Volume 6, Part 5, 1978

	PAGE
576TH MEETING, LONDON	
Colloquium: Renal Membrane Function in Health and Disease	
Metabolic heterogeneity of renal tubule cells (<i>by title only</i>). <i>By</i> U. Schmidt	825
The topology of kidney microvillar enzymes. <i>By</i> A. J. Kenny, R. D. C. MacNair & A. G. Booth	825
Membrane molecular aspects of tubule solute transport. <i>By</i> R. Kinne	830
Physiological consequences of the cellular distribution of sodium-plus-potassium ion-dependent adenosine triphosphatase. <i>By</i> J. E. Kyte	833
Intrarenal action of angiotensin (<i>by title only</i>). <i>By</i> W. S. Peart	836
Recent advances in the study of the disturbance of electrolyte transport in Bartter's Syndrome (<i>by title only</i>). <i>By</i> E. Bourke & V. Delaney	836
Renal role of parathyroid hormone (<i>by title only</i>). <i>By</i> F. P. Muldowney	836
Hormonal changes and transport adaptation in chronic renal failure: The possible role of a natriuretic hormone. <i>By</i> A. Licht, S. Stein & N. S. Bricker	837
Colloquium: Neuronal and Synaptic Adaptation	
Cellular basis for long-term neuronal adaptation. <i>By</i> J. Z. Young	839
The possible significance for learning of some different types of synaptic modification. <i>By</i> A. R. Gardner-Medwin	841
Macromolecular mechanisms and long-term changes in behaviour. <i>By</i> S. P. R. Rose	844
Presynaptic factors preconditioning synaptic activity. <i>By</i> J. de Belleruche & H. F. Bradford	848
Pharmacological and physiological correlates of variable receptor sensitivity. <i>By</i> M. Wilkinson	853
Possible roles for purine compounds in neuronal adaptation. <i>By</i> T. W. Stone	858
Protein phosphorylation as a possible mechanism in neuronal adaptation. <i>By</i> H. Holmes & R. Rodnight	863
Chairman's Survey: Neuronal and synaptic adaptation. <i>By</i> H. S. Bachelard	865

Colloquium: Regulation of Cholesterol Biosynthesis and Catabolism

Measurement of cholesterol biosynthesis <i>in vivo</i> with tritiated water. <i>By</i> R. Fears	871
Cholesterol biosynthesis in hepatocytes. <i>By</i> G. F. Gibbons & C. R. Pullinger	875
Compartmentation and supply of cholesterol: Two important factors in the co-ordinate regulation of hydroxymethylglutaryl-CoA reductase and cholesterol 7 α -hydroxylase. <i>By</i> K. A. Mitropoulos, S. Venkatesan & S. Balasubramaniam	878
Cholesterol metabolism in arterial smooth muscle and endothelium. <i>By</i> J. P. D. Reckless	883
High-density lipoproteins and atherosclerosis. <i>By</i> D. J. Betteridge	888
Cholesterol metabolism and steroid-hormone production. <i>By</i> R. Hume & G. S. Boyd	893
Cholesterol transformation to biliary acids <i>in vivo</i> in the rat. <i>By</i> F. Chevallier & D. Mathé	898

Colloquium: Photosystem II

Oxygen evolution: Some historical aspects. <i>By</i> R. Hill	901
Variations in photosynthetic electron-transport pathways in <i>Chlorella vulgaris</i> . <i>By</i> J. Sinclair & A. Sarai	904
Absorbance and fluorescence changes by photosystem-II electron acceptors (<i>by title only</i>). <i>By</i> H. J. Van Gorkum, A.-L. Etienne & A. C. F. Gorren	906
Electron-paramagnetic-resonance studies of photosystem II. <i>By</i> M. C. W. Evans	906
New insights on the primary electron-acceptor complex of photosystem II. <i>By</i> R. Malkin & J. Barber	909

Communications

The influence of calcium ions on the uptake of sugars by rat small intestine <i>in vitro</i> . <i>By</i> A. S. Manning, J. M. McMullan & D. F. Evered	914
The intestinal absorption of lead. <i>By</i> I. P. L. Coleman, M. E. Hilburn & J. A. Blair	915
Variation in adenosine triphosphatase activities in serial preparations of human erythrocyte membranes. <i>By</i> J. E. Hesketh & H. W. Reading	918
Albumin is associated with the inner surface of the lymphocyte plasma membrane. <i>By</i> M. J. Owen, B. H. Barber, R. A. Faulkes & M. J. Crumpton	920
Formation of hybrid liposomes from negatively and positively charged liposomes: A possible model for the study of membrane fusion. <i>By</i> D. H. Wreschner & G. Gregoriadis	922
Incorporation of hepatitis-B surface antigen (HB _s Ag) into liposomes. <i>By</i> E. K. Manesis, C. H. Cameron & G. Gregoriadis	925
Uncoupling of work and adenosine triphosphate utilization in daunorubicin cardiotoxicity. <i>By</i> J. W. Dow & J. H. Burns	928

