Morton Lecture

Phosphoinositides and the regulation of tubular-based endosomal sorting

Peter J. Cullen

839–850

Biochemical Society Focused Meetings

Models of Dementia: the Good, the Bad and the Future

Robinson College, Cambridge, U.K., 15–17 December 2010

Edited by Stuart Allan (Manchester, U.K.), Christian Hölscher (University of Ulster, Coleraine, U.K.), Karen Horsburgh (Edinburgh, U.K.), Simon Lovestone (King's College London, U.K.) and Calum Sutherland (Dundee, U.K.).

Models of Dementia: an introductory overview

Lindsay Graham and Calum Sutherland

851–856

Intraneuronal A β as a trigger for neuron loss: can this be translated into human pathology?

Thomas A. Bayer and Oliver Wirths

857–861

A BACwards glance at neurodegeneration: molecular insights into disease from *LRRK2*, *SNCA* and *MAPT* BAC-transgenic mice

Sara J. Johnson and Richard Wade-Martins

862–867

Mitochondrial β -amyloid in Alzheimer's disease

Eva Borger, Laura Aitken, Kirsty E.A. Muirhead, Zoe E. Allen, James A. Ainge, Stuart J. Conway and Frank J. Gunn-Moore

868–873

FDG-PET imaging, EEG and sleep phenotypes as translational biomarkers for research in Alzheimer's disease

Bettina Platt, Andy Welch and Gernot Riedel

874–880

Axon–glial disruption: the link between vascular disease and Alzheimer's disease?

Karen Horsburgh, Michell M. Reimer, Philip Holland, Guiquan Chen, Gillian Scullion and Jill H. Fowler

881–885

Assessing the contribution of inflammation in models of Alzheimer's disease

Hannah Johnston, Herve Boutin and Stuart M. Allan

886–890

Diabetes as a risk factor for Alzheimer's disease: insulin signalling impairment in the brain as an alternative model of Alzheimer's disease

Christian Hölscher

891–897

Systemic inflammation and Alzheimer's disease Clive Holmes and Joe Butchart	898-901
Hippocampal synaptic activity, pattern separation and episodic-like memory: implications for mouse models of Alzheimer's disease pathology Alice Palmer and Mark Good	902-909
Alzheimer's disease genetics: lessons to improve disease modelling Rita J. Guerreiro and John Hardy	910-916
Can neurodegeneration be separated from neuropathological hallmarks of chronic idiopathic human neurodegenerative disease? A perspective from modelling! Simon Paine, James Lowe, Lynn Bedford and R. John Mayer	917-919
The amyloid cascade hypothesis has misled the pharmaceutical industry	920-923
Roles of apolipoprotein E4 (ApoE4) in the pathogenesis of Alzheimer's disease: lessons from ApoE mouse models Yadong Huang	924-932
Selected oral communications	
Modelling early responses to neurodegenerative mutations in mice Jonathan Gilley, Robert Adalbert and Michael P. Coleman	933-938
'Alzheimer-like' pathology in a murine model of arterial hypertension Daniela Carnevale and Giuseppe Lembo	939-944
Systemic inflammation and delirium: important co-factors in the progression of dementia Colm Cunningham	945-953
The role of mutant TAR DNA-binding protein 43 in amyotrophic lateral sclerosis and frontotemporal lobar degeneration Jonathan Janssens, Gernot Kleinberger, Hans Wils and Christine Van Broeckhoven	954-959

Proteins with a BPI/LBP/PLUNC-Like Domain: Revisiting the Old and Characterizing the New

New Business School, University of Nottingham, U.K., 5-7 January 2011

Edited by Colin Bingle (Sheffield, U.K.) and Sven-Ulrik Gorr (University of Minnesota School of Dentistry, Minneapolis, MN, U.S.A.).

Distant cousins: genomic and sequence diversity within the BPI fold-containing (BPIF)/PLUNC protein family Colin D. Bingle, Lynne Bingle and C. Jeremy Craven	961-965
An expanded family of proteins with BPI/LBP/PLUNC-like domains in trypanosome parasites: an association with pathogenicity? Eva Gluenz, Amy R. Barker and Keith Gull	966-970
Ovocalyxin-36 and other LBP/BPI/PLUNC-like proteins as molecular actors of the mechanisms of the avian egg natural defences Joël Gautron, Sophie Réhault-Godbert, Géraldine Pascal, Yves Nys and Maxwell T. Hincke	971-976

