Keilin Memorial Lecture

The ATP synthase: the understood, the uncertain and the unknown

John E. Walker

1-16

Early Career Research Award

Type IV secretion machinery: molecular architecture and function

Vidya Chandran

17-28

Biochemical Society Focused Meetings

Regulation of Protein Trafficking and Function by Palmitoylation

St Anne's College, Oxford, U.K., 23-25 August 2012

Edited by Luke Chamberlain (University of Strathclyde, U.K.) and Tony Magee (Imperial College London, U.K.).

Mechanism and function of DHHC S-acyltransferases

Maurine E. Linder and Benjamin C. Jennings

29-34

Adaptation of low-resolution methods for the study of yeast microsomal polytopic membrane proteins: a methodological review

Arlette Bochud, Nagaraju Ramachandra and Andreas Conzelmann

35-42

Chemical approaches for profiling dynamic palmitoylation

Brent R. Martin

43-49

Palmitoylation of influenza virus proteins

Michael Veit, Marina V. Serebryakova and Larisa V. Kordyukova

50-55

Chemical proteomics: a powerful tool for exploring protein lipidation

Elisabeth M. Storck, Remigiusz A. Serwa and Edward W. Tate

56-61

Palmitoylation and the trafficking of peripheral membrane proteins

Luke H. Chamberlain, Kimon Lemonidis, Maria Sanchez-Perez, Martin W. Werno, Oforiwa A. Gorleku and Jennifer Greaves

62-66

Regulation of large conductance calcium- and voltage-activated potassium (BK) channels by S-palmitoylation Michael J. Shipston	67–71
Palmitoylation-dependent regulation of glutamate receptors and their PDZ domain-containing partners Gareth M. Thomas and Richard L. Haganir	72–78
The role of palmitoylation in regulating Ras localization and function Sharon Eisenberg, Alex J. Laude, Alison J. Beckett, Craig J. Mageean, Veronica Aran, Maria Hernandez-Valladares, Yoav I. Henis and Ian A. Prior	79–83
Palmitoylation, pathogens and their host Mathieu Blanc, Sanja Blaskovic and F. Gisou van der Goot	84–88
Selected oral communications	
Palmitoylation of serotonin receptors Nataliya Gorinski and Evgeni Ponimaskin	89–94
Regulation of the cardiac Na ⁺ pump by palmitoylation of its catalytic and regulatory subunits Jacqueline Howie, Lindsay B. Tulloch, Michael J. Shattock and William Fuller	95–100

Translating the Powerhouse: Redox Signalling

Imperial College London, London, U.K., 6–9 September 2012

Organized by Giovanni Mann (King's College London, U.K.) and Michael Murphy (MRC Mitochondrial Biology Unit, Cambridge, U.K.). Edited by Michael Murphy.

Metabolic triad in brain aging: mitochondria, insulin/IGF-1 signalling and JNK signalling Fei Yin, Tianyi Jiang and Enrique Cadenas	101–105
Glutathione and γ -glutamylcysteine in the antioxidant and survival functions of mitochondria Ruben Quintana-Cabrera and Juan P. Bolaños	106–110
Beyond retrograde and anterograde signalling: mitochondrial–nuclear interactions as a means for evolutionary adaptation and contemporary disease susceptibility Scott W. Ballinger	111–117
Platelet mitochondrial function: from regulation of thrombosis to biomarker of disease Sergey Zharikov and Sruti Shiva	118–123
Role of p90 ^{RSK} in regulating the Crabtree effect: implications for cancer Emily K. Redman, Paul S. Brookes and Marcin K. Karcz	124–126
Convergent mechanisms for dysregulation of mitochondrial quality control in metabolic disease: implications for mitochondrial therapeutics Tanecia Mitchell, Balu Chacko, Scott W. Ballinger, Shannon M. Bailey, Jianhua Zhang and Victor Darley-Usmar	127–133

G-Protein-Coupled Receptors: from Structural Insights to Functional Mechanisms

Monash University Prato Centre, Prato, Italy, 12–14 September 2012

Edited by **Bice Chini (CNR Institute of Neuroscience, Italy), Marco Parenti (University of Milano–Bicocca, Italy), David Poyner (Aston University, U.K.) and Mark Wheatley (University of Birmingham, U.K.).**

