OBITUARY NOTICE	
Professor Richard Alan Morton	1
572ND MEETING, LONDON	
Colloquium: Compartmentation and Metabolic Control	
The limited contribution of the nuclear envelope to metabolic compartmentation. <i>By G. Siebert</i>	5
The involvement of some mitochondrial transporting systems in metabolism <i>(by title only). By J. B. Chappell</i>	9
Cytosolic organization of carbohydrate-metabolism enzymes in cross-striated muscle. <i>By D. Pette</i>	9
Features of metabolic pathway separation <i>(by title only). By B. Hess</i>	11
Gluconeogenesis as a compartmentalized activity. <i>By M. F. Utter & D. T. Chuang</i>	11
Colloquium: The Role of Protein Phosphorylation in the Control of Carbohydrate Metabolism	
The purification and characterization of protein phosphatase inhibitor-1 from rabbit skeletal muscle. <i>By P. Cohen & G. A. Nimmo</i>	17
Role of phosphorylase kinase and cyclic AMP-dependent protein kinase in the regulation of phosphorylase phosphatase. <i>By P. Gergely & G. Bot</i>	21
Mammalian phosphorylase phosphatase. <i>By E. Y. C. Lee, R. L. Mellgren, J. H. Aylward & S. D. Killilea</i>	25
Hormonal regulation of glycogenolysis and gluconeogenesis in isolated rat hepatocytes. <i>By L. Hue & J. E. Felú</i>	29
Hormonal control on glycogen-metabolizing enzymes in liver. <i>By D. A. Hems</i>	33
Colloquium: Biophysical Studies of Membrane-Protein Interactions	
Three-dimensional-structure analysis by electron microscopy <i>(by title only).</i> <i>By N. Unwin</i>	38
Freeze-etch studies of membrane proteins: A review. <i>By D. M. Shotton</i>	38
[² H]Hydrogen and [³¹ P]phosphorus nuclear-magnetic-resonance and neutron- diffraction studies of membranes. <i>By J. Seelig</i>	40
Spin-label studies of protein-lipid interactions. <i>By D. Marsh</i>	42
Fluorescence studies and the nature of ion channels. <i>By A. G. Lee</i>	43
Membrane proteins in detergent solutions <i>(by title only). By C. Tanford</i>	46

	PAGE
Molecular mechanisms of non-specific drug action (<i>by title only</i>). <i>By</i> J. C. Metcalfe, T. R. Hesketh, G. A. Smith, C. A. Keightley & C. Richards	46
Colloquium: Common Subunits and the Economy of Use of Informational Macromolecules	
The lipoamide dehydrogenase component of the 2-oxo acid dehydrogenase multienzyme complexes of <i>Escherichia coli</i> . <i>By</i> R. N. Perham, R. A. Harrison & J. P. Brown	47
Function of thioredoxin in oxidoreductions and as a subunit of phage-T7 deoxyribonucleic acid polymerase. <i>By</i> A. Holmgren & G.-B. Karlsson	50
The function and structure of the protein-synthesis elongation factors Tu and Ts in phage-Q β replicase. <i>By</i> T. Blumenthal, S. Brown, R. A. Young & L. Stringfellow	52
The function of the common subunit of glycoprotein hormones. <i>By</i> J. G. Pierce, G. A. Bloomfield & L. C. Giudice	57
The common prohormone of corticotropin and the opiate peptide lipotropin C-fragment (β -endorphin). <i>By</i> D. G. Smyth	61
Overlapping genes in bacteriophages ϕ X174 and G4. <i>By</i> B. G. Barrell, D. C. Shaw, J. E. Walker, F. D. Northrop, G. N. Godson & J. C. Fiddes	63
Colloquium: Recent Progress in the β-Oxidation of Fatty Acids	
The organization of fatty acid oxidation. <i>By</i> P. K. Tubbs	68
Acyl-coenzyme A synthetases. <i>By</i> M. V. Park	70
