	PAGE
<b>574TH MEETING, BATH</b>	
<b>Colloquium: Cell Recognition</b>	
Immunological basis of cell recognition. <i>By</i> N. A. Mitchison	481
<i>Dictyostelium</i> , a microbial model for biochemical studies on cell recognition. <i>By</i> G. Gerisch, K. Müller & H. Beug	481
Cell recognition between mast cells and fibroblasts, and between nerve and muscle ( <i>by title only</i> ). <i>By</i> G. Burnstock	486
Target recognition and synapse formation by ciliary-ganglion neurons in tissue culture. <i>By</i> W. F. Stevens, D. W. Slaaf, J. Hooisma, T. Magchielse & E. Meeter	487
Membrane glycoproteins in recognition. <i>By</i> A. F. Williams	490
<b>Colloquium: Enzyme and Protein Turnover During Growth and Development</b>	
The regulation of muscle-protein turnover in growth and development. <i>By</i> D. J. Millward	494
The role of lysosomes in turnover of cytoplasmic and exogenous proteins. <i>By</i> J. B. Lloyd	500
Intracellular mechanisms involved in the biosynthesis of milk proteins. <i>By</i> R. K. Craig, A. P. Boulton & P. N. Campbell	501
Enzyme turnover in differentiating and developing cells. <i>By</i> R. J. Mayer	505
The use of creatine kinase activity as an index of skeletal-muscle differentiation. <i>By</i> G. E. Morris	509
<b>Colloquium: Carbohydrate Fuels for the Tissues</b>	
The role of glucose and glycogen as fuels for muscle. <i>By</i> E. A. Newsholme, V. A. Zammit & B. Crabtree	512
Glucose as a fuel for the brain. <i>By</i> H. S. Bachelard	520
Glucose as a fuel in kidney. <i>By</i> B. D. Ross, S. Bullock, N. Frega & A. Leaf	524
Carbohydrate metabolism in the lung. <i>By</i> K. G. M. M. Alberti, H. Datta, D. M. Kelly, I. Morgan & W. A. Stubbs	527
Glycogen as a fuel for skeletal muscle. <i>By</i> J. R. Griffiths & Z. H. A. Rahim	530
Glucose as a fuel for small intestine. <i>By</i> J. W. Porteous	534

Glucose as a fuel for the mammary gland. <i>By</i> N. J. Kuhn	539
<b>Communications</b>	
Studies on the subcellular localization of $\gamma$ -glutamyl transpeptidase in rat liver. <i>By</i> G. D. Smith & T. J. Peters	543
The determination of the initial velocities of enzyme-catalysed reactions from stopped-assay data. <i>By</i> G. L. Atkins & I. A. Nimmo	545
An evaluation of methods for determining the initial velocities of enzyme-catalysed reactions from progress curves. <i>By</i> I. A. Nimmo & G. L. Atkins	548
An endogenous inhibitor of the neutral proteinase from rat intestinal smooth muscle. <i>By</i> I. T. Carney, J. Kay & N. Birket	550
Carbonic anhydrase III isoenzyme from human and bovine muscle. <i>By</i> N. Carter, A. Shiels & R. Tashian	552
Inhibition of rabbit muscle creatine kinase by iodomethane. <i>By</i> S. R. R. Reddy & D. C. Watts	553
The metabolism of chemically modified insulins. <i>By</i> D. Papachristodoulou, D. Brandenburg, D. I. Dron, R. H. Jones, P. H. Sönksen & J. H. Thomas	555
The identification of brush-border-membrane peptidases in human intestinal biopsies after electrophoresis on polyacrylamide gels containing sodium dodecyl sulphate. <i>By</i> J. R. Green	557
The isolation and substrate specificity of a bovine kidney enzyme cleaving L-prolylvalylglycine. <i>By</i> M. A. Khilji & G. S. Bailey	559
Chemical-modification studies on pig kidney alkaline phosphatase. <i>By</i> M. N. Woodroffe & P. J. Butterworth	562
Mean size of <i>Saccharomyces cerevisiae</i> cells growing at different growth rates. <i>By</i> C. B. Tyson, Q. J. Smith & A. E. Wheals	564
Purification and characterization of glycerate kinase from <i>Flavobacterium</i> sp. N.C.I.B. 11171. <i>By</i> A. Willetts	565
Properties of chitinase from <i>Vibrio alginolyticus</i> , as assayed with the chromogenic substrate 3,4-dinitrophenyl tetra- <i>N</i> -acetylchitotetraoside. <i>By</i> O. A. Aribisala & G. W. Gooday	568
The incorporation of the calcium-activated photoprotein into isolated rat fat-cells by liposome-cell fusion. <i>By</i> R. L. Dormer, M. B. Hallett & A. K. Campbell	570
The stimulation of calcium uptake into sarcoplasmic-reticulum vesicles from rat heart by adenosine 3':5'-phosphate-dependent protein kinase. <i>By</i> D. N. Hollinworth & P. J. England	573
Effects of glucose 6-phosphate and other metabolites on the rate of glycogen breakdown by phosphorylase <i>b</i> . <i>By</i> J. M. Saad & J. C. Kernohan	576
The extent of removal and metabolism of chylomicrons and chylomicron remnants by the individual lobes of the perfused rat liver. <i>By</i> R. S. Gardner & P. A. Mayes	578
Effect of pulsatile hepatic-vein pressure on the removal and metabolism of chylomicrons and chylomicron remnants by individual lobes of the perfused rat liver. <i>By</i> R. S. Gardner & P. A. Mayes	581
The passage of <sup>14</sup> C-labelled clofibrate through the liver. <i>By</i> M. E. Laker & P. A. Mayes	583