G-Protein-Coupled Receptors: from Structural Insights to Functional Mechanisms Bice Chini, Marco Parenti, David R. Poyner and Mark Wheatley	135–136
Arresting inflammation: contributions of plasma membrane and endosomal signalling to neuropeptide-driven inflammatory disease Fiore Cattaruzza, Daniel P. Poole and Nigel W. Bunnett	137–143
How ligands and signalling proteins affect G-protein-coupled receptors' conformational landscape Sophie Mary, Jean-Alain Fehrentz, Marjorie Damian, Pascal Verdié, Jean Martinez, Jacky Marie and Jean-Louis Banères	144–147
Fluorescent ligands to investigate GPCR binding properties and oligomerization Martin Cottet, Orestis Faklaris, Amadine Falco, Eric Trinquet, Jean-Philippe Pin, Bernard Mouillac and Thierry Durroux	148–153
The orthosteric agonist-binding pocket in the prototypic class B G-protein-coupled secretin receptor Laurence J. Miller and Maoqing Dong	154–158
The importance of interactions with helix 5 in determining the efficacy of β -adrenoceptor ligands Tony Warne and Christopher G. Tate	159–165
Deciphering the specific role of $G_{\alpha i/o}$ isoforms: functional selective oxytocin ligands and somatostatin SST5 receptor mutants Marta Busnelli, Erika Peverelli, Giovanna Mantovani, Anna Spada and Bice Chini	166–171
Recent advances in understanding GLP-1R (glucagon-like peptide-1 receptor) function Cassandra Koole, Kavita Pabreja, Emilia E. Savage, Denise Wootten, Sebastian G.B. Furness, Laurence J. Miller, Arthur Christopoulos and Patrick M. Sexton	172–179
The activation of the CGRP receptor James Barwell, Mark Wheatley, Alex C. Conner, Bruck Taddese, Shabana Vohra, Christopher A. Reynolds and David R. Poyner	180–184
Preparation of purified GPCRs for structural studies Robert M. Cooke, Markus Koglin, James C. Errey and Fiona H. Marshall	185–190
Selected oral communications	
Enlightening G-protein-coupled receptors on the plasma membrane using super-resolution photoactivated localization microscopy Marco Scarselli, Paolo Annibale, Claudio Gerace and Aleksandra Radenovic	191–196
Insights into the molecular evolution of oxytocin receptor ligand binding Johannes Koehbach, Thomas Stockner, Christian Bergmayr, Markus Muttenthaler and Christian W. Gruber	197–204

Characterization of the dynamic events of GPCRs by automated computational simulations Hugo Gutiérrez-de-Terán, Xabier Bello and David Rodríguez	205–212
Molecular sampling of the allosteric binding pocket of the TSH receptor provides discriminative pharmacophores for antagonist and agonists Inna Hoyer, Ann-Karin Haas, Annika Kreuchwig, Ralf Schülelein and Gerd Krause	213–217
Ligand bias at the μ -opioid receptor Eamonn Kelly	218–224
Molecular mechanisms of platelet P2Y ₁₂ receptor regulation Margaret R. Cunningham, Shaista P. Nisar and Stuart J. Mundell	225–230
Atypical chemokine receptors: from silence to sound Cinzia Cancellieri, Alessandro Vacchini, Massimo Locati, Raffaella Bonecchi and Elena M. Borroni	231–236

Microvesiculation and Disease

London Metropolitan University, London, U.K., 13–14 September 2012

Edited by Annie Bligh, Una Fairbrother, Sheelagh Heugh and Jameel Inal (London Metropolitan University, U.K.).

Microvesiculation and Disease Jameel M. Inal, Una Fairbrother and Sheelagh Heugh	237–240
Exosomes as a novel way of interneuronal communication Mathilde Chivet, Charlotte Javalet, Fiona Hemming, Karin Pernet-Gallay, Karine Laulagnier, Sandrine Fraboulet and Rémy Sadoul	241–244
Immune modulation of T-cell and NK (natural killer) cell activities by TEXs (tumour-derived exosomes) Theresa L. Whiteside	245–251
Microvesicles and exosomes as vehicles between protozoan and host cell communication Poliana Deolindo, Ingrid Evans-Osses and Marcel Ivan Ramirez	252–257
Interplay of host–pathogen microvesicles and their role in infectious disease Jameel M. Inal, Ephraim A. Ansa-Addo and Sigrun Lange	258–262
Exosomes and communication between tumours and the immune system: are all exosomes equal? Angélique Bobrie and Clotilde Théry	263–267
Interactions of human monocytes with TMVs (tumour-derived microvesicles) Monika Baj-Krzyworzeka, Jarosław Baran, Rafał Szatanek, Bożenna Mytar, Maciej Siedlar and Marek Zembala	268–272
Role of extracellular membrane vesicles in intercellular communication of the tumour microenvironment Katrin J. Svensson and Mattias Belting	273–276
The <i>cis</i> -acting signals that target proteins to exosomes and microvesicles Jr-Ming Yang and Stephen J. Gould	277–282

Role of stem-cell-derived microvesicles in the paracrine action of stem cells Giovanni Camussi, Maria Chiara Deregibus and Vincenzo Cantaluppi	283–287
Extracellular vesicles in the circulation: are erythrocyte microvesicles a confounder in the plasma haemoglobin assay? Karen M.K. de Vooght, Cedric Lau, Pim P.M. de Laat, Richard van Wijk, Wouter W. van Solinge and Raymond M. Schiffelers	288–292
Selected oral communications	
The role of microvesicles in cancer progression and drug resistance Samireh Jorfi and Jameel M. Inal	293–298
Coxsackievirus B transmission and possible new roles for extracellular vesicles Jameel M. Inal and Samireh Jorfi	299–302
A 32-month follow-up study of nanovesicle concentrations in blood from 12 patients with gastrointestinal stromal tumour treated with imatinib Eva Ogorevc, Roman Štukelj, Apolonija Bedina-Zavec, Vid Šuštar, Metka Šimundić, Veronika Kralj-Iglič and Rado Janša	303–308

Independent Meeting

Molecular Biology of Archaea 3

Max Planck Institute for Terrestrial Microbiology, Marburg, Germany, 2–4 July 2012

Edited by Sonja-Verena Albers (Max Planck Institute for Terrestrial Microbiology, Germany), Bettina Siebers (University of Duisberg-Essen, Germany) and Finn Werner (University College London, U.K.).