Preparation of a nuclear membrane fraction from normal and from herpes virus-infected BHK cells. <i>By</i> W. S. Steveley & C. J. Packard	929
Entrapment of mRNA and rRNA into large monolamellar liposomes derived from hybrid small monolamellar liposomes. <i>By</i> D. H. Wreschner, G. Gregoriadis, D. B. Gunner & R. R. Dourmashkin	930
Alkaline phosphatase: A possible transport protein for inorganic phosphate. <i>By</i> S. P. Shirazi, K. W. Colston & P. J. Butterworth	933
Isolation of an active fragment of protein phosphatase inhibitor-1 from rabbit skeletal muscle. <i>By</i> S. Shenolikar, J. G. Foulkes & P. Cohen	935
Purification of bovine spleen collagenolytic cathepsin (cathepsin N). <i>By</i> A. Ducastaing & D. J. Etherington	938
Purification and compositional relatedness of aldehyde reductase from several species. <i>By</i> W. S. Davidson, L. Weihsrauch & T. G. Flynn	940
Kinetics and mechanism of action of aldehyde reductase from pig kidney. <i>By</i> W. S. Davidson & T. G. Flynn	943
Requirements for the inhibition of sodium and potassium ion-transporting adenosine triphosphatase by adriamycin. <i>By</i> M. Gosálvez & M. F. Blanco	945
The isolation of a neutral proteinase from the urine of a patient with Goodpasture's syndrome. <i>By</i> M. Davies, E. Sanders, G. A. Coles & K. T. Hughes	947
The phosphorylation of rabbit skeletal-muscle glycogen synthase by cyclic AMP-dependent protein kinase. <i>By</i> C. Proud	950
Effects of chelators and calcium ions on the response of renal adenosine triphosphatase activity to hormones and concanavalin A. <i>By</i> S. Al-Saleh & K. P. Wheeler	952
Activation of carbonic anhydrase from erythrocytes of chicks and rabbits by adenosine 3':5'-cyclic monophosphate-dependent protein kinases. <i>By</i> P. Dietsch, A. P. Schaefer, M. Buhle & P. R. Siegmund	953
The effect of age on the number of monoamine oxidase active centres in the rat heart. <i>By</i> C. J. Fowler & B. A. Callingham	955
Release of lysosomal acid phosphatase by extracts from oral streptococci. <i>By</i> R. Duguid & G. Cooney	957
Properties of 5-hydroxyisophthalate 4-hydroxylase from a Coryneform bacteria. <i>By</i> E. A. Elmorsi & D. J. Hopper	958
Further studies of the metabolism of <i>N</i> -nitroso[2,5- ¹⁴ C]pyrrolidine in the rat (<i>by title only</i>). <i>By</i> R. C. Cottrell, D. G. Walters, P. J. Young, B. G. Lake, J. C. Phillips & S. D. Gangolli	959
Effects of age, inducing agents and carcinogens on the distribution of cytochrome <i>P</i> -450 in microsomal membranes from rat liver. <i>By</i> T. W. Poole & D. V. Parke	959
Metabolic activation of carbon tetrachloride to a free-radical product: Studies using a spin trap. <i>By</i> A. Ingall, K. A. K. Lott, T. F. Slater, S. Finch & A. Stier	962
Metabolism and biliary excretion of <i>NN</i> -dimethylaminoazobenzene: A possible role for liver glutathione. <i>By</i> W. G. Levine	964
Metabolism of transferrin-bound iron by the liver: A study <i>in vivo</i> . <i>By</i> J. P. Milsom & R. G. Batey	966

