THE NINTH JUBILEE LECTURE	PAGE
The mitochondrial fraction. <i>By</i> C. de Duve	823
583rd MEETING, CAMBRIDGE	
Colloquium: Hormones and Membranes	
Hormonal control of testicular lutropin receptors. <i>By</i> R. M. Sharpe	837
Distribution of gonadotropin receptors on the luteal-cell membrane and their coupling to adenylate cyclase (<i>by title only</i>). <i>By</i> T. A. Bramley	841
The thyrotropin receptor and thyrotropin-receptor antibodies. <i>By</i> B. R. Smith	842
Coupling of the glucagon receptor to adenylate cyclase. <i>By</i> M. D. Houslay	843
Reconstitution of hormonal responses in intact cells by cell-fusion hybridization with different plasma-membrane receptors (<i>by title only</i>). <i>By</i> D. Schulster	846
Hormone-receptor interactions: Corticotropin-(1-24)-tetracosapeptide spans artificial lipid-bilayer membranes. <i>By</i> P. Schoch, D. F. Sargent & R. Schwyzer	846
Colloquium: Rapid Responses in Cell to Hormones	
Short-term control of liver carbohydrate metabolism. <i>By</i> L. Hue	850
Hormonal control of pyruvate dehydrogenase (<i>by title only</i>). <i>By</i> P. J. Randle, A. L. Kerbey, P. M. Radcliffe & G. J. Sale	854
Rapid effects of hormones on enzymes of lipid metabolism. <i>By</i> E. D. Saggerson, S. R. Sooranna, E. J. Bates & C. H. K. Cheng	854
Quantitative cytochemistry in the detection and analysis of sensitive rapid effects of hormones. <i>By</i> J. Chayen, R. Chayen, G. M. Besser & L. Bitensky	857
Hormonal stimulation of phosphatidylinositol breakdown, with particular reference to the hepatic effects of vasopressin. <i>By</i> R. H. Michell, C. J. Kirk & M. M. Billah	861
The importance of measuring intracellular free Ca^{2+} . <i>By</i> A. K. Campbell, M. B. Hallett, R. A. Daw, J. P. Luzio & K. Siddle	865
Colloquium: Proton Translocation	
Comparative aspects of the energetics of oxidative phosphorylation in bacteria and mitochondria. <i>By</i> S. J. Ferguson, M. C. Sorgato, D. B. Kell & P. John	870
Stoichiometry of charge and proton translocation in mitochondria: Steady-state measurement of charge/O and P/O ratios. <i>By</i> M. D. Brand	874

	PAGE
Mechanism and stoichiometry of redox-linked proton translocation in mitochondria. <i>By</i> M. Wikström & K. Krab	880
Respiratory-chain protonmotive stoichiometry. <i>By</i> P. Mitchell & J. Moyle	887
COMMUNICATIONS	
Seasonal changes in glycogen synthase activity in the mantle tissue of the mussel <i>Mytilus edulis</i> L.: Regulation by tissue glucose. <i>By</i> P. A. Gabbott, P. A. Cook & M. A. Whittle	895
Control of NADP ⁺ -dependent isocitrate dehydrogenase activity in the mussel <i>Mytilus edulis</i> L. <i>By</i> E. J. H. Head & P. A. Gabbott	896
Seasonal changes in the triacylglycerol fatty acids of the mantle tissue of the mussel <i>Mytilus edulis</i> L. <i>By</i> M. J. Waldox & D. L. Holland	898
The contribution of the pentose phosphate cycle to the central pathways of metabolism in the marine mussel <i>Mytilus edulis</i> L. <i>By</i> B. N. Zaba & J. I. Davies	900
The effects of <i>pp'</i> -DDT[1,1,1-trichloro-2,2-bis(<i>p</i> -chlorophenyl)ethane] on carbohydrate metabolism in the developing neonatal rat. <i>By</i> M. R. L. Stratford & K. Snell	902
The polymeric structure of the native glycoprotein from human gastric-mucus gel. <i>By</i> J. P. Pearson, A. Allen & C. W. Venables	904
