Biochemical Society Focused Meetings

Cellular Cytoskeletal Motor Proteins

Wellcome Trust Genome Campus, Hinxton, Cambridge, U.K., 30 March–1 April 2011

Edited by Folma Buss (Cambridge, U.K.) and John Kendrick-Jones (MRC Laboratory of Molecular Biology, Cambridge, U.K.).

Myosin motor proteins are involved in the final stages of the secretory pathways Lisa M. Bond, Hemma Brandstaetter, James R. Sellers, John Kendrick-Jones and Folma Buss	1115–1119
Kinesin motors and primary cilia Kristen J. Verhey, John Dishinger and Hooi Lynn Kee	1120–1125
Bidirectional intracellular transport: utility and mechanism Amber L. Jolly and Vladimir I. Gelfand	1126–1130
Distinct and redundant roles of the non-muscle myosin II isoforms and functional domains Aibing Wang, Xuefei Ma, Mary Anne Conti and Robert S. Adelstein	1131–1135
Regulation of myosin 5a and myosin 7a Verl B. Siththanandan and James R. Sellers	1136–1141
Coiled coils and SAH domains in cytoskeletal molecular motors Michelle Peckham	1142–1148
Mitotic motors and chromosome segregation: the mechanism of anaphase B Ingrid Brust-Mascher and Jonathan M. Scholey	1149–1153
Chromokinesins: localization-dependent functions and regulation during cell division David Vanneste, Vanessa Ferreira and Isabelle Vernos	1154–1160
Messengers, motors and mysteries: sorting of eukaryotic mRNAs by cytoskeletal transport Simon L. Bullock	1161–1165
Cellular functions of class IX myosins in epithelia and immune cells Martin Bähler, Kerstin Elfrink, Peter J. Hanley, Sabine Thelen and Yan Xu	1166–1168
Cytoplasmic dynein Victoria J. Allan	1169–1178
The role of motor proteins in endosomal sorting Sylvie D. Hunt and David J. Stephens	1179–1184

Selected oral communications

- Function and regulation of *Saccharomyces cerevisiae* myosins-I in endocytic budding
Jonathan Giblin, Isabel María Fernández-Golbano, Fatima-Zahra Idrissi and María Isabel Geli 1185–1190
- Melanosomes on the move: a model to understand organelle dynamics
Alistair N. Hume and Miguel C. Seabra 1191–1196
- Microtubule-based motor-mediated mRNA localization in *Drosophila* oocytes and embryos
Imre Gaspar 1197–1201
- Rab GTPases and microtubule motors
Conor P. Horgan and Mary W. McCaffrey 1202–1206
- The many different cellular functions of MYO7A in the retina
David S. Williams and Vanda S. Lopes 1207–1210
- Co-operative transport by molecular motors
Florian Berger, Corina Keller, Melanie J.I. Müller, Stefan Klumpp and Reinhard Lipowsky 1211–1215

Analysis of Free Radicals, Radical Modifications and Redox Signalling

Aston University, Birmingham, U.K., 18–19 April 2011

Edited by Helen Griffiths (Aston University, U.K.), Corinne Spickett (Aston University, U.K.) and Paul Winyard (Exeter, U.K.).

- Analysis of radicals and radical reaction products in cell signalling and biomolecular damage: the long hard road to gold-standard measures
Paul G. Winyard, Corinne M. Spickett and Helen R. Griffiths 1217–1220
- Oxidative chemistry of fluorescent dyes: implications in the detection of reactive oxygen and nitrogen species
Balaraman Kalyanaraman 1221–1225
- Measurement and meaning of markers of reactive species of oxygen, nitrogen and sulfur in healthy human subjects and patients with inflammatory joint disease
Paul G. Winyard, Brent Ryan, Paul Eggleton, Ahuva Nissim, Emma Taylor, Maria Letizia Lo Faro, Torsten Burkholz, Katalin E. Szabó-Taylor, Bridget Fox, Nick Viner, Richard C. Haigh, Nigel Benjamin, Andrew M. Jones and Matthew Whiteman 1226–1232
- Analysis of oxidized and chlorinated lipids by mass spectrometry and relevance to signalling
Corinne M. Spickett and Norsyahida Mohd Fauzi 1233–1239
- Lipidomics of polyunsaturated-fatty-acid-derived oxygenated metabolites
Karen A. Massey and Anna Nicolaou 1240–1246
- Redox signalling via the cellular thiolstat
Claus Jacob 1247–1253
- Cysteine residues as catalysts for covalent peptide and protein modification: a role for thiyl radicals?
Christian Schöneich 1254–1259