The role of carnitine, the carnitine acyltransferases and the carnitine-exchange system. <i>By</i> R. R. Ramsay	72
Fatty acyl-coenzyme A dehydrogenases. <i>By</i> P. C. Engel	76
3-Oxoacyl-coenzyme A thiolases and L-3-hydroxyacyl-coenzyme A dehydrogenases. <i>By</i> B. Middleton	80
Control of β -oxidation. <i>By</i> J. Bremer, R. Z. Christiansen & B. Borrebæk	83
Inhibitors of β -oxidation. <i>By</i> H. Osmundsen & H. S. A. Sherratt	84
Colloquium: The Metabolic Oxidation of Sulphur-Containing Compounds and its Significance	
Interaction of thiol-containing compounds with cytochrome P-450 <i>By</i> H. P. A. Illing	89
Sulphoxidation in the neonatal Guinea Pig. <i>By</i> R. H. Waring, M. Armitage & S. C. Mitchell	91
Oxidative desulphuration of thione compounds and its toxicological implications (<i>by title only</i>). <i>By</i> F. de Matteis	94
Intermediate metabolites of thiocarbamides, thioureylenes and thioamides: Mechanism of formation and reactivity. <i>By</i> D. M. Ziegler	94
S-Oxygenation in herbicide metabolism in mammals (<i>by title only</i>). <i>By</i> M. Crawford & D. H. Hutson	96

	PAGE
Communications	
Cholinesterase in fibroblasts grown in the presence of hypercholesterolaemic serum. <i>By</i> K. Madhavankutty, D. M. Murphy, J. O'Donnell & M. M. Chu	97
Oxidation of [¹⁴ C]palmitate by isolated rat liver mitochondria. <i>By</i> M. Lopes-Cardozo & S. G. Van den Bergh	98
Acylation of lysophosphatidylcholine by subcellular fractions of Guinea-Pig cerebral cortex: Subcellular distribution of acyl-coenzyme A synthetase and acyl-coenzyme A hydrolase. <i>By</i> S. K. Fisher & C. E. Rowe	101
The activation and release of phospholipase A1 activity of rat adipose tissue. <i>By</i> J. Stocks & D. J. Galton	102
Parameters regulating phospholipid biosynthesis in isolated rat intestinal villus cells. <i>By</i> P. J. A. O'Doherty	103
The release of lipoprotein lipase from human adipose tissue is potentiated by serum lipoproteins. <i>By</i> G. Holdsworth, K. G. Taylor & D. J. Galton	105
Apoprotein exchange between human high-density-lipoprotein subfractions (high-density-lipoprotein subfractions 2 and 3). <i>By</i> J. Shepherd, C. J. Packard, J. R. Patsch, G. Morgan & A. M. Gotto, Jr.	106
Identification of 5-hydroxyhexanoic acid in the urine of twin siblings with a syndrome having close similarities to Jamaican vomiting sickness. <i>By</i> A. M. Lawson & R. A. Chalmers	108
Dicarboxylic aciduria as an indicator of defective β -oxidation in twin siblings with a vomiting sickness and hypoglycaemia similar to Jamaican vomiting sickness. <i>By</i> R. A. Chalmers & A. M. Lawson	111
The location of proteoglycans in sheep brain. <i>By</i> C. J. Branford White & J. F. Hardy	113
Differential effects of D- and L-allylglycine (2-aminopent-4-enoic acid) on regional cerebral γ -aminobutyrate concentrations. <i>By</i> R. W. Horton, A. G. Chapman & B. S. Meldrum	115
Brain neurotransmitters in pyridoxine deficiency. <i>By</i> K. Dakshinamurti	119
Inhibition of kynurenine hydroxylase by benserazide, carbidopa and other aromatic hydrazine derivatives: Evidence for subclinical iatrogenic niacin deficiency. <i>By</i> D. A. Bender & W. R. D. Smith	120
Positive identification of kynurenine in rat and human brain. <i>By</i> M. H. Joseph, H. F. Baker & A. M. Lawson	123
