## Biochemical Society Focused Meeting

### Signalling 2011: a Biochemical Society Centenary Celebration

University of Edinburgh, U.K., 8–10 June 2011

**Edited by Nicholas Brindle (Leicester, U.K.), Simon Cook (The Babraham Institute, U.K.), Jeff McIlhinney (Oxford, U.K.), Simon Morley (University of Sussex, U.K.), Sandip Patel (University College London, U.K.), Susan Pyne (University of Strathclyde, U.K.), Colin Taylor (Cambridge, U.K.), Alan Wallace (AstraZeneca, U.K.) and Stephen Yarwood (Glasgow, U.K.).**

Novel control of cAMP-regulated transcription in vascular endothelial cells <b>Gillian R. Milne, Timothy M. Palmer and Stephen J. Yarwood</b>	1–5
Epac2: a sulfonylurea receptor? <b>Holger Rehmann</b>	6–10
cGMP–cAMP interplay in cardiac myocytes: a local affair with far-reaching consequences for heart function <b>Alessandra Stangherlin and Manuela Zaccolo</b>	11–14
Negative co-operativity in the EGF receptor <b>Linda J. Pike</b>	15–19
Neuropilin signalling in angiogenesis <b>Sina Koch</b>	20–25
Regulation of signalling by microRNAs <b>Roi Avraham and Yosef Yarden</b>	26–30
Controlling cancer through the autotaxin–lysophosphatidic acid receptor axis <b>Mari Gotoh, Yuko Fujiwara, Junming Yue, Jianxiang Liu, SueChin Lee, James Fells, Ayako Uchiyama, Kimiko Murakami-Murofushi, Stephen Kennel, Jonathan Wall, Renukadevi Patil, Renuka Gupte, Louisa Balazs, Duane D. Miller and Gabor J. Tigyi</b>	31–36
How phosphoinositide 3-phosphate controls growth downstream of amino acids and autophagy downstream of amino acid withdrawal <b>Nicholas T. Ktistakis, Maria Manifava, Priya Schoenfelder and Sergio Rotondo</b>	37–43
The essential role of cAMP/Ca <sup>2+</sup> signalling in mammalian circadian timekeeping <b>John S. O'Neill and Akhilesh B. Reddy</b>	44–50
Role of Epac in brain and heart <b>Anne-Coline Laurent, Magali Breckler, Magali Berthouze and Frank Lezoualc'h</b>	51–57
Immediate-early gene activation by the MAPK pathways: what do and don't we know? <b>Amanda O'Donnell, Zaneta Odrowaz and Andrew D. Sharrocks</b>	58–66

Regulation of MEK/ERK pathway output by subcellular localization of B-Raf <b>Catherine Andreadi, Catherine Noble, Bipin Patel, Hong Jin, Maria M. Aguilar Hernandez, Kathryn Balmanno, Simon J. Cook and Catrin Pritchard</b>	<b>67–72</b>
Tumour cell responses to MEK1/2 inhibitors: acquired resistance and pathway remodelling <b>Annette S. Little, Kathryn Balmanno, Matthew J. Sale, Paul D. Smith and Simon J. Cook</b>	<b>73–78</b>
Roles of p38 MAPKs in invasion and metastasis <b>Ivan del Barco Barrantes and Angel R. Nebreda</b>	<b>79–84</b>
Exploring the function of the JNK (c-Jun N-terminal kinase) signalling pathway in physiological and pathological processes to design novel therapeutic strategies <b>Clare Davies and Cathy Tournier</b>	<b>85–89</b>
Phosphorylation of basic helix–loop–helix transcription factor Twist in development and disease <b>Gongda Xue and Brian A. Hemmings</b>	<b>90–93</b>
Sphingosine 1-phosphate signalling in cancer <b>Nigel J. Pyne, Francesca Tonelli, Keng Gat Lim, Jaclyn S. Long, Joanne Edwards and Susan Pyne</b>	<b>94–100</b>
The glycerophosphoinositols and their cellular functions <b>Daniela Corda, Pasquale Zizza, Alessia Varone, Karol S. Bruzik and Stefania Mariggio</b>	<b>101–107</b>
Cellular geography of IP <sub>3</sub> receptors, STIM and Orai: a lesson from secretory epithelial cells <b>Hayley Dingsdale, Svetlana Voronina, Lee Haynes, Alexei Tepikin and Gyorgy Lur</b>	<b>108–111</b>
Morphological and functional aspects of STIM1-dependent assembly and disassembly of store-operated calcium entry complexes <b>Wei-Wei Shen and Nicolas Demaurex</b>	<b>112–118</b>
Regulation of store-operated calcium entry during cell division <b>Jeremy T. Smyth and James W. Putney</b>	<b>119–123</b>
Mammalian Hippo signalling: a kinase network regulated by protein–protein interactions <b>Alexander Hergovich</b>	<b>124–128</b>
Cell migration and invasion in human disease: the Tks adaptor proteins <b>Sara A. Courtneidge</b>	<b>129–132</b>
Multi-pathway network analysis of mammalian epithelial cell responses in inflammatory environments <b>David C. Clarke and Douglas A. Lauffenburger</b>	<b>133–138</b>
Cross-talk between mitogenic Ras/MAPK and survival PI3K/Akt pathways: a fine balance <b>Edita Aksamitiene, Anatoly Kiyatkin and Boris N. Kholodenko</b>	<b>139–146</b>
From parathyroid hormone to cytosolic Ca <sup>2+</sup> signals <b>Colin W. Taylor and Stephen C. Tovey</b>	<b>147–152</b>
Triggering of Ca <sup>2+</sup> signals by NAADP-gated two-pore channels: a role for membrane contact sites? <b>Sandip Patel and Eugen Brailoiu</b>	<b>153–157</b>