Contemporary techniques for detecting and identifying proteins susceptible to reversible thiol oxidation Joseph R. Burgoyne and Philip Eaton	1260–1267
Thiol regulation of pro-inflammatory cytokines and innate immunity: protein S-thiolation as a novel molecular mechanism Lucia Coppo and Pietro Ghezzi	1268–1272
Free radicals and redox signalling in T-cells during chronic inflammation and ageing Helen R. Griffiths, Christopher R. Dunston, Stuart J. Bennett, Melissa M. Grant, Darren C. Phillips and George D. Kitas	1273–1278
Mechanisms and consequences of oxidative damage to extracellular matrix Eleanor C. Kennett, Christine Y. Chuang, Georg Degendorfer, John M. Whitelock and Michael J. Davies	1279–1287
Selected oral communications	
Electrochemical and optical sensing of reactive oxygen species: pathway to an integrated intracellular and extracellular measurement platform Philip Manning and Calum J. McNeil	1288–1292
Spectroscopic analysis of protein Fe–NO complexes César Bellota-Antón, John Munnoch, Kirsty Robb, Katrin Adamczyk, Marco Candelaresi, Anthony W. Parker, Ray Dixon, Matthew I. Hutchings, Neil T. Hunt and Nicholas P. Tucker	1293–1298
Measurement of exercise-induced oxidative stress in lymphocytes James E. Turner, Jos A. Bosch and Sarah Aldred	1299–1304
Mitochondrial ('mild') uncoupling and ROS production: physiologically relevant or not? Irina G. Shabalina and Jan Nedergaard	1305–1309

Joint Sino–U.K. Protein Symposium: a Meeting to Celebrate the Centenary of the Biochemical Society

Shanghai University, Shanghai, China, 5–7 May 2011

Edited by Zengyi Chang (Peking University, China) and Neil Isaacs (Glasgow, U.K.).

The 2011 Joint Sino–U.K. Protein Symposium Zengyi Chang and Neil Isaacs	1311–1312
Biochemical contacts and collaborations between China and the U.K. since 1911 Guy G. Dodson	1313–1322
Insulin research in China and the U.K. Youshang Zhang	1323–1326
Probing the druggability of protein–protein interactions: targeting the Notch1 receptor ankyrin domain using a fragment-based approach Noha Abdel-Rahman, Alfonso Martinez-Arias and Tom L. Blundell	1327–1333
Glycosylation of mouse and human immune cells: insights emerging from N-glycomics analyses Aristotelis Antonopoulos, Simon J. North, Stuart M. Haslam and Anne Dell	1334–1340

Combining modelling and mutagenesis studies of synaptic vesicle protein 2A to identify a series of residues involved in racetam binding Jiye Shi, Dina Anderson, Berkley A. Lynch, Jean-Gabriel Castaigne, Patrik Foerch and Florence Lebon	1341–1347
Application of proteomics in the mechanistic study of traditional Chinese medicine Xuan Liu and De-An Guo	1348–1352
Towards a structural understanding of drug and peptide transport within the proton-dependent oligopeptide transporter (POT) family Simon Newstead	1353–1358
The yeast prion protein Ure2: insights into the mechanism of amyloid formation Li-Jun Chen, Elizabeth B. Sawyer and Sarah Perrett	1359–1364
Collation and data-mining of literature bioactivity data for drug discovery Louisa J. Bellis, Ruth Akhtar, Bissan Al-Lazikani, Francis Atkinson, A. Patricia Bento, Jon Chambers, Mark Davies, Anna Gaulton, Anne Hersey, Kazuyoshi Ikeda, Felix A. Krüger, Yvonne Light, Shaun McGlinchey, Rita Santos, Benjamin Stauch and John P. Overington	1365–1370
Recent development of 3C and 3CL protease inhibitors for anti-coronavirus and anti-picornavirus drug discovery R. Ramajayam, Kian-Pin Tan and Po-Huang Liang	1371–1375
Arginine deiminase modulates endothelial tip cells via excessive synthesis of reactive oxygen species Wei Zhuo, Xiaomin Song, Hao Zhou and Yongzhang Luo	1376–1381
Towards structure-based protein drug design Changsheng Zhang and Luhua Lai	1382–1386
Selected oral communication	
Non-homologous end-joining partners in a helical dance: structural studies of XLF-XRCC4 interactions Qian Wu, Takashi Ochi, Dijana Matak-Vinkovic, Carol V. Robinson, Dimitri Y. Chirgadze and Tom L. Blundell	1387–1392

Independent Meetings

Structure and Function of Whey Acidic Protein (WAP) Four-Disulfide Core (WFDC) Proteins

Robinson College, Cambridge, U.K., 12–14 April 2011

Edited by Colin Bingle (Sheffield, U.K.), Judith Hall (Newcastle, U.K.), Cliff Taggart (Queen's University Belfast, U.K.) and Annapurna Vyakarnam (King's College London, U.K.).