Rat brain acetoacetyl-coenzyme A deacylase. <i>By</i> T. B. Patel & J. B. Clark	126
A method for the rapid separation of cytosolic and particulate components of rat brain synaptosomes. <i>By</i> R. F. G. Booth & J. B. Clark	128
The binding of the muscarinic receptor antagonist, [³ - ³ H]quinuclidinyl benzilate, to <i>Torpedo marmorata</i> membrane fragments. <i>By</i> M. R. Pickard & P. G. Strange	129
Effects of chronic low doses of L-thyroxine on succinate dehydrogenase activity in the mammalian liver and myocardium. <i>By</i> M. T. Smith	131
Milk-fat synthesis by prolactin-stimulated rabbit mammary tissue in organ culture: Relationship to cation transport. <i>By</i> I. R. Falconer, R. W. Baldwin, I. A. Forsyth, B. M. Wilson & R. Dils	133

	PAGE
Perphenazine and testosterone metabolism by mammary tumours in oophorectomized rats. <i>By</i> P. Buchan & W. R. Miller	135
Dehydroxylation of oestriol by the rat kidney. <i>By</i> M. Höller, B. P. Lisboa, K. Dengler & H. Breuer	136
The receptor conformation of flexible peptides. <i>By</i> C. R. Snell	138
An enterogastric circulation. <i>By</i> G. M. Powell, T. J. Parry & C. G. Curtis	141
Control <i>in vitro</i> of tocopherol oxidase by light in extracts from leaves of <i>Xanthium strumarium</i> L. <i>By</i> J. K. Gaunt & E. S. Plumpton	143
The effect of repeated administration on allyl alcohol-induced hepatotoxicity in the rat. <i>By</i> B. G. Lake, S. D. Gangolli, M. G. Wright, P. Grasso, F. M. B. Carpanini & K. R. Butterworth	145
Effect of glucagon and starvation on L-type pyruvate kinase from rat liver. <i>By</i> T. J. C. Van Berkel, J. K. Kruijt & J. F. Koster	147
The effect of insulin administration <i>in ovo</i> on liver glucose 6-phosphate in chick embryos. <i>By</i> R. S. Campbell & D. R. Langslow	149
Comparison of the actions of dichloroacetate and 2-bromopalmitate in palmitate-perfused rat hearts: Effects on carbohydrate metabolism, contractility and oxygen consumption. <i>By</i> A. J. Higgins, M. Morville & R. A. Burges	152
Persistent effects of starvation on pyruvate dehydrogenase kinase and phosphatase of lactating-rat mammary gland. <i>By</i> M. A. Baxter & H. G. Coore	154
Intracellular compartmentation of alanine synthesis in diaphragm muscle. <i>By</i> K. Snell	157
Induction of hepatic enzyme abnormalities associated with obesity by neonatal overnourishment. <i>By</i> D. A. Duff & K. Snell	160
The simultaneous oxidation of substrates by rat liver mitochondria. <i>By</i> J. A. Spencer, M. C. Barrett & A. A. Horton	161
Regulation <i>in vivo</i> of phosphorylase <i>b</i> in skeletal muscle of phosphorylase Kinase-deficient mice. <i>By</i> Z. H. A. Rahim, D. Perrett & J. R. Griffiths	164
A multienzyme aggregate with glycolytic activity from <i>Escherichia coli</i> . <i>By</i> D. M. Gorringer & V. Moses	167
Specificity of nuclear protein kinases in differentiating chick skeletal-muscle cells. <i>By</i> Nguyen Thi Man, G. E. Morris & R. J. Cole	169
Sequential synthesis of ganglioside precursors and haematosides in chicken retina. <i>By</i> P. F. Urban, N. Neskovic, S. Harth, P. Mandel & H. Dreyfus	172
The effect of birth and related hormonal events on the neonatal development of uridine diphosphate glucuronosyltransferase activity towards bilirubin and other substrates in rat liver. <i>By</i> M. T. Campbell & G. J. Wishart	175