Systematic nomenclature for the PLUNC/PSP/BSP30/SMGB proteins as a subfamily of the BPI fold-containing superfamily Colin D. Bingle, Ruth L. Seal and C. Jeremy Craven		977–983
Plasma PLTP (phospholipid-transfer protein): an emerging role in ‘reverse lipopolysaccharide transport’ and innate immunity Thomas Gautier and Laurent Lagrost		984–988
Old and new findings on lipopolysaccharide-binding protein: a soluble pattern-recognition molecule Ralf R. Schumann		989–993
Deficient expression of bactericidal/permeability-increasing protein in immunocompromised hosts: translational potential of replacement therapy Christine D. Palmer, Eva C. Guinan and Ofer Levy		994–999
Structural and biophysical insight into cholesteryl ester-transfer protein Justin Hall and Xiayang Qiu		1000–1005
The BPI-like/PLUNC family proteins in cattle Thomas T. Wheeler, Brendan J. Haigh, Marita K. Broadhurst, Kylie A. Hood and Nauman J. Maqbool		1006–1011
PLUNC: a multifunctional surfactant of the airways Jennifer Bartlett, Lokesh Gakhar, Jon Penterman, Pradeep Singh, Rama K. Mallampalli, Edith Porter and Paul B. McCray, Jr		1012–1016
Latherin and other biocompatible surfactant proteins Malcolm W. Kennedy		1017–1022
Distribution of human PLUNC/BPI fold-containing (BPIF) proteins Lynne Bingle and Colin D. Bingle		1023–1027
Dual host-defence functions of SPLUNC2/PSP and synthetic peptides derived from the protein Sven-Ulrik Gorr, Mahsa Abdolhosseini, Anuradha Shelar and Julie Sotsky		1028–1032
Selected oral communications		
Bioinformatics of the TULIP domain superfamily Klaus O. Kopec, Vikram Alva and Andrei N. Lupas		1033–1038
LBP/BPI proteins and their relatives: conservation over evolution and roles in mutualism Benjamin C. Krasity, Joshua V. Troll, Jerrold P. Weiss and Margaret J. McFall-Ngai		1039–1044
The bactericidal/permeability-increasing protein (BPI) in the innate defence of the lower airways Alexander Holweg, Markus Schnare and André Gessner		1045–1050
Functional roles of SPLUNC1 in the innate immune response against Gram-negative bacteria Y. Peter Di		1051–1055

The Molecular Biology of Inflammatory Bowel Diseases

University of Durham, Durham, U.K., 20–22 March 2011

Edited by **Tony Corfield (Bristol, U.K.), Chris Probert (Bristol, U.K.) and Heather M. Wallace (Aberdeen, U.K.)**

The Molecular Biology of Inflammatory Bowel Diseases Anthony P. Corfield, Heather M. Wallace and Chris S.J. Probert	1057–1060
The opposing roles of IL-21 and TGF β 1 in chronic inflammatory bowel disease Thomas T. MacDonald, Iona Bell and Giovanni Monteleone	1061–1066
Bacteria in the pathogenesis of inflammatory bowel disease Paul Flanagan, Barry J. Campbell and Jonathan M. Rhodes	1067–1072
Nutritional influences on the gut microbiota and the consequences for gastrointestinal health Karen P. Scott, Sylvia H. Duncan, Petra Louis and Harry J. Flint	1073–1078
Role of faecal gas analysis for the diagnosis of IBD Chris S.J. Probert	1079–1080
Intestinal secretory cell ER stress and inflammation Michael A. McGuckin, Rajaraman D. Eri, Indrajit Das, Rohan Lourie and Timothy H. Florin	1081–1085
Selected oral communications	
Genetic relationships between <i>A20/TNFAIP3</i> , chronic inflammation and autoimmune disease Lars Vereecke, Rudi Beyaert and Geert van Loo	1086–1091
Histone deacetylase inhibitors and their potential role in inflammatory bowel diseases Alexander J.P. Edwards and Sylvia L.F. Pender	1092–1095
Intestinal inflammation and the enterocyte transportome Isabel Romero-Calvo, Cristina Mascaraque, Antonio Zarzuelo, María Dolores Suárez, Olga Martínez-Augustin and Fermín Sánchez de Medina	1096–1101
Role of oxidative stress and antioxidant enzymes in Crohn's disease Marisa Iborra, Inés Moret, Francisco Rausell, Guillermo Bastida, Mariam Aguas, Elena Cerrillo, Pilar Nos and Belén Beltrán	1102–1106
Impeded protein folding and function in active inflammatory bowel disease J. Jasper Deuring, Maikel P. Peppelenbosch, Ernst J. Kuipers, C. Janneke van der Woude and Colin de Haar	1107–1111
