Volume 6, Part 2, 1978

573RD MEETING, HULL

	PAGE
Colloquium: The Role of Oxygen in the Control of Metabolism	
The biochemistry of anaerobiosis. <i>By</i> J. G. Morris	353
Regulation and role of superoxide dismutase. <i>By</i> H. M. Hassan & I. Fridovich	356
Microbial oxidative phosphorylation. <i>By</i> C. W. Jones	361
Oxygen and the enzymes of obligate aerobes. <i>By</i> E. A. Dawes	363
Structure of oxymyoglobin (<i>by title only</i>). <i>By</i> S. E. V. Phillips & M. F. Perutz	368
Oxygen and brain metabolism. <i>By</i> H. S. Bachelard	368
Oxygen evolution in photosynthesis. <i>By</i> D. S. Bendall	372
 Communications	
A faecal hydrogen acceptor for clostridial 3-oxo steroid Δ^4 -dehydrogenase. <i>By</i> F. Fernandez & M. Hill	376
The degradation of cholesterol by <i>Escherichia coli</i> isolated from human faeces. <i>By</i> R. W. Owen, M. E. Tenneson, R. F. Bilton & A. N. Mason	377
The effects of catabolite repression on the biosynthesis of sterols in <i>Saccharomyces cerevisiae</i> . <i>By</i> D. Quain & J. M. Haslam	380
Membrane lipid composition: A determinant of anaerobic growth and <i>petite</i> formation in psychrophilic and psychrophobic yeasts. <i>By</i> K. Watson, H. Morton, H. Arthur & M. Streamer	380
The lipid component of two methanol-assimilating yeasts. <i>By</i> J. B. M. Rattray & J. E. Hambleton	382
Metabolic studies related to lipid accumulation in yeast. <i>By</i> P. A. Botham & C. Ratledge	383
Physical properties of small functional units obtained from gastropod mollusc haemocyanins by tryptic digestion. <i>By</i> W. J. Gullick & E. J. Wood	386
Isolation of enriched synaptic-membrane fraction from guinea-pig brain by affinity partitioning on concanavalin A-Sepharose 4B. <i>By</i> C. W. B. Campbell	389
Alkali-labile bonds in the potato cell wall. <i>By</i> M. C. Jarvis, D. R. Threlfall & J. Friend	391
Increases in phenylalanine ammonia-lyase activity and lignin-like compounds as race-specific-resistance responses of potato tubers to <i>Phytophthora infestans</i> . <i>By</i> S. J. Henderson & J. Friend	393

	PAGE
Death and intracellular degradation of <i>Mycobacterium leprae</i> after exposure <i>in vitro</i> to enzymic free-radical generators. <i>By</i> J. Delville & P. J. Jacques	394
Effect of treatment <i>in vivo</i> with Triton WR-1339 and macrocyclon on infection of the mouse foot-pad by <i>Mycobacterium leprae</i> . <i>By</i> J. Delville & P. J. Jacques	395
Partial repression of cytochrome <i>P</i> -450 by adenosine 3':5'-cyclic monophosphate in protoplasts of <i>Saccharomyces cerevisiae</i> . <i>By</i> A. Wiseman, T.-K. Lim & L. F. J. Woods	397
Inhibition of acid proteinase from <i>Dictyostelium discoideum</i> . <i>By</i> M. J. North	400
Lactose metabolism in <i>Klebsiella pneumoniae</i> strains growing in chemostat culture. <i>By</i> I. S. Carter & A. C. R. Dean	403
The role of amylomaltase and maltodextrin phosphorylase in the pathway of glycogen catabolism in <i>Escherichia coli</i> . <i>By</i> L. E. Macaskie & T. N. Palmer	405
The effects of 1,4-diaminobutanone on polyamine metabolism in bacteria, a cellular slime mould and rat tissues. <i>By</i> L. Stevens, I. M. McKinnon, R. M. Turner & M. J. North	407
Evidence for gramicidin S functioning as a bacterial hormone specifically regulating spore outgrowth in <i>Bacillus brevis</i> Nagano. <i>By</i> S. Nandi & B. Seddon	409
Biochemical aspects of germination and outgrowth of <i>Bacillus brevis</i> Nagano and control by gramicidin S. <i>By</i> B. Seddon & S. Nandi	412
Phosphofructokinase in the polychaete worm <i>Glycera alba</i> (Müller) exposed to low oxygen concentrations: Effect of adenosine 3':5'-cyclic monophosphate activities observed <i>in vitro</i> . <i>By</i> J. Blackstock	414
The proton-consuming site of the respiratory nitrate reductase of <i>Escherichia coli</i> is on the cytoplasmic aspect of the cytoplasmic membrane. <i>By</i> R. W. Jones & P. B. Garland	416
The mechanism of coupled oxidation of octaethylhaem to octaethylbiliverdin. <i>By</i> B. D. Chaney & S. B. Brown	419
Amounts of iron, haem and related compounds in <i>Mycobacterium smegmatis</i> grown in various concentrations of iron. <i>By</i> K. A. McCready & C. Ratledge	421
The transport of iron from ferrioxochelin by <i>Mycobacterium smegmatis</i> . <i>By</i> M. C. Stephenson & C. Ratledge	423
Secretion of extracellular lipases by <i>Candida lipolytica</i> . <i>By</i> M. Matthey & D. Morgan	426
A scheme for the microbial degradation of lithocholic acid involving testosterone as an intermediate. <i>By</i> M. E. Tenneson, R. F. Bilton & A. N. Mason	428
Plasmid-determined tetracycline resistance in <i>Escherichia coli</i> K12: Lack of evidence that resistance is related to changes in lipid metabolism. <i>By</i> I. Chopra	431
Mutant citrate synthases from <i>Escherichia coli</i> . <i>By</i> S. Harford & P. D. J. Weitzman	433
Mutant citrate synthases from <i>Acinetobacter</i> generated by transformation. <i>By</i> P. D. J. Weitzman, H. A. Kinghorn, L. J. Beecroft & S. Harford	436
Preliminary characterization of the mutant α -mannosidase in bovine mannosidosis. <i>By</i> L. J. Burditt, B. G. Winchester, N. S. Van-de-Water & R. D. Jolly	438
The degradation of onion cell walls by extracellular enzymes of <i>Botrytis allii</i> and <i>Sclerotium cepivorum</i> . <i>By</i> A. T. Mankarios & J. Friend	441

CONTENTS

v

	PAGE
The metabolism of chlorogenic acid in tuber discs of a resistant and a susceptible potato cultivar after inoculation with <i>Fusarium solani</i> var. <i>caeruleum</i> . By M. J. Waites, S. B. Reynolds & J. Friend	441
BIOCHEMICAL REVIEWS	
Progress in recent research on multiple sclerosis. By A. N. Davison	443
Organization and structure in central-nerve myelin. By M. G. Rumsby	448
BOOK REVIEWS	463
