Volume 5, Part 4, 1977

569TH MEETING, SUSSEX

	PAGE
Colloquium: Carbohydrates and the Mammary Gland	
Control of glucose metabolism in lactating-rat mammary gland: Effects of other substrates, insulin and starvation. <i>By</i> D. H. Williamson & A. M. Robinson	829
Pyruvate disposal by lactating-rat mammary gland. <i>By</i> M. A. Goheer & H. G. Coore	834
Human milk fucosyltransferases. <i>By</i> J.-P. Prieels, T. Beyers & R. L. Hill	838
Lactose synthesis: Metabolic consequences of its location in the Golgi apparatus. <i>By</i> N. J. Kuhn	840
The carbohydrate portions of milk glycoproteins (<i>by title only</i>). <i>By</i> P. Jollès	840
Colloquium: Invertebrate Neurotransmitters	
Putative transmitters in invertebrates. <i>By</i> R. J. Walker	841
Glutamatergic synapses in invertebrates. <i>By</i> P. N. R. Usherwood	845
Cholinergic synaptic transmission in invertebrate central nervous systems. <i>By</i> D. B. Sattelle	849
Biochemical aspects of cholinergic transmission in insect central nervous system. <i>By</i> J. F. Donnellan & R. Harris	852
5-Hydroxytryptamine in identified neurons. <i>By</i> V. W. Pentreath	854
Biochemical aspects of dopamine (3,4-dihydroxyphenethylamine) in an invertebrate nervous system: Uptake, metabolism and analysis of receptors. <i>By</i> N. N. Osborne	858
Properties of γ -aminobutyric acid receptor/ionophore proteins from crayfish muscle. <i>By</i> R. W. Olsen, B. Meiners, P. Kehoe & M. K. Ticku	863
Colloquium: Calcium and Membrane Function	
The interrelated roles of calcium ion and cyclic nucleotides in control of secretory processes (<i>by title only</i>). <i>By</i> H. Rasmussen	866
Calcium as a mediator of hormone action. <i>By</i> C. N. Hales, A. K. Campbell, J. P. Luzio & K. Siddle	866
Calcium ion fluxes and insulin release in pancreatic islets. <i>By</i> W. J. Malaisse	872
Intracellular localization of calcium in pancreatic B-cells. <i>By</i> S. L. Howell	875

	PAGE
Strontium ions as a probe for the role of alkaline-earth metal ions in histamine secretion. <i>By</i> J. C. Foreman, M. B. Hallett & J. L. Mongar	879
Calcium ions, cyclic guanosine monophosphate and the regulation of thyroid membrane function. <i>By</i> J. E. Dumont & J. Mockel	883
Insulin β -granule-plasma-membrane interactions: Effects of glucose and glucose 6-phosphate. <i>By</i> N. R. Lazarus & B. Davis	884
 Colloquium: Hormonal Control of Lipid Metabolism	
Short-term hormonal control of fat metabolism in the liver. <i>By</i> D. A. Hems	886
Regulation of liver lipid metabolism in experimental obesity. <i>By</i> B. Jeanrenaud, P. Freychet, F. Assimacopoulos-Jeannet, Y. le Marchand & C. Karakash	890
Regulation of the conversion of glucose into fat in white adipose tissue by insulin. <i>By</i> R. Denton, B. Bridges, R. Brownsey, G. Evans, W. Hughes & D. Stansbie	894
Hormones and fatty acid metabolism in white adipose tissue. <i>E. D. Saggerson, S. R. Sooranna & R. D. Harper</i>	900
Regulation of adipose-tissue lipid metabolism in obese-hyperglycaemic mice. <i>By</i> J. Winand, J.-P. Dehaye & J. Christophe	903
Hormonal control of brown-adipose-tissue metabolism. <i>By</i> D. G. Nicholls	908
 Communications	
