### REVIEW

#### Can angiogenesis be exploited to improve stroke outcome? Mechanisms and therapeutic potential

by M. Slevin, P. Kumar, J. Gaffney, S. Kumar and J. Krupinski

171–183

Published on the Internet 15 August 2006, doi:10.1042/CS20060049

### COMMENTS

#### Are the lipid-modifying effects of fibrates mediated by alterations in plasma lipid transfer activity?

by G. F. Lewis (see accompanying paper, pp. 193–199)

185–187

Published as Immediate Publication 9 June 2006, doi:10.1042/CS20060140

#### $\beta$ -Adrenergic receptor blockers and the treatment of vasovagal syncope: more nails in the coffin!

by C. J. Mathias (see accompanying paper, pp. 209–216)

189–191

Published as Immediate Publication 18 July 2006, doi:10.1042/CS20060174

### PAPERS

#### Relationships between changes in plasma lipid transfer proteins and apolipoprotein B-100 kinetics during fenofibrate treatment in the metabolic syndrome

by G. F. Watts, J. Ji, D. C. Chan, E. M. M. Ooi, A. G. Johnson, K.-A. Rye and P. H. R. Barrett

193–199

Published as Immediate Publication 16 May 2006, doi:10.1042/CS20060072

comment

#### Body composition and the apoB/apoA-I ratio in migrant Asian Indians and white Caucasians in Canada

by J. Smith, K. Cianflone, M. Al-Amri and A. Sniderman

201–207

Published as Immediate Publication 22 May 2006, doi:10.1042/CS20060045

#### Failure of propranolol to prevent tilt-evoked systemic vasodilatation, adrenaline release and neurocardiogenic syncope

by B. A. Eldadah, S. L. Pechnik, C. S. Holmes, J. P. Moak, A. M. Saleem and D. S. Goldstein

209–216

Published as Immediate Publication 24 April 2006, doi:10.1042/CS20060017

comment

**Modification of the pulmonary renin–angiotensin system and lung structural remodelling in congestive heart failure**

by F. Lefebvre, A. Préfontaine, A. Calderone, A. Caron, J.-F. Jasmin, L. Villeneuve and J. Dupuis

217–224

*Published as Immediate Publication 27 April 2006, doi:10.1042/CS20060027*

**Direct comparison of relaxation and cGMP production in human coronary by-pass grafts in response to stimulation with natriuretic peptides and a nitric oxide donor**

by A. Hammerer-Lercher, J. Fersterer, S. Holzmann, J. Bonatti, E. Ruttmann, D. Hofer, J. Mair and B. Puschendorf

225–231

*Published as Immediate Publication 18 May 2006, doi:10.1042/CS20060034*
