Subject Index

Entries prefixed by an asterisk refer to papers represented by title only.

- Abscisic acid**
control of tocopherol oxidase *in vitro* 186–187
Acer pseudoplatanus, see Sycamore
- Acetate**
adaptation of cells of *Chlorella fusca* 736–737
- Acetylcholine**
receptors, see Acetylcholine receptors
- Acetylcholine receptors**
antigenic sites 741
myasthenia gravis 693–694
protein 693–694
toxin-binding sites 741
- Acetylcholinesterase**
erythrocyte 551
- Acetyl-CoA carboxylase**
removal of phosphorylation site 387–388
- Acid proteinases**
kidney-cortex 596–597
- Acinetobacter calcoaceticus***
mandelate dehydrogenase 653–654
- Actin**
myosin subfragment 1 650
skeletal-muscle 650
- Actinomyces israelii***
inhibitors of cell culture growth in 137–138
- Actinomycin D**
effect on murine tumour 107–108
liposome-entrapped 107–108
- Active-site titration**
trypsin 193–194
- Adenine derivatives**
effect on urate biosynthesis 140–141
- Adenosine**
binding in brain 141–142
- Adenosine 3':5'-cyclic monophosphate**
adenosine activation of formation 141–142
adenylate cyclase activity 139–140
islet-of-Langerhans 579–580
protein biosynthesis 613–614
- Adenosine 3':5'-cyclic monophosphate phosphodiesterase**
insulin 537–538
liver 537–538
plasma-membrane 537–538
see also Cyclic AMP phosphodiesterase
- Adenosine deaminase**
lipolysis and esterification 362–363
- Adenosine diphosphatase**
liver 599–600
- Adenosine diphosphate ribosylation**
nuclear proteins 215–227
proteins in rat pancreas 192
- Adenosine triphosphatase**
Ca²⁺-activated 38–40
effect of lipids on activity 46–48
erythrocyte 718
(Na⁺ + K⁺)-dependent 46–48
- Adenosine triphosphate**
effect on alkylsulphohydrolase induction 92
effect on [¹⁴C]choline uptake in synaptosomes 138
erythrocyte-'ghost' 578
inhibition of pyruvate kinase 385–386
restriction enzymes 396–397
- Adenosine triphosphate synthesis**
rat liver mitochondria 454–455
- Adenosine triphosphate synthesis/membrane-fixed-charge relationships**
protonmotive force 453–454
- S-Adenosylmethionine**
concentration in brain 62–63
tissue concentration 62–63
- Adenylate cyclase**
activation by human choriogonadotropin 386–387
computer simulation of activity 139–140
corpus luteum 306–307
dimethyl 3,3'-dithiobispropionimidate 306–307
interaction with gangliosides 128–129
luteal membranes 386–387
regulation of cytochrome *P*-450 biosynthesis 712–713
- Adipocytes**, see Fat-cells
- Adipose tissue**
brown, see Brown adipose tissue
cholesterol esterase 728–729
lipid biosynthesis 590–591
lipolytic agents and fatty acid esterification 362–363
lipoprotein lipase 74
regulation of metabolism during lactation 369–370, 370–371
regulation of metabolism during pregnancy 370–371
triacylglycerol lipase 728–729
very-low-density-lipoprotein metabolism 539–540
xanthine oxidase and lipolysis 363–364
- Adrenal gland**
aminoglutethimide inhibition of steroidogenesis 301
- Adrenal-gland cortex**
steroid-hormone biosynthesis 584–585
- Adrenal medulla**
copper deficiency and catecholamine synthesis 342
- Adrenaline**
effect on Ca²⁺ movement in liver 144–145
- β-Adrenergic receptors**
visual-centre 633–624
- Adrenocorticotropin**, see Corticotropin
- *Adrenocorticotropin prohormone of endorphin (31000 mol. wt.)**
selective processing 413
- Affinity chromatography**
aldose reductase 194–195
- Age**
cell, see Cell age