Heterophagy of asialo-glycophorin by rat liver. <i>By</i> G. R. Hildenbrandt & N. N. Aronson, Jr.	905
Deficiency of fructose 1,6-bisphosphate aldolase in type-II muscle fibres of the A2G-adr mouse mutant with abnormal muscle function. <i>By</i> J. Watkins, R. L. Watts & D. C. Watts	907
The binding of rat uterine cytosol oestrogen receptor to oligothymidylate-cellulose: Further evidence for the presence of a cytosol activating factor. <i>By</i> L. Myatt, M. G. Elder & L. Lim	909
The effect of dietary composition on the binding of insulin and glucagon to goat hepatocytes. <i>By</i> R. D. Gill & I. C. Hart	910
Glucagon antiserum: A tool to investigate the role of circulating glucagon in obese-hyperglycaemic (<i>ob/ob</i>) mice. <i>By</i> P. R. Flatt, S. K. Swanston-Flatt & C. J. Bailey	911
Subcellular distribution of protein kinase activities in mammalian islets of Langerhans. <i>By</i> Y. Ducommun, N. G. Morgan & W. Montague	913
Hormonal activation of bovine luteal adenylate cyclase. <i>By</i> N. B. Lydon, J. L. Young & D. A. Stansfield	915
Inhibition of steroid glucuronidation in guinea-pig liver microsomal fractions by physiological concentrations of uridine nucleotides. <i>By</i> R. De Brito & T. Hallinan	917
The effects of neuraminidase on foetal calf serum and fetuin. <i>By</i> J. G. Whateley & P. Knox	919
Attempted solubilization of boar testis microsomal androsta-5,16-dien-3 β -ol synthetase. <i>By</i> G. M. Cooke & D. B. Gower	920
The oleic acid-induced shape transformation of human erythrocytes. <i>By</i> M. G. Rumsby, S. Sparrow & C. Little	922
	1979

	PAGE
Mutability of the kinetic properties of the acetylcholine hydrolase activity of human erythrocytes. <i>By</i> S. F. Mabood, P. F. J. Newman & I. A. Nimmo	924
Modification <i>in vitro</i> of cholesterol content of sheep liver nuclear envelope. <i>By</i> P. S. Agutter, J. O. Munro & K. E. Suckling	926
Isolation of nuclear-pore complexes from Triton X-100-extracted rat liver nuclear envelope. <i>By</i> P. Marshall & J. R. Harris	928
The fate of liposomes in the rat small intestine. <i>By</i> D. A. Whitmore & K. P. Wheeler	929
Microvesicles are released from human erythrocytes aging at 4°C in heparin and citrate/phosphate/dextrose anticoagulants. <i>By</i> M. White, M. G. Rumsby & L. A. D. Tovey	931
Effects of lithium and haloperidol on blood platelet function. <i>By</i> H. W. Reading & R. Rose	933
The subcellular fractionation of plant shoot tissue by zonal rotor centrifugation. <i>By</i> K. J. Cattell, M. J. Connock, T. J. Hocking, P. R. Kirk, J. Shuttleworth & A. P. Sturdee	935
The interaction of dispersions of lipid-soluble fusogens with hen erythrocytes. <i>By</i> A. H. Goodall, M. J. Galloway, D. Fisher & J. A. Lucy	937
Microtubules and the agglutination and fusion of chicken erythrocytes by Sendai virus. <i>By</i> C. A. Hart & D. Fisher	939
A kinetic study of the degradation of human glomerular basement membrane by human polymorphonuclear leucocyte azurophil granules: Supportive evidence for the involvement of leucocytes in glomerulonephritis. <i>By</i> K. T. Hughes, M. Davies, E. Sanders & G. A. Coles	941