Effects of starvation, diabetes and 2-bromo- α -ergocryptine treatment on pyruvate dehydrogenase activity in lactating rat mammary gland. <i>By</i> M. A. Baxter, M. A. Goheer & H. G. Coore	968
Correlations between androgen metabolism and sebaceous-gland activity. <i>By</i> M. F. Cooper, J. B. Hay, D. McGibbon & S. Shuster	970
The reactions of 1 nm plutonium dioxide particles with rat lung fluid. <i>By</i> J. R. Cooper, G. N. Stradling, H. Smith & S. E. Breadmore	972
The degradation of taurocholic acid and glycocholic acid by <i>Pseudomonas</i> spp. N.C.I.B. 10590. <i>By</i> M. E. Tenneson, R. F. Bilton & A. N. Mason	975
Chloramphenicol and ethidium bromide effects on flight-muscle mitochondria of the blowfly <i>Calliphora erythrocephala</i> . <i>By</i> B. M. Ashour, S. M. Danks & P. A. Whittaker	978
Protein synthesis in <i>petite</i> mutants of the yeast <i>Kluyveromyces lactis</i> . <i>By</i> J. Heritage & P. A. Whittaker	980
Alternative respiration pathways in the <i>petite</i> -negative yeast <i>Kluyveromyces lactis</i> . <i>By</i> A. J. Morgan & P. A. Whittaker	983
Reversible modulation of rat liver 3-hydroxy-3-methylglutaryl-coenzyme A reductase: Evidence for an interconvertible system. <i>By</i> F. G. Hegardt & J. Bové	986
Lipogenesis in sheep adipose tissue maintained in tissue culture: Effects of insulin and growth hormone. <i>By</i> R. G. Vernon	988
The urea cycle in different types of macrophages. <i>By</i> F. Hofmann, J. Kreusch, K.-P. Maier, P. G. Munder & K. Decker	990
Isocitrate dehydrogenase and malate dehydrogenase in synaptic and non-synaptic rat brain mitochondria: A comparison of their kinetic constants. <i>By</i> J. C. K. Lai & J. B. Clark	993
Phosphoproteins and related enzymes in isolated synaptic-junctional structures. <i>By</i> M. Ng & A. I. Matus	995
The metabolism of a tryptophan load in rat brain and liver: The influence of L- α -methyl-dopa hydrazine (MK-486, carbidopa). <i>By</i> M. H. Joseph & D. L. C. Hall-Tipping	997
The effect of L-3,4-dihydroxyphenylalanine (L-dopa) on the incorporation of radioactive amino acids into rat brain protein. <i>By</i> M. D. King & P. W. Beesley	1000
Liver tryptophan pyrrolase and brain 5-hydroxytryptamine: Effects of chronic ethanol administration. <i>By</i> A. A.-B. Badawy, N. F. Punjani & M. Evans	1002
The antagonism by naloxone of agents that interact with dopaminergic neurones. <i>By</i> P. W. Dettmar, A. Cowan & D. S. Walter	1004
Persistence of increased histone kinase activity of neocortical tissues in relation to excitation and to adenosine 3':5'-cyclic monophosphate. <i>By</i> M. E. Newman, H. McIlwain & J. Patel	1006
Effects of pre- and peri-natal restricted food intake on sulphated glycosaminoglycan concentrations in rat brain. <i>By</i> C. J. Branford White	1008
The effects of transition-metal ions on rat brain synaptosomal amine-uptake systems. <i>By</i> J. C. K. Lai, J. F. Guest, L. Lim & A. N. Davison	1010
Progesterin receptors in the hypothalamus of immature and mature female rats. <i>By</i> S. Thrower & L. Lim	1012
	1978

