Biochemical Society Focused Meetings

Electron Transfer at the Microbe–Mineral Interface

University of East Anglia, Norwich, U.K., 2–4 April 2012

Edited by Jim Fredrickson (Pacific Northwest National Laboratory, U.S.A.), David Richardson (University of East Anglia, U.K.) and John Zachara (Pacific Northwest National Laboratory, U.S.A.).

Electron Transport at the Microbe–Mineral Interface: a synthesis of current research challenges

David J. Richardson, James K. Fredrickson and John M. Zachara

1163–1166

Shewanella oneidensis MR-1 chemotaxis proteins and electron-transport chain components essential for congregation near insoluble electron acceptors

H. Wayne Harris, Mohamed Y. El-Naggar and Kenneth H. Nealson

online data

1167–1177

On conducting electron traffic across the periplasm

Jeffrey A. Gralnick

1178–1180

Analysis of structural MtrC models based on homology with the crystal structure of MtrF

Marcus J. Edwards, James K. Fredrickson, John M. Zachara, David J. Richardson and Thomas A. Clarke

1181–1185

Long-range electron transport to Fe(III) oxide via pili with metallic-like conductivity

Derek R. Lovley

1186–1190

Influence of Fe²⁺-catalysed iron oxide recrystallization on metal cycling

Drew E. Latta, Christopher A. Gorski and Michelle M. Scherer

1191–1197

Molecular structure and free energy landscape for electron transport in the decahaem cytochrome MtrF

Marian Breuer, Piotr Zarzycki, Liang Shi, Thomas A. Clarke, Marcus J. Edwards, Julea N. Butt, David J. Richardson, James K. Fredrickson, John M. Zachara, Jochen Blumberger and Kevin M. Rosso

online data

1198–1203

Comparative c-type cytochrome expression analysis in *Shewanella oneidensis* strain MR-1 and *Anaeromyxobacter dehalogenans* strain 2CP-C grown with soluble and insoluble oxidized metal electron acceptors

Silke Nissen, Xiaoxin Liu, Karuna Chourey, Robert L. Hettich, Darlene D. Wagner, Susan M. Pfiffner and Frank E. Löffler

online data

1204–1210

Biogeochemistry and microbiology of microaerobic Fe(II) oxidation

David Emerson

1211–1216

The roles of CymA in support of the respiratory flexibility of *Shewanella oneidensis* MR-1

Sophie J. Marritt, Duncan G.G. McMillan, Liang Shi, James K. Fredrickson, John M. Zachara, David J. Richardson, Lars J.C. Jeuken and Julea N. Butt

1217–1221

The molecular toolbox for chromosomal heterologous multiprotein expression in <i>Escherichia coli</i> Katrin Richter and Johannes Gescher	1222–1226
Electron transfer at the cell-uranium interface in <i>Geobacter</i> spp. Gemma Reguera	1227–1232
Operational and technical considerations for microbial electrosynthesis Joachim Desloover, Jan B.A. Arends, Tom Hennebel and Korneel Rabaey	1233–1238
Biomining of selenium by the selenate-respiring bacterium <i>Thauera selenatis</i> Clive S. Butler, Charles M. Debieux, Elizabeth J. Dridge, Peter Splatt and Matthew Wright	1239–1243
The molecular biogeochemistry of manganese(II) oxidation Kati Geszvain, Cristina Butterfield, Richard E. Davis, Andrew S. Madison, Sung-Woo Lee, Dorothy L. Parker, Alexandra Soldatova, Thomas G. Spiro, George W. Luther, III and Bradley M. Tebo	1244–1248
Microbial iron-redox cycling in subsurface environments Eric E. Roden	1249–1256
Selected oral communications	
Development of a proteoliposome model to probe transmembrane electron-transfer reactions Gaye F. White, Zhi Shi, Liang Shi, Alice C. Dohnalkova, James K. Fredrickson, John M. Zachara, Julea N. Butt, David J. Richardson and Thomas A. Clarke	1257–1260
Mtr extracellular electron-transfer pathways in Fe(III)-reducing or Fe(II)-oxidizing bacteria: a genomic perspective Liang Shi, Kevin M. Rosso, John M. Zachara and James K. Fredrickson	1261–1267
Mind the gap: diversity and reactivity relationships among multihaem cytochromes of the MtrA/DmsE family Kathryn D. Bewley, Mackenzie A. Firer-Sherwood, Jee-Young Mock, Nozomi Ando, Catherine L. Drennan and Sean J. Elliott	1268–1273
A long way to the electrode: how do <i>Geobacter</i> cells transport their electrons? Pablo Sebastián Bonanni, Germán David Schrott and Juan Pablo Busalmen	1274–1279
Rates and potential mechanism of anaerobic nitrate-dependent microbial pyrite oxidation Julian Bosch and Rainer U. Meckenstock	1280–1283
Spectroelectrochemical analysis of electroactive microbial biofilms Diego Millo	1284–1290
The quest to achieve the detailed structural and functional characterization of CymA Ricardo O. Louro and Catarina M. Paquete	1291–1294

