Volume 4, Part 3, 1976

THE NINTH CIBA MEDAL LECTURE	PAGE
Vectorial chemistry and the molecular mechanics of chemiosmotic coupling: Power transmission by proticity. <i>By</i> P. Mitchell	399
562ND MEETING, BANGOR	
Colloquium: Energy Metabolism of Marine Invertebrates	
The distribution and metabolism of wax esters in marine invertebrates. <i>By</i> J. R. Sargent & R. R. Gatten	431
Octopine dehydrogenase in the cockle <i>Cardium edule</i> . <i>By</i> G. Gäde	433
Tissue differences in the response of the mussel <i>Mytilus edulis</i> to experimentally induced anaerobiosis. <i>By</i> A. E. Chaplin & J. Loxton	437
Adenylate energy charge in <i>Mytilus edulis</i> L. during exposure to air. <i>By</i> T. C. M. Wijsman, A. de Zwaan & R. H. M. Ebberink	442
Regulation at the phosphoenolpyruvate branchpoint by the adenylate energy charge in <i>Mytilus edulis</i> . <i>By</i> R. H. M. Ebberink, A. de Zwaan & T. C. M. Wijsman	444
Some kinetic and regulatory properties of the cytoplasmic L-malate dehydrogenases from the posterior adductor muscle and mantle tissues of the common mussel <i>Mytilus edulis</i> . <i>By</i> D. R. Livingstone	447
Colloquium: Microbial Catabolism: Its Role in the Carbon Cycle and Environmental Significance	
Introduction: Anaerobic and aerobic environments. <i>By</i> W. C. Evans	452
Microbial catabolism and the carbon cycle. <i>By</i> S. Dagley	455
Microbial degradation of alicyclic and heterocyclic compounds. <i>By</i> P. W. Trudgill	458
Microbial degradation of halogenated compounds. <i>By</i> P. J. Chapman	463
Plasmids and catabolism. <i>By</i> P. A. Williams & M. J. Worsley	466
Evolution of catabolic pathways. <i>By</i> L. N. Ornston & D. Parke	468
Communications	
Factors in haemolymph of the mussel, <i>Mytilus edulis</i> L., of possible significance as defence mechanisms. <i>By</i> S. W. Hardy, T. C. Fletcher & L. M. Gerrie	473
Production of volatile fatty acids in bivalved molluscs. <i>By</i> J. H. F. M. Kluytmans & A. de Zwaan	475
Carbonic anhydrase activity in the oyster <i>Ostrea edulis</i> L. during rapid shell formation. <i>By</i> W. M. Arnold & D. L. Holland	477

	PAGE
A kinetic study of muscle pyruvate kinase from <i>Carcinus maenas</i> . By C. J. Newton, P. C. Poat & K. A. Munday	479
Abortive enzyme-substrate ternary complexes formed by the fructose 1,6-diphosphate-activated pyruvate kinase from the hepatopancreas of <i>Carcinus maenas</i> . By I. G. Giles, P. C. Poat & K. A. Munday	481
The effect of photoperiod on endogenous γ -tocopherol and plastochromanol in leaves of <i>Xanthium strumarium</i> L. (cocklebur). By R. W. Battle, J. K. Gaunt & D. L. Laidman	484
The properties and distribution of α -tocopherol oxidase in plants. By E. Murillo, S. E. Plumpton & J. K. Gaunt	486
Flavodoxin from a red alga. By A. Husain, K. G. Hutson, P. W. Andrew & L. J. Rogers	488
Ferredoxins from red algae. By P. W. Andrew & L. J. Rogers	489
Anaerobic photometabolism of aromatic compounds by <i>Rhodopseudomonas</i> sp. By P. J. Whittle, D. O. Lunt & W. C. Evans	490
Metabolism of tyrosine by <i>Microspira tyrosinatica</i> : A new intermediate [2,4,5-trihydroxyphenylalanine (6-hydroxydopa)] in the tyrosinase reaction. By D. O. Lunt & W. C. Evans	491
Aerobic metabolism of pyrazine compounds by a <i>Pseudomonas</i> species. By M. Matthey & E. M. Harle	492
Aromatic-alcohol dehydrogenases from <i>Pseudomonas putida</i> N.C.I.B. 9869. By M. J. Keat & D. J. Hopper	494
Ethanolamine catabolism by bacteria, including <i>Escherichia coli</i> . By C. M. Blackwell, F. A. Scarlett & J. M. Turner	495
L-Threonine catabolism via aminoacetone: A search for a pathway in bacteria. By S. C. Bell & J. M. Turner	497
The effect of the exogenous folate concentration on the biosynthesis of pteroyl-polyglutamates in <i>Lactobacillus casei</i> and the folate polyglutamate distribution in <i>Escherichia coli</i> . By R. Bassett, D. Weir & J. Scott	500
Purification and properties of an unusual nitrilase from <i>Nocardia</i> N.C.I.B. 11216. By D. B. Harper	502
The effect of growth conditions on the wax content of various strains of <i>Acinetobacter</i> . By L. M. Fixter & J. G. McCormack	504
Biodegradative adenosine triphosphate-DL-1-aminopropan-2-ol phosphotransferase in a pseudomonad capable of aminoacetone catabolism. By A. Faulkner & J. M. Turner	506
Compartmentation of amino acids and change in the fate of radioactive glucose in rat brain after electroshock and reserpine pretreatment. By J. G. Nievel	508
Changes in nucleotide metabolism of the liver and fate of [14 C]orotate among various pyrimidines at the outset and during induction of drug-metabolizing enzymes and hepatomegaly. By N. Robinson, J. G. Nievel & J. Anderson	509
Studies on the relationship between induction of drug-metabolizing enzymes, liver enlargement and ascorbic acid excretion in rodents. By T. R. Skrbic, J. G. Nievel & J. Anderson	511

	PAGE
Effect of various nucleotide and protein factors on the capacity of the liver microsomal fractions and ribosomes to incorporate labelled amino acids into protein <i>in vitro</i> . <i>By</i> J. G. Nieval & P. J. Bray	512
Effects of chemical modification of the protein on the antigenic activity of carcino-embryonic antigen. <i>By</i> P. Thomas, R. G. Edwards & J. H. Westwood	513
Biliary excretion of mestranol in the female rat: Effect of neomycin pretreatment on enterohepatic recirculation. <i>By</i> D. Brewster, R. S. Jones & A. M. Symons	516
Aromatization of shikimic acid in the rat and the role of gastrointestinal micro-organisms. <i>By</i> D. Brewster, R. S. Jones & D. V. Parke	518
Further purification of rat liver uridine diphosphate glucuronyltransferase. <i>By</i> B. Burchell & A. Burchell	521
A comparison of steroid glucuronyltransferases of rat liver and hepatoma, and effects of phenobarbitone and 3-methylcholanthrene induction. <i>By</i> T. Gessner	522
The localization of hippurate synthesis in the matrix of rat liver mitochondria. <i>By</i> S. J. Gatley & H. S. A. Sherratt	525
Early interaction of radioactive butylated hydroxytoluene with protein factors of varying stability in rat liver, related to the onset of sequential biochemical changes leading to the induction of drug-metabolizing enzymes and liver enlargement. <i>By</i> M. F. Scully, P. J. Bray & J. G. Nieval	526
Competition between the induction of hepatic protein synthesis by drugs and inhibition of actinomycin D indicating a mechanism for decreased acute toxicity <i>in vivo</i> apparently independent of stimulated drug metabolism. <i>By</i> J. Anderson & J. G. Nieval	528
BOOK REVIEWS	531