Transglutaminase activity in human erythrocytes stored for transfusion: Relationship to spectrin depletion in the microvesicles that form during the aging process <i>in vitro</i> . <i>By</i> W. F. Cole, M. G. Rumsby & L. A. D. Tovey	943
Synthesis of erythrosin isothiocyanate and its use as a phosphorescent depolarization probe for slow rotational mobility of membrane proteins. <i>By</i> C. H. Moore & P. B. Garland	945
Effects of bile salts on the plasma membranes of isolated hepatocytes. <i>By</i> D. Billington, C. E. Evans, P. P. Godfrey & R. Coleman	947
Membrane composition affects characteristics of glycocholate-induced lysis of erythrocytes. <i>By</i> R. Coleman & D. Billington	948
Specificity of lactating rat mammary-gland pyruvate dehydrogenase phosphate phosphatase for the phosphorylated residues of the α -subunit. <i>By</i> M. A. Baxter & H. G. Coore	949
Separation of isolated cardiac sarcolemma into inside-out and right-side-out vesicles by affinity chromatography. <i>By</i> J. Mas-Oliva, A. Williams & W. G. Naylor	950
Hydrophobic photolabelling of sodium-plus-potassium ion-stimulated adenosine triphosphatase. <i>By</i> C. Montecucco, H. Gutweniger, A. Johanson & R. Bisson	952
Labelling of the subunits of the mitochondrial adenosine triphosphatase complex in contact with the lipid bilayer. <i>By</i> C. Montecucco, R. Bisson, A. Pitotti, F. Dabbeni-Sala & H. Gutweniger	954

	PAGE
Identification of receptors for epidermal growth factor in the electron microscope by using an epidermal-growth-factor-biotin/avidin-gold procedure. <i>By</i> C. R. Hopkins, B. Boothroyd & H. Gregory	956
Transport of uric acid and L-phenylalanine by resealed erythrocyte 'ghosts' prepared by a dialysis technique. <i>By</i> U. Sprandel, A. R. Hubbard & R. A. Chalmers	957
Transport of oxalic acid, glycollic acid, glyoxylic acid and benzoic acid by resealed erythrocyte 'ghosts' prepared by a dialysis technique. <i>By</i> A. R. Hubbard, U. Sprandel & R. A. Chalmers	958
Manganese ions as a calcium ion probe: Use of water proton spin-lattice relaxation measurement. <i>By</i> K. J. Micklem, C. A. Pasternak, J. F. Gibson & R. N. Sheppard	960
Brush-border membrane lactase: Purification and kinetic analysis of two forms of the enzyme from the proximal and distal small intestine of suckling rats. <i>By</i> J. Cousineau & J. R. Green	961
Human intestinal brush-border sucrase: Mechanism of sodium ion activation below pH 7. <i>By</i> N. Bertrand-Triadou, C. Tellier & F. Alvarado	962
Effect of chlorpromazine on sugar transport across isolated brush-border membranes of the pig. <i>By</i> A. S. Manning & J. M. McMullan	963
Ionic effects on the transport of sugars in rat liver lysosomes. <i>By</i> K. Docherty & C. N. Hales	965
The role of calmodulin in the myosin light-chain kinase system. <i>By</i> A. C. Nairn & S. V. Perry	966
Partial characterization of a protein from rat liver 100000g supernatant which stimulates cholesterol 7 α -hydroxylase. <i>By</i> I. F. Craig, G. S. Boyd, R. J. McLeod & K. E. Suckling	967
The estimation of the electrical potential across the inner membrane of mitochondria within intact synaptosomes. <i>By</i> I. D. Scott & D. G. Nicholls	969
The isolation of the nicotinic acetylcholine-receptor protein from human muscle. <i>By</i> F. A. Stephenson, R. Harrison & G. G. Lunt	971