Precocious development of rat hepatic glucokinase. <i>By</i> M. B. Allen, C. Aragon, C. Gimenez & D. G. Walker	176
Compartmentation of uridine diphosphate glucuronosyltransferase: Effect of uridine diphosphate <i>N</i> -acetylglucosamine on the apparent <i>V</i> of glucuronidation. <i>By</i> P. Bingham, C. Berry & T. Hallinan	178
The respiratory chain of <i>Bacillus caldolyticus</i> . <i>By</i> J. M. Beavis & J. B. Chappell	180

	PAGE
Activation of phosphoenolpyruvate carboxylase from <i>Escherichia coli</i> by long-chain acyl derivatives of coenzyme A and by Blue Dextran 2000. <i>By</i> M. C. Scrutton	182
Regulation of carbohydrate metabolism in <i>Tetrahymena pyriformis</i> . <i>By</i> A. Barnekow	184
Plasma glycosyltransferase activities as an index of marrow status in acute myelogenous leukaemias. <i>By</i> D. Kessel, T.-H. Chou & P. Khilanani	187
[¹⁹ F]Fluorine nuclear-magnetic-resonance study of the reaction of the aminic form of aspartate transaminase with difluoro-oxaloacetate. <i>By</i> G. D. Smith, R. Eisenthal & R. Harrison	190
The kinetic mechanism of <i>N</i> -methylglutamate dehydrogenase from <i>Pseudomonas aminovorans</i> . <i>By</i> C. W. Bamforth & P. J. Large	193
Subunit composition of fatty acid synthetase from fungi. <i>By</i> N. M. Packter & A. Alam	195
Wheat-germ aspartate transcarbamylase: Reversible ligand-dependent aggregation behaviour <i>in vitro</i> . <i>By</i> J. E. Grayson & R. J. Yon	197
The purification of nucleotide-dependent enzymes with dye-polysaccharide resins. <i>By</i> J. Stockton, A. G. M. Pearson, L. J. West & A. J. Turner	200
Location of transketolase and transaldolase in apical cells of pea roots. <i>By</i> M. J. Emes & M. W. Fowler	203
Influence of magnesium sulphate on the inhibition of human placental oestradiol-17 β dehydrogenase by adenosine triphosphate. <i>By</i> M. A. Shaw & J. Jeffrey	205
Co-operativity in chlorpromazine-human serum albumin interactions. <i>By</i> S.-Y. Tham & A. Rosen	207
An evaluation of three methods for fitting the Michaelis-Menten equation to sets of data with a common Michaelis constant but different maximum velocities. <i>By</i> G. L. Atkins, I. A. Nimmo & A. Bauermeister	209
The detection and determination of polyamines from human urine. <i>By</i> M. Gittins & K. B. Cooke	212
The relationship between molecular weight and specific activity of unfractionated and fractionated heparins. <i>By</i> I. R. MacGregor, D. A. Lane & V. V. Kakkar	214
Studies on thiol proteinases with fluorescent probes. <i>By</i> J. P. G. Malthouse, M. Shipton & K. Brocklehurst	217
Heterogeneity of rabbit creatine kinase shown by isoelectric focusing. <i>By</i> A. R. Cattani, J. M. Jamieson, E. J. Milner-White & N. C. Price	220
Is phosphorylase phosphatase a manganese metalloenzyme? <i>By</i> A. Burchell & P. Cohen	220
Purification and properties of an alcohol dehydrogenase from the liver and intestinal caecum of rainbow trout (<i>Salmo gairdnerii</i>). <i>By</i> A. Bauermeister & J. Sargent	222
Electron-spin-resonance studies of the lipoamide 'swinging arm' of the pyruvate dehydrogenase multienzyme of <i>Escherichia coli</i> . <i>By</i> M. C. A. Griffin, W. G. Griffin & R. N. Perham	225
Light-scattering studies on the action of endocellulases. <i>By</i> J. Demeester, H. Steyaert, M. Bracke & A. Lauwers	227

