Volume 4, Part 4, 1976

563RD MEETING, LONDON	PAGE
Colloquium: Fibrous Proteins in the Nervous System	
Actin and myosin: Their role in the growth of nerve cells. <i>By</i> D. Bray	543
Neurofilaments. <i>By</i> B. H. Anderton, C. W. Bell, B. J. Newby & D. S. Gilbert	544
Biochemical properties of microtubules. <i>By</i> J. R. Lagnado	548
Microtubules and synaptic structure (<i>by title only</i>). <i>By</i> E. G. Gray	548
Microtubules and vesicle migration in neurons. <i>By</i> P. Banks	548
Colloquium: The Reconstitution of Bioenergetic Systems	
Reconstitution of electrogenic function of the Δ pH generators (<i>by title only</i>). <i>By</i> V. P. Skulachev	551
Reconstitution of mitochondrial energy conservation at sites 0 and 1. <i>By</i> C. I. Ragan	552
Reconstitution of a proton pump. <i>By</i> D. Oesterhelt & V. Christoffel	556
Rhodopsin in bilayer membranes. <i>By</i> M. Montal	560
How the structure of the sarcoplasmic reticulum regulates the accumulation of calcium (<i>by title only</i>). <i>By</i> G. Warren & J. C. Metcalfe	561
Colloquium: Applications of Calorimetry to Biochemistry	
A system of micro-calorimeters and its use in biochemistry and biology. <i>By</i> I. Wadsö	561
Application of calorimetry to the evaluation of metabolic data for whole organisms. <i>By</i> I. Lamprecht	565
Temperature-scanning calorimeters and their use in systems of biochemical interest (<i>by title only</i>). <i>By</i> D. S. Reid	569
Time-resolution in calorimetry as applied to muscle and systems of muscle proteins <i>in vitro</i> (<i>by title only</i>). <i>By</i> R. C. Woledge	570
Flow micro-calorimetric studies of the kinetics of enzymic and microbiological processes. <i>By</i> A. E. Beezer	570
Colloquium: Lipids in Disease	
The regulation of cholesterol metabolism. <i>By</i> M. J. P. Higgins	572
Control of hepatic triacylglycerol metabolism. <i>By</i> P. A. Mayes	575
The biochemistry of familial hypercholesterolaemia. <i>By</i> N. B. Myant	580

	PAGE
The hypertriglyceridaemias: A heterogeneous group of metabolic disorders. <i>By</i> D. J. Galton, P. Clifton-Bligh & J. P. D. Reckless	585
Hypolipidaemic agents: Current status and recent developments. <i>By</i> B. Morgan	589
Plasma lipoproteins in liver disease. <i>By</i> J. Agorastos, C. Boswell, D. S. Harry & N. McIntyre	593
Colloquium: Effects of Steroids on the Skin	
Steroids and the skin: A general review. <i>By</i> F. J. Ebling	597
Steroids and specialized skin secretions in mammals. <i>By</i> E. Johnson	602
Steroid metabolism in human skin: Its relation to sebaceous-gland growth and acne vulgaris. <i>By</i> M. B. Hodgins and J. B. Hay	605
Effects of topical corticosteroids on proliferative disease of the epidermis (<i>by title only</i>). <i>By</i> R. Marks	609
Communications	
A new pathway for the biosynthesis of spermidine. <i>By</i> G. H. Tait	610
Biphasic interactions between a <i>Neurospora crassa</i> glutamate dehydrogenase and reduced nicotinamide-adenine dinucleotide phosphate. <i>By</i> M. G. Gore & M. Iwatsubo	612
Mandelate dehydrogenase with altered stereospecificity in mutant strains of <i>Acinetobacter calcoaceticus</i> N.C.I.B. 8250. <i>By</i> C. A. Fewson, J. D. Beggs, E. Seenan & E. F. Ahlquist	614
An assay procedure for the vitamin K ₁ -2,3-epoxide-reducing system of rat liver involving high-performance liquid chromatography. <i>By</i> G. R. Elliott, E. M. Odam & M. G. Townsend	615
Superoxide dismutases in mitochondria from <i>Helianthus tuberosus</i> and <i>Neurospora crassa</i> . <i>By</i> G. P. Arron, L. Henry, J. M. Palmer & D. O. Hall	618
