Gunnar W. Reginsson and Olav Schiemann	128–139
Winged helix domains with unknown function in Hel308 and related helicases Isabel L. Woodman and Edward L. Bolt	140–144
Structure and function of a novel endonuclease acting on branched DNA substrates Christophe Creze, Roxane Lestini, Joelle Kühn, Alessio Ligabue, Hubert F. Becker, Mirjam Czjzek, Didier Flament and Hannu Myllykallio	145–149
Ploidy and gene conversion in Archaea Jörg Soppa	150–154
Thermophilic archaeal enzymes and applications in biocatalysis Jennifer A. Littlechild	155–158

Regulatory RNAs in *Haloferax volcanii*
Susan Fischer, Juliane Benz, Bettina Späth, Angelika Jellen-Ritter, Ruth Heyer, Marcella Dörr, Lisa-Katharina Maier, Clemens Menzel-Hobeck, Matthias Lehr, Katharina Jantzer, Julia Babski, Jörg Soppa and Anita Marchfelder **159–162**

Protein–protein interactions in the archaeal core replisome
Stuart A. MacNeill **163–168**

Homing endonucleases residing within inteins: evolutionary puzzles awaiting genetic solutions
Adi Barzel, Adit Naor, Eyal Privman, Martin Kupiec and Uri Gophna **169–173**

Enzymology and Ecology of the Nitrogen Cycle

University of Birmingham, U.K., 15–17 September 2010

Edited by Jeff Cole (University of Birmingham, U.K.), Rosa María Martínez-Espinosa (University of Alicante, Spain), David Richardson (University of East Anglia, Norwich, U.K.) and Nick Watmough (University of East Anglia, Norwich, U.K.).

Enzymology and ecology of the nitrogen cycle
Rosa María Martínez-Espinosa, Jeffrey A. Cole, David J. Richardson and Nicholas J. Watmough **175–178**

Oxygen control of nitrogen oxide respiration, focusing on α -proteobacteria
James P. Shapleigh **179–183**

Nitric oxide detoxification in the rhizobia–legume symbiosis
Cristina Sánchez, Juan J. Cabrera, Andrew J. Gates, Eulogio J. Bedmar, David J. Richardson and Maréa J. Delgado **184–188**

The role of effector molecules in signal transduction by P_{II} proteins
Martha Radchenko and Mike Merrick **189–194**

The catalytic mechanism of *Pseudomonas aeruginosa* cd_1 nitrite reductase
Serena Rinaldo, Giorgio Giardina, Nicoletta Castiglione, Valentina Stelitano and Francesca Cutruzzolà **195–200**

Electron transfer and half-reactivity in nitrogenase
Thomas A. Clarke, Shirley Fairhurst, David J. Lowe, Nicholas J. Watmough and Robert R. Eady **201–206**

Selected oral communications

Denitrification regulatory phenotype, a new term for the characterization of denitrifying bacteria
Linda Bergaust, Lars R. Bakken and Åsa Frostegård **207–212**

Nitrosative stress in *Escherichia coli*: reduction of nitric oxide
Claire E. Vine and Jeffrey A. Cole **213–215**

Gene expression study of the flavodi-iron proteins from the cyanobacterium *Synechocystis* sp. PCC6803
Vera L. Gonçalves, Lígia M. Saraiva and Miguel Teixeira **216–218**

Nitric oxide and nitrosative stress tolerance in yeast
Anna Tillmann, Neil A.R. Gow and Alistair J.P. Brown **219–223**

An HcpR homologue from <i>Desulfovibrio desulfuricans</i> and its possible role in nitrate reduction and nitrosative stress Ian T. Cadby, Steve J.W. Busby and Jeffrey A. Cole	224–229
Nitrate and (per)chlorate reduction pathways in (per)chlorate-reducing bacteria Margreet J. Oosterkamp, Farrakh Mehboob, Gosse Schraa, Caroline M. Plugge and Alfons J.M. Stams	230–235
Electrocatalytic reduction of nitrate and selenate by NapAB Andrew J. Gates, Clive S. Butler, David J. Richardson and Julea N. Butt	236–242
A new intra-aerobic metabolism in the nitrite-dependent anaerobic methane-oxidizing bacterium <i>Candidatus 'Methylospirillum oxyfera'</i> Ming L. Wu, Katharina F. Ettwig, Mike S.M. Jetten, Marc Strous, Jan T. Keltjens and Laura van Niftrik	243–248
Partial and complete denitrification in <i>Thermus thermophilus</i> : lessons from genome drafts Carlos Bricio, Laura Alvarez, Manuel J. Gómez and José Berenguer	249–253
Denitrification in Gram-positive bacteria: an underexplored trait Ines Verbaendert, Paul De Vos, Nico Boon and Kim Heylen	254–258
<i>In vitro</i> proof of direct regulation of glutamine synthetase by GlnK proteins in the extreme halophilic archaeon <i>Haloferax mediterranei</i> Laia Pedro-Roig, Mónica Camacho and María José Bonete	259–262
Molecular interactions between multihaem cytochromes: probing the protein–protein interactions between pentahaem cytochromes of a nitrite reductase complex Colin Lockwood, Julea N. Butt, Thomas A. Clarke and David J. Richardson	263–268
Bacterial cyanide degradation is under review: <i>Pseudomonas pseudoalcaligenes</i> CECT5344, a case of an alkaliphilic cyanotroph Victor M. Luque-Almagro, Rafael Blasco, Manuel Martínez-Luque, Conrado Moreno-Vivián, Francisco Castillo and M. Dolores Roldán	269–274
Plant influence on nitrification Marcin W. Skiba, Timothy S. George, Elizabeth M. Baggs and Tim J. Daniell	275–278
Advances in ¹⁵ N-tracing experiments: new labelling and data analysis approaches Tobias Rütting, Dries Huygens, Jeroen Staelens, Christoph Müller and Pascal Boeckx	279–283
Emerging complexity in the denitrification regulatory network of <i>Bradyrhizobium japonicum</i> María J. Torres, Emilio Bueno, Socorro Mesa, Eulogio J. Bedmar and María J. Delgado	284–288
Transcriptional regulation by the dedicated nitric oxide sensor, NorR: a route towards NO detoxification Matthew Bush, Tamaswati Ghosh, Nicholas Tucker, Xiaodong Zhang and Ray Dixon	289–293
The <i>Pseudomonas aeruginosa</i> DNR transcription factor: light and shade of nitric oxide-sensing mechanisms Giorgio Giardina, Nicoletta Castiglione, Manuela Caruso, Francesca Cutruzzolà and Serena Rinaldo	294–298