	PAGE
Classification of the microtubule-associated protein kinase. <i>By</i> P. Sheterline	229
The use of specific immunoprecipitation to monitor phosphorylation of a microtubule-associated protein. <i>By</i> P. Sheterline	231
Existence in bovine kidney of two enzymes attacking tripeptides containing <i>N</i> -terminal proline. <i>By</i> M. A. Khilji, A. F. Akrawi & G. S. Bailey	233
Infrared studies on pig brain thromboplastin. <i>By</i> H. Rezvan & R. M. Howell	235
Liquid-crystal model for the organization of molecules in collagen fibrils. <i>By</i> D. W. L. Hukins & J. Woodhead-Galloway	238
Production of alkaline phosphatase by a rat osteogenic sarcoma <i>in vivo</i> and <i>in vitro</i> . <i>By</i> L. A. Coulton, P. M. Ingleton, C. J. Preston, D. Brocklehurst & T. J. Martin	239
Affinity labelling of the ribonucleic acid polymerase of <i>Escherichia coli</i> . <i>By</i> A. D. B. Malcolm & J. R. Moffat	241
An unusual structural feature of non-histone chromosomal high-mobility-group protein 1. <i>By</i> J. M. Walker, K. Gooderham, J. R. B. Hastings & E. W. Johns	242
Binding of naphth-2-ylacetic acid to rat liver deoxyribonucleic acid. <i>By</i> J. Caldwell, T. S. Emudianughe, R. L. Smith & P. F. R. Little	242
Heterogeneity of proteoglycans from adult human costal cartilage. <i>By</i> J. P. Pearson & R. M. Mason	244
Phenobarbitone disposition in relation to tolerance. <i>By</i> J. E. Croft, J. Caldwell & R. L. Smith	246
Purification of a tobacco leaf protein associated with resistance to virus infection. <i>By</i> J. F. Antoniw & W. S. Pierpoint	248
Intramolecular inhibition by enzyme of site-specific modification reactions can mask pK_a values characteristic of the reaction pathway: Do the side chains of aspartic acid-158 and lysine-156 of papain form an ion-pair? <i>By</i> J. P. G. Malthouse & K. Brocklehurst	250
Enzymes as tools for the investigation of reaction mechanism and as a method of studying microenvironments by using a solvent-sensitive isomerization. <i>By</i> M. S. Mushiri, H. Suschitzky & K. Brocklehurst	253
Preparation and characterization of enzymes from spray-dried papaya (<i>Carica papaya</i>) latex. <i>By</i> B. S. Baines, T. Stuchbury & K. Brocklehurst	255
A more general definition of K_m . <i>By</i> J. R. Griffiths	258
Use of a television-camera densitometer and image analyser for scanning polyacrylamide-gel-electrophoresis patterns. <i>By</i> A. Flook, P. Robinson, M. Stubbs & M. P. Tombs	260
Substituted pyridines as two-protonic-state reactivity probes, reporter-group delivery vehicles and labelling reagents for the study of thiol enzymes. <i>By</i> K. Brocklehurst, J. P. G. Malthouse, B. S. Baines, R. D. Blenkinsop, J. A. Churcher, M. S. Mushiri & F. Ormerod	261
High-capacity adsorbents for affinity chromatography. <i>By</i> P. A. Anderson & L. Jervis	263
Demineralization in organic solvents by using alkylammonium salts of ethylenediaminetetra-acetic acid (<i>by title only</i>). <i>By</i> J. E. Scott & T. W. Kyffin	266

	PAGE
A general method for the isolation and partial characterization of mitochondrial nucleoids by centrifugation in metrizamide gradients. <i>By</i> D. Rickwood & R. D. Jurd	266