The effects of cortisol on [2- ¹⁴ C]glycine incorporation into proteins and on transfer ribonucleic acid methylase activity in rhabdomyosarcoma of rats. <i>By</i> W. De Loecker, F. De Wever, D. Doms & M. L. Stas	912
The measurement of ribosomal ribonucleic acid synthesis in rat liver and skeletal muscle <i>in vivo</i> . <i>By</i> G. K. Grimble & D. J. Millward	913
Partial sequences of cytoplasmic initiator methionine transfer ribonucleic acid from <i>Scenedesmus obliquus</i> D3. <i>By</i> P. O. Olins, F. T. Jay & D. S. Jones	916
The use of oligodeoxythymidylate-cellulose in isolating messenger ribonucleic acid-protein particles and in detecting developmental changes in the composition of rat cerebral polyribosomes. <i>By</i> R. M. Elliott, L. Lim & A. N. Davison	917
Globin-gene expression during erythroid development in the rabbit. <i>By</i> P. M. Clissold, H. R. V. Arnstein & C. J. Chesterton	918
Control by serum of amino acid transport and deoxyribonucleic acid synthesis in cultured avian fibroblasts. <i>By</i> A. F. Borghetti, M. Tramacere & G. G. Guidotti	921
Nuclear-protein changes in the first cleavage cycle in fertilized sea-urchin eggs. <i>By</i> M. G. Ord & L. A. Stocken	923
Nucleosomes and deoxyribonucleic acid methylation. <i>By</i> E. L. McKay, J. T. Douglas, R. L. P. Adams & R. H. Burdon	926
Regulation of hepatic nuclear transcription in unfed rats. <i>By</i> B. E. H. Coupar & C. J. Chesterton	927
Homology between Ti-plasmids of <i>Agrobacterium tumefaciens</i> : Hybridization studies using electron microscopy. <i>By</i> G. Engler, M. Van Montagu, I. Zaenen & J. Schell	930
	1977

	PAGE
Comparative study of Ti-plasmids in <i>Agrobacterium tumefaciens</i> by use of restriction enzymes. <i>By</i> A. Depicker, J. Schell & M. Van Montagu	931
Poly(adenosine diphosphate ribose) polymerase purification in an aqueous/organic-solvent system. <i>By</i> C. Tsopanakis, E. McLaren, A. Tsopanakis & S. Shall	932
Study of the translational stability of messenger ribonucleic acids for <i>Lytechinus pictus</i> and HeLa-cell histones injected into <i>Xenopus</i> oocytes. <i>By</i> G. Huez, G. Marbaix, E. Weinberg, D. Gallwitz, E. Hubert & Y. Cleuter	936
Mammalian cells recognize growth factors in the G ₁ -interval, and organize a series of signals and events necessary for deoxyribonucleic acid replication and cell division. <i>By</i> L. J. de Asua, M. K. O'Farrell, D. Clingan & P. S. Rudland	937
Synthesis and modification of nuclear proteins in serum-stimulated 3T3 cells. <i>By</i> M. K. O'Farrell	940
Transfection in <i>Streptomyces virginiae</i> . <i>By</i> V. Konvalinkova, P. Roelants & M. Mergeay	941
<i>Physarum polycephalum</i> histones. <i>By</i> S. Corbett, S. Miller, V. J. Robinson, H. R. Matthews & E. M. Bradbury	943
Heterology and homology between the ribonucleic acid species of plant viruses as evaluated by molecular hybridization. <i>By</i> J. Kummert, M. Demeure, D. Portetelle, P. Gepts, A. Angarita & J. Semal	946
Poly(adenosine diphosphate ribose) in wheat. <i>By</i> A. J. Whitby & W. J. D. Whish	948
Poly(adenosine diphosphate ribose) polymerase and deoxyribonucleic acid damage. <i>By</i> M. I. Davies, S. Shall & C. J. Skidmore	949