On the road to improve the bioremediation and electricity-harvesting skills of <i>Geobacter sulfurreducens</i> : functional and structural characterization of multihaem cytochromes Leonor Morgado, Ana P. Fernandes, Joana M. Dantas, Marta A. Silva and Carlos A. Salgueiro	1295–1301
Biological photovoltaics: intra- and extra-cellular electron transport by cyanobacteria Robert W. Bradley, Paolo Bombelli, Stephen J.L. Rowden and Christopher J. Howe	1302–1307
Does bioelectrochemical cell configuration and anode potential affect biofilm response? Amit Kumar, Krishna Katuri, Piet Lens and Dónal Leech	1308–1314
Microscale gradients and their role in electron-transfer mechanisms in biofilms Haluk Beyenal and Jerome T. Babauta	1315–1318
Magnetochrome: a <i>c</i> -type cytochrome domain specific to magnetotactic bacteria Marina I. Siponen, Géraldine Adryanczyk, Nicolas Ginet, Pascal Arnoux and David Pignol	1319–1323
Mineral respiration under extreme acidic conditions: from a supramolecular organization to a molecular adaptation in <i>Acidithiobacillus ferrooxidans</i> Magali Roger, Cindy Castelle, Marianne Guiral, Pascale Infossi, Elisabeth Lojou, Marie-Thérèse Giudici-Ortoniconi and Marianne Ilbert	1324–1329
Electrochemical communication between microbial cells and electrodes via osmium redox systems Kamrul Hasan, Sunil A. Patil, Dónal Leech, Cecilia Hägerhäll and Lo Gorton	1330–1335
<hr/>	
Rab GTPases and Their Interacting Proteins in Health and Disease University College Cork, Cork, Ireland, 11–13 June 2012 Edited by Mary McCaffrey (University College Cork, Ireland).	
<hr/>	
The Rab family of proteins: 25 years on Eoin E. Kelly, Conor P. Horgan, Bruno Goud and Mary W. McCaffrey	1337–1347
Small GTPases and <i>Brucella</i> entry into the endoplasmic reticulum Xavier de Bolle, Jean-Jacques Letesson and Jean-Pierre Gorvel	1348–1352
The role of Rab GTPases in the transport of vacuoles containing <i>Legionella pneumophila</i> and <i>Coxiella burnetii</i> Camille A. Hardiman, Justin A. McDonough, Hayley J. Newton and Craig R. Roy	1353–1359
Rab11 proteins in health and disease Eoin E. Kelly, Conor P. Horgan and Mary W. McCaffrey	1360–1367
Molecular basis of Charcot–Marie–Tooth type 2B disease Cecilia Bucci and Maria De Luca	1368–1372
Rab GTPase localization and Rab cascades in Golgi transport Suzanne R. Pfeffer	1373–1377
Rho family GTPases Alan Hall	1378–1382

Rab27a and melanosomes: a model to investigate the membrane targeting of Rabs
Antonia E.G. Booth, Miguel C. Seabra and Alistair N. Hume **1383–1388**

Selected oral communications

Quantitative image analysis approaches for probing Rab GTPase localization and function in mammalian cells
Vasanth R. Singan, Kenan Handzic and Jeremy C. Simpson **1389–1393**

RAB3GAP1, *RAB3GAP2* and *RAB18*: disease genes in Micro and Martsolf syndromes
Mark T. Handley and Irene A. Aligianis **1394–1397**

Novel functions for Rab GTPases in multiple aspects of tumour progression
Chiara Recchi and Miguel C. Seabra **1398–1403**

Rab25 in cancer: a brief update
Shreya Mitra, Kwai W. Cheng and Gordon B. Mills **1404–1408**

Role of the Rab11 pathway in negative-strand virus assembly
Emily A. Bruce, Amanda Stuart, Mary W. McCaffrey and Paul Digard **1409–1415**

Roles for myosin Va in RNA transport and turnover
Mary W. McCaffrey and Andrew J. Lindsay **1416–1420**

Specific localization of Rabs at intracellular membranes
Julia Blümer, Yao-Wen Wu, Roger S. Goody and Aymelt Itzen **1421–1425**

Rab proteins of the endoplasmic reticulum: functions and interactors
Carolina Ortiz Sandoval and Thomas Simmen **1426–1432**

How Bugs Kill Bugs: Progress and Challenges in Bacteriocin Research

University of Nottingham, U.K., 16–18 July 2012

Edited by Colin Kleanthous (Oxford, U.K.), Chris Penfold (Nottingham, U.K.) and Dan Walker (Glasgow, U.K.).