Fucose-containing proteins in synaptic membranes. <i>By</i> C. J. Branford White & A. M. Moseby	973
Variability of lipid concentrations and phosphatidylcholine-cholesterol acyl-transferase activity in plasma from three species of amphibians. <i>By</i> N. P. T. Gillett, A. M. K. Sibrian & J. S. Owen	974
Mutations affecting lipid biosynthesis of <i>Saccharomyces cerevisiae</i> : Isolation of ethanolamine auxotrophs. <i>By</i> V. A. Letts & I. W. Dawes	976
The action of cholesterol oxidase on cholesterol in vesicles and micelles. <i>By</i> S. G. De Martinez & C. Green	978
The specific interaction of <i>Escherichia coli</i> initiation factor IF3 with coliphage-MS2 ribonucleic acid. <i>By</i> M. J. F. Fowler & M. Szekely	979
An explanation for variations in the clinical and biochemical symptoms of lysosomal-enzyme deficiency diseases such as GM ₁ gangliosidosis. <i>By</i> P. S. J. Cheetham	980
	1979

	PAGE
Effect of mononuclear-cell factor on prostaglandin production by cells cultured from human gingiva, synovium, cartilage and endometrium. <i>By</i> D. J. Englis, S. M. D'Souza, J. E. Meats, M. B. McGuire, J. Wright & R. G. G. Russell	982
Measurement of unbound non-esterified fatty acid concentrations in serum. <i>By</i> D. M. Salmon & J. P. Flatt	983
Increased phosphatidate accumulation during single contractions of isolated smooth-muscle cells. <i>By</i> D. M. Salmon & T. W. Honeyman	986
The effect of splenectomy on plasma phosphatidylcholine-cholesterol acyl-transferase activity and blood lipids in human schistosomiasis mansoni. <i>By</i> L. C. B. B. Coélho & M. P. T. Gillett	988
The action of <i>Bacillus cereus</i> phospholipase C on central-nervous-system myelin in freshly isolated and freeze-dried resuspended forms. <i>By</i> K. Gwarsha, C. Little & M. G. Rumsby	990
Insulin receptors and anabolic activity of rat adipose tissue during early pregnancy. <i>By</i> R. G. Vernon, R. A. Clegg & D. J. Flint	992
Characterization of the uptake of 1,6-diphenylhexa-1,3,5-triene by adipocyte membranes. <i>By</i> R. E. Hubbard & C. J. Garratt	993
Counter-transport of 3- <i>O</i> -methylglucose in rat adipocytes. <i>By</i> T. B. Ponnudurai & C. J. Garratt	995
Human lymphocyte ecto-5'-nucleotidase is not directly involved in immunoglobulin production. <i>By</i> M. Rowe & S. M. Johnson	997
5'-Nucleotidase on stimulated mouse lymphocytes <i>in vitro</i> and <i>in vivo</i> . <i>By</i> S. M. Johnson, R. Robinson & A. J. Edwards	998
Ribonuclease activity in lymphocyte cytoplasm before and after activation of the cells with phytohaemagglutinin. <i>By</i> D. M. Wallace, G. Ungpakorn & J. E. Kay	1000
Nucleoside uptake, acronycine action and membrane fluidity during lymphocyte activation. <i>By</i> B. Kennedy	1002
Changes in the synthesis of non-histone chromatin proteins associated with proliferation and differentiation of B-lymphocytes. <i>By</i> D. I. Stott	1004
Appearance of a new nucleoplasmic protein in B-lymphocytes after stimulation with lipopolysaccharide. <i>By</i> D. I. Stott	1006
Early effects of lectins on lymphocyte membrane transport correlate with induction of proliferation. <i>By</i> A. F. Borghetti, E. Z. Girit & J. E. Kay	1007
Calcium ion-dependence of the early stimulation of lymphocyte nucleoside transport by phytohaemagglutinin and ionophore A23187. <i>By</i> J. E. Kay & A. Mattsson	1009
