### 575TH MEETING, GLASGOW

|   | PAGE |
|---|------|
| <b>Colloquium: Prostaglandins in the Nervous System</b>   |      |
| An introduction to the chemistry and biology of the prostaglandins, with particular reference to methods of detection ( <i>by title only</i> ). <i>By</i> R. L. Jones     | 713  |
| Biochemistry of prostaglandins. <i>By</i> R. J. Flower  | 713  |
| Prostaglandin-mediated prejunctional regulation of adrenergic neurotransmission. <i>By</i> P. O. Hedqvist   | 714  |
| Involvement of prostaglandins in the female reproductive cycle. <i>By</i> N. L. Poyser  | 718  |
| Prostaglandins and opioids. <i>By</i> H. O. J. Collier  | 722  |
| The role of prostaglandins in pyrexia. <i>By</i> A. S. Milton   | 727  |
| <b>Colloquium: Novel Gene Sequence Arrangements and their Expression</b>  |      |
| Insertion and transposition elements in prokaryotes. <i>By</i> N. S. Willetts   | 732  |
| Interrupter sequences that are widely distributed in the <i>Drosophila</i> genome. <i>By</i> D. M. Glover, S. J. Kidd, H. T. Roiha, B. R. Jordan, S. Endow & R. Appels    | 732  |
| The relationship between the nucleotide sequence of virus-SV40 DNA and the nucleotide sequence of virus-SV40 mRNA species ( <i>by title only</i> ). <i>By</i> S. Weissman | 736  |
| Control of herpes simplex virus transcription. <i>By</i> J. B. Clements & R. J. Watson  | 736  |
| The structure of the rabbit $\beta$ -globin gene. <i>By</i> R. A. Flavell, C. Waalwijk & A. J. Jeffreys   | 742  |
| The ovalbumin structural gene in genome and messenger. <i>By</i> N. H. Carey & M. T. Doel   | 746  |
| Events in the joining of immunoglobulin V- and C-genes ( <i>by title only</i> ). <i>By</i> T. H. Rabbitts   | 748  |
| Arrangement of immunoglobulin genes ( <i>by title only</i> ). <i>By</i> G. Matthysens   | 748  |
| <b>Communications</b>   |      |
| S-Adenosyl-L-methionine-dependent deoxyribonucleases of eukaryotic origin. <i>By</i> A. C. B. Cato, I. S. Villadsen & R. H. Burdon  | 749  |
| The conformation of <i>Escherichia coli</i> phenylalanyl-transfer ribonucleic acid. <i>By</i> J. P. Goddard & M. Lowdon   | 750  |

|   |     |
|---|-----|
| Insulin regulates the translation of rat skeletal-muscle messenger ribonucleic acid. <i>By</i> L. H. Fahmy & D. P. Leader   | 751 |
| Adenovirus deoxyribonucleic acid synthesis in a soluble fraction isolated from infected human cells. <i>By</i> C. H. Shaw, D. M. Rekosh, W. C. Russell & G. E. Blair  | 752 |
| The effect of oxidized nicotinamide-adenine dinucleotide on ribonucleic acid synthesis in isolated nuclei from baby-hamster kidney cells (BHK-21/C13). <i>By</i> H. M. Furneaux & C. K. Pearson                               | 753 |
| Oestrogen-induced changes in the population of uterine polyribosomal polyadenylated RNA. <i>By</i> S. Aziz & J. T. Knowler  | 755 |
| Non-polyadenylated messenger ribonucleic acids with affinity for polyadenylated-Sepharose from Friend murine leukaemia cells. <i>By</i> P. K. Katinakis & R. H. Burdon  | 757 |
| Complex kinetic data obtained with neutral proteinase and its inhibitor present in tumour-cell preparations. <i>By</i> F. Steven, V. Podrazký & S. Itzhaki  | 759 |
| The effects of zinc and lead on $\delta$ -aminolaevulinate dehydratase. <i>By</i> P. A. Meredith & M. R. Moore  | 760 |
| Separation of glutathione <i>S</i> -transferases by affinity chromatography. <i>By</i> R. A. Lawrence, P. R. Baker & A. Cuschieri   | 762 |
| Displacement of trypsin from the tumour-cell inhibitor-trypsin complex by exchange, by using enzymes with blocked active centres. <i>By</i> F. Steven & V. Podrazký   | 765 |
| Amino acid compositions provide a reliable guide to sequence similarities. <i>By</i> A. Cornish-Bowden  | 767 |
| The 0-, 4- and 6-sulphated disaccharides of chondroitin sulphates: Their electrophoretic separation and detection with <i>p</i> -anisidine. <i>By</i> R. J. Elliott & D. L. Gardner   | 768 |
| Evidence for the presence of a calcium-ion-binding site within fibrinogen fragment D. <i>By</i> J. S. Lawrie & G. Kemp  | 769 |
| <i>N</i> -Methylindoxyl acetate-linked stain for acetylcholinesterase. <i>By</i> D. A. Galbraith & D. C. Watts  | 771 |
| Progesterone binding in rat uterine cytosol during early pregnancy. <i>By</i> J. Y. Brodie & B. Green   | 773 |
| Differences in metabolism of corticosterone by the newborn and adult human. <i>By</i> J. W. Honour & C. H. L. Shackleton  | 775 |
| Glycocholic acid- and lithocholic acid-binding components in 1000000 <i>g</i> -supernatant preparations from rat ileum and jejunum. <i>By</i> R. C. Strange, B. J. Chapman, B. W. A. Williamson & I. W. Percy-Robb            | 778 |
| Effects of dietary-fat saturation on the composition of very-low-density lipoproteins and on the metabolism of their major apoprotein, apolipoprotein B. <i>By</i> J. Shepherd, C. J. Packard, D. Taunton & A. M. Grotto, Jr. | 779 |
| Plasma clearance and tissue distribution of liposomes containing different sterols. <i>By</i> S. A. Wharton & C. Green  | 781 |
| Intrajejunal absorption of liposomally entrapped insulin in normal man. <i>By</i> H. M. Patel, N. G. L. Harding, F. Logue, C. Kesson, A. C. MacCuish, J. C. MacKenzie, B. E. Ryman & I. Scobie                                | 784 |
| The role of 1,2-epoxyindene in the metabolism of indene <i>in vivo</i> . <i>By</i> F. A. Kerdel, R. J. Bick, R. P. Hopkins & P. Callaghan   | 785 |

**CONTENTS**

v

**BIOCHEMICAL REVIEWS**

Intracellular protein degradation. *By* J. Kay 789

Biological activities of complement. *By* T. Barkas 798

**BOOK REVIEWS** 809