- Aggregation**
platelet, see Platelet aggregation
- Agrobacterium tumefaciens***
mapping of Ti plasmid 173–174
- Alanine**
biosynthesis 501–504, 506–509
hepatic gluconeogenesis 205–213
hepatocyte 577
metabolism 577
skeletal-muscle 501–504, 574–575
small-intestine 506–509
synthesis in muscle 205–213
transport 577
- Albumin**
antibodies to, see Anti-albumin antibodies

- Albumin—*continued*
 Ca²⁺ activation of mitochondrial isocitrate dehydrogenase (NAD⁺) 339
 effect on arachidonate oxygenation during prostaglandin biosynthesis 79–80
 serum, *see* Serum albumin
- Alcian Blue
 colorimetric glycoprotein assay 72
- Aldose reductase
 affinity chromatography 194–195
 bovine lens 194–195
 erythrocyte 644–645
 human erythrocyte 194–195
- Algal (*Chlorella*) photosynthesis
 effects of pO₂ and pCO₂ 479–481
- Alkaline phosphatase
 small-intestine 645–646
- Alkaline proteinases
 smooth-muscle 564–565
- Alkylsulphohydrolase
 inhibition of induction in *Pseudomonas C*₁₂B 92
- Amino acid starvation
 initiation factor eIF-2 in Ehrlich ascites-tumour cells 348, 350–351
 polypeptide-chain initiation in Ehrlich ascites-tumour cells 350–357
- Amino acid transport
 osmotic pressure 319
- Amino acids
 aromatic 625–627
 brain 609–610
 cerebral 63–64
 concentrations in brain 64–65
 ion-gradient-linked transport 271–273, 275–276
 metabolism 497–499
 methanogenesis 625–627
 Na⁺ and transport in *Halobacterium* 275–276
 neutral 609–610
 skeletal-muscle 497–499, 499–501
 transport in *Trypanosoma brucei* 273–275
 turnover 499–501
- Aminoacylation
 modified tRNA^{Phe} 89–90
- γ-Aminobutyrate
 release 61–62
- Aminoglutethimide
 breast cancer 301
- Ammonia
 kidney 509–510
 metabolism 509–510
- Amniotic fluid
 prostaglandins 659–662
- Anabaena variabilis*
 K⁺ transport 709–710
 K⁺ transport and electrogenesis 708–709
 proton electrochemical potential gradient 707–708
 Rb⁺ transport 709–710
- [4-¹⁴C]Androstenedione
 metabolites in skeletal muscle 134
- Anions
 inhibition of arylsulphatases A and B 405–451
- Anti-albumin antibodies
 immunoaffinity purification 430–431
- Antibodies
 anti-albumin, *see* Anti-albumin antibodies
 immunoglobulin G, *see* Immunoglobulin G antibody
 monoclonal, *see* Monoclonal antibodies
 viral, *see* Viral antibody
- Antibody response
 influenza virus 257–260
- Anticoagulant
 sulphated polysaccharides 82–83
- Antigens
 brain 608
 embryonic, *see* Embryonic antigens
 Ehrlich-ascites-tumour-cell, *see* Ehrlich-ascites-tumour-cell antigens
- Antithrombin III
 anticoagulant effects 82–83
 effect of sulphated polysaccharides on clotting 188–189
 inhibition of platelet aggregation 84–85, 85–86
 plasmin and 652–653
- Aorta
 protein phosphorylation during contraction 365–366
- Apoferitin
 heavy-metal-ion-binding sites 654–655
 iron uptake 655–656
- Arachidonate
 induction of platelet aggregation 726–727
 oxygenation during prostaglandin biosynthesis 79–80
- Arginine methylase
 myelin basic protein 611–612
 spinal-cord 611–612
- Artemia salina*, *see* Brine shrimp
- Arylsulphatase
 sheep liver and gut 343–344
- Arylsulphatases A and B
 inhibition by nucleotides and other anions 450–451
- Ascites cells
 Krebs II, *see* Krebs II ascites cells
- Ascites tumour
 Ehrlich, *see* Ehrlich ascites tumour
- Ascites-tumour cells
 aerobic glycolysis 579
 Ehrlich, *see* Ehrlich ascites-tumour cells
- Asialo-fetuin
