Inorganic Polyphosphate (polyP) Physiology

Held at Charles Darwin House, London, U.K., 7 September 2015.

Polyphosphate and acidocalcisomes Noelia Lander, Ciro Cordeiro, Guozhong Huang and Roberto Docampo	1-6
Inorganic polyphosphate (polyP) as an activator and structural component of the mitochondrial permeability transition pore Maria E. Solesio, Pia A. Elustondo, Eleonora Zakharian and Evgeny V. Pavlov	7-12
The new world of inorganic polyphosphates Cristina Azevedo and Adolfo Saiardi	13-17
Polyphosphate as a haemostatic modulator Nicola J. Mutch	18-24
Inorganic polyphosphate in cardiac myocytes: from bioenergetics to the permeability transition pore and cell survival Elena N. Dedkova	25-34
Caveats in studies of the physiological role of polyphosphates in coagulation Tomas L. Lindahl, Sofia Ramström, Niklas Boknäs and Lars Faxälv	35-39
Role of inorganic polyphosphate in mammalian cells: from signal transduction and mitochondrial metabolism to cell death Plamena R. Angelova, Artyom Y. Baev, Alexey V. Berezhnov and Andrey Y. Abramov	40-45
A cautionary (spectral) tail: red-shifted fluorescence by DAPI-DAPI interactions Sidney Omelon, John Georgiou and Wouter Habraken	46-49

Carbohydrate Active Enzymes in Medicine and Biotechnology

Held at University of St Andrews, Fife, Scotland, U.K., 19-21 August 2015.

The reaction mechanism of retaining glycosyltransferases Albert Ardèvol, Javier Iglesias-Fernández, Victor Rojas-Cervellera and Carme Rovira	51-60
Recent structural and mechanistic insights into protein <i>O</i> -GalNAc glycosylation Ramon Hurtado-Guerrero	61-67
α -Glucan biosynthesis and the GlgE pathway in <i>Mycobacterium tuberculosis</i> Stephen Bornemann	68-73

Xylan decoration patterns and the plant secondary cell wall molecular architecture Marta Busse-Wicher, Nicholas J. Grantham, Jan J. Lyczakowski, Nino Nikolovski and Paul Dupree	74–78
Carbohydrate-active enzymes: sequences, shapes, contortions and cells Gideon J. Davies and Spencer J. Williams	79–87
O-GlcNAc transferase inhibitors: current tools and future challenges Riccardo Trapannone, Karim Rafie and Daan M.F. Van Aalten	88–93
Learning from microbial strategies for polysaccharide degradation Glyn R. Hemsworth, Guillaume Déjean, Gideon J. Davies and Harry Brumer	94–108
Sulfatases and radical SAM enzymes: emerging themes in glycosaminoglycan metabolism and the human microbiota Alhosna Benjdia and Olivier Berteau	109–115
Galactokinase promiscuity: a question of flexibility? Megan McAuley, Helena Kristiansson, Meilan Huang, Angel L. Pey and David J. Timson	116–122
From endolysins to Artilysin [®] s: novel enzyme-based approaches to kill drug-resistant bacteria Hans Gerstmans, Lorena Rodríguez-Rubio, Rob Lavigne and Yves Briers	123–128
Glycosyltransferase engineering for carbohydrate synthesis John B. McArthur and Xi Chen	129–142
Discovery and industrial applications of lytic polysaccharide mono-oxygenases Katja S. Johansen	143–149
Beta galactosidases in Arabidopsis and tomato – a mini review Balakumaran Chandrasekar and Renier A.L. van der Hoorn	150–158
Iminosugar inhibitors of carbohydrate-active enzymes that underpin cereal grain germination and endosperm metabolism Vasilios M. E. Andriotis, Martin Rejzek, Michael D. Rugen, Birte Svensson, Alison M. Smith and Robert A. Field	159–165
Sialidases from gut bacteria: a mini-review Nathalie Juge, Louise Tailford and C David Owen	166–175

Signalling 2015: Cellular Functions of Phosphoinositides and Inositol Phosphates

Held at Robinson College, University of Cambridge, Cambridge, U.K., 1–4 September 2015.

Phosphatidylinositol 3,5-bisphosphate: regulation of cellular events in space and time Natsuko Jin, Michael J. Lang and Lois S. Weisman	177–184
---	----------------

The amyloid precursor protein (APP) binds the PIKfyve complex and modulates its function Heather Currinn and Thomas Wassmer	185–190
Towards pharmacological intervention in inositol pyrophosphate signalling Stephen B. Shears	191–196
Phosphatidylinositol and phosphatidic acid transport between the ER and plasma membrane during PLC activation requires the Nir2 protein Yeun Ju Kim, Maria Luisa Guzman-Hernandez, Eva Wisniewski, Nicolas Echeverria and Tamas Balla	197–201
A tale of two inositol trisphosphates Robin Irvine	202–211
Specificity and disease in the ubiquitin system Viduth K. Chaugule and Helen Walden	212–227
Does PtdIns(4,5) P_2 concentrate so it can multi-task? Gerald R.V. Hammond	228–233
Enzymes of yeast polyphosphate metabolism: structure, enzymology and biological roles Rūta Gerasimaitė and Andreas Mayer	234–239
Regulation of PtdIns(3,4,5) P_3 /Akt signalling by inositol polyphosphate 5-phosphatases Matthew J. Eramo and Christina A. Mitchell	240–252
Phosphate, inositol and polyphosphates Thomas M. Livermore, Cristina Azevedo, Bernadett Kolozsvari, Miranda S.C. Wilson and Adolfo Saiardi	253–259
Type III phosphatidylinositol 4 kinases: structure, function, regulation, signalling and involvement in disease Gillian L. Dornan, Jacob A. McPhail and John E. Burke	260–266
The sperm phospholipase C- ζ and Ca^{2+} signalling at fertilization in mammals Karl Swann and F. Anthony Lai	267–272
The PTEN protein: cellular localization and post-translational regulation Nick R. Leslie, Nisha Kriplani, Miguel A. Hermida, Virginia Alvarez-Garcia and Helen M. Wise	273–278
Inositol polyphosphate multikinase (IPMK) in transcriptional regulation and nuclear inositolide metabolism M. Merced Malabanan and Raymond D. Blind	279–285
RdgB α reciprocally transfers PA and PI at ER–PM contact sites to maintain PI(4,5) P_2 homeostasis during phospholipase C signalling in <i>Drosophila</i> photoreceptors Shamshad Cockcroft, Kathryn Garner, Shweta Yadav, Evelyn Gomez-Espinoza and Padinjat Raghu	286–292
Phosphoinositide signalling in type 2 diabetes: a β -cell perspective Lucia E. Rameh and Jude T. Deeney	293–298

Phosphoinositides in the nucleus and myogenic differentiation: how a nuclear turtle with a PHD builds muscle

Nullin Divecha

299–306

Emerging evidence of signalling roles for PI(3,4) P_2 in Class I and II PI3K-regulated pathways

Phillip T. Hawkins and Len R. Stephens

307–314

Bioenergetics in mitochondria, bacteria and chloroplasts

Held at Schloss Rauschholzhausen, Ebsdorfergrund, Germany, 10–13 April 2013.

Electrochemical insights into the mechanism of NiFe membrane-bound hydrogenases

Lindsey A. Flanagan and Alison Parkin

315–328