Synthesis and complete processing of a high-molecular-weight precursor polypeptide to viral structural proteins in toad oocytes micro-injected with avian myeloblastosis virus ribonucleic acid. <i>By</i> J. Ghysdael, E. Hubert, M. Travníček, D. P. Bolognesi, Y. Cleuter, G. Huez, G. Marbaix, D. Portetelle & H. Chantrenne	950
Cross-reacting nuclear non-histone antigens from <i>Physarum polycephalum</i> and Ehrlich ascites cells. <i>By</i> K. Zanker, R. J. Inglis, H. R. Matthews & E. M. Bradbury	953
A simplified method for selective removal of 3'-polyadenylic acid segments from ribonucleic acid. <i>By</i> E. M. Gillis & C. Seurinck-Opsomer	956
Extraction and purification of transfer ribonucleic acid methyltransferases from a higher plant, <i>Phaseolus vulgaris</i> L. <i>By</i> M. J. F. Abeels	957
Characterization of conditionally lethal mutations affecting ribosomal proteins in <i>Escherichia coli</i> . <i>By</i> T. Cabezón, G. Delcuve, A. Herzog, J. Petre & A. Bollen	958
Calcium and lipolysis in adipose tissue: Effects of ethanedioxybis(ethylamine)-tetra-acetate (EGTA) and ionophore A23187. <i>By</i> K. Siddle & C. N. Hales	959
Relationships between the effect of adrenaline and ionophore A23187 on adenosine 3':5'-cyclic monophosphate and on free intracellular calcium ion concentrations in pigeon erythrocyte 'ghosts'. <i>By</i> A. K. Campbell & R. L. Dormer	962
Ionophore- and antigen-induced histamine release from mast cells and a comparison of their inhibition. <i>By</i> K. J. Barrett-Bee	965
The role of calcium in lymphocyte activation by the ionophore A23187 and phytohaemagglutinin. <i>By</i> E. Kondorosi & J. E. Kay	967

	PAGE
Adenosine 3':5'-cyclic monophosphate in lifting of glucose repression of α -glucosidase by fluoride in yeast. <i>By</i> A. Wiseman & T.-K. Lim	970
Control of bovine adrenocortical adenylate cyclase activity by guanine nucleotides. <i>By</i> P. Glynn, D. M. F. Cooper & D. Schulster	973
Cyclic nucleotide phosphodiesterase from <i>Spinacea oleracea</i> L.: Subcellular distribution and properties. <i>By</i> M. Edwards, E. G. Brown, R. P. Newton & C. J. Smith	975
Inhibition of liver phosphorylase phosphatase by adenosine 3':5'-cyclic monophosphate-dependent and -independent protein inhibitors. <i>By</i> J. Goris, G. Defreyn & W. Merlevede	978
Purification and detection of deoxyribonucleoside kinases. <i>By</i> A. Baxter, L. M. Carswell & J. P. Durham	979
Cyclic nucleotide phosphodiesterases from rat pancreas: Differential regulation by a calcium-dependent activator protein. <i>By</i> A. Vandermeers, M. C. Vandermeers, J. Rathe, A. Delforge & J. Christophe	981
Evidence that fatty acid oxidation stimulates gluconeogenesis in newborn rats. <i>By</i> P. R. Ferré, J.-P. Pegorier, J. R. Girard & E. B. Marliss	982
Gluconeogenesis in isolated chicken hepatocytes. <i>By</i> A. J. Dickson & D. R. Langslow	983
Inhibition of fatty acid synthesis and stimulation of glucose release by angiotensin II and adrenaline in the perfused mouse liver. <i>By</i> G. Y. Ma, C. D. Gove & D. A. Hems	986
Effect of pyruvate on pyruvate dehydrogenase activity and fatty acid oxidation in rat fat-cells. <i>By</i> S. R. Sooranna, R. D. Harper & E. D. Saggerson	989
Influence of extracellular calcium ions on hormonal stimulation of glycogen breakdown in hepatocyte suspensions. <i>By</i> P. D. Whitton, L. M. Rodrigues & D. A. Hems	992