Evidence that the monomers of dimeric triose phosphate isomerase are active. <i>By</i> C. J. Branford White & D. A. Fell	620
Product-inhibition studies on pyruvate kinase isolated from the leg muscle of <i>Carcinus maenas</i> . <i>By</i> C. J. Newton, P. C. Poat & K. A. Munday	622
Equilibrium isotopic-exchange studies of the reaction catalysed by rabbit muscle pyruvate kinase. <i>By</i> I. G. Giles, P. C. Poat & K. A. Munday	624
Collagenolytic cathepsin activity in rabbit peritoneal polymorphonuclear leucocytes. <i>By</i> W. T. Gibson, D. W. Milsom, F. S. Steven & J. S. Lowe	627
The subcellular location of a collagenolytic cathepsin in rabbit peritoneal polymorphonuclear leucocytes. <i>By</i> W. T. Gibson, D. W. Milsom, F. S. Steven & J. S. Lowe	628
Studies on normal and mutant cystathionine β -synthase from cultured skin fibroblasts. <i>By</i> R. Griffiths & N. Tudball	630
Inability of organomercurials to inhibit the reaction between aurothiomalate and thiols. <i>By</i> C. J. Danpure & D. A. Fyfe	631
Binding sites on <i>Escherichia coli</i> ribonucleic acid polymerase. <i>By</i> A. Graham, J. Greene, P. A. Lowe & A. D. B. Malcolm	633

	PAGE
The action of streptozotocin on mouse leukaemia cells. <i>By</i> M. I. Davies, H. Halldórsson, S. Shall & C. J. Skidmore	635
Modification of glyceraldehyde 3-phosphate dehydrogenase activity by adsorption to erythrocyte membranes and phospholipid vesicles. <i>By</i> J. M. Wrigglesworth, S. Keokitichai, M. S. Wooster & F. A. Miller	637
The effect of hypophysectomy on the glutathione-insulin transhydrogenase activity of rat liver. <i>By</i> J. H. Thomas, A. Jones, P. Davey & J. S. M. Hutchinson	640
The use of a radiochemical titrant for the determination of the operational molarity of solutions of pepsin. <i>By</i> G. B. Irvine & D. T. Elmore	643
Cholesterol in plasma-membrane subfractions from livers of control and cholesterol-fed guinea pigs. <i>By</i> A. S. Grandison & C. Green	645
Rat intestinal alkaline phosphatase: A heterogeneous dimeric glycoprotein. <i>By</i> N. Malik & P. J. Butterworth	646
The effects of the pyrrolizidine alkaloid, heliotrine, and nicotinamide on the concentration of plasma insulin and blood glucose in the rat. <i>By</i> R. Schoental & K. N. Frayn	649
Summary of a novel, three-component regulatory model for uridine diphosphate glucuronyltransferase. <i>By</i> C. Berry & T. Hallinan	650
Zinc metabolism and dibutyl phthalate-induced testicular atrophy in the rat. <i>By</i> B. R. Cater, M. W. Cook & S. D. Gangolli	652
Studies on the hydrolysis <i>in vitro</i> of phthalate esters by hepatic and intestinal mucosal preparations from various species. <i>By</i> B. G. Lake, J. C. Phillips, R. A. Hodgson, B. J. Severn, S. D. Gangolli & A. G. Lloyd	654
Paracetamol injury to rat liver slices, and its subsequent prevention by some anti-oxidants. <i>By</i> A. E. M. McLean & L. Nuttall	655
Interactions of protein, lipid and metal ions in the low-density lipoprotein of hen's-egg yolk. <i>By</i> J. C. Swann, G. W. Smithers & R. W. Burley	657
Suppression by insulin of net triacylglycerol depletion in the perfused mouse liver. <i>By</i> D. M. W. Salmon & D. A. Hems	659
Glycolipid synthesis in hamster embryo cell cultures. <i>By</i> F. A. McEvoy, D. E. Ellis & S. Shall	662
Shape changes of the human erythrocyte 'ghost'. <i>By</i> J. R. Harris	664
The reconstitution of photosystem 1 in barley plastids lacking pigment P700. <i>By</i> N. L. Morgan & W. T. Griffiths	667