Biosynthesis of Thy antigen. <i>By</i> J. M. Graham, K. H. M. Coffey, J. E. Smith & C. A. Pasternak	1011
Foetal calf serum and the adhesion of cells in culture. <i>By</i> P. Knox, S. Griffiths & J. G. Whateley	1011
Labelling of specific antibodies with fluorescein isothiocyanate with protection of the antigen-binding site. <i>By</i> S. A. Imam	1013
Kinetics of prostaglandin E ₂ suppression of mitogen-stimulated peripheral blood lymphocytes. <i>By</i> A. E. Kingston & J. Ivanyi	1014

	PAGE
Preparation of monoclonal antibodies to chick neural retina-cell-surface antigens. <i>By F. S. Walsh & G. S. Eisenbarth</i>	1016
Enzyme immunoassay of albumin as an aid to the diagnosis of cystic fibrosis in the newborn human. <i>By T. H. Adams, G. M. Ramsay & G. B. Wisdom</i>	1018
Enzyme immunoassay of specific immunoglobulins to semliki-forest virus in infected nude (Athymic) mice. <i>By A. J. Suckling, S. Jagelman & H. E. Webb</i>	1019
Purine metabolism studied with high-pressure liquid chromatography. <i>By R. A. Harkness, R. J. Simmonds, M. C. O'Connor & A. D. B. Webster</i>	1021
Rapid internalization of plasma-membrane 5'-nucleotidase in rat spleen lymphocytes in response to rabbit anti-(rat liver 5'-nucleotidase) serum. <i>By K. K. Stanley, M. R. Edwards & J. P. Luzio</i>	1023
The subcellular distribution and regulation of platelet phosphoprotein phosphatase. <i>By A. G. Castle, P. Gergely & N. Crawford</i>	1024
Substrate utilization by the isolated perfused rat lung. <i>By H. Datta & K. G. M. M. Alberti</i>	1026
An isolated rat heart as a model for metabolic and pharmacological studies of ischaemia. <i>By A. S. Manning, D. J. Hearse & D. J. Coltart</i>	1028
The effect of cell cytosol on adenylate cyclase activation in particulate preparations. <i>By A. Crawford, S. MacNeil, H. Amirrasooli, S. Johnson, C. Ollis & J. Wright</i>	1030
The role of 5'-nucleotidase. <i>By A. C. Newby</i>	1030
Calcium ions and adenosine 3':5'-cyclic monophosphate in hepatocytes: Effects of ethanedioxybis(ethylamine)tetra-acetate (EGTA) and ionophore A23187. <i>By S. A. Westwood & K. Siddle</i>	1032
Lack of effect of insulin on guanosine 3':5'-cyclic monophosphate content of insulin-sensitive rat hepatocytes. <i>By D. A. Flockhart & K. Siddle</i>	1033
Alterations in concentration of adenosine 3':5'-cyclic monophosphate and guanosine 3':5'-cyclic monophosphate in guinea-pig plasma during development of a transplantable leukaemia. <i>By P. A. Light, M. Nowak & J. D. M. Albano</i>	1035
Rat brain and lung cyclic nucleotide phosphodiesterases: Different responses to cromoglycate. <i>By S. A. Saeed, N. M. Butt & W. A. Taylor</i>	1037
Theoretical studies of the control of adenosine 3':5'-cyclic monophosphate by the high- and low- K_m phosphodiesterases. <i>By D. A. Fell</i>	1039
Comparison of rates of protein synthesis in skeletal muscle measured <i>in vivo</i> and in the perfused hemicorpus. <i>By V. R. Preedy, V. M. Pain & P. J. Garlick</i>	1040
Inhibition of adenosine 3':5'-cyclic monophosphate phosphodiesterase by nicotinic acid. <i>By S. A. Saeed, N. M. Butt, J. R. Lovely & H. O. J. Collier</i>	1042
Aerobic lactate synthesis by rat cardiac muscle. <i>By P. Strong & J. Illingworth</i>	1044
