

ESSAYS IN MEDICAL BIOCHEMISTRY

VOLUME 3

Edited by V. Marks and C. N. Hales.
pp. 152. £4.50 (U.S. \$9.00)

This volume presents in an attractive and readable form four biochemical topics of current medical interest. Hormones feature in articles on folate and B₁₂ interaction, and the role of the alimentary tract as an endocrine organ. Growing knowledge of proteins secreted by tumours is presented by Dr. I. Chanarin, and Dr. J. B. Holton discusses the value and risks of tests based on amniocentesis. The contributors clearly point out the limits of present knowledge and the scope for further development.

List of Contents and Authors

Preface

Folates, Cobalamins and their Inter-relationship in Man

By I. Chanarin

Tumour Markers

By K. D. Bagshawe and F. Searle

Diagnostic Tests on Amniotic Fluid

By J. B. Holton

The Gastrointestinal Hormones with Particular Reference to their Role in Regulation of Insulin Excretion

By V. Marks and D. S. Turner

Still available

Volume 1 £2.00 (US \$5.00)

Volume 2 £4.00 (US \$8.00)

Writing a SCIENTIFIC PAPER (4th Edition)

by VERNON BOOTH

A GUIDE TO IMPROVED
WRITING FOR ALL FROM
RESEARCH STUDENTS TO
PROFESSORS

CONCISE . . .

INFORMATIVE . . .

. . . EASY TO READ

This is an extensively revised and updated edition; the earlier editions are all out-of-print, having sold many thousands of copies. The continuing demand shows its worth to any scientist, from student to professor, who writes for publication. Written in concise form this booklet contains much valuable information within its pages. By far the cheapest publication on this subject and a worthy addition to your bookshelf.

32 pp. £1.00 (U.S. \$2.00)

SPECIAL DISCOUNTS are available to bona fide students' bodies or departments wishing to purchase in quantity:

11–20 copies less 10% discount

21–30 copies less 20% discount

31–50 copies less 30% discount

51 or more

copies less 40% discount

All orders, together with remittance, to:

SPECIAL PUBLICATION No. 5

Safety in Biological Laboratories

68 pp + xii ISBN 0904498 05 0

A concise, easily readable guide for workers in Life-Science Laboratories from Anatomy through Biophysics . . . Nutrition . . . Veterinology to Zoology. Emphasis is on **SAFETY** rather than **DANGER**, on avoidance of risks, elimination of hazards, and on the need for safety consciousness for the benefit of others as well as the worker's own person. Among topics discussed are radiation, animals, pathogens, carcinogens and other dangerous substances, vacuum distillation, fire and electricity as well as such simple operations as emptying autoclaves and connecting plastic tubing to glass tubing. The booklet is intended for all who work in laboratories, from the newest assistant to the head of department (who may come to realize that some of their standard practices contain avoidable elements of danger). So generous discounts are offered for bulk purchase.

The booklet should help every reader to be more likely to survive and to pass on the message: **SAFETY IN BIOLOGICAL LABORATORIES.**

CONTENTS

Preface

Glossary

Precautions for All Laboratory Workers

By Arthur W. Hartley and Vernon Booth

Electrical Hazards, Fire and Explosion

By Edward Hartree

The Role of the Safety Officer

By Oliver Phillip Edmonds

The Animal House

By Donald W. Jolly

Microbiological Hazards

By Richard D. Barry

Carcinogens, Mutagens, Teratogens

By Donald B. Cater and Edward Hartree

Radiation Hazards

By Philip P. Dendy

Subject Index

Limited stocks available of earlier volumes

No. 1 BIOCHEMISTRY AND MENTAL ILLNESS

Edited by L. L. IVERSEN and S. P. R. ROSE 251 pp. £4.50 (\$12.00)

No. 2 BIOCHEMISTS IN INDUSTRY

Edited by K. W. FULLER 58 pp. £1.25 (\$3.50)

No. 3 THE METABOLISM AND FUNCTION OF VITAMIN D

Edited by D. R. FRASER 114 pp. £4.00 (\$10.50)

No. 4 MEMBRANE ADENOSINE TRIPHOSPHATASES AND TRANSPORT PROCESSES

Edited by J. R. BRONK 197 pp. £5.00 (\$12.50)

Nonsense Mutations and tRNA Suppressors

edited by J. E. Celis and J. D. Smith

May 1979, x+350 pp., £16.00 0.12.164550.9

From the preface:

'This book is a record of the proceedings of the EMBO Laboratory Course and Aarhus University 50 Years Anniversary Symposium on "Nonsense mutations and tRNA suppressors" held in Aarhus in July 1978. The main aim of the book is to introduce the reader to the field of translational suppression, specifically to nonsense mutations and tRNA suppressors. The book covers classic work on nonsense suppressors in prokaryotes and yeast as well as the latest developments in the search for nonsense mutations and tRNA suppressors in higher eukaryotes. To help the reader the book contains a few general chapters dedicated to tRNA and its role in protein synthesis as well as a compilation of wild type and mutant tRNA sequences.'

Advances in Microbial Physiology Volume 18

edited by A. H. Rose and J. Gareth Morris

May 1979, x+300 pp., £18.60 0.12.027718.2

This series presents critical review articles on all aspects of the physiological and biochemical activities of micro-organisms. *Advances in Microbial Physiology*, spanning the area between microbiology and biochemistry, is able to deal with subjects of interest in both fields which previously have received little attention from reviewers.

Contents of Volume 18

R. H. Garrett and Nancy Klein Amy: Nitrate assimilation in fungi.

Paul S. Sypher, Peter T. Borgia and John L. Paznokas:

Biochemistry of dimorphism in the fungus *Mucor*. **Michael G. Sargent:**

Surface extension and the cell cycle in prokaryotes. **W. R. Finnerty:**

Physiology and biochemistry of bacterial phospholipid metabolism.
