Colworth Medal Lecture

Superfamily I helicases as modular components of DNA-processing machines

Mark S. Dillingham

413–423

IAS Medal Lecture

Making biochemistry count: life among the amino acid dehydrogenases

Paul C. Engel

425–429

Biochemical Society Focused Meeting

mTOR Signalling in Health and Disease

Charles Darwin House, London, U.K., 11–12 November 2010

Edited by Ivan Gout (University College London, U.K.), Christopher Proud (Southampton, U.K.) and Michael Seckl (Imperial College London, U.K.).

mTOR Signalling in Health and Disease

Christopher G. Proud

431–436

A brief history of TOR

Robbie Loewith

437–442

Signalling by amino acid nutrients

Lijun Yan and Richard F. Lamb

443–445

Differing effects of rapamycin and mTOR kinase inhibitors on protein synthesis

Yilin Huo, Valentina Iadevaia and Christopher G. Proud

446–450

Blocking the mTOR pathway: a drug discovery perspective

Carlos Garcia-Echeverria

451–455

Benefits of mTOR kinase targeting in oncology: pre-clinical evidence with AZD8055

Gayle Marshall, Zoe Howard, Jonathan Dry, Sarah Fenton, Dan Heathcote, Neil Gray, Heather Keen, Armelle Logie, Sarah Holt, Paul Smith and Sylvie M. Guichard

456–459

Selected oral communications

- A longer and healthier life with TOR down-regulation: genetics and drugs
Ivana Bjedov and Linda Partridge 460–465
- The tuberous sclerosis complex: balancing proliferation and survival
Romana Tomasoni and Anna Mondino 466–471
- Occupational hazards: allosteric regulation of protein kinases through the nucleotide-binding pocket
Angus J.M. Cameron 472–476
- Regulation of plant growth and metabolism by the TOR kinase
Thomas Dobrenel, Chloé Marchive, Rodnay Sormani, Manon Moreau, Milena Mozzo, Marie-Hélène Montané, Benoit Menand, Christophe Robaglia and Christian Meyer 477–481
- A critical role for non-coding RNA *GAS5* in growth arrest and rapamycin inhibition in human T-lymphocytes
Gwyn T. Williams, Mirna Mourtada-Maarabouni and Farzin Farzaneh 482–486
- MAF1: a new target of mTORC1
Annemieke A. Michels 487–491
- ATP-competitive inhibitors of mTOR: new perspectives in the treatment of renal cell carcinoma
Didier Roulin, Nicolas Demartines and Olivier Dormond 492–494
- Regulation of the SREBP transcription factors by mTORC1
Caroline A. Lewis, Beatrice Griffiths, Claudio R. Santos, Mario Pende and Almut Schulze 495–499

Independent Meetings

4th European Conference on Tetraspanins

University of Birmingham, Birmingham, U.K., 8–10 September 2010

Edited by Mike Tomlinson (Birmingham, U.K.).

- The complexity of tetraspanins
Eric Rubinstein 501–505
- Tetraspanins in cellular immunity
Eleanor Livingston Jones, Maria C. Demaria and Mark D. Wright 506–511
- Tetraspanins in the humoral immune response
Annemiek B. van Spriel 512–517
- Tetraspanin microdomains: fine-tuning platelet function
Elizabeth J. Haining, Jing Yang and Michael G. Tomlinson 518–523
- The role of tetraspanins in fusion
Marzieh Fanaei, Peter N. Monk and Lynda J. Partridge 524–528
- Tetraspanin functions during HIV-1 and influenza virus replication
Markus Thali 529–531