The limitative role of free fatty acids in the response of adipose tissue to food deprivation. <i>By</i> J. I. Davies & J. E. Souness	995
Adenosine deaminase and the spontaneous lipolysis of fat-cells from rats exposed to a food-deprived-re-feeding cycle. <i>By</i> J. E. Souness & J. I. Davies	997
Regulation by insulin and free fatty acids of pyruvate dehydrogenase activity in perfused rat liver. <i>By</i> D. L. Topping, M. A. Goheer, H. G. Coore & P. A. Mayes	1000
Effects of fructose concentration on adenine nucleotide concentrations and pyruvate dehydrogenase activity of perfused rat liver. <i>By</i> D. L. Topping & P. A. Mayes	1001
Effect of insulin on hepatic lipogenesis. <i>By</i> F. Assimacopoulos-Jeannet, C. Karakash, Y. le Marchand & B. Jeanrenaud	1002
The use of cholesterol oxidase in an improved method for measurement of the true rate of cholesterol biosynthesis. <i>By</i> G. F. Gibbons & C. R. Pullinger	1003
The reversibility of the <i>N</i> -oxidation of chlorphentermine <i>in vivo</i> . <i>By</i> M. Michel-Lipowsky, J. Caldwell & R. L. Smith	1005
Structure-metabolism relationships of arylacetic acids: The metabolic fate of naphth-2-ylacetic acid <i>in vivo</i> . <i>By</i> T. S. Emudianughe, J. Caldwell & R. L. Smith	1006
	1977

	PAGE
Uptake and metabolism of cholesterol by rat corpus-luteum mitochondria. <i>By</i> H. A. Leaver & G. S. Boyd	1009
Preliminary studies of the metabolism of <i>N</i> -nitroso[2,5- ¹⁴ C]pyrrolidine in the rat. <i>By</i> R. C. Cottrell, P. J. Young, I. A. Herod, B. G. Lake, J. C. Phillips & S. D. Gangolli	1011
Further studies on the metabolism of dimethylnitrosamine by rat liver <i>in vitro</i> . <i>By</i> B. G. Lake, R. C. Cottrell, J. C. Phillips, S. D. Gangolli & A. G. Lloyd	1013
Depletion of coenzymes at the site of rapidly growing tissues due to alkylation: The biochemical basis of the teratogenic effects of alkylating agents, including organophosphorus and certain other compounds. <i>By</i> R. Schoental	1016
The role of iron in haem degradation. <i>By</i> S. B. Brown & M. S. Grundy	1017
Bile-pigment isomers from degradation of haemoglobin M Iwate. <i>By</i> S. B. Brown, J. C. Docherty & T. B. Bradley	1020
The biosynthesis of mannose-containing lipids as intermediates in the glycosylation of proteins of rabbit mammary gland. <i>By</i> D. A. White	1022
The oxygenation of the 3-methyl group of 7 β -(5-D-aminoadipamido)-3-methylceph-3-em-4-carboxylic acid (desacetoxyccephalosporin C) by extracts of <i>Acetomonium chrysoenum</i> . <i>By</i> S. J. Brewer, J. E. Farthing & M. K. Turner	1024
The carbamoylation of the 3-hydroxymethyl group of 7 α -methoxy-7 β -(5-D-aminoadipamido)-3-hydroxymethylceph-3-em-4-carboxylic acid (desacetyl-7 α -methoxycephalosporin C) by homogenates of <i>Streptomyces clavuligerus</i> . <i>By</i> S. J. Brewer, T. T. Boyle & M. K. Turner	1026
Effects of (+)-catechin <i>in vitro</i> and <i>in vivo</i> on disturbances produced in rat liver endoplasmic reticulum by carbon tetrachloride. <i>By</i> O. Danni, B. C. Sawyer & T. F. Slater	1029
Glutamine conjugation of phenylacetic acid in the ferret. <i>By</i> P. C. Hirom, J. R. Idle, P. Millburn & R. T. Williams	1033