Effect of added light-harvesting pigments on the reconstruction of photosynthetic reactions in membranes from bacteriochlorophyll-less mutants of <i>Rhodospseudomonas sphaeroides</i> . <i>By</i> C. N. Hunter & O. T. G. Jones	669
A study of the permeability of the cytoplasmic membrane of <i>Escherichia coli</i> to reduced and oxidized Benzyl Viologen and Methyl Viologen cations: Complications in the use of Viologens as redox mediators for membrane-bound enzymes. <i>By</i> R. W. Jones, T. A. Gray & P. B. Garland	671
A characteristic protein of the surfaces of neoplastic cells. <i>By</i> M. R. Price & R. W. Stoddart	673

	PAGE
The comparison of membrane proteins of normal and neoplastic cells by isoelectric focusing. <i>By</i> R. W. Stoddart & M. R. Price	675
The entrapment of therapeutic agents in resealed erythrocyte 'ghosts' and their fate <i>in vivo</i> . <i>By</i> D. A. Tyrrell & B. E. Ryman	677
Loss of infectivity of mycobacterial and protozoal exoplasmic parasites after exposure <i>in vitro</i> to the polyenzymic cocktail 'PIGO'. <i>By</i> J. L. Avila, J. Convit, M. E. Pinardi & P. J. Jacques	680
Aspects of morphological and biochemical changes in chemically induced kidney injury in the rat. <i>By</i> R. C. Cottrell, C. E. Agrelo, S. D. Gangolli & P. Grasso	681
Further studies on the inhibition of rat hepatic dimethylnitrosamine metabolism <i>in vitro</i> . <i>By</i> B. G. Lake, J. C. Phillips, S. D. Gangolli & A. G. Lloyd	684
Accumulation of cytochrome <i>P</i> -450 in yeast in the presence of Tween-80. <i>By</i> A. Wiseman, C. McCloud & T.-K. Lim	685
Effect of steric exclusion by dextran on the conversion of fibrinogen in fibrin. <i>By</i> M. W. Rampling, D. A. Lane & V. V. Kakkar	688
Phosphorylation of platelet microtubule proteins by an endogenous protein kinase. <i>By</i> A. G. Castle & N. Crawford	691
Increased phosphorylation of specific blood platelet proteins in association with the release reaction. <i>By</i> R. J. Haslam & J. A. Lynham	694
Subcellular distribution of kininase activity in pig liver. <i>By</i> C. N. Dearnley & G. S. Bailey	697
A comparison of the inhibition of phosphodiesterase activity and allergic histamine release by disodium cromoglycate and compound I.C.I. 74917. <i>By</i> K. Barrett-Bee & W. Henderson	699
The inhibition of histamine release from guinea-pig lung by compound I.C.I. 74917 and isoprenaline. <i>By</i> K. J. Barrett-Bee & J. Lees	702
The metabolism of debrisoquine in rat and man. <i>By</i> M. Angelo, L. G. Dring, R. Lancaster & R. L. Smith	704
A new method for the determination of the major metabolite of prostaglandin $F_{2\alpha}$ in human urine based on stable isotope dilution and gas chromatography-mass spectrometry. <i>By</i> A. R. Brash, G. H. Draffan, R. A. Clare & T. A. Baillie	706
Electron transport in the alkalophile <i>Bacillus pasteurii</i> (N.C.I.B. 8841). <i>By</i> B. A. Haddock & J. G. Coble	709
Electron transport in mutants of <i>Escherichia coli</i> deficient in their ability to synthesize adenosine 3':5'-cyclic monophosphate and the catabolite-gene activator protein. <i>By</i> M. S. Daoud & B. A. Haddock	711
The actions of clofibrate on hepatic metabolism in the rat. <i>By</i> M. E. Laker & P. A. Mayes	714
Comparison of metabolism of the main lipid constituents of chylomicrons and chylomicron remnants in the perfused liver. <i>By</i> R. S. Gardner & P. A. Mayes	715
Regulation of lipogenesis by insulin and free fatty acids in perfused rat liver. <i>By</i> D. L. Topping & P. A. Mayes	717
The interaction of clotting factor X with adsorbents containing bivalent cations. <i>By</i> R. M. Howell & S. L. M. Deacon	718

	PAGE
