Colworth Medal Lecture

Rethinking the clockwork: redox cycles and non-transcriptional control of circadian rhythms

Lisa Wu and Akhilesh B. Reddy

1–10

Early Career Research Award

Protein kinase networks that limit TLR signalling

Kristopher Clark

11–24

Early Career Research Award

Discontinuous leading-strand synthesis: a stop-start story

Joseph T.P. Yeeles

25–34

Biochemical Society Focused Meeting

Signalling 2013: from Structure to Function

University of York, U.K., 17–19 June 2013

Edited by Nicholas Brindle (University of Leicester, U.K.), Sandip Patel (University College London, U.K.) and Stephen Yarwood (University of Glasgow, U.K.).

Functional implications of assigned, assumed and assembled PKC structures

Mark Linch, Philippe Riou, Jeroen Claus, Angus J. Cameron, Julien De Naurois, Banafshe Larijani, Tony Ng, Neil Q. McDonald and Peter J. Parker

35–41

Regulating the level of intracellular hydrogen peroxide: the role of peroxiredoxin IV

Rachel E. Martin, Zhenbo Cao and Neil J. Bulleid

42–46

Explorations of time and electrochemical potential: opportunities for fresh perspectives on signalling proteins Julea N. Butt	47–51
Structure and function of RLIP76 (RalBP1): an intersection point between Ras and Rho signalling Helen R. Mott and Darerca Owen	52–58
Regulation of IL-6-type cytokine responses by MAPKs Ana P. Costa-Pereira	59–62
Structural organization of signalling to and from IP ₃ receptors Colin W. Taylor, Stephen C. Tovey, Ana M. Rossi, Cristina I. Lopez Sanjurjo, David L. Prole and Taufiq Rahman	63–70
AMPK: a cellular energy sensor primarily regulated by AMP Graeme J. Gowans and D. Grahame Hardie	71–75
NF- κ B and the cell cycle Adeline C. Ledoux and Neil D. Perkins	76–81
PARP inhibitors for anticancer therapy Nicola Curtin	82–88
Selected oral communications	
cAMP signalling in the vasculature: the role of Epac (exchange protein directly activated by cAMP) Owain Llŷr Roberts and Caroline Dart	89–97
Functions of inorganic polyphosphates in eukaryotic cells: a coat of many colours Cristina Azevedo and Adolfo Saiardi	98–102
New strategies to inhibit KEAP1 and the Cul3-based E3 ubiquitin ligases Peter Canning and Alex N. Bullock	103–107
Structures of soluble guanylate cyclase: implications for regulatory mechanisms and drug development Opher Gileadi	108–113
Structure–function relationships and supramolecular organization of the EGFR (epidermal growth factor receptor) on the cell surface Sarah R. Needham, Laura C. Zanetti-Domingues, Michael Hirsch, Daniel J. Rolfe, Christopher J. Tynan, Selene K. Roberts, Marisa L. Martin-Fernandez and David T. Clarke	114–119
Structure, function and inhibition of the phosphoinositide 3-kinase p110 α enzyme Jack U. Flanagan and Peter R. Shepherd	120–124
New strategies for the treatment of ovarian cancer Elizabeth Robinson, Natalie Fisher, Vasileios Stamelos, Charles Redman and Alan Richardson	125–129
Recent advances in the structural molecular biology of Ets transcription factors: interactions, interfaces and inhibition Christopher D.O. Cooper, Joseph A. Newman and Opher Gileadi	130–138
Allosteric linkers in cAMP signalling Madoka Akimoto, Kody Moleschi, Stephen Boulton, Bryan VanSchouwen, Rajeevan Selvaratnam, Susan S. Taylor and Giuseppe Melacini	139–144

HDX-MS takes centre stage at unravelling kinase dynamics

Kristina Lorenzen and Tony Pawson

145–150

Independent Meeting

Translation UK 2013

University of Kent, U.K., 4–5 July 2013.

Edited by Emma Mead and Rosalyn Masterton (University of Kent, U.K.).

Control and regulation of mRNA translation

Emma J. Mead, Rosalyn J. Masterton, Tobias von der Haar, Mick F. Tuite and C. Mark Smales

151–154

Challenges and obstacles related to solving the codon bias riddles

Tamir Tuller

155–159

Controlling translation elongation efficiency: tRNA regulation of ribosome flux on the mRNA

Barbara Gorgoni, Elizabeth Marshall, Matthew R. McFarland, M. Carmen Romano and Ian Stansfield

160–165

The diverse roles of the eIF4A family: you are the company you keep

Wei-Ting Lu, Anna Wilczynska, Ewan Smith and Martin Bushell

166–172

The translational machinery is an optimized molecular network that affects cellular homeostasis and disease

Eleanna Kazana and Tobias von der Haar

173–176

Pleiotropic molecular effects of the *Mycobacterium ulcerans* virulence factor mycolactone underlying the cell death and immunosuppression seen in Buruli ulcer

Belinda Hall and Rachel Simmonds

177–183

mRNA deadenylation by Pan2–Pan3

Jana Wolf and Lori A. Passmore

184–187

Biochemical Society-sponsored session at the Society for Experimental Biology 2013 Annual Meeting

Cell Polarity: Mechanisms and Modelling

Valencia Conference Centre, Spain, 3–6 July 2013

Edited by Kathryn Ayscough (University of Sheffield, U.K.).

Dynamics of ezrin and EBP50 in regulating microvilli on the apical aspect of epithelial cells

Raghuvir Viswanatha, Anthony Bretscher and Damien Garbett

189–194

Tight junction regulation through vesicle trafficking: bringing cells together Sarah J. Fletcher and Joshua Z. Rappoport	195–200
Cdc42 regulates polarized growth and cell integrity in fission yeast Sergio A. Rincón, Miguel Estravís and Pilar Pérez	201–205
Rho GTPase–phosphatidylinositol phosphate interplay in fungal cell polarity Robert A. Arkowitz and Martine Bassilana	206–211
Rho-GTPase-regulated vesicle trafficking in plant cell polarity Xu Chen and Jiří Friml	212–218
Elucidating the regulation of complex signalling systems in plant cells Junli Liu, Keith Lindsey and Patrick J. Hussey	219–223
