S U B J E C T I N D E X

- α -Adducin polymorphism**
essential hypertension,
sodium–lithium countertransport
231–236
- Adenosine deaminase**
dipeptidyl peptidase IV (DPIV),
post-proline aminopeptidase
277–292
- Adipose tissue**
catecholamine, weight loss 323–329
- Airway obstruction**
endothelin receptor antagonist,
smoke inhalation and burn injury
265–272
- Airway remodelling**
asthma, smooth muscle 463–477
- Amino acid metabolism**
 β -cell, diabetes 185–194
- Androgen receptor**
prostate cancer, Ras signalling
293–308
- Angiotensin**
frizzled, vascular smooth muscle
523–530
- Angiotensin-converting enzyme (ACE)**
endothelial function, heart failure
331–338
- Antineutrophil cytoplasm antibody (ANCA)**
neutrophil, small vessel vasculitis
101–112
- Aortic stiffness**
baroreceptor sensitivity, ischaemic
stroke 441–447
- Apoptosis**
neutrophil, systemic inflammatory
response syndrome (SIRS)
413–424
- Ascorbic acid (vitamin C)**
diabetes, oxidative stress 507–513
- Asthma**
airway remodelling, smooth muscle
463–477
- Atherosclerosis**
cholesterol metabolism,
polymorphism 539–546
- C-reactive protein (CRP),**
osteoprotegerin 237–243
- Autologous plasma**
protein clearance, volume
expansion 217–224
- Autonomic nervous system**
cardiac autonomic neuropathy,
Type II diabetes 93–99
- Baroreceptor sensitivity**
aortic stiffness, ischaemic stroke
441–447
hypertension, organ damage
547–552
- Blood flow**
vascular resistance, venous
occlusion plethysmography
151–157
- Blood pressure**
congenital central hypoventilation
syndrome, heart rate variability
215–216, 225–230
5-hydroxytryptamine (5-HT),
hypertension 399–412
- Blood pressure variability**
hypertension, ketanserin 547–552
- Bosentan**
endothelial dysfunction,
ischaemia/reperfusion 357–363
- Bronchoalveolar lavage**
chronic eosinophilic pneumonia,
tryptase 273–276
- C₁₈ fatty acid**
lymphocyte, reactive oxygen
species 245–253
- Cardiac autonomic neuropathy**
autonomic nervous system, Type II
diabetes 93–99
- Cardiac health**
heart failure, natriuretic peptide
23–36
- Cardiac remodelling**
hypertension, statin 349–355
- Cardiovascular disease**
cytokine, inflammation 205–213
- Cardiovascular reactivity**
familial Mediterranean fever, fractal
analysis 37–46
- Cardiovascular risk factor**
complement, coronary heart
disease 129–135
- Catecholamine**
adipose tissue, weight loss
323–329
- β -Cell**
amino acid metabolism, diabetes
185–194
- Cell-replacement therapy**
neurological disorder, stem cell
13–22
- Cell therapy**
regeneration, transdifferentiation
309–321
- Cholesterol metabolism**
atherosclerosis, polymorphism
539–546
- Chronic eosinophilic pneumonia**
bronchoalveolar lavage, tryptase
273–276
- Complement**
cardiovascular risk factor, coronary
heart disease 129–135
ischaemia/reperfusion, skeletal
muscle 47–53
- Congenital central hypoventilation
syndrome**
blood pressure, heart rate
variability 215–216, 225–230
- Coronary artery disease**
cardiovascular risk factor,
complement 129–135
- C-reactive protein (CRP)**
atherosclerosis, osteoprotegerin
237–243
- endothelial cell, Fc γ receptor**
85–91
- endothelial dysfunction, Type II**
diabetes 121–128
- inflammation, statin** 493–495,
515–521

Cytokine	Eprosartan	Hypertension
cardiovascular disease, inflammation 205–213	haemodynamics, hypoglycaemia 113–119	baroreceptor sensitivity, organ damage 547–552
Diabetes	Essential hypertension	blood pressure, 5-hydroxytryptamine (5-HT) 399–412