The mechanism of enhancement of rat liver tryptophan pyrrolase activity by acute ethanol administration. <i>By</i> A. A.-B. Badawy & M. Evans	1035
The mechanism of inhibition of rat liver tryptophan pyrrolase activity by chronic ethanol administration. <i>By</i> M. Evans & A. A.-B. Badawy	1037
A method for measuring rates of lactose synthesis <i>in vivo</i> in laboratory animals. <i>By</i> D. T. Carrick & N. J. Kuhn	1038
Lactose synthesis, galactosyltransferase activity and plasma insulin concentration throughout lactation in the rat. <i>By</i> C. J. Wilde & N. J. Kuhn	1040
Effects of substituting monoglycerides for natural fats in the diet on serum lipids in fasting man. <i>By</i> A. Christophe & G. Verdonk	1041
Murein hydrolase activity and septum deficiency in <i>Escherichia coli</i> genetically constitutive for the β -oxidation pathway. <i>By</i> E. Vanderwinkel, M. De Vlieghere & A. Feller	1043
Mucopolysaccharides of brain and viscera in two cases of mucopolysaccharidosis. <i>By</i> G. A. F. Van Dessel, A. R. Lagrou, J.-J. R. Martin & W. S. H. Dierick	1045
Calcium ion-dependence of sugar-transport regulation in atrial muscle. <i>By</i> I. Bihler & C. Sawh	1047

	PAGE
Light-induced changes in auxin metabolism during hook opening of etiolated bean seedlings. <i>By</i> J. A. De Greef, R. Van Hoof & R. Caubergs	1049
Mechanism of action of somatostatin: Growth-hormone release and [⁴⁵ Ca]calcium ion translocation caused by increasing the extracellular potassium ion concentration. <i>By</i> R. J. Bicknell & J. G. Schofield	1051
The gastrointestinal absorption of liposomally entrapped insulin in normal rats. <i>By</i> H. M. Patel & B. E. Ryman	1054
3- <i>O</i> -Methylglucose transport into lymphocytes and the effect of insulin. <i>By</i> C. P. J. Caygill & J. B. Pring	1056
Pancreatic insulin and glucagon content and secretion after infection of mice with EMC virus. <i>By</i> F. Zaheer, S. L. Howell, K. W. Taylor & D. R. Gamble	1058
High-molecular-weight forms of diuretic hormone from <i>Rhodnius prolixus</i> . <i>By</i> L. Hughes	1060
The effect of spermidine on lysosomes in thyroid follicle cells. <i>By</i> D. M. Gilbert, G. M. Besser, L. Bitensky & J. Chayen	1063
Binding of thyrotropin to membranes from adipose tissue. <i>By</i> D. L. Gill, N. J. Marshall & R. P. Ekins	1064
Alkylation of methionine residues in pituitary growth hormone. <i>By</i> O. Gaston-Parry & M. Wallis	1067
Hypothalamic and peripheral relations during the oestrous cycle of the female rat: The oestrogen receptor in the uterus. <i>By</i> S. Thrower, L. Lim & J. O. White	1069
Hypothalamic and peripheral relations during the oestrous cycle of the female rat: The oestrogen receptor in the hypothalamus. <i>By</i> J. O. White, L. Lim & S. Thrower	1072
Adenosine 3':5'-cyclic monophosphate in nerve-terminal fractions from neocortical tissues: Its augmentation by a post-stimulation process. <i>By</i> M. E. Newman & H. McIlwain	1074
The effect of amino acids on ouabain-induced [⁴⁵ Ca]calcium ion uptake into slices of rat cerebral cortex. <i>By</i> D. R. Riddall & A. N. Davison	1075
The role of trehalose in the nutrition of the locust nervous system. <i>By</i> R. H. C. Strang & E. M. Clement	1076