Starvation and enzyme activities in the skeletal muscles and liver of a teleost fish (<i>Pleuronectes platessa</i>). <i>By T. W. Moon & I. A. Johnston</i>	1045
Acetaldehyde dehydrogenase activity in the intestine of the rainbow trout (<i>Salmo gairdnerii</i>). <i>By A. Bauermeister & J. Sargent</i>	1047
Enzymes of serine metabolism in normal and neoplastic tissues. <i>By K. Snell & W. E. Knox</i>	1048
	1979

	PAGE
Characterization of the phosphorylase phosphatase associated with dog liver particulate glycogen as a manganese metalloenzyme. <i>By</i> G. Defreyn, J. Verplaetse, J. Goris, R. Lontie & W. Merlevede	1050
Effects of treating rats with hydrazine on the circulating concentrations of corticosterone and insulin in relation to hepatic triacylglycerol synthesis. <i>By</i> J. Cooling, S. L. Burditt & D. N. Brindley	1051
Lipoprotein lipase in lactating rat mammary tissue. Purification, characterization and surface location on isolated mammary cells. <i>By</i> R. A. Clegg	1053
The effects of chronic hyperinsulinaemia on insulin binding and glucose metabolism in rat adipocytes. <i>By</i> J. Whittaker, K. G. M. M. Alberti, D. A. York & J. Singh	1055
Proteins contained within hepatic lysosomes. <i>By</i> B. M. Mullock, M. Dobrota & R. H. Hinton	1056
Functional arginine residues in bovine testicular hyaluronidase. <i>By</i> P. Gacesa, K. S. Dodgson & A. H. Olavesen	1058
A rapid sensitive assay for glutathione <i>S</i> -epoxidettransferase activity: Species differences in the activity of the hepatic enzyme. <i>By</i> G. M. Pacifici, A. R. Boobis, M. J. Brodie & D. S. Davies	1060
A study of kininase activity in pig liver. <i>By</i> R. K. Sharma, C. N. Dearnley & G. S. Bailey	1061
Metabolism of phenethylamine and 5-hydroxytryptamine by cultured vascular cells. <i>By</i> M. A. Trevethick, J. D. Pearson, H. J. Olverman & J. L. Gordon	1063
Radioimmunoassay of 6-oxoprostaglandin F _{1α} and prostaglandin E ₂ produced by pig aortic endothelium in culture. <i>By</i> A. Ager, J. D. Pearson & J. L. Gordon	1065
The rapid increase in intracellular free calcium ion concentration induced by complement and its role in cell damage. <i>By</i> J. P. Luzio, R. A. Daw, M. B. Hallett, P. J. Richardson & A. K. Campbell	1066
Manganese and autologous-membrane-dependent anticancer autologous antigen preparation ('AAAP') for treating established cancer. <i>By</i> D. L. McCollester	1068
The effects of hormone treatment on the transfer ribonucleic acid methylase activity in liver and skeletal muscle of rats. <i>By</i> A. M. Leyman & W. De Loecker	1069
Determination of the catalytic groups of intestinal brush-border sucrase by pH-variation studies. <i>By</i> C. Tellier, N. Bertrand-Triadou & F. Alvarado	1071
Chorismate mutase/prephenate dehydrogenase: Protection of the active site(s) against inactivation by iodoacetamide. <i>By</i> E. Heyde	1072
Microsomal biphenyl hydroxylation: The effect of selective deuterium substitution on the rate of formation of the monohydroxybiphenyls. <i>By</i> J. W. Bridges, D. McKillop, P. J. Cox, P. B. Farmer, A. B. Foster & M. Jarman	1073
Evidence for a model of regeneration of a protonated species, bR, from a photo-transient, M, in the photochemical cycle of bacteriorhodopsin from <i>Halo-bacterium halobium</i> . <i>By</i> M. E. Edgerton & C. Greenwood	1075