Thyroid status and hepatic lipid metabolism in the rat. <i>By</i> M. E. Laker & P. A. Mayes	584
Affinity labelling of the rat muscle hexokinase type II. <i>By</i> B. A. Connolly & I. P. Trayer	586
Hepatic metabolism in pig malignant hyperthermia. <i>By</i> G. M. Hall, J. N. Lucke, R. Lovell & D. Lister	587
Effects of carbon tetrachloride on isolated rat liver cells: Stimulation of lipid peroxidation and inhibitory action of free-radical scavengers. <i>By</i> G. Poli, M. P. Chiono, T. F. Slater, M. U. Dianzani & E. Gravela	589
The influence of dietary-fat saturation on the metabolism of apolipoproteins A-I, B and C in a type-IIb hyperlipoproteinaemic subject. <i>By</i> J. Shepherd, C. Packard, G. Morgan, D. Taunton & A. Gotto, Jr.	592
The lipoprotein lipase (clearing-factor lipase) activity of bovine subcutaneous adipose tissue and isolated adipocytes. <i>By</i> H. A. K. Plaas, R. Harwood & A. Cryer	596
Changes in fatty acid synthesis during leaf development. <i>By</i> J. L. Harwood, J. Wharfe & P. Bolton	598
The relationship between changes in the concentration of serum lipoproteins and tissue lipogenesis: Effect of Triton WR-1339. <i>By</i> R. Fears & A. M. Umpleby	600
The relationship between changes in the concentration of serum lipoproteins and tissue lipogenesis: Effects of dietary cholesterol and orotic acid. <i>By</i> R. Fears & A. M. Umpleby	602
A comparative study of lectin binding to cultured mosquito ( <i>Aedes aegyptii</i> ) and mammalian cells ( <i>by title only</i> ). <i>By</i> T. D. Butters & R. C. Hughes	604
Two-dimensional electrophoresis of <sup>125</sup> I-labelled surface glycoproteins of normal BHK cells and ricin-resistant variants ( <i>by title only</i> ). <i>By</i> S. D. J. Pena, G. Mills & R. C. Hughes	604
Proteolysis by trypsin or transformation by polyoma virus potentiates the manganese-stimulated adhesion of fibroblasts to serum-coated substratum. <i>By</i> J. Palmer, M. Minnikin, A. Allen & D. Rees	605
A colorimetric assay for glycoproteins based on the periodic acid/Schiff stain. <i>By</i> M. Mantle & A. Allen	607
Use of H1 histone to test the fidelity of protein biosynthesis in mouse tissues. <i>By</i> Z. A. Medvedev & M. N. Medvedeva	610
Changes in the relative rates of protein synthesis and breakdown during muscle growth and atrophy. <i>By</i> P. C. Bates & D. J. Millward	612
The relationship between synthesis of ribonucleic acid and the decline in proliferative ability during aging <i>in vitro</i> . <i>By</i> S. A. Whatley & B. T. Hill	614
Cross-linking studies on <i>Escherichia coli</i> ribonucleic acid polymerase. <i>By</i> E. H. L. Cheng & B. H. Nicholson	617
Poly(adenosine diphosphate ribose) glycohydrolase in germinating wheat embryos. <i>By</i> A. J. Whitby & W. J. D. Whish	619
Effect of inhibition of protein synthesis on the degradation of canavanil-proteins in <i>Escherichia coli</i> <i>By</i> A. R. Hipkiss	620

