Biochemical Society Focused Meeting

Protein Kinase C Signalling in Health and Disease

Science Gallery, Trinity College Dublin, Ireland, 24–25 June 2014.

Edited by Aideen Long (Trinity College Dublin, Ireland) and Maria O'Connell (University of East Anglia, U.K.).

Tuning the signalling output of protein kinase C

Corina E. Antal and Alexandra C. Newton

1477–1483

PKC θ -regulated signalling in health and disease

Pulak R. Nath and Noah Isakov

1484–1489

Protein kinase C: a regulator of cytoskeleton remodelling and T-cell migration

Aideen Long and Michael Freeley

1490–1497

Imaging tumour heterogeneity of the consequences of a PKC α -substrate interaction in breast cancer patients

Gregory Weitsman, Katherine Lawler, Muireann T. Kelleher, James E. Barrett, Paul R. Barber, Eamon Shamil, Frederic Festy, Gargi Patel, Gilbert O. Fruhwirth, Lufei Huang, Iain D.C. Tullis, Natalie Woodman, Enyinnaya Ofo, Simon M. Ameer-Beg, Sheeba Irshad, John Condeelis, Cheryl E. Gillett, Paul A. Ellis, Borivoj Vojnovic, Anthony C.C. Coolen and Tony Ng

1498–1505

Lipid-based patterning of the immunological synapse

Morgan Huse

1506–1511

Protein kinase C θ : the pleiotropic T-cell signalling intermediate

Katarzyna Wachowicz and Gottfried Baier

1512–1518

PKC η is an anti-apoptotic kinase that predicts poor prognosis in breast and lung cancer

Udi Zurgil, Assaf Ben-Ari, Noa Rotem-Dai, Galia Karp, Ella Krasnitsky, Sigal A. Frost and Etta Livneh

1519–1523

Selective protein kinase C θ (PKC θ) inhibitors for the treatment of autoimmune diseases

Adam Curnock, Clare Bolton, Peter Chiu, Elisabeth Doyle, Damien Fraysse, Matthias Hesse, Julie Jones, Peter Weber and Juan-Miguel Jimenez

1524–1528

The many hats of protein kinase C δ : one enzyme with many functions

Nir Qvit and Daria Mochly-Rosen

1529–1533

Regulation of the cytokinesis cleavage furrow by PKC ϵ

Nicola Brownlow, Tanya Pike, Victoria Crossland, Jeroen Claus and Peter Parker

1534–1537

Differential targeting of cPKC and nPKC decodes and regulates Ca $^{2+}$ and lipid signalling

Xin Hui, Lars Kaestner and Peter Lipp

1538–1542

C1 domain-targeted isophthalates as protein kinase C modulators: structure-based design, structure–activity relationships and biological activities

Virpi Talman, Riccardo Provenzani, Gustav Boije af Gennäs, Raimo K. Tuominen and Jari Yli-Kauhaluoma

1543–1549

Targeting PKC θ in skeletal muscle and muscle diseases: good or bad?

Valeria Marrocco, Piera Fiore, Luca Madaro, Annunziata Crupi, Biliana Lozanoska-Ochser and Marina Bouché

1550–1555

Protein kinase C in cellular transformation: a valid target for therapy?

Anuradha Tarafdar and Alison M. Michie

1556–1562

Angiogenesis and Vascular Remodelling: New Perspectives

University of Chester, U.K., 14–16 July 2014.

Edited by Roy Bicknell (Birmingham University Medical School, U.K.), Michael Cross (University of Liverpool, U.K.), Stuart Egginton (University of Leeds, U.K.), Victoria Heath (University of Birmingham, U.K.) and Ian Zachary (University College London, U.K.).

Notch functions in developmental and tumour angiogenesis by diverse mechanisms

Thaned Kangsamaksin, Ian W. Tattersall and Jan Kitajewski

1563–1568

Exploring the role of endothelium in the tumour response to anti-angiogenic therapy

Yi-Chao He, Michael M. Halford, Marc G. Achen and Steven A. Stacker

1569–1575

VEGF, Notch and TGF β /BMPs in regulation of sprouting angiogenesis and vascular patterning

Yi Jin, David Kaluza and Lars Jakobsson

1576–1583

The role of ERK5 in endothelial cell function

Gopika N. Nithianandarajah-Jones, Bettina Wilm, Christopher E.P. Goldring, Jürgen Müller and Michael J. Cross

1584–1589

Redefining the role(s) of endothelial $\alpha v\beta 3$ -integrin in angiogenesis

Samuel J. Atkinson, Tim S. Ellison, Veronica Steri, Emma Gould and Stephen D. Robinson

1590–1595

The development of anti-angiogenic heparan sulfate oligosaccharides

Gordon C. Jayson, Gavin J. Miller, Steen U. Hansen, Marek Barath, John M. Gardiner and Egle Avizienyte

1596–1600

Mechanisms that influence tumour response to VEGF-pathway inhibitors

Neil R. Smith, Stephen R. Wedge, Aurelien Pommier and Simon T. Barry

1601–1607

The emerging quest for the optimal angiostatic combination therapy

Arjan W. Griffioen, Andrea Weiss, Robert H. Berndsen, U. Kulsoom Abdul, Marije T. te Winkel and Patrycja Nowak-Sliwinska