 metabolism by cells in culture 197–198
- Aspergillus carbonarius*
 spore germination 429–430
- Aspergillus nidulans*
 deoxyribonuclease 4 445–446
 neutral proteinases 542–543
- Astrocytes
 brain 604–605
 cerebroside 604–605
- Atrophic skeletal muscle
 glycosidases 447–448
- Auxin
 carrot-embryo abortion induced by 627–628
- Auxins
 control of tocopherol oxidase *in vitro* 186–187
- Axons
 neurofilaments 484–487
- B- and T-lymphocytes
 radiochemical assay for glycol-leucine dipeptidase 438–438
- Baby-hamster kidney cells (BHK-21/C13)
 sulphated glycosaminoglycans 134–136
- Bacilli
 tunicamycin and wall-polymer synthesis 164–166
- Bacteria
 active transport of peptides 683–685
 binding-protein-dependent transport 678–679
 proton-coupled transport 678–679
- Bacteriorhodopsin
 proton pump of *Halobacterium halobium* 677–678

- Balenine**
skeletal-muscle 552
- Band-3 glycoprotein**
monoclonal antibodies 334–335
- Barley (*Hordeum vulgare*) leaves**
chloroplast differentiation 534
lipid metabolism 534
- Basic protein**
myelin 491–493, 601–602, 603–604, 611–612, *613
- Bean (*Vicia faba*)**
enzyme activities in subcellular fractions 177–178
- cis-Benzenediol**
phenol production 425–453
- Benzoate**
Desulfovibrio vulgaris 624–625
metabolism 624–625
Pseudomonas aeruginosa 624–625
- Benzol[a]pyrene**
binding to cytochrome *P*-450 200–201
n.m.r. spectroscopy of interaction with cytochrome *P*-450 99–100
- N*-Benzoyloxycarbonyltyrosine *p*-nitrophenyl ester**
plasmin 583–584
- Bifurcation diagrams**
biochemical response curves 313–315
- Bile**
effect of somatostatin on flow of 53–54
enterokinase excretion 55
transport of proteins into 114
- Bile acids**
subcellular distribution 111–112
- Bile salts**
binding to rat liver ligandin 372
binding to rat serum albumin 372
membrane damage 126–127
- Binding**
cytochrome *c* oxidase 78–79
haemoproteins 75–76, 78–79
proton-dependent, *see* Proton-dependent binding
- Bioactivation**
post-translational proteolysis 411–412
- Biochemical response curves**
bifurcation diagrams 313–315
- Biodegradation**
catechol 452–453
methanogenic, *see* Methanogenic degradation
- Biotechnology**
green-cell cultures 475–482
photosynthetic cells 481–482
solar energy 481–482
- Birds**
lipid metabolism 295–296
- Blood**
storage and NADH–ferricyanide reductases 325, 326
- Blood plasma, *see* Plasma**
- Blood platelets, *see* Platelets**
- Blue-green algae**
minor nucleotides in tRNA 87–88
- Bone**
inhibitor of collagenase 112–113
- Book Reviews and Publications Received** 157–161, 229–240, 401–408, 467–474, 669–674, 767–776
- Brachial plexus**
cortical protein synthesis after activation of 65–66
- Brain**
adenosine binding 141–142
adenylate cyclase 128–129
amino acid uptake 609–610
antigens 608
astrocytes 604–605
calmodulin 487–489
calmodulin-binding proteins 487–489
cyclic AMP phosphodiesterase 128–129
demyelination 483–494
diamagnetic-cation detection by chlortetracycline fluorescence 340–341
enolase 489–491
gangliosides 128–129
gastrin-like immunoreactive peptide 50–51
glycine-cleavage system 504–506
methylenetetrahydrofolate reductase 392–393
mitochondria and synaptosomal Ca²⁺ transport 264–266
myelin 600–601, 603–604, 604–605, 618–619
neurofilaments 484–487, 614–615, 615–616
neurons 604–605
oligodendrocytes 604–605
oligodendroglia 612–613
polypeptide composition of cells during development 335–336