Phosphatidylcholine degradation in mouse plasma. <i>By</i> M. P. T. Gillett, E. M. Costa & J. S. Owen	1077
L-Fucosyltransferase activity in the human cervical epithelium. <i>By</i> P. Scudder & E. N. Chantler	1079

	PAGE
Isolation of L-histidine ammonia-lyase from rainbow trout (<i>Salmo gairdneri</i> Richardson). <i>By</i> B. J. Fowler, R. L. Allen & D. A. Phipps	1081
Tyramine-mediated enhancement of arylsulphatase purified from <i>Pseudomonas</i> C ₁₂ B. <i>By</i> J. R. George & J. W. Fitzgerald	1082
Activation of haemolytic activity in chick-embryo fibroblast cells infected with Newcastle-disease virus strain N. <i>By</i> J. H. Dickinson & A. C. R. Samson	1084
Sequencing the 5'-end of foot-and-mouth-disease virus (<i>by title only</i>). <i>By</i> T. J. R. Harris	1085
Comparison of translation products <i>in vivo</i> and <i>in vitro</i> of cowpea-mosaic virus (<i>by title only</i>). <i>By</i> R. W. Goldbach	1085
The effect of spermidine on ribonucleic acid polymerase II activity in isolated nuclei from baby-hamster kidney cells (BHK-21/C13). <i>By</i> H. M. Wallace & H. M. Keir	1086
The fractionation and isolation of DNA-binding proteins from human serum. <i>By</i> A. R. Siddiqui, R. J. H. Davies & J. A. Hill	1088
The two-dimensional electrophoresis of human serum DNA-binding proteins. <i>By</i> A. E. Hughes, W. S. B. Lowry, J. A. Hill & R. J. H. Davies	1089
Isolation of an oligonucleotide, a potent inhibitor of eukaryotic and viral messenger ribonucleic acid translation, from chick embryonic muscle. <i>By</i> M. G. Pluskal, R. K. Roy & S. Sarkar	1091
Deoxyribonucleic acid-binding properties of the deoxyribonucleic acid-dependent deoxyribonucleic acid polymerase induced in baby-hamster kidney cells after infection with herpes simplex virus type I. <i>By</i> H. N. Baybutt & C. K. Pearson	1093
The conformation of HeLa-cell 5.8S ribosomal ribonucleic acid: Evidence from the reaction of specific uridine residues with carbodi-imide. <i>By</i> J. M. Kelly, B. E. H. Maden & J. P. Goddard	1095
Organization of the genome of turnip yellow-mosaic virus deduced from its messenger properties. <i>By</i> C. Bénicourt & M.-D. Morch	1095
Dissociation between ⁴⁵ Ca uptake and insulin release: Evidence for an inhibitory pool of calcium in the β -cell plasma membrane. <i>By</i> P. R. Flatt, E. Gylfe & B. Hellman	1097
Models for membrane calcium fluxes using nuclear-magnetic-resonance lanthanide-ion probes (<i>by title only</i>). <i>By</i> G. R. A. Hunt, L. R. H. Tipping & K. Jawaharlal	1100
The incorporation of arsenazo III into fragmented sarcoplasmic-reticulum vesicles, and its use to study the adenosine triphosphate analogue adenosine [β -imido]triphosphate as a substrate for the calcium pump. <i>By</i> C. J. Hole & D. W. Yates	1101
Effects of non-gonadal hormones on rat liver drug-metabolizing enzymes and cytochrome P-450 during early postnatal development. <i>By</i> J. E. A. Leakey, J. R. Fouts & G. J. Dutton	1103
Structure-activity relationship for 'safrole-type' cytochrome P-450 induction. <i>By</i> T. R. Fennell & J. W. Bridges	1104
Intact guinea-pig intestinal cells as a model for studying drug metabolism. <i>By</i> J. R. Dawson & J. W. Bridges	1106
	1979

	PAGE