amino acid metabolism, β -cell 185–194	α -adducin polymorphism, sodium–lithium countertransport 231–236	cardiac remodelling, statin 349–355
ascorbic acid (vitamin C), oxidative stress 507–513	Expression profiling	lipoprotein lipase, triacylglycerol metabolism 137–142
oxidative stress, end-stage renal disease 497–506	proteomics, tumour 369–383	
Diet	Factor VIIa	Hypoglycaemia
β -adrenergic receptor, catecholamine	endothelin, protease-activated receptor (PAR) 255–263	eprosartan, haemodynamics 113–119
Dipeptidyl peptidase IV (DPIV)	Familial Mediterranean fever	
adenosine deaminase, post-proline aminopeptidase 277–292	cardiovascular reactivity, fractal analysis 37–46	Inflammation
Disease model	Fcγ receptor	cardiovascular disease, cytokine 205–213
mutagenesis, neurological disorder 385–397	C-reactive protein (CRP), endothelial cell 85–91	C-reactive protein (CRP), statin 493–495, 515–521
Diurnal variation	Fibrotic lung disease	Insulin resistance
non-invasive measurement, vascular function 425–431	eicosanoid, leukotriene 479–491	metabolic syndrome, risk factor 553–559
Echocardiography	Folic acid	pregnancy, resistin 81–84
marathon, oxidative stress 73–80	homocysteine, remethylation 449–456	Intracerebral artery
Eicosanoid	Forkhead	non-invasive measurement, transcranial Doppler 433–439
fibrotic lung disease, leukotriene 479–491	pancreatic development, winged-helix transcription factor 195–204	Ion channel
Endothelial cell	Fractal analysis	long QT syndrome, missense mutation 143–150
C-reactive protein (CRP), Fc γ receptor 85–91	cardiovascular reactivity, familial Mediterranean fever 37–46	Ischaemia/reperfusion
Endothelial dysfunction	Frizzled	bosentan, endothelial dysfunction 357–363
bosentan, ischaemia/reperfusion 357–363	angiotensin, vascular smooth muscle 523–530	complement, skeletal muscle 47–53
C-reactive protein (CRP), Type II diabetes 121–128	Haemodynamics	Ischaemic preconditioning
myocardial infarction, vitamin supplementation 65–72	eprosartan, hypoglycaemia 113–119	liver, steatosis 55–63
Endothelial function	Heart failure	Ischaemic stroke
angiotensin-converting enzyme (ACE), heart failure 331–338	angiotensin-converting enzyme (ACE), endothelial function 331–338	aortic stiffness, baroreceptor sensitivity 441–447
high-cholesterol diet, plaque formation 531–538	natriuretic peptide, cardiac health 23–36	Leukotriene
myometrial vessel, pre-eclampsia 457–462	Heart rate variability	eicosanoid, fibrotic lung disease 479–491
Endothelin	blood pressure, congenital central hypoventilation syndrome 215–216, 225–230	Lipoprotein lipase
factor VIIa, protease-activated receptor (PAR) 255–263	High-cholesterol diet	hypertension, triacylglycerol metabolism 137–142
Endothelin receptor antagonist	endothelial function, plaque formation 531–538	Liver
airway obstruction, smoke inhalation and burn injury 265–272	Homocysteine	ischaemic preconditioning, steatosis 55–63
End-stage renal disease	folic acid, remethylation 449–456	Long QT syndrome
diabetes, oxidative stress 497–506	5-Hydroxytryptamine (5-HT)	ion channel, missense mutation 143–150
Epithelial cell differentiation	blood pressure, hypertension 399–412	Lower limb ischaemia
prostate cancer, stem cell 1–11		muscle oxygenation, spectroscopy 159–165

- M**arathon
echocardiography, oxidative stress 73–80
- Metabolic rate
protein synthesis, tonsil 179–184
- Metabolic syndrome
insulin resistance, risk factor 553–559
- Migraine
persistent foramen ovale, right-to-left shunt 365–367
- Missense mutation