protein 14–3–2 489–491
protein 14–3–3 617–618
protein biosynthesis 613–614
proteins 494–496, 608, 616–617, 620–621
synapses 483–484, 619–620
thromboplastin 133
thyroliiberin deaminase 424
triacylglycerol formation and hydrolysis during myelination 368–369
tubulin 725
visual centres 623–624
- Brain cortex, *see* Cerebral cortex**
- Brain tissue**
synaptosomal-membrane preparations 423
thyroliiberin pyroglutamyl peptidase 423
- Branched-chain 2-oxo acid dehydrogenase**
phosphorylation in intact mitochondria 374
- Breast cancer**
aminoglutethimide 301
- Breeding**
plant, *see* Plant breeding
- Brine shrimp**
uracil-DNA glycosylase 730–731
- Brown adipose tissue**
Ca²⁺ activation of mitochondrial isocitrate dehydrogenase (NAD⁺) 339
cold-acclimation and fatty acid synthesis 375
- Bruceantin**
protein-synthesis-initiation inhibitor 357–359
- Brush border**
membranes, *see* Brush-border membranes
- Brush-border membrane vesicles**
glucose uptake 318
- Brush-border membranes**
disease 688–690
- α-Bungarotoxin**
binding component from *Musca domestica* 742–743
- C₁ compounds**
microbial assimilation 1–10
- Cadmium ions**
inhibition of synaptosomal dopamine uptake 68
- Calcitonin**
immunoreactive material from tumour cells 340
- Calcium-binding glycoprotein**
mitochondrial Ca²⁺ uptake 338
- Calcium-binding protein**
small-intestine 528–529

- Calcium ions
 accumulation by mammary Golgi-rich fraction 337-338
 activation of mitochondrial isocitrate dehydrogenase (NAD⁺) 339
 cellular regulation 261-270
 effect of adrenaline in liver cells 144-145
 effect of glucagon in liver cells 144-145
 effect on glutamate release from rat striatum 109-110
 Golgi-vesicle 525-526
 5-hydroxytryptamine secretion 530-531
 initiation of lymphocyte growth 721-722
 mammary-gland 525-526
 membrane ion permeability 268-270
 mercurial-stimulated mitochondrial efflux 336-337
 mitochondria and transport in synaptosomes 264-266
 mitochondrial cycle with Na⁺ 261-262
 mitochondrial influx and efflux 262-264
 mitochondrial uptake and Ca²⁺-binding glycoprotein 338
 pancreatic acinar cells 268-270
 regulation of mitochondrial metabolism 266-268
 thromboxane B₂ biosynthesis 530-531
 transport 525-526
- Calmodulin
 brain 487-489
 phosphorylase kinase subunit binding 387
 posterior-pituitary-gland 557-558
- Calmodulin-binding proteins
 brain 487-489
- Cancer
 breast 301
- Candida lipolytica*
 extracellular-esterase uptake by membrane vesicles 320-321
- Canine-distemper virus
 large- and small plaque 428-429
 neurovirulence for hamsters 428-429
- Carbohydrates
 greening of plant cultures 475-477
- Carbon dioxide partial pressure
 algal photosynthesis 479-481
- Carbon disulphide
 hepatotoxicity 97-98
- Carbonic anhydrase
 acidemia 86-87
 biosynthesis 548-550
 erythrocytes 86-87
 isoenzymes 86-87
 reticulocyte 548-550
 skeletal-muscle 643
- Carboxylic acids
 fatty acid biosynthesis 562-563
- Carcinoma
 immunoreactive calcitonin 340
 Walker 256, *see* Walker 256 carcinoma
- Carcinus maenas*, *see* Common shore crab
- Cardiac muscle
 initiation by ribosomes 360-361
 insulin pretreatment and ribosomes 359-360
 plasma-membrane fraction containing interrelated discs 328
- Carotenoid shift
 light-harvesting pigment-protein complexes in *Rhodospirillum rubrum* 188
- Carrageenan
 induction of platelet aggregation 84-85