Hepatitis C virus entry and the tetraspanin CD81 Michelle J. Farquhar, Helen J. Harris and Jane A. McKeating	532–536
Structural characterization of CD81–Claudin-1 hepatitis C virus receptor complexes Nicklas Bonander, Mohammed Jamshad, Ke Hu, Michelle J. Farquhar, Zania Stamataki, Peter Balfe, Jane A. McKeating and Roslyn M. Bill	537–540
Membrane proteases and tetraspanins María Yáñez-Mó, Francisco Sánchez-Madrid and Carlos Cabañas	541–546
Tetraspanin protein contributions to cancer Hong-Xing Wang, Qinglin Li, Chandan Sharma, Konstantin Knoblich and Martin E. Hemler	547–552
Tetraspanin CD151 as a target for antibody-based cancer immunotherapy Jean-François Haeuw, Liliane Goetsch, Christian Bailly and Nathalie Corvaia	553–558
Exosome target cell selection and the importance of exosomal tetraspanins: a hypothesis Sanyukta Rana and Margot Zöller	559–562
Tetraspanin CD9 in cell migration Dale Powner, Petra M. Kopp, Susan J. Monkley, David R. Critchley and Fedor Berditchevski	563–567
The effect of cell–ECM adhesion on signalling via the ErbB family of growth factor receptors Xanthippi Alexi, Fedor Berditchevski and Elena Odintsova	568–573
<hr/>	
NACON VIII: 8th International Meeting on Recognition Studies in Nucleic Acids	
The Edge, University of Sheffield, Sheffield, U.K., 12–16 September 2010	
Mike Blackburn, Mark Dickman, Jane Grasby, David Hornby, Chris Hunter, John Rafferty, Jim Thomas, David Williams and Nick Williams (Sheffield, U.K.).	
<hr/>	
A brief review of DNA and RNA chemical synthesis Marvin H. Caruthers	575–580
COMBEX: COMputational BRidge to EXperiments Richard J. Roberts	581–583
The reaction mechanism of FokI excludes the possibility of targeting zinc finger nucleases to unique DNA sites Stephen E. Halford, Lucy E. Catto, Christian Pernstich, David A. Rusling and Kelly L. Sanders	584–588
Translocation, switching and gating: potential roles for ATP in long-range communication on DNA by Type III restriction endonucleases Mark D. Szczelkun	589–594
DNA polymerase activity at the single-molecule level Joshua P. Gill, Jun Wang and David P. Millar	595–599
Cell-cycle-specific activators of the Mec1/ATR checkpoint kinase Vasundhara M. Navadgi-Patil and Peter M. Burgers	600–605

Helicases that underpin replication of protein-bound DNA in <i>Escherichia coli</i> Peter McGlynn	606–610
Single-molecule FRET reveals nucleotide-driven conformational changes in molecular machines and their link to RNA unwinding and DNA supercoiling Dagmar Klostermeier	611–616
Intermediates in serine recombinase-mediated site-specific recombination W. Marshall Stark, Martin R. Boocock, Femi J. Oloruniji and Sally-J. Rowland	617–622
Sequence-specific covalent labelling of DNA Anna Gottfried and Elmar Weinhold	623–628
Formation of stable DNA triplexes Keith R. Fox and Tom Brown	629–634
DNA acting like RNA Robert V. Brown and Laurence H. Hurley	635–640
Catalysis by the nucleolytic ribozymes David M.J. Lilley	641–646
Interactions of the c-di-GMP riboswitch with its second messenger ligand Kathryn D. Smith and Scott A. Strobel	647–651
Identification of novel ligands for thiamine pyrophosphate (TPP) riboswitches Elena Cressina, Lihong Chen, Michael Moulin, Finian J. Leeper, Chris Abell and Alison G. Smith	652–657
The ribosome as a molecular machine: the mechanism of tRNA–mRNA movement in translocation Marina V. Rodnina and Wolfgang Wintermeyer	658–662

Section Meeting

Signalling and Human Disease

Hilton Hotel, Belfast, Northern Ireland, U.K., 25–26 November 2010

Edited by Konstantin Panov (Queen’s University Belfast, U.K.) and Paul Thompson (University of Ulster, Coleraine, U.K.).

The emerging role of FK506-binding proteins as cancer biomarkers: a focus on FKBPL Hayley D. McKeen, Donal J. Brennan, Shauna Hegarty, Fiona Lanigan, Karin Jirstrom, Christopher Byrne, Anita Yakkundi, Helen O. McCarthy, William M. Gallagher and Tracy Robson	663–668
Inflammasome activation: from inflammatory disease to infection Aisling Dunne	669–673
Controlling embryonic stem cell proliferation and pluripotency: the role of PI3K- and GSK-3-dependent signalling Melanie J. Welham, Emmajayne Kingham, Yolanda Sanchez-Ripoll, Benjamin Kumpfmüller, Michael Storm and Heather Bone	674–678

Viruses and the human DEAD-box helicase DDX3: inhibition or exploitation? Martina Schröder	679–683
Tribbles: ‘puzzling’ regulators of cell signalling Endre Kiss-Toth	684–687
Inflammation: a role for NR4A orphan nuclear receptors? Jason P. McMorrow and Evelyn P. Murphy	688–693
The interaction of IQGAPs with calmodulin-like proteins Sevel Pathmanathan, Elaine Hamilton, Erwan Atcheson and David J. Timson	694–699
Correction	701
