REVIEW

Is the anti-inflammatory effect of regular exercise responsible for reduced cardiovascular disease?

K. R. Wilund

543–555

Published on the Internet 1 May 2007, doi:10.1042/CS20060368

PAPERS

An increase in plasma adiponectin multimeric complexes follows hypocaloric diet-induced weight loss in obese and overweight pre-menopausal women

J. Polak, Z. Kovacova, M. Jacek, E. Klimcakova, M. Kovacikova, M. Vitkova, O. Kuda, M. Sebel, E. Samcova and V. Stich

557–565

Published as Immediate Publication 4 January 2007, doi:10.1042/CS20060296

Regulation and enzymatic basis of bone resorption by human osteoclasts

K. Fuller, B. Kirstein and T. J. Chambers

567–575

Published as Immediate Publication 23 January 2007, doi:10.1042/CS20060274

Differences in the diagnostic value of various criteria of negative T waves for hypertrophic cardiomyopathy based on a molecular genetic diagnosis

T. Konno, N. Fujino, K. Hayashi, K. Uchiyama, E. Masuta, H. Katoh, Y. Sakamoto, T. Tsubokawa, H. Ino and M. Yamagishi

577–582

Published as Immediate Publication 31 January 2007, doi:10.1042/CS20060293