- Carrot (*Daucus carota*) embryos
 auxin-induced abortion 627-628
- Cartilage glycosaminoglycans
 comparison of solvent extractions 446-447
 10 μm-thick sections 432-433
- Casein kinases
 Krebs II ascites cells 347
- Castration
 effect on drug metabolism 342-343
- Catechol
 methanogenic biodegradation by microbial consortium 452-453
- Catecholamines
 adrenal synthesis and copper deficiency 342
- Cathepsins
 kidney-cortex 596-597
- Catheranthus roseus* cells
 sucrose utilization 630-631
- Cations
 endodeoxyribonuclease *Eco*RI 634

 barley-leaf 534
 differentiation 534
 fatty acid biosynthesis 535–536
 spinach-leaf 535–536
- Chloroquine
 lysosomal cystine accumulation 571
- Chlorotriethylphosphinegold(I)
 erythrocyte binding 635–636
- Chlorpromazine
 effect on cerebral amino acids 63–64
- Chlortetracycline
 detection of diamagnetic cations in tissue 340–341
 fluorescence 340–341
- CHO cells
 glycolysis 631–632
 lactate utilization 632–633
 maltose utilization 633–634
 starch utilization 633–634
- Cholesterol
 cytochrome *P*-450-dependent hydroxylation 122–123
 distribution across myelin membrane bilayer 717
 Ehrlich-ascites-tumour-cell 545
 erythrocyte membranes 131
 incorporation into liver microsomal fraction 122–123
 metabolism 545
 side-chain-damage enzyme complex 129
- Cholesterol esterase
 adipose tissue 728–729
- Cholesterol 7 α -hydroxylase
 cytochrome *P*-450-dependent 102–103
- [¹⁴C]Choline
 synaptosomal uptake 138
- Choriogonadotropin
 activation of luteal adenylate cyclase 386–387
- Chromatography
 thin-layer, *see* Thin-layer chromatography
- Chronic lymphocytic leukaemia
 lymphocyte α -L-fucosidase 439–440
- α -Chymotrypsin
 glutamate dehydrogenase digestion 649
- Clotting
 sulphated polysaccharides and antithrombin-III-deficient plasma 188–189
- Cobra
 erabutoxins and related neurotoxins 753–755
- Coenzymes
 nicotinamide, *see* Nicotinamide coenzymes
- Cold-acclimation
 fatty acid synthesis 375
- Coliphage ϕ X174
 DNA transcription 740
- Collagen
 A, B and C α -chains 324–325
 foetus and placenta 324–325
 induction of platelet aggregation 726–727
 non-basement-membrane 324–325
 synthesis in muscle 74–75
 types V and VI 324–325
- Collagenase
 inhibitor 112–113
- Collagenase zymogen
 activation 647–648
- Colorimetric assay
 mucous glycoproteins 72
- Colpoda steinii*
 protein-linked polyamines in cyst coat 335
- Common shore crab (*Carcinus maenas*)
 muscle phosphofructokinase 142–143
 phosphofructokinase 560–561, 561–562
 pyruvate kinase 143–144
 skeletal muscle 560–561, 561–562
- Complement
 stimulation of polymorphonuclear-leucocyte chemiluminescence 723–725
- Compound BASF 13-338
 membrane lipid synthesis 119–120
- Computer-assisted sequencing
 peptide mass spectra 176–177
- Computer simulation
 adenylate cyclase activity 139–140
 cyclic AMP concentration changes 139–140
- Concanavalin A-Sepharose
 binding of collagenase inhibitor 112–113
- Conceptuses
 culture *in vitro* 434–435
- Connective tissue
 hormones 662–667
 prostaglandins 662–667
 uterine-cervix 662–667
- Copper deficiency
 adrenal-medulla catecholamine synthesis 342
- Corpus callosum
 2':3'-cyclic nucleotide phosphodiesterase 610–611
- Corpus luteum
 cholesterol-side-chain-cleavage enzyme complex 129
 choriogonadotropin activation of adenylate cyclase 386–387
 dimethyl 3,3'-dithiobispropionimidate and adenylate cyclase 306–307