1608–1615

Capillary growth in human skeletal muscle: physiological factors and the balance between pro-angiogenic and angiostatic factors

Ylva Hellsten and Birgitte Hoier

1616–1622

Neuropilin regulation of angiogenesis

Anastasia Lampropoulou and Christiana Ruhrberg

1623–1628

miRNAs in post-ischaemic angiogenesis and vascular remodelling Jaimy Saif and Costanza Emanueli	1629–1636
Split for the cure: VEGF, PDGF-BB and intussusception in therapeutic angiogenesis Roberto Gianni-Barrera, Mariateresa Bartolomeo, Brigitte Vollmar, Valentin Djonov and Andrea Banfi	1637–1642
Syndecans in angiogenesis and endothelial cell biology Giulia De Rossi and James R. Whiteford	1643–1646
The glioblastoma vasculature as a target for cancer therapy Anna Dimberg	1647–1652
Therapeutic vaccination targeting the tumour vasculature Anna-Karin Olsson	1653–1657
A review of ELTD1, a pro-angiogenic adhesion GPCR David M. Favara, Alison H. Banham and Adrian L. Harris	1658–1664
Regulation of neovascularization by S-glutathionylation via the Wnt5a/sFlt-1 pathway Colin E. Murdoch, Markus M. Bachschmid and Reiko Matsui	1665–1670

The Biological and Biomedical Consequences of Protein Moonlighting

Charles Darwin House, London, U.K., 29–30 July 2014.

Edited by Brian Henderson and Andrew Martin (University College London, U.K.).

Protein moonlighting: a new factor in biology and medicine Brian Henderson and Andrew C.R. Martin	1671–1678
An introduction to protein moonlighting Constance J. Jeffery	1679–1683
An evolutionary perspective on protein moonlighting Shelley D. Copley	1684–1691
Can bioinformatics help in the identification of moonlighting proteins? Sergio Hernández, Alejandra Calvo, Gabriela Ferragut, Luís Franco, Antoni Hermoso, Isaac Amela, Antonio Gómez, Enrique Querol and Juan Cedano	1692–1697
The role of proteomics in studies of protein moonlighting Robert J. Beynon, Dean Hammond, Victoria Harman and Yvonne Woolerton	1698–1703
Structural biology of moonlighting: lessons from antibodies Andrew C.R. Martin	1704–1708
The evolution of protein moonlighting: adaptive traps and promiscuity in the chaperonins Mario A. Fares	1709–1714
Evolution of moonlighting proteins: insight from yeasts Carlos Gancedo, Carmen-Lisset Flores and Juana M. Gancedo	1715–1719
An overview of protein moonlighting in bacterial infection Brian Henderson	1720–1727

Peptidylprolyl <i>cis-trans</i> isomerases of <i>Legionella pneumophila</i> : virulence, moonlighting and novel therapeutic targets Janine Rasch, Can M. Ünal and Michael Steinert	1728–1733
Protein moonlighting in parasitic protists Michael L. Ginger	1734–1739
Moonlighting proteins in sperm–egg interactions François M. Petit, Catherine Serres and Jana Auer	1740–1743
Extracellular cell stress proteins as biomarkers of human disease A. Graham Pockley, Brian Henderson and Gabriele Multhoff	1744–1751
Immunoglobulin heavy-chain-binding protein (BiP): a stress protein that has the potential to be a novel therapy for rheumatoid arthritis Gabriel S. Panayi and Valerie M. Corrigall	1752–1755
Chemical genetics and its application to moonlighting in glycolytic enzymes Da-Woon Jung, Woong-Hee Kim and Darren R. Williams	1756–1761
Dual life of TPPP/p25 evolved in physiological and pathological conditions Judit Oláh and Judit Ovádi	1762–1767
Selenocysteine robustness versus cysteine versatility: a hypothesis on the evolution of the moonlighting behaviour of peroxiredoxins Fulvio Saccoccia, Francesco Angelucci, Giovanna Boumis, Gianni Desiato, Adriana E. Miele and Andrea Bellelli	1768–1772
Comparison of moonlighting guanylate cyclases: roles in signal direction? Lubna Freihat, Victor Muleya, David T. Manallack, Janet I. Wheeler and Helen R. Irving	1773–1779
Computational characterization of moonlighting proteins Ishita K. Khan and Daisuke Kihara	1780–1785
Moonlighting and pleiotropy within two regulators of the degradation machinery: the proteasome lid and the CSN Elah Pick and Laylan Bramasole	1786–1791
Fructose-1,6-bisphosphate aldolase (FBA) – a conserved glycolytic enzyme with virulence functions in bacteria: ‘ill met by moonlight’ Fariza Shams, Neil J. Oldfield, Karl G. Wooldridge and David P.J. Turner	1792–1795
Protein moonlighting in iron metabolism: glyceraldehyde-3-phosphate dehydrogenase (GAPDH) Vishant Mahendra Boradia, Manoj Raje and Chaaya Iyengar Raje	1796–1801