How Bugs Kill Bugs: Progress and Challenges in Bacteriocin Research
Christopher N. Penfold, Daniel Walker and Colin Kleanthous **1433–1437**

Resistance is futile: the bacteriocin model for addressing the antibiotic resistance challenge
Margaret A. Riley, Sandra M. Robinson, Christopher M. Roy, Morgan Dennis, Vivian Liu and Robert L. Dorit **1438–1442**

Translocation trumps receptor binding in colicin entry into *Escherichia coli*
Karen S. Jakes **1443–1448**

Import of periplasmic bacteriocins targeting the murein
Volkmar Braun, Stephanie Helbig and Silke I. Patzer **1449–1455**

Microcins in action: amazing defence strategies of Enterobacteria
Sylvie Rebuffat **1456–1462**

Pathways of colicin import: utilization of BtuB, OmpF porin and the TolC drug-export protein Stanislav D. Zakharov, Onkar Sharma, Mariya Zhalnina, Eiki Yamashita and William A. Cramer	1463–1468
Colicin A binds to a novel binding site of TolA in the <i>Escherichia coli</i> periplasm Christopher N. Penfold, Chan Li, Ying Zhang, Mireille Vankemmelbeke and Richard James	1469–1474
Colicin translocation across the <i>Escherichia coli</i> outer membrane Nicholas G. Housden and Colin Kleanthous	1475–1479
Energetics of colicin import revealed by genetic cross-complementation between the Tol and Ton systems Roland Llobès, Emilie Goemaere, Xiang Zhang, Eric Cascales and Denis Duché	1480–1485
Hijacking cellular functions for processing and delivery of colicins E3 and D into the cytoplasm Miklos de Zamaroczy and Liliana Mora	1486–1491
‘Bac’ to the future: bioengineering lantibiotics for designer purposes Evelyn M. Molloy, R. Paul Ross and Colin Hill	1492–1497
Bacteriocins active against plant pathogenic bacteria Rhys Grinter, Joel Milner and Daniel Walker	1498–1502
Using a bacteriocin structure to engineer a phage lysin that targets <i>Yersinia pestis</i> Petra Lukacik, Travis J. Barnard and Susan K. Buchanan	1503–1506
Regulating colicin synthesis to cope with stress and lethality of colicin production Darja Žgur-Bertok	1507–1511
Killing as means of promoting biodiversity Monica I. Abrudan, Sarah Brown and Daniel E. Rozen	1512–1516
Membrane activities of colicin nuclease domains: analogies with antimicrobial peptides Mireille Vankemmelbeke, Richard James and Christopher N. Penfold	1517–1521
Selected oral communications	
Colicin M, a peptidoglycan lipid-II-degrading enzyme: potential use for antibacterial means? Thierry Touzé, Hélène Barreateau, Meriem El Ghachi, Ahmed Bouhss, Aurélie Barnéoud-Arnolet, Delphine Patin, Emmanuelle Sacco, Didier Blanot, Michel Arthur, Denis Duché, Roland Llobès and Dominique Mengin-Lecreulx	1522–1527
Antimicrobial mechanism of lantibiotics Mohammad R. Islam, Jun-ichi Nagao, Takeshi Zendo and Kenji Sonomoto	1528–1533
Intrinsically disordered proteins: lessons from colicins Oliver Hecht, Colin Macdonald and Geoffrey R. Moore	1534–1538

The role of bacterial membrane proteins in the internalization of microcin MccJ25 and MccB17 Indran Mathavan and Konstantinos Beis	1539–1543
Application of anti-listerial bacteriocins: monitoring enterocin expression by multiplex relative reverse transcription-PCR D. Ross Williams and Panagiotis Chanos	1544–1548
Colicin-like bacteriocins as novel therapeutic agents for the treatment of chronic biofilm-mediated infection Carla L. Brown, Karen Smith, Laura McCaughey and Daniel Walker	1549–1552
MMBL proteins: from lectin to bacteriocin Maarten G.K. Ghequire, Remy Loris and René De Mot	 1553–1559
Structure and uptake mechanism of bacteriocins targeting peptidoglycan renewal Kornelius Zeth	 1560–1565