 preparation of isolated cells 305
 site of lutropin action 305
- Corticotropin
 mRNA coding for precursor 749–751
- Corticotropin-containing peptides
 anterior-pituitary-gland-cell 585–586
- Cortisol
 plasma 587–588
- Cotyledons
 cucumber 535–536
 fatty acid biosynthesis 535–536
- Coumarin
 hepatotoxicity 96–97
 metabolism 96–97
- Countercurrent partition
 dextran/poly(ethylene glycol) 76–77
- Creatine kinase BB isoenzyme
 assay 621–622
- Crithidia fasciculata* (trypanosomatid flagellate)
 transmembrane proton electrochemical gradient 307–308
- Cromoglycate
 cyclic nucleotide phosphodiesterase 199–200

- Crossed immunoelectrophoresis
Escherichia coli methyl-accepting chemotaxis proteins 441
- Cucumber (*Cucumis sativus*) cotyledons
 fatty acid biosynthesis 535-536

 arylsulphatase 343–344
- Gel filtration
 equilibrium, *see* Equilibrium gel filtration
- Gene-dosage effect
 heterozygous (*ob/+*) mice 588–589
- 'General phosphatase'
 possible inhibitor-1 in fat cells 382–383
- *Genetics
 leaf-cell and protoplast culture 477

- Germination
Aspergillus carbonarius spores 429–430
- Gibberellic acid
 control of tocopherol oxidase *in vitro* 186–187
- Gingival cells
 prostaglandin E biosynthesis 527–528
- Globin gene
 use of restriction-enzyme fragments of cloned deoxyribo-
 nucleic acid for mapping 172
- Globulin
 α_2 -SB, *see* α_2 -SB globulin
- Glucagon
 effect on Ca^{2+} movement in liver 144–145
 glucocorticoid and inhibition of lipogenesis 383–384
 glucose 6-phosphatase 586–587
 immunoreactive 57–58
 muscle protein synthesis 367–368
 obese–hyperglycaemic (*ob/ob*) mice 58–59
 phosphate-dependent glutaminase 576
 polypeptides related to 51–52, 426–427
- Glucocorticoids
 glucagon inhibition of lipogenesis 383–384
 muscle protein turnover and growth 447–448
- Glucokinase
 induction by glucose and insulin 384–385
 induction in neonatal-rat hepatocytes 384–385
- Gluconeogenesis
 hepatic 205–213
 hepatocyte 547
 muscle alanine synthesis 205–213
- Glucose
 adenosine 3':5'-cyclic monophosphate accumulation 579–
 580
 amino acid transport in *Trypanosoma* 273–275
 lipid biosynthesis 590–591
 metabolism in monogastric and ruminant animals 291–
 292
 metabolism in small intestine 56
 transport in small intestine 56
 uptake by brush-border membrane vesicle 318
 uptake by *Chlorella vulgaris* 681–683
 yeast growth 573–574
- Glucose-pentapeptides
 erythrocyte-membrane glucose transport 315–316
- Glucose 6-phosphatase
 liver 541–542, 586–587
 purification from rabbit liver microsomal fraction 389–390
- Glucose 6-phosphate dehydrogenase
 hypothalamus 606
 liver 606
- Glucose transport
 glucose-pentapeptides in erythrocyte membranes 315–316
- Glucose-transport system
 purification from rat jejunum 318
- L-Glutamate
 binding to cerebellar synaptic membranes 109
 Ca^{2+} -dependent release from rat striatum 109–110
- Glutamate dehydrogenase
 α -chymotryptic digestion 649
- Glutaminase
 liver 576
 mitochondrial 576
 phosphate-dependent 576
- Glutamine
 biosynthesis 501–504
 metabolism 506–509
 skeletal-muscle 501–504, 509–510
 small-intestine 506–509
- γ -Glutamyltransferase
 purification from normal rat liver 77
- Glutathione S-transferases
 nature of multiple forms 451–452
- Glycerol
 inhibition of ligand binding to haemoproteins 75–76
- Glycine
 metabolism 504–506
- Glycogen synthase kinase