Towards defining the complement of mammalian WFDC-domain-containing proteins Colin D. Bingle	1393–1397
Genes encoding WFDC- and Kunitz-type protease inhibitor domains: are they related? Åke Lundwall and Adam Clauss	1398–1402

Phylogeny of whey acidic protein (WAP) four-disulfide core proteins and their role in lower vertebrates and invertebrates Valerie J. Smith	1403–1408
WAP domain proteins as modulators of mucosal immunity Thomas S. Wilkinson, Ali Roghanian, Alexander John Simpson and Jean-Michel Sallenave	1409–1415
Biological functions of the WAP domain-containing multidomain proteins WFIKKN1 and WFIKKN2 Katalin Kondás, György Szláma, Alinda Nagy, Mária Trexler and László Patthy	1416–1420
SLPI and inflammatory lung disease in females Paul J. McKiernan, Noel G. McElvaney and Catherine M. Greene	1421–1426
War and peace between WAP and HIV: role of SLPI, trappin-2, elafin and ps20 in susceptibility to HIV infection Anna G. Drannik, Bethany M. Henrick and Kenneth L. Rosenthal	1427–1432
Immunotherapy of prostate cancer: identification of new treatments and targets for therapy, and role of WAP domain-containing proteins Christine Galustian, Annapurna Vyakarnam, Oussama Elhage, Oliver Hickman, Prokar Dasgupta and Richard A. Smith	1433–1436
SLPI and elafin: multifunctional antiproteases of the WFDC family Aaron Scott, Sinéad Weldon and Clifford C. Taggart	1437–1440
SLPI and trappin-2 as therapeutic agents to target airway serine proteases in inflammatory lung diseases: current and future directions Marie-Louise Zani, Annabelle Tanga, Ahlame Saidi, Hélène Serrano, Sandrine Dallet-Choisy, Kévin Baranger and Thierry Moreau	1441–1446
Functional studies of eppin Michael G. O’Rand, Esther E. Widgren, Katherine G. Hamil, Erick J. Silva and Richard T. Richardson	1447–1449
Therapeutic potential of human elafin Lee Shaw and Oliver Wiedow	1450–1454
The <i>WFDC1</i> gene: role in wound response and tissue homeostasis Steven J. Ressler and David R. Rowley	1455–1459

8th International Meeting on Yeast Apoptosis

Keynes College, University of Kent, Canterbury, U.K., 2–6 May 2011

Edited by Paula Ludovico (University of Minho, Braga, Portugal).

mRNA stability and control of cell proliferation Cristina Mazzone and Claudio Falcone	1461–1465
Yeast chronological lifespan and proteotoxic stress: is autophagy good or bad? Belém Sampaio-Marques, Carolina Felgueiras, Alexandra Silva, Fernando Rodrigues and Paula Ludovico	1466–1470

Aging and longevity of yeast colony populations: metabolic adaptation and differentiation Libuše Váchová and Zdena Palková	1471–1475
Aggresome formation and segregation of inclusions influence toxicity of α -synuclein and synphilin-1 in yeast Erwin Swinnen, Sabrina Büttner, Tiago F. Outeiro, Marie-Christine Galas, Frank Madeo, Joris Winderickx and Vanessa Franssens	1476–1481
Using yeast models to probe the molecular basis of amyotrophic lateral sclerosis Emma L. Bastow, Campbell W. Gourlay and Mick F. Tuite	1482–1487
Mitochondrial quality control in aging and lifespan control of the fungal aging model <i>Podospora anserina</i> Heinz D. Osiewacz	1488–1492
Apoptosis-like programmed cell death in the grey mould fungus <i>Botrytis cinerea</i> : genes and their role in pathogenicity Neta Shlezinger, Adi Doron and Amir Sharon	1493–1498
Nma111p, the pro-apoptotic HtrA-like nuclear serine protease in <i>Saccharomyces cerevisiae</i> : a short survey Birthe Fahrenkrog	1499–1501
Proteases and caspase-like activity in the yeast <i>Saccharomyces cerevisiae</i> Derek Wilkinson and Mark Ramsdale	1502–1508
Mitochondrial quality control by the ubiquitin–proteasome system Eric B. Taylor and Jared Rutter	1509–1513
Mitophagy, mitochondrial dynamics and the general stress response in yeast Matthias Müller and Andreas S. Reichert	1514–1519
Mitochondrial dynamics in yeast cell death and aging Ralf J. Braun and Benedikt Westermann	1520–1526
Apoptosis-inducing antifungal peptides and proteins Katrijn De Brucker, Bruno P.A. Cammue and Karin Thevissen	1527–1532
Vacuole–mitochondrial cross-talk during apoptosis in yeast: a model for understanding lysosome–mitochondria-mediated apoptosis in mammals Maria João Sousa, Flávia Azevedo, Ana Pedras, Carolina Marques, Olga P. Coutinho, Ana Preto, Hernâni Gerós, Susana R. Chaves and Manuela Côrte-Real	1533–1537
Achievements and perspectives in yeast acetic acid-induced programmed cell death pathways Nicoletta Guaragnella, Lucia Antonacci, Salvatore Passarella, Ersilia Marra and Sergio Giannattasio	1538–1543
Farnesol-induced cell death in the filamentous fungus <i>Aspergillus nidulans</i> Táisa Magnani Dinamarco, Maria Helena S. Goldman and Gustavo Henrique Goldman	1544–1548
Correction	1549