Changes in the size and protein turnover of the soleus muscle in response to immobilization or denervation. <i>By</i> D. F. Goldspink	1014
The effects of cortisone treatment on the protein turnover of the soleus muscle after immobilization. <i>By</i> J. A. McGrath & D. F. Goldspink	1017
Colchicine persistence and binding in goldfish brain. <i>By</i> G. Clingbine & C. E. Heading	1019
Is there a membrane-bound, calcium-dependent phosphatidylinositol phosphodiesterase in rat brain? <i>By</i> R. F. Irvine & R. M. C. Dawson	1020
Effects of acute hyperbaric exposure on the concentration of alanine and other metabolites in mouse tissues. <i>By</i> G. Evans, D. R. Nelson & A. K. Huggins	1022
Increased incorporation of [³ H]fucose into synaptic membranes of the visual cortex after first exposure to light of dark-reared rats. <i>By</i> R. D. Burgoyne & S. P. R. Rose	1025
Effect of metabolic inhibitors on the release of [¹⁴ C]adenosine derivatives from guinea-pig neocortex synaptosome preparations. <i>By</i> C. Barberis & J.-L. Daval	1026
Cholesteryl esters and other neutral lipids in adrenoleukodystrophy brain. <i>By</i> R. B. Ramsey, N. L. Banik & A. N. Davison	1027
Fructose 1,6-bisphosphatase activity in the brain of mice and rats submitted to the convulsant methionine sulphoximine. <i>By</i> T. Hevor & J. Gayet	1029
The influence of extracellular calcium concentration on the vasopressin-stimulated incorporation of inorganic phosphate into phosphatidylinositol in hepatocyte suspensions. <i>By</i> C. J. Kirk, T. R. Verrinder & D. A. Hems	1031
Stimulation of the breakdown and resynthesis of phosphatidylinositol in rat hepatocytes by angiotensin, vasopressin and adrenaline. <i>By</i> M. M. Billah & R. H. Michell	1033
Enhanced phosphatidylinositol breakdown as a calcium-independent response of rat parotid fragments to substance P. <i>By</i> L. M. Jones & R. H. Michell	1035
Relationship between 5-hydroxytryptamine activation of phosphatidylinositol hydrolysis and calcium-ion entry in <i>Calliphora</i> salivary glands. <i>By</i> J. N. Fain & M. J. Berridge	1038
Preparation of active fractions enriched in photosystem I and photosystem II from the thermophilic blue-green alga <i>Phormidium laminosum</i> . <i>By</i> A. C. Stewart & D. S. Bendall	1040
Alteration in concentration of carotenoids in <i>Rhodopseudomonas capsulata</i> transferred from dark to light growth. <i>By</i> J. Manwaring, C. A. Pullin, E. H. Evans & G. Britton	1041
Problems relating to the storage and treatment of urine samples before radioimmunoassay for Tamm-Horsfall glycoprotein. <i>By</i> A. A. Goodall & R. D. Marshall	1043
Separation of picomolar concentrations of adenine and guanine nucleotides and nucleosides by high-performance thin-layer chromatography on silica gel. <i>By</i> I. Das	1047

Equilibrium dialysis: A new approach. <i>By</i> T. J. Coombs & C. J. Coulson	1048
The use of immobilized creatine kinase to study antibody-antigen interaction by immunoabsorption of enzyme-specific antibodies. <i>By</i> S. Cherif & E. J. Milner-White	1050
Ampholyte-displacement chromatography for the separation of serum proteins. <i>By</i> J. L. Young, B. A. Webb, D. G. Coutie & B. Reid	1051
Restriction-endonuclease mapping of mitochondrial DNA from <i>Tetrahymena pyriformis</i> . <i>By</i> J. D. Norton & I. G. Jones	1054
The involvement of poly(adenosine diphosphate-ribose) in deoxyribonucleic acid repair. <i>By</i> M. I. Davies, H. Halldorsson, N. Nduka, S. Shall & C. J. Skidmore	1056
Mechanism of transcription repression during erythroid development in the rabbit. <i>By</i> L. S. L. Hsu, J. A. Davies & C. J. Chesterton	1057
Presence of poly(adenosine diphosphate-ribose)-metabolizing enzymes in <i>Tetrahymena pyriformis</i> . <i>By</i> C. Tsopanakis, J. C. Leer, S. Shall & O. Westergaard	1060
Reutilization of [³ H]uridine in polyadenylated and ribosomal ribonucleic acid. <i>By</i> W. T. Melvin & H. M. Keir	1063
Genetic control of the immune response to bacteriophage ϕ X174 in inbred mice. <i>By</i> N. N. Suh & A. Ebringer	1065
Presence of a translational inhibitor in lymphocyte cytoplasm. <i>By</i> J. E. Kay, C. R. Benzie, P. Dicker & K. Lindahl-Kiessling	1067
Nucleotide synthesis from purine bases and nucleosides in rat skeletal muscle. <i>By</i> T. G. Sheehan & E. R. Tully	1070
Partial isolation and translation <i>in vitro</i> of mRNA species coding for α - and β -subunits of human placental <i>N</i> -acetyl- β -D-hexosaminidase. <i>By</i> G. C. Douglas & A. MacKenzie	1072
Changes in biochemical properties of alveolar macrophages during activation <i>in vivo</i> . <i>By</i> F. Hofmann, C. Bauer, P. G. Munder, W. Reutter & K. Decker	1074
Factors affecting the early stimulation of uridine uptake by lymphocytes incubated with phytohaemagglutinin. <i>By</i> E. Girit, C. A. Phillips & J. E. Kay	1077
Thymidine uptake in F ₁ rat cells stimulated by mitomycin-C-treated lymphocytes. <i>By</i> R. Subramaniam & A. Ebringer	1079
Chemical activation of native prothrombin. <i>By</i> C. R. W. Gray	1081