The effects of anoxia on the metabolism and activity of the ganglia of the locust nervous system. <i>By</i> E. M. Clement & R. H. C. Strang	1077
Lack of persistence in the haemolymph accounts for the low toxicity of the putative transmitter L-glutamate towards the sheep maggot fly <i>Lucilia sericata</i> . <i>By</i> R. G. Wilson, R. J. Hart, C. Potter & S. N. Irving	1078
Effect of electrical stimulation of the autonomic nerve supply on the concentration of guanosine 3':5'-cyclic monophosphate and the activity of guanylate cyclase in rat salivary glands and their relationship to the induction of growth. <i>By</i> J. P. Durham, F. R. Butcher, T. C. Muir & D. Templeton	1081
The isolation of proteoheparan sulphate from sheep brain. <i>By</i> C. J. B. White	1083
Cerebral acid hydrolases as indicators of the progress of viral encephalitis. <i>By</i> A. J. Suckling, S. Jagelman & H. E. Webb	1085
The mechanism of the isomerization of cholest-5-en-3-one to cholest-4-en-3-one by cholesterol oxidase. <i>By</i> A. G. Smith & C. J. W. Brooks	1088
	1977

	PAGE
Synthesis and secretion by rabbit bone-marrow macrophages in culture of a neutral proteinase that degrades cartilage proteoglycans. <i>By</i> P. Hauser & G. Vaes	1091
Do mercurials and thyroxine potentiate calcium-dependent phospholipase activity in mitochondria? <i>By</i> M. M. Al-Shaikhaly & H. Baum	1093
Inactivation and re-activation of mitochondrial alcohol dehydrogenase from Baker's Yeast. <i>By</i> M. Wiesenfeld, L. Schimpfessel & R. Crokaert	1096
Dihydrofolate reductase: Partial sequence of the <i>Lactobacillus casei</i> enzyme and homology with other dihydrofolate reductases. <i>By</i> K. E. Batley & H. R. Morris	1097
The capacity of nucleotide affinity adsorbents for NAD- and NADP- dependent dehydrogenases. <i>By</i> D. H. Watson & P. D. G. Dean	1099
Kinetics of binding of cytochrome <i>c</i> oxidase from rat liver to an immunoadsorbent. <i>By</i> J. H. Walker & R. J. Mayer	1101
A purification scheme for ribonuclease activity(ies) in hen's-egg yolk. <i>By</i> J. Wouters & J. Stockx	1104
Peptidases hydrolysing hordein in germinating barley. <i>By</i> E. D. Baxter	1107
Further evidence for the aspecificity of the alkaline phosphohydrolase from hen's-egg yolk. <i>By</i> I. Debruyne & J. Stockx	1109
pH study of the inactivation of a β -D-xylosidase with thiol reagents (<i>by title only</i>). <i>By</i> E. Saman, M. Claeysens & C. K. De Bruyne	1111
Electrophoretic desorption of affinity adsorbents. <i>By</i> P. D. G. Dean, P. Brown, M. J. Leyland, D. H. Watson, S. Angal & M. J. Harvey	1111
Hydrolysis of para-substituted aryl β -D-xylopyranosides and $\beta(1\rightarrow4)$ xylo-oligosaccharides by an induced β -D-xylosidase from <i>Bacillus pumilus</i> PRL B12. <i>By</i> E. Van Doorslaer, H. Kersters-Hilderson & C. K. De Bruyne	1113
Micro-calorimetric evidence for the functioning of a membrane-adenosine triphosphatase complex in <i>Phaseolus vulgaris</i> (French Bean). <i>By</i> J.-P. Verbelen, E. Moereels & J. A. De Greef	1114
Determination of endocellulase activity by viscosimetry. <i>By</i> J. Demeester, W. Cooreman, M. Bracke & A. Lauwers	1115