The synthesis of co-polymers with pendant functional groups arranged in a pre-determined geometry as enzyme models. <i>By</i> V. W. Pike, C. W. Wharton, K. Brocklehurst & E. M. Crook	269
Characterization of mammalian liver nuclear envelope. <i>By</i> J. F. Milne, P. S. Agutter, J. R. Harris & G. Stubbs	271
The relation of bile proteins to serum and liver plasma membrane. <i>By</i> B. M. Mullock & R. H. Hinton	274
Preparation and properties of the polypeptides of the gap junction. <i>By</i> J. Carreira & W. H. Evans	276
Immunological isolation of hepatocyte plasma membranes. <i>By</i> S. A. Westwood, J. P. Luzio, D. A. Flockhart & K. Siddle	278
Phospholipid-exchange proteins for the topological distribution of microsomal phospholipids. <i>By</i> P. J. Brophy, A. M. H. P. Van den Besselaar & K. W. A. Wirtz	280
A proposed structure for cholesterol-containing bilayers based on studies with fluorescent sterols. <i>By</i> J. Rogers, A. G. Lee & D. C. Wilton	281
Entry of calcium ions into hen erythrocytes on treatment with fusogenic chemicals. <i>By</i> A. M. J. Blow, G. M. Botham & J. A. Lucy	284
MgATP ²⁻ and the molecular organization of erythrocyte membranes. <i>By</i> S. D. Shukla, M. M. Billah, J. B. Finean & R. H. Michell	285
The removal of membrane components from human erythrocytes by glycocholate. <i>By</i> D. Billington & R. Coleman	286
Effects of mammalian bile on plasma membranes. <i>By</i> R. Coleman & D. Billington	288
Effect in rat lymphocytes of fatty acids and concanavalin A on the fluorescence polarization of 1,6-diphenylhexatriene. <i>By</i> C. D. Stubbs, W. M. Tsang, J. Belin, A. D. Smith & S. M. Johnson	289
Membrane association may limit the use of acid phosphatase as a lysosomal marker. <i>By</i> M. Dobrota, R. H. Hinton, A. A. A. El-Aaser, J. T. R. Fitzsimons & E. Reid	291
Thermal adaptation in yeasts: Correlation of substrate transport with membrane lipid composition in psychrophilic and thermotolerant yeasts. <i>By</i> K. Watson	293
Effect of ethanol, diphenylhydantoin, methotrexate and low sodium ion concentration on jejunal surface pH and folic acid transfer in the rat. <i>By</i> M. L. Lucas, S. K. Swanston, F. H. Lei, P. Mangkornthong & J. A. Blair	297
Proteins coated micropinocytic vesicles isolated from human placentae. <i>By</i> A. Whyte	299
An effect of fluorescent probes and of insulin on the structure of adipocyte membranes. <i>By</i> I. A. Bailey, C. J. Garratt & S. M. Wallace	302
Binding of ¹²⁵ I-labelled epidermal growth factor to surface receptors on cultured pig granulosa cells. <i>By</i> I. D. Read, H. Gregory & C. R. Hopkins	304
Circadian rhythms in the activity of acetylcholinesterase of human erythrocytes incubated <i>in vitro</i> . <i>By</i> S. F. Maboood, P. F. J. Newman & I. A. Nimmo	305

	PAGE
Effect of ethionine on the polypeptide composition of rat liver nuclear envelope. <i>By</i> J. F. Milne & J. R. Harris	308
Lipids in bovine adrenal-medullary chromaffin granules: Structure, location and accessibility in the membrane of gangliosides, and lactosylceramide sialyltransferase activity. <i>By</i> H. Dreyfus, M. Pescheloche, S. Harth, P. Mandel & D. Aunis	312
BIOCHEMICAL REVIEWS	
Restriction endonucleases and modification methylases in bacteria. <i>By</i> A. H. A. Bingham & T. Atkinson	315
Auxin receptors: Background and current research. <i>By</i> M. A. Venis	325
BOOK REVIEWS	335