Mitochondrial organization and Ca <sup>2+</sup> uptake <b>Marnie L. Olson, Susan Chalmers and John G. McCarron</b>	158–167
Roles of the mammalian target of rapamycin, mTOR, in controlling ribosome biogenesis and protein synthesis <b>Valentina Iadevaia, Yilin Huo, Ze Zhang, Leonard J. Foster and Christopher G. Proud</b>	168–172
DNA double-strand break repair within heterochromatic regions <b>Johanne M. Murray, Tom Stiff and Penny A. Jeggo</b>	173–178
 <b>Selected oral communications</b>	
cAMP measurements with FRET-based sensors in excitable cells <b>Katy L. Everett and Dermot M.F. Cooper</b>	179–183
Human epidermal growth factor receptor (HER1) aligned on the plasma membrane adopts key features of <i>Drosophila</i> EGFR asymmetry <b>Marisa L. Martin-Fernandez</b>	184–188
Investigating extracellular <i>in situ</i> EGFR structure and conformational changes using FRET microscopy <b>Selene K. Roberts, Christopher J. Tynan, Martyn Winn and Marisa L. Martin-Fernandez</b>	189–194
The regulatory role of the juxtamembrane region in the activity of the epidermal growth factor receptor <b>Aislyn D.W. Boran</b>	195–199
Non-genomic progesterone signalling and its non-canonical receptor <b>Patricia Moussatche and Thomas J. Lyons</b>	200–204
Growth and metabolic control of lipid signalling at the Golgi <b>Hailan Piao and Peter Mayinger</b>	205–209
PKA phosphorylation of the small heat-shock protein Hsp20 enhances its cardioprotective effects <b>Helen V. Edwards, John D. Scott and George S. Baillie</b>	210–214
Unbiased identification of substrates for the Epac1-inducible E3 ubiquitin ligase component SOCS-3 <b>Jamie J.L. Williams and Timothy M. Palmer</b>	215–218
cAMP-dependent allostery and dynamics in Epac: an NMR view <b>Rajeevan Selvaratnam, Madoka Akimoto, Bryan VanSchouwen and Giuseppe Melacini</b>	219–223
ERK phosphorylation and nuclear accumulation: insights from single-cell imaging <b>Christopher J. Caunt and Craig A. McArdle</b>	224–229
The roles of ATF2 (activating transcription factor 2) in tumorigenesis <b>Malgorzata Gozdecka and Wolfgang Breitwieser</b>	230–234
MKP-2: out of the DUSP-bin and back into the limelight <b>Ahmed Lawan, Emma Torrance, Sameer Al-Harathi, Muhannad Shweash, Sulaiman Alnasser, Thikryat Neamatallah, Juliane Schroeder and Robin Plevin</b>	235–239
Targeting phosphoinositide 3-kinase $\delta$ for allergic asthma <b>Wendy C. Rowan, Janet L. Smith, Karen Affleck and Augustin Amour</b>	240–245

Organization of cAMP signalling microdomains for optimal regulation by Ca <sup>2+</sup> entry <b>Debbie Willoughby</b>	<b>246–250</b>
ERK5 and its role in tumour development <b>Pamela A. Lochhead, Rebecca Gilley and Simon J. Cook</b>	<b>251–256</b>
The emerging role of PtdIns5P: another signalling phosphoinositide takes its place <b>Deborah L. Grainger, Christodoulos Tavelis, Alexander J. Ryan and Katherine A. Hinchliffe</b>	<b>257–261</b>
The regulation of myosin phosphatase in pregnant human myometrium <b>Claire A. Hudson and Andrés López Bernal</b>	<b>262–267</b>
The small Rho GTPase Rif and actin cytoskeletal remodelling <b>Lifei Fan and Harry Mellor</b>	<b>268–272</b>
Decoding neurohormone pulse frequency by convergent signalling modules <b>Krasimira Tsaneva-Atanasova, Christopher J. Caunt, Stephen P. Armstrong, Rebecca M. Perrett and Craig A. McArdle</b>	<b>273–278</b>
IP <sub>3</sub> R, store-operated Ca <sup>2+</sup> entry and neuronal Ca <sup>2+</sup> homeostasis in <i>Drosophila</i> <b>Sumita Chakraborty and Gaiti Hasan</b>	<b>279–281</b>
Putative roles for phospholipase C <sub>η</sub> enzymes in neuronal Ca <sup>2+</sup> signal modulation <b>Petra Popovics and Alan J. Stewart</b>	<b>282–286</b>
Protein kinase D in the hypertrophy pathway <b>Yuan Yan Sin and George S. Baillie</b>	<b>287–289</b>
Histone H4 histidine phosphorylation: kinases, phosphatases, liver regeneration and cancer <b>Paul G. Besant and Paul V. Attwood</b>	<b>290–293</b>
<hr/> <b>Correction</b>	<hr/> <b>295</b> <hr/>