Alkaline phosphatase: Properties in crude homogenates of human diploid fibroblasts. <i>By</i> F. J. Vanneville, A. F. Van Elsen & J. G. Leroy	1117
A radioimmunoassay for tubulin. <i>By</i> M. Joniau, M. De Brabander & J. De Mey	1118
Structural studies on avian pancreatic polypeptide. <i>By</i> J. E. Pitts, J. A. Jenkins, I. J. Tickle, T. L. Blundell & S. P. Wood	1119
The structure at 0.3nm (3Å) resolution of the acid proteinase from <i>Endothia parasitica</i> . <i>By</i> J. A. Jenkins, I. J. Tickle, T. Sewell & T. L. Blundell	1120
The relation of structure to storage and receptor binding of glucagon. <i>By</i> S. Dockerill, T. L. Blundell, K. Sasaki, I. J. Tickle & S. P. Wood	1121
Structure of iturin and iturin-like substances. <i>By</i> L. Delcambe, F. Peypoux, F. Besson, M. Guinand & G. Michel	1122
Molecular weights of liver phosphorylase kinase (<i>by title only</i>). <i>By</i> G. van de Werve & H.-G. Hers	1124

	PAGE
Chemical modification of rat α -foetoprotein with <i>p</i> -chloromercuribenzoate and a mercurated oestradiol affinity label. <i>By</i> V. Versee & A. O. Barel	1124
A mechanism for ferritin-iron oxidation and deposition. <i>By</i> R. R. Crichton & F. Roman	1126
Isolation and characterization of plant ferritins. <i>By</i> Y. Ponce-Ortiz & R. R. Crichton	1128
A kinetic study of the mechanism of ferritin formation. R. R. Crichton & E. P. Pâques	1130
Effects of phosphatidylinositol-specific phospholipase C from <i>Staphylococcus aureus</i> on plasma-membrane enzymes. <i>By</i> M. G. Low & J. B. Finean	1131
The modulation of cell-membrane fluidity by catalytic hydrogenation. <i>By</i> P. J. Quinn, D. Chapman, C. Vigo & B. R. Boar	1132
Structure of the inner surface of lymphocyte plasma membrane. <i>By</i> F. S. Walsh, B. H. Barber & M. J. Crumpton	1134
Orientation of glycoproteins in pig lymphocyte plasma membrane. <i>By</i> F. S. Walsh, B. H. Barber & M. J. Crumpton	1137
A comparison of haemoglobin-free human erythrocyte 'ghosts' prepared under isoionic and hypoionic conditions. <i>By</i> M. M. Billah, J. B. Finean, R. Coleman & R. H. Michell	1139
The molecular and cell-surface changes associated with morphological alterations mediated by dibutyryladenosine 3':5'-cyclic monophosphate in rat cells. <i>By</i> M. Rieber & A. T. Meza	1140
Phospholipids of the milk-fat-globule membrane and the mouse mammary-tumour virus isolated from the milk of infected mice. <i>By</i> L. Gosselin, C.-M. Calberg-Bacq, C. François, C. Gosselin-Rey, S. Kozma & P. M. Osterrieth	1142
Chemically induced cell fusion <i>in vitro</i> of erythrocytes from patients with liver diseases. <i>By</i> M. J. Hope, K. R. Bruckdorfer, J. S. Owen & J. A. Lucy	1144
Some properties of liposomes of different sizes. <i>By</i> P. Sharma, D. A. Tyrrell & B. E. Ryman	1146
The storage of small molecules in the octopus salivary gland: Nuclear-magnetic-resonance study. <i>By</i> A. Daniels, J. Krebs, P. Wright & R. J. P. Williams	1149
Studies on the entrapment of the calcium-activated photoprotein obelin and carbonic anhydrase in liposomes and their interaction with isolated adipocytes. <i>By</i> R. L. Dormer, A. K. Campbell & G. R. Newman	1151
The role of protein in the structure of barley endosperm cell walls. <i>By</i> I. S. Forrest	1154