ion channel, long QT syndrome 143–150
- Muscle oxygenation
lower limb ischaemia, spectroscopy 159–165
- Mutagenesis
disease model, neurological disorder 385–397
- Myocardial infarction
endothelial dysfunction, vitamin supplementation 65–72
peripheral blood mononuclear cell, tumour necrosis factor (TNF) 339–347
- Myometrial vessel
endothelial function, pre-eclampsia 457–462
- N**atriuretic peptide
cardiac health, heart failure 23–36
- Neurological disorder
cell-replacement therapy, stem cell 13–22
disease model, mutagenesis 385–397
- Neutrophil
antineutrophil cytoplasm antibody (ANCA), small vessel vasculitis 101–112
apoptosis, systemic inflammatory response syndrome (SIRS) 413–424
- Non-invasive measurement
diurnal variation, vascular function 425–431
intracerebral artery, transcranial Doppler 433–439
- O**rgan damage
baroreceptor sensitivity, hypertension 547–552
- Osteoprotegerin
atherosclerosis, C-reactive protein (CRP) 237–243
- Oxidative stress
ascorbic acid (vitamin C), diabetes 507–513
echocardiography, marathon 73–80
diabetes, end-stage renal disease 497–506
- P**ancreatic development
forkhead, winged-helix transcription factor 195–204
- Peripheral blood mononuclear cell
myocardial infarction, tumour necrosis factor (TNF) 339–347
- Persistent oramen ovale
migraine, right-to-left shunt 365–367
- Placenta
pre-eclampsia, resistin 81–84
- Plaque formation
endothelial function, high-cholesterol diet 531–538
- Polymorphism
atherosclerosis, cholesterol metabolism 539–546
- Post-proline aminopeptidase
adenosine deaminase, dipeptidyl peptidase IV (DPIV) 277–292
- Pre-eclampsia
endothelial function, myometrial vessel 457–462
placenta, resistin 81–84
- Prostate cancer
androgen receptor, Ras signalling 293–308
epithelial cell differentiation, stem cell 1–11
- Protease-activated receptor (PAR)
endothelin, factor VIIa 255–263
- Protein clearance
autologous plasma, volume expansion 217–224
- Protein synthesis
metabolic rate, tonsil 179–184
- Proteomics
expression profiling, tumour 369–383
surgical stress, transcriptomics 167–178
- R**as signalling
androgen receptor, prostate cancer 293–308
- Reactive oxygen species
 C_{18} fatty acid, lymphocyte 245–253
- Regeneration
cell therapy, transdifferentiation 309–321
- Remethylation
folic acid, homocysteine 449–456
- Resistin
pre-eclampsia, placenta 81–84
- Right-to-left shunt
migraine, persistent foramen ovale 365–367
- Risk factor
insulin resistance, metabolic syndrome 553–559
- S**keletal muscle
complement, ischaemia/reperfusion 47–53
- Small vessel vasculitis
antineutrophil cytoplasm antibody (ANCA), neutrophil 101–112
- Smoke inhalation and burn injury
airway obstruction, endothelin receptor antagonist 265–272
- Smooth muscle
airway remodelling, asthma 463–477
- Sodium–lithium countertransport
 α -adducin polymorphism, essential hypertension 231–236
- Spectroscopy
lower limb ischaemia, muscle oxygenation 159–165
- Statin
cardiac remodelling, hypertension 349–355
C-reactive protein (CRP), inflammation 493–495, 515–521
- Steatosis
ischaemic preconditioning, liver 55–63
- Stem cell
cell-replacement therapy, neurological disorder 13–22
epithelial cell differentiation, prostate cancer 1–11
- Surgical stress
proteomics, transcriptomics 167–178
- Systemic inflammatory response syndrome (SIRS)
apoptosis, neutrophil 413–424
- T**onsil
metabolic rate, protein synthesis 179–184
- Transcranial Doppler
intracerebral artery, non-invasive measurement 433–439
