564TH MEETING, DUBLIN	PAGE
Colloquium: The Biochemistry of the Folate Cofactors	
The identification of the intracellular folate coenzymes of different cell types. <i>By J. M. Scott</i>	845
The folate-mediated synthesis of ribothymidylate in transfer ribonucleic acid, and evidence for multifunctional enzymes in one-carbon metabolism in eukaryotic sources. <i>By J. C. Rabinowitz</i>	850
Polyglutamate forms of folate: Natural occurrence and role as substrates in mammalian cells. <i>By J. R. Bertino, J. K. Coward, A. Cashmore, P. Chello, S. Panichajakul, C. G. Horvath & R. W. Stout</i>	853
Anti-folate toxicity and its reversal. <i>By K. R. Harrap</i>	856
Communications	
Location and identification of the genes for adenovirus type 2 polypeptides. <i>By J. F. Atkins, J. B. Lewis, C. W. Anderson & R. F. Gesteland</i>	859
The interaction of immobilized transition-metal ions with some gastrointestinal polypeptides. <i>By M. Conlon & R. F. Murphy</i>	860
Relationship between peptide hydrolases in brush-border and cytosol fractions of guinea-pig intestinal mucosa. <i>By C. O. Piggot & P. F. Fottrell</i>	862
Peptide hydrolase activity in brain and pituitary of guinea pig. <i>By G. O'Cuinn</i>	864
Affinity chromatography of biliverdin reductase. <i>By J. Watt & P. O'Carra</i>	866
Steroid catabolism in choline-deficient rats. <i>By M. E. Beary & J. Rafter</i>	868
Regulation of hepatic sulphotransferases. <i>By J. Carroll & L. M. Armstrong</i>	871
Relationships between sulphide metabolism, molybdate toxicity and plasma copper distribution in the rat and guinea pig. <i>By C. J. Cardin, A. Dennehy, J. Mason & C. Roberts</i>	873
The identification of externally exposed proteins of rabbit skeletal-muscle sarcoplasmic-reticulum preparations. <i>By E. J. Barrett & D. R. Headon</i>	877
Purification of a deoxyribonuclease from <i>Aspergillus nidulans</i> . <i>By A. M. Conneely, G. R. Campbell & F. G. Winder</i>	879
The effect of protein-functional-group reagents on D-gluconate transport in <i>Bacillus subtilis</i> . <i>By M. P. O'Sullivan & M. N. McKillen</i>	882
The energization of D-gluconate transport in <i>Bacillus subtilis</i> . <i>By A. L. Baxter & M. N. McKillen</i>	884

Nitrogen metabolism in the photoresponsive phytopathogenic fungus <i>Cercospora beticola</i> . By A. McLean, F. J. Lynch & E. C. Hussey	886
Carbon-utilization patterns in the photoresponsive fungus <i>Cercospora beticola</i> . By A. McLean, F. J. Lynch & E. C. Hussey	889
Ethylene glycol and polyethylene glycol catabolism by a sewage bacterium. By N. Jones & G. K. Watson	891
Isolation and characterization of inositol-containing glycosphingolipids from <i>Aspergillus niger</i> . By P. F. S. Byrne & P. J. Brennan	893
Structure and composition of the zona pellucida of the mouse oocyte. By A. Newport & J. Carroll	896
Effect of polyinosinic acid-polycytidylic acid on establishment, and on spontaneous and chemical transformation of Balb/c mouse-embryo cells in culture. By M. M. Clynes & E. J. Duke	897
Altered pyrimidine-salvage metabolism in a 5-fluorouracil-resistant mutant of <i>Drosophila melanogaster</i> . By M. M. Clynes & E. J. Duke	900
Turkey liver xanthine dehydrogenase: Effects of methanol on the enzyme-catalysed oxidation of reduced nicotinamide-adenine dinucleotide. By Í. N. Fhaoláin, M. J. Hynes & M. P. Coughlan	901
Turkey liver xanthine dehydrogenase: Further observations on the reaction with arsenite. By M. P. Coughlan, Í. N. Fhaoláin & M. J. Hynes	904
Distribution studies on polyglutamate forms of folate. By B. Reed, D. Weir & J. M. Scott	906
Effect of ethanol on activity of folate conjugase and on serum binding and cellular uptake of radiolabelled folates. By E. R. Eichner, J. E. Loewenstein & E. Cox	908
The fate of 5-[¹⁴ C]methyltetrahydrofolate in the rat liver. By J. A. Blair, F. J. Staff & P. A. Barford	910
The effect of methotrexate on the metabolism of [¹⁴ C]folates in the rat. By P. A. Barford, J. A. Blair & M. A. K. Malghani	912
Effects of folate deficiency on some hepatic enzymes of folate metabolism in the oestrogen-treated immature female chick (domestic fowl). By R. A. Burns & N. Jackson	914
Delay in metabolism of parenteral folinic acid to 5-methyltetrahydrofolate in man. By V. M. Whitehead & H. A. Stein	918
Folate coenzyme forms in fibroblasts from patients deficient in 5,10-methyltetrahydrofolate reductase. By B. A. Cooper & D. Rosenblatt	921
Regulation of methionine synthetase in L-cells by vitamin B-12, folate and methionine. By B. Grzelakowska-Sztabert & M. Landman-Balińska	922
Purification of thymidylate synthetase by means of affinity chromatography on tetrahydroamethopterin-aminoethyl-Sepharose. By W. Rode, Z. M. Ziełńska, K. Slavík & V. Slavíkova	925
[³ H]Thymidine triphosphate incorporation into isolated nuclei. By J. W. L. Hooton & A. V. Hoffbrand	927
Molecular weight and amino acid composition of adenylate deaminase from rabbit skeletal muscle. By D. O'Driscoll, N. P. Roring & C. A. Ross	928

CONTENTS

vii

Role of thyroid hormones in the control of the synthesis of endoplasmic reticulum in rapidly growing neonatal brain and in the hepatocytes during experimentally induced liver growth and nodular hyperplasia. <i>By J. G. Nievel & N. Robinson</i>	930
Biochemical changes in liver and blood underlying parenchymal damage of rat liver induced by a dose-dependent effect of drugs before and after development of liver enlargement and nodular hyperplasia. <i>By J. G. Nievel, J. Anderson & P. J. Bray</i>	932
Studies on the relationship between effects on membranes and ribosomal aggregates in high-power electron micrography and on macromolecular synthesis induced by drugs and environmental chemicals. <i>By J. G. Nievel</i>	933
BOOK REVIEWS	937