Lytic viruses infecting organisms from the three domains of life Jamie C. Snyder and Mark J. Young	309–313
End-resection at DNA double-strand breaks in the three domains of life John K. Blackwood, Neil J. Rzechorzek, Sian M. Bray, Joseph D. Maman, Luca Pellegrini and Nicholas P. Robinson	314–320
Structure and dynamics of the crenarchaeal nucleoid Rosalie P.C. Driessen and Remus Th. Dame	321–325
<i>Cis</i> -regulatory logic in archaeal transcription Eveline Peeters, Nuno Peixeiro and Guennadi Sezonov	326–331
<i>Thermococcus kodakarensis</i> DNA replication Zhuo Li, Lori M. Kelman and Zvi Kelman	332–338
Evolutionary advantages of polyploidy in halophilic archaea Jörg Soppa	339–343
Regulatory RNAs in archaea: first target identification in Methanoarchaea Daniela Prasse, Claudia Ehlers, Rolf Backofen and Ruth A. Schmitz	344–349
Translation initiation in the crenarchaeon <i>Sulfolobus solfataricus</i> : eukaryotic features but bacterial route Anna La Teana, Dario Benelli, Paola Londei and Udo Bläsi	350–355

Archaeal transcription: making up for lost time Magdalena N. Wojtas and Nicola G.A. Abrescia	356–361
Archaeology of RNA polymerase: factor swapping during the transcription cycle Fabian Blombach, Tina Daviter, Daniel Fielden, Dina Grohmann, Katherine Smollett and Finn Werner	362–367
Modern biophysical approaches probe transcription-factor-induced DNA bending and looping Andreas Gietl and Dina Grohmann	368–373
The ring of confidence: a haloarchaeal CRISPR/Cas system Lisa-Katharina Maier, Britta Stoll, Jutta Brendel, Susan Fischer, Friedhelm Pfeiffer, Mike Dyall-Smith and Anita Marchfelder	374–378
Attack from both ends: mRNA degradation in the crenarchaeon <i>Sulfolobus solfataricus</i> Elena Evguenieva-Hackenberg and Udo Bläsi	379–383
Hot and sweet: protein glycosylation in Crenarchaeota Benjamin H. Meyer and Sonja-Verena Albers	384–392
Archaeal biofilms: widespread and complex Sabrina Fröls	393–398
Atypical protein kinases of the RIO family in archaea Dominik Esser and Bettina Siebers	399–404
Genetic manipulation in <i>Sulfolobus islandicus</i> and functional analysis of DNA repair genes Changyi Zhang, Bin Tian, Suming Li, Xiang Ao, Kevin Dalgaard, Serkan Gökce, Yunxiang Liang and Qunxin She	405–410
C/D box sRNA, CRISPR RNA and tRNA processing in an archaeon with a minimal fragmented genome Hagen Richter, Sabine Mohr and Lennart Randau	411–415
A brief history of the discovery of hyperthermophilic life Karl O. Stetter	416–420
Evolution of Na ⁺ and H ⁺ bioenergetics in methanogenic archaea Katharina Schlegel and Volker Müller	421–426
CoA biosynthesis in archaea Haruyuki Atomi, Hiroya Tomita, Takuya Ishibashi, Yuusuke Yokooji and Tadayuki Imanaka	427–431
Add salt, add sugar: N-glycosylation in <i>Haloferax volcanii</i> Lina Kaminski, Shai Naparstek, Lina Kandiba, Chen Cohen-Rosenzweig, Adi Arbiv, Zvia Konrad and Jerry Eichler	432–435
Membrane vesicles, nanopods and/or nanotubes produced by hyperthermophilic archaea of the genus <i>Thermococcus</i> Evelyne Marguet, Marie Gaudin, Emilie Gauliard, Isabelle Fourquaux, Stephane le Blond du Plouy, Ikuo Matsui and Patrick Forterre	436–442

Genomics and biology of Rudiviruses, a model for the study of virus–host interactions in Archaea

David Prangishvili, Eugene V. Koonin and Mart Krupovic

443–450

From archaeon to eukaryote: the evolutionary dark ages of the eukaryotic cell

Joran Martijn and Thijs J.G. Ettema

451–457

Sulfolobus islandicus: a model system for evolutionary genomics

Changyi Zhang, David J. Krause and Rachel J. Whitaker

458–462