Physical studies on calcium phosphate and barium citrate used as clotting-factor absorbents. <i>By</i> S. L. M. Deacon & R. M. Howell	720
Apparent alterations of erythrocyte acetylcholinesterase and other membrane proteins in Duchenne muscular dystrophy: A further example of a generalized membrane defect associated with hereditary muscular dystrophy. <i>By</i> P. K. Das, D. Graesslin & H. W. Goedde	723
Assay of enzyme activity by polarography. <i>By</i> P. D. J. Weitzman	724
The metabolism of labetalol in animals and man. <i>By</i> R. Hopkins, L. E. Martin & R. Bland	726
Effects of dark-rearing and light exposure on incorporation of [³ H]lysine into a tubulin-enriched fraction in rat visual cortex. <i>By</i> S. P. R. Rose, A. K. Sinha & A. Jones-Leconte	729
The distribution of colchicine and vinblastine receptors in subcellular fractions from 1-3-day-old chick brain. <i>By</i> A. N. Itani & J. R. Lagnado	732
The incorporation <i>in vivo</i> of [³² P]orthophosphate into phospholipids associated with brain microtubular proteins. <i>By</i> E. K. Kirazov & J. R. Lagnado	734
Calorimetric characterization of the micellar calcium phosphate in cows' milk. <i>By</i> R. L. J. Lyster	735
Thermodynamics of changing co-ordination number. <i>By</i> D. P. Graddon	737
The enthalpy of interaction between collagen fibres and denaturing solvents. <i>By</i> S. Menashi, A. Finch, P. J. Gardner & D. A. Ledward	740
Developmental changes in the composition of rat brain myelin: Relationship between the two basic proteins. <i>By</i> P. P. Giorgi	742
Changes in the activities of acetylcholinesterase and pseudocholinesterase in regions of the rat brain after behavioural treatments. <i>By</i> C. Evans & G. A. Kerkut	744
Acetylcholinesterase changes in the thalamus of rat brain after anaesthesia and electrical stimulation. <i>By</i> R. Anand, M. G. Gore & G. A. Kerkut	746
The persistence, translocation and metabolism of adenosine 3':5'-cyclic monophosphate generated in isolated cerebral tissues by electrical excitation. <i>By</i> C. Barberis, H. McIlwain & M. E. Newman	748
(Magnesium plus sodium plus potassium ion)-stimulated adenosine triphosphatase in rat sciatic nerve. <i>By</i> P. K. Das, G. M. Bray, A. J. Aguyao & M. Rasminsky	750
Heterogeneity of smooth-muscle cholinesterase in subcellular fractions. <i>By</i> P. K. Das, A. J. Scaf & H. W. Lammers	753
(Sodium plus potassium ion)-dependent adenosine triphosphatase activity in reconstituted systems and in cultured cells. <i>By</i> H. K. Kimelberg	755
The gel-filtration chromatography of complexes of noradrenaline, adenosine triphosphate and magnesium. <i>By</i> N. J. Birch, A. C. Janik, R. A. Inie & R. P. Hullin	757
Stereochemical studies on the formation of porphobilinogen. <i>By</i> A. G. Chaudhry & P. M. Jordan	760
The resolution of two kinetically distinct types of 5,5'-dithiobis-(2-nitrobenzoic acid)-titrating groups in 5-aminolaevulinate dehydratase from cow liver. <i>By</i> M. G. Gore, P. M. Jordan & A. G. Chaudhry	762

	PAGE
Subunit modification of 5-aminolaevulinate dehydratase involving cysteine residues. <i>By</i> P. Jordan, M. G. Gore & A. G. Chaudhry	762
Studies of a haem-containing protein associated with cases of β^0 -thalassaemia in patients of West Indian origin. <i>By</i> R. H. Saundry, I. Mamman & R. G. Huntsman	763
Nucleotides and human placental oestradiol-17 β dehydrogenase. <i>By</i> M. A. Shaw & J. Jeffery	765
Purification of oestradiol receptor by chromatography on oligo(dT)-cellulose. <i>By</i> C. Hall, S. Thrower, L. Lim & A. N. Davison	766