Effect of age and sex on enhancement of biphenyl 2-hydroxylation. <i>By</i> D. J. Benford & J. W. Bridges	1107
Effect of protein synthesis inhibitors on the induction of rat liver microsomal cytochrome <i>P</i> -448 by 3-methylcholanthrene. <i>By</i> T. W. Poole & D. V. Parke	1109
The generation of a membrane potential by a fermentative bacterium. <i>By</i> D. J. Clarke, D. B. Kell & G. Morris	1111
Rotational mobility of membrane-bound cytochrome <i>o</i> of <i>Escherichia coli</i> and cytochrome <i>a</i> ₁ of <i>Thiobacillus ferro-oxidans</i> . <i>By</i> P. B. Garland, M. T. Davison & C. H. Moore	1112
Synthesis of a dicyclohexylcarbodi-imide-binding proteolipid by isolated pea chloroplasts. <i>By</i> A. Doherty & J. C. Gray	1114
The methanogenic fermentation of plant phenolics. <i>By</i> M. T. Balba, N. A. Clarke & W. C. Evans	1115
Proton transport across the thylakoid membrane at subzero temperatures (<i>by title only</i>). <i>By</i> L. F. Olsen & R. P. Cox	1117
Separation and purification of two hydrogenase activities in <i>Chromatium</i> : Kinetics and subunit analysis. <i>By</i> M. J. Llama, J. L. Serra, K. K. Rao & D. O. Hall	1117
Properties of the monomeric and dimeric forms of <i>Chromatium</i> hydrogenase. <i>By</i> J. L. Serra, M. J. Llama, K. K. Rao & D. O. Hall	1119
The effect of dibutylchloromethyltin on plant mitochondria. <i>By</i> A. L. Moore, P. E. Linnett & R. B. Beechey	1120
Photorespiratory nitrogen cycling: Evidence for a mitochondrial glutamine synthetase. <i>By</i> C. Jackson, J. E. Dench, P. Morris, S. C. Lui, D. O. Hall & A. L. Moore	1122
The effect of lead nitrate on purified pig heart pyruvate dehydrogenase. <i>By</i> K. Hyland & D. C. H. McBrien	1124
The role of adenosine triphosphate in the regulation of free calcium ion concentrations by mitochondria from guinea-pig cerebral cortex (<i>by title only</i>). <i>By</i> D. G. Nicholls & I. D. Scott	1126
Properties of chloroform-released ox heart mitochondrial adenosine triphosphatase: Comparison with F ₁ -adenosine triphosphatase and factor A. <i>By</i> P. N. Lowe, H. Baum & R. B. Beechey	1127
Epidermal lipid liposomes: A novel non-phospholipid membrane system. <i>By</i> G. M. Gray & R. J. White	1129
Preparation and chemical properties of periodate-oxidized adenosine triphosphate and some related compounds. <i>By</i> P. N. Lowe, H. Baum & R. B. Beechey	1131
Interactions between periodate-oxidized adenosine triphosphate and the mitochondrial adenosine triphosphatase. <i>By</i> P. N. Lowe, H. Baum & R. B. Beechey	1133
Hydrogen-dependent proton translocation by membrane vesicles from <i>Escherichia coli</i> . <i>By</i> R. W. Jones	1136
Cell-density control of amino acid transport in simian virus 40-transformed 3T3 cells. <i>By</i> G. Piedimonte, M. Tramacere & A. F. Borghetti	1137

Reaction and diffusion in membranes. <i>By</i> Y. Schiffmann	1140
A non-equilibrium biochemical control theory based on lateral diffusion. <i>By</i> Y. Schiffmann	1142
Colicin E1-induced membrane de-energization in <i>Escherichia coli</i> . <i>By</i> S. M. Hammond & W. A. Cramer	1145
BIOCHEMICAL REVIEWS	
Molecular democracy: Who shares the controls? <i>By</i> H. Kacser & J. A. Burns	1149
Sequestration of metabolites: Insights into metabolic control. <i>By</i> J. H. Ottaway	1161
BOOK REVIEWS	1169