 cyclic AMP- and Ca^{2+} -independent 526–527
 liver 526–527
- Glycogenolysis
 glucose 593–594
 liver 593–594
- Glycohydrolase
 poly(adenosine diphosphate ribose), *see* Poly(adenosine
 diphosphate ribose) glycohydrolase
- Glycolysis
 aerobic 579
 amino acid transport in *Trypanosoma* 273–275
 ascites-tumour-cell 579
 CHO-cell 631–632
- Glyconeogenesis
 skeletal muscle 203–204
- Glycophorin
 acyl-chain length and lipid interaction 323–324
 incorporation into phospholipid liposomes 323–324
- Glycophorin A
 monoclonal antibodies 334–335
- Glycoprotein
 calcium-binding, *see* Calcium-binding glycoprotein
 disulphide-linked 70 000-mol.wt. protein 388–389
 myelin 618–619
 pig gastric mucus 388–389
- Glycoproteins
 abnormalities linked with malignancy 697–698
 activation in Myxovirus 419–422
 antibodies to glycophorin A and Band 3 334–335
 defects in membrane 698–700
 inhibition of synthesis and secretion by tunicamycin 190–
 191
 mitochondrial-membrane 619–620
 mucus, *see* Mucus glycoproteins
 myelin 69–70
 plasma-membrane 619–620
 structure of gastric mucus gel 716
 sulphated, *see* Sulphated glycoprotein

 effects of tunicamycin 166–168
 protein 166–168
- Glycyl-leucine dipeptidase
 radiochemical assay 438–439
- Golden hamster (*Mesocricetus auratus*)
 fatty acid synthesis in brown adipose tissue 375
- Golgi apparatus
 Ca^{2+} accumulation in mammary tissue 337–338
- Golgi vesicles
 calcium ion transport 525–526
 mammary-gland 525–526
- Granulocytes
 insulin degradation 299
- Green-cell cultures
 biotechnology 475–482
- Greening
 plant cultures 475–477
- Guanosine 3':5'-cyclic monophosphate
 platelet function 531–532

- Guanosine diphosphatase
stimulation of initiation factor eIF-2 351–352
- Gut
evolution of peptides 14–15
glucagon-like polypeptides 51–52
insulin secretion 17–19
neuroendocrine system 19–22
peptide hormones 19–22
peptides from nerves 14–15
peptides in endocrine cells 14–15
- Gut wall
arylsulphatase 343–344
- Haemoglobin
denaturation in dilute solution 393–394
effect on inhibition of prostaglandin synthase 198–199
- Haemoglobin S
polymerization 556–557
- Haemoproteins
binding 75–76
ligand binding to 78–79
redox potential of cytochrome P-450 101–102
- Halobacterium halobium*
bacteriorhodopsin proton pump 677–678
Na⁺ gradient and amino acid transport 275–276
- Halothane
effect on [¹⁴C]serine incorporation into phospholipid 124–125
- Haptoglobin
effect on arachidonate oxygenation during prostaglandin biosynthesis 79–80
inhibition of prostaglandin synthase 379–380
- Heart
[4-¹⁴C]androstenedione metabolites 134
mitochondrial Na⁺/Ca²⁺ cycle 261–262
muscle ribosome initiation activity 360–361
muscle ribosomes and insulin pretreatment 359–360
myocardial infarction and protein release 657
myosin light-chain phosphorylation 364–365
plasma-membrane fraction with intercalated discs 328
protein-synthesis regulation 282–283
[4-¹⁴C]testosterone metabolites 134
- Heart cells
lactate dehydrogenase release 582, 583
- Hemicorpus
hormones and muscle protein synthesis 367–368
- Heparin
inhibition of platelet aggregation 85–86
interaction with very-low-density hypoproteins 373
platelet protein neutralizing 726
very-low-density-lipoprotein metabolism 539–540
- Hepatocarcinogenesis
developmental-specific enzyme activities 94
- Hepatocytes
alanine metabolism 577
alanine transport 577
cytosol 570