An essential factor in the translocation of the oestradiol receptor. <i>By</i> S. Thrower, C. Hall, L. Lim & A. N. Davison	769
A potential model for studying the control of oestradiol binding. <i>By</i> J. R. Thompson & R. J. B. King	772
Purification of poly(adenosine diphosphate ribose) polymerase from pig thymus. <i>By</i> C. Tsopanakis, E. A. McLaren & S. Shall	774
Affinity chromatography of nuclear enzymes. <i>By</i> M. G. Khan & S. Shall	778
Effect of histidinol on the initiation and elongation of protein synthesis in Krebs II ascites cells. <i>By</i> S. A. Austin	781
Messenger ribonucleic acid content of phytohaemagglutinin-treated lymphocytes. <i>By</i> R. Jagus-Smith & J. E. Kay	783
Molecular equilibria in ribonucleic acid polymerase. <i>By</i> A. M. Campbell	785
Functional properties of <i>Escherichia coli</i> ribonucleic acid polymerase subunit subassemblies. <i>By</i> P. A. Lowe & A. D. B. Malcolm	786
The use of metrizamide density gradients to obtain a chromatin component from mammalian cells enriched in deoxyribonucleic acid-replicating regions. <i>By</i> J. F. Burke & C. K. Pearson	787
Phosphorylation of microtubule proteins by an endogenous adenosine 3':5'-cyclic monophosphate-dependent protein kinase. <i>By</i> P. Sheterline	789
A possible solution to the problem of unwinding deoxyribonucleic acid, requiring that deoxyribonucleic acid is four-stranded in chromatin. <i>By</i> P. A. W. Edwards	792
Sebaceous lipogenesis and androgen metabolism in acne. <i>By</i> M. F. Cooper, J. B. Hay, D. McGibbon & S. Shuster	793
Effects of 5 α -reduced androgens on preputial-gland size and lipogenic activity. <i>By</i> P. E. Bowden, D. Meddis, M. F. Cooper, A. J. Thody & S. Shuster	795
Effects of testosterone and α -melanocyte-stimulating hormone on preputial-gland (sebaceous) activity. <i>By</i> M. F. Cooper, P. E. Bowden, D. Meddis, A. J. Thody & S. Shuster	798
Deoxyribonucleic acid polymerases in simian virus 40-infected monkey cells. <i>By</i> I. McLenaghan, R. L. P. Adams, R. Eason & J. G. Lindsay	800
Multiple forms of deoxyribonucleic acid polymerases α and β in pea seedlings. <i>By</i> C. Stevens & J. A. Bryant	803
Deoxyribonucleic acid polymerases from <i>Chlamydomonas reinhardtii</i> . <i>By</i> C. A. Ross & W. J. Harris	806
	1976

	PAGE
Role of deoxyribonucleic acid polymerase β in nuclear deoxyribonucleic acid synthesis. <i>By</i> T. R. Butt, W. M. Wood & R. L. P. Adams	807
The nature of 'activated' deoxyribonucleic acid used in deoxyribonucleic acid polymerase studies. <i>By</i> J. M. Morrison	810
Changes in the 'melting' temperature of chromatin in cells infected with pig herpes virus 1. <i>By</i> W. S. Stevely & B. I. Golombok	811
Transcription in nuclei isolated from a higher plant. <i>By</i> P. S. Wilson & J. Bennett	812
Alterations in the ribonucleic acid metabolism of nuclei isolated from mouse fibroblasts during aging and growth restriction <i>in vitro</i> . <i>By</i> C. H. Evans	813
Changes in synthesis of nuclear proteins after α -amanitin poisoning. <i>By</i> F. Novello, M. Derenzini & A. Pession-Brizzi	815
Non-histone-protein phosphorylation in rat salivary glands after treatment with isoproterenol, dibutyryladenosine cyclic monophosphate and dibutyrylguanosine cyclic monophosphate. <i>By</i> M. J. Capps & S. Itzhaki	816
Nuclease S_1 -specific cleavage sites within HeLa-cell 5.8S ribosomal ribonucleic acid. <i>By</i> M. S. N. Khan & B. E. H. Maden	817
Antibody synthesis in <i>Xenopus</i> oocytes with messenger ribonucleic acid from immunized rats. <i>By</i> N. J. Deacon & A. Ebringer	818
BOOK REVIEWS	821