Respiratory nitrogen metabolism and nitrosative stress defence in ϵ -proteobacteria: the role of NssR-type transcription regulators Melanie Kern, Christine Winkler and Jörg Simon	299–302
Proteins and protein complexes involved in the biochemical reactions of anaerobic ammonium-oxidizing bacteria Naomi M. de Almeida, Wouter J. Maalcke, Jan T. Keltjens, Mike S.M. Jetten and Boran Kartal	303–308
Enzymology under global change: organic nitrogen turnover in alpine and sub-Arctic soils James T. Weedon, Rien Aerts, George A. Kowalchuk and Peter M. van Bodegom	309–314
Bioturbation: impact on the marine nitrogen cycle Bonnie Laverock, Jack A. Gilbert, Karen Tait, A. Mark Osborn and Steve Widdicombe	315–320
Four PCR primers necessary for the detection of periplasmic nitrate reductase genes in all groups of Proteobacteria and in environmental DNA Tobias Klatte, Laura Evans, Rebekah N. Whitehead and Jeffrey A. Cole	321–326

Independent Meeting

Glycomarkers for Disease

Conference Centre of the Polish National Academy of Science, Wierzba, Poland, 12–16 September 2010

Edited by Tony Merry (Manchester, U.K.).

Discovering new clinical markers in the field of glycomics Jayne E. Telford, Margaret A. Doherty, Tharmala Tharmalingam and Pauline M. Rudd	327–330
Glycoconjugate markers of joint diseases Janusz Popko, Sławomir Olszewski, Tomasz Guszczyn, Krzysztof Zwierz and Sławomir Pancewicz	331–335
Glycomarkers for muscular dystrophy Jane E. Hewitt	336–339
Carbohydrate markers of pancreatic cancer Sławomir Dariusz Szajda, Napoleon Waszkiewicz, Sylwia Chojnowska and Krzysztof Zwierz	340–343
Terminal monosaccharide expression on amniotic glycoproteins as biomarkers of fetus maturity Magdalena Orczyk-Pawiłowicz and Iwona Kątnik-Prastowska	344–348
Glycosylation changes as important factors for the susceptibility to urinary tract infection Joemar Taganna, Arjen R. de Boer, Manfred Wuhrer and Julie Bouckaert	349–354
Expression and potential biological role of α (1,2)fucosylated glycotopes on amniotic and seminal fibronectins Iwona Kątnik-Prastowska and Magdalena Orczyk-Pawiłowicz	355–359

Glycomarkers in parasitic infections and allergy Karin Hoffmann-Sommergruber, Katharina Paschinger and Iain B.H. Wilson	360–364
Glycoconjugates in the detection of alcohol abuse Napoleon Waszkiewicz, Sławomir Dariusz Szajda, Alina Kępka, Agata Szulc and Krzysztof Zwierz	365–369
Glycans in melanoma screening. Part 1. The role of β 1,6-branched N-linked oligosaccharides in melanoma Małgorzata Przybyło and Anna Lityńska	370–373
Glycans in melanoma screening. Part 2. Towards the understanding of integrin N-glycosylation in melanoma Paweł Link-Lenczowski and Anna Lityńska	374–377
The cellular microenvironment and cell adhesion: a role for O-glycosylation Liping Zhang and Kelly G. Ten Hagen	378–382
Glycosaminoglycans as regulators of stem cell differentiation Raymond A.A. Smith, Kate Meade, Claire E. Pickford, Rebecca J. Holley and Catherine L.R. Merry	383–387
Highly glycosylated tumour antigens: interactions with the immune system Eirikur Saeland and Yvette van Kooyk	388–392
Urinary glycan markers for disease Dominic S. Alonzi, Ying-Hsiu Su and Terry D. Butters	393–398
Glycobiomarkers by glycoproteomics and glycan profiling (glycomics): emergence of functionality Hans-Joachim Gabius	399–405
Exoglycosidase markers of diseases Sylwia Chojnowska, Alina Kępka, Sławomir Dariusz Szajda, Napoleon Waszkiewicz, Marcin Bierć and Krzysztof Zwierz	406–409