degradation of insulin 300
ethanol metabolism 525
fatty acid biosynthesis 562–563
fatty acid metabolism 547, 572
glucokinase induction in neonatal rats 384–385
gluconeogenesis 547
nicotinamide-adenine dinucleotide 570
nicotinamide coenzymes 183–184
oleate metabolism 591–592
peroxisomes 572
stability of nucleotides and nucleoside diphosphate sugars 189–190
tunicamycin and glycoprotein synthesis and secretion 190–191
urate biosynthesis 140–141
- Hepatoma
diethylnitrosamine-induced 563–564
different cell types 108–109
peroxidation 563–564
- High-density lipoproteins
rat plasma 73
- Histamine
acute inflammation 150–155
release from peritoneal mast cells 435
- Histamine receptors
antagonists 150–155
H₁- 150–155
H₂- 150–155
- Histidine residue
active site of nuclear-envelope nucleoside triphosphatase 321
- Histones
*folding 637
- Hordeum vulgare*, see Barley
- Hormones
control of steroid and drug metabolism 342–343
effect on energy production in S180 sarcoma 105
protein-synthesis regulation 282–283, 283–285
uterine-cervix connective tissue 662–667
- Human immunoglobulin anti-D (Rh₀)
production for intravenous administration 178–179
- Hydrocortisone, see Cortisol
- Hydrogen ions, see Protons
- Hydroperoxyeicosatetraenoic acid
activator of prostaglandin synthase 449–450
- Hydroxylation
cholesterol 122–123
3-Hydroxy-3-methylglutaryl-coenzyme A lyase
liver 543–544
5-Hydroxytryptamine
platelet 530–531
secretion 530–531

 glucocorticoid, glucagon and lipogenesis 383–384
 gluconeogenesis 205–273
 glucose 6-phosphatase 541–542, 586–587
 glucose 6-phosphate dehydrogenase 606
 γ -glutamyltransferase purification 77
 glycine-cleavage system 504–506
 glycogenolysis 593–594
 host protein synthesis and Ehrlich ascites tumour 354
 3-hydroxy-3-methylglutaryl-coenzyme A lyase 543–544
 iron content 550–551
 lithocholic acid binding in trout cytosol 371–372
 lysosomal sugar accumulation 316
 methionine metabolism 540–541
 MgATP²⁻-dependent phosphorylase phosphatase 78
 microanalytical subcellular fractionation 76–77
 microsomal fraction 648–649
 microsomal glucose 6-phosphatase 389–390
 mitochondria 576
 mitochondrial Ca²⁺ transport 262–264
 mitochondrial steady-state ATP synthesis 454–455
 monoamine oxidase 607–608
 3-oxo acid coenzyme A-transferase 543–544
 peroxidation 563–564
 [¹⁴C]phenol binding 117–118
 phosphate-dependent glutaminase 576
 protein biosynthesis 613–614
 protein-synthesis regulation 282–283, 283–285
 steroid and drug metabolism 342–343
 Liver cells, *see* Hepatocytes
 Locust (*Schistocerca americana gregaria*)
 flight muscle 532–533
 Lung
 tumour cells producing immunoreactive calcitonin 340
 Luteinizing hormone, *see* Lutropin
 Lutropin
 site of action in corpus luteum 305
 Lymphoblastoid (Daudi) cells
 interferon, thymidine uptake and DNA synthesis 353–354
 Lymphocytes
 B and T, *see* B- and T-lymphocytes
 Ca²⁺ effect on growth 721–722
 cyclic nucleotide phosphodiesterase 199–200
 cytoplasmic polypeptide-initiation inhibitor 355–356
 α -L-fucosidase 439–440
 normal and chronic-lymphocytic leukaemia 439–440
 phosphoproteins of plasma membrane 182–183
 protein synthesis during mitogen activation 288
 T-, *see* T-lymphocytes
 Lymphoid cells
 influenza virus 257–260
 Lysosomes
 cystine accumulation 571
 fractionation 597–598
 kidney-cortex 597–598
 skin-fibroblast 571
 sugar accumulation 316