The immune response of mice to <i>Micrococcus lysodeikticus</i> : Evidence for serum-mediated immunoregulation. <i>By</i> R. Verloes, V. Machtelincx, J. Theunissen & L. Kanarek	1156
Biochemical properties that accompany the production of homogeneous antibody response: A general mechanism hypothesis. <i>By</i> R. Verloes, M. de Ridder & L. Kanarek	1158
The effect of fatty acids and albumin on the transformation of rodent spleen lymphocytes stimulated by phytohaemagglutinin, concanavalin A or bacterial lipopolysaccharide. <i>By</i> W. M. Tsang, C. Weyman & A. D. Smith	1159
Cholesterol uptake by erythrocyte membranes. <i>By</i> C. J. Kirby & C. Green	1160

	PAGE
Adenylate cyclase activity in hepatic plasma membranes from obese-hyperglycaemic mice. <i>By</i> J.-P. Dehaye, J. Winand & J. Christophe	1162
Recycling of fibroblast plasma-membrane antigens internalized during endocytosis. <i>By</i> Y.-J. Schneider, P. Tulkens & A. Trouet	1164
Phospholipid analysis of nephromas and unaffected cortex of tumour-bearing human kidneys. <i>By</i> R. Geers, A. Christophe, F. Matthys, G. Verdonk & G. Popelier	1167
Localization of lytic activities in the plasmode of <i>Physarum polycephalum</i> : β -Galactosidase and acid phosphatase. <i>By</i> N. Massamba	1169
Rat liver lysosomes of rats at different ages. <i>By</i> J. Mertens-Strijthagen, C. de Schrijver, S. Wattiaux-de Coninck & R. Wattiaux	1170
Inhibition of protein degradation induced by dimeric ribonuclease A in hepatoma cells. <i>By</i> J. Bartholeyns & P. Baudhuin	1172
Isopycnic equilibration of hepatoma-cell homogenates at different times during the cell cycle. <i>By</i> J. Quintart & P. Baudhuin	1174
Interferon resistance in leukaemic cells and lysosome stability. <i>By</i> J. W�renne & J. Bartholeyns	1176
Secretion of lysosomal enzymes by platelets. <i>By</i> D. E. MacIntyre, R. M. McMillan & J. L. Gordon	1178
Transport of 5-hydroxytryptamine by endothelial cells. <i>By</i> J. D. Pearson, H. J. Olverman & J. L. Gordon	1181
Colloquium: Induction of Deoxyribonucleic Acid Synthesis: Cell-Cycle Control	
Deoxyribonucleic acid synthesis during early embryogenesis. <i>By</i> J. Brachet	1184
Initiation of deoxyribonucleic acid replication in <i>Xenopus</i> (<i>by title only</i>). <i>By</i> C. C. Ford	1190
Induction of deoxyribonucleic acid synthesis and chromatin assembly by <i>Xenopus</i> egg cytoplasm (<i>by title only</i>). <i>By</i> R. A. Laskey	1190
Surface signals and cellular regulation of growth (<i>by title only</i>). <i>By</i> G. M. Edelman	1190
The induction of deoxyribonucleic acid synthesis and transition probability (<i>by title only</i>). <i>By</i> J. A. Smith	1190
Cell-cycle control in yeasts. <i>By</i> P. Nurse	1191
Inducible pathways in deoxyribonucleic acid repair, mutagenesis and carcinogenesis. <i>By</i> M. Radman	1194
Human genetic disorders with defects in the repair of deoxyribonucleic acid. <i>By</i> A. R. Lehmann & C. F. Ariett	1199
BOOK REVIEWS	1205
BIOCHEMICAL REVIEWS	
Dolichol phosphate, a coenzyme in the glycosylation of animal membrane-bound glycoproteins. <i>By</i> F. W. Hemming	1223
A biochemical approach to the control of dental caries. <i>By</i> J. A. Cole	1232