Protein degradation in rabbit reticulocytes and reticulocyte cell-free preparations: Stimulation by adenosine triphosphate and inhibition by potassium ions. <i>By R. S. Daniels &amp; A. R. Hipkiss</i>	623
Molecular-weight analysis of polypeptides synthesized by isolated rat gastric and intestinal cells. <i>By C. N. A. Trotman</i>	626
Limited proteolysis of deoxyribonucleic acid-dependent ribonucleic acid polymerase of <i>Escherichia coli</i> B. <i>By E. H. L. Cheng &amp; B. H. Nicholson</i>	628
Incorporation of [1- <sup>14</sup> C]acetate into the long-chain fatty acyl-coenzyme A esters of rat brain <i>in vivo</i> . <i>By R. W. Bonser &amp; G. G. Lunt</i>	629
Specificity of 5-hydroxytryptamine uptake by snail nervous tissue. <i>By N. N. Osborne, H. U. Schröder &amp; V. Neuhoff</i>	632
Changes in catecholamine metabolism after chronic treatment with, and withdrawal from, methamphetamine. <i>By H. S. Bachelard &amp; M. E. Bardsley</i>	633
Development of transient myasthenia-like symptoms in chickens injected with acetylcholine receptor from <i>Torpedo marmorata</i> . <i>By T. Barkas, R. Harrison, G. G. Lunt, C. M. J. Watson, A. L. Harvey &amp; J. G. Robertson</i>	634
Immunochemistry of the acetylcholine receptor. <i>By T. Barkas, R. Harrison, G. G. Lunt &amp; C. M. J. Watson</i>	636
Antigenic glycopeptides from electroplax membranes of <i>Torpedo marmorata</i> . <i>By R. Harrison, G. G. Lunt &amp; C. R. Roast</i>	639
Influence of pH on protein phosphate turnover in brain synaptic membranes. <i>By M. Ng &amp; A. I. Matus</i>	640
A comparison of platelet membrane and erythrocyte membrane adenosine triphosphatase specific activities in affective disorders. <i>By M. Scott &amp; H. W. Reading</i>	642
The nature and transport of nerve-terminal glycoproteins. <i>By O. K. Langley</i>	644
Glycosaminoglycans in synaptosomes. <i>By C. J. Branford White &amp; T. Jones</i>	646
Separation of multiple molecular forms of acetylcholinesterase by using affinity chromatography: Isolation of the 'secretory' form. <i>By A. J. Hodgson, I. W. Chubb &amp; A. D. Smith</i>	648
Size and molecular properties of the acetylcholine-receptor protein of muscle. <i>By E. A. Barnard, J. O. Dolly, M. Lo &amp; T. Mantle</i>	649
Effects of $\beta$ -bungarotoxin and tityustoxin on uptake and release of neurotransmitters. <i>By O. J. Dolly, C. K. Tse, J. W. Spokes &amp; C. R. Diniz</i>	652
Amino acid concentrations in the dorsal region of rat medulla oblongata containing the dorsal-column nuclei. <i>By P. V. Taberner &amp; F. Roberts</i>	655
Lymphocyte response to mitogens in rheumatoid arthritis. <i>By R. J. Haines &amp; D. Hough</i>	657
Inhibition of capping of surface immunoglobulins at femtomolar concentrations of adriamycin, compound ICRF-159 and tetrodotoxin. <i>By M. Gosálvez, L. Pezzi &amp; C. Vivero</i>	659
The discovery of an erythroid developmental agglutinin. <i>By F. L. Harrison &amp; C. J. Chesterton</i>	662
The transport of nitrite in the blood. <i>By P. L. R. Smith, C. L. Walters &amp; R. Walker</i>	665

A radioaffinity assay for human serum albumin. *By* P. G. H. Byfield, M. Land, D. G. Williams & J. M. Rideout 666

**572ND MEETING, LONDON**

Rhodopsin vesicles derived from retinal-outer-segment membranes: Effect of light and detergent on the lipid fraction. *By* N. Virmaux, M. Delmelle, G. Nullans & H. Dreyfus 669

**BIOCHEMICAL REVIEWS**

Stimulus-response coupling at  $\alpha$ -adrenergic receptors. *By* L. M. Jones & R. H. Michell 673

Cryoenzymology: The use of fluid solvent mixtures at subzero temperatures for the study of biochemical reactions. *By* R. P. Cox 689

**BOOK REVIEWS** 699
