S U B J E C T I N D E X

- A**cute coronary syndrome
myotrophin, N-terminal pro-B-type natriuretic peptide (NTproBNP) 251–256
- Adiponectin
insulin resistance, weight loss 557–565
- Age
behaviour, self-rated health 363–373
- Aging
familial combined hyperlipidaemia (FCH), obesity 131–139
ischaemia, necrosis 429–440
- Angiogenesis
ischaemia, prostacyclin agonist (ONO-1301) 607–616
- Angiogenic factor
intrauterine growth restriction (IUGR), pregnancy 51–57
- Angiotensin II type I receptor (AT₁ receptor)
cardiovascular disease, signal transduction 417–428
flow-mediated dilation (FMD), nitric oxide synthase (NOS) 393–401
- Antioxidant
DNA damage, Type 2 diabetes 599–606
- Apoptosis
lymphocyte, starvation 59–67
- Arachidonate
5-lipoxygenase-activating protein (ALOX5AP)
leukotriene, myocardial infarction 411–416
- Arginine
post-operative response, tumour 527–532
- Arterial hypotension
normal pressure glaucoma, sodium handling 337–344
- Arterial stiffness
isometric exercise, muscle metaboreflex 441–447
- Atherosclerosis
cardiovascular risk prediction, non-invasive measurement 507–516
- Autonomic nervous system
gender, muscle sympathetic nerve activity 353–361
- B**ile duct ligation
calcium signalling, platelet 167–174
- β -Blocker
Fas/Fas ligand, left ventricular function 299–304
- Blood flow
pancreatic islet, vasoactive drug 69–76
- Blood perfusion
glucagon-like peptide-1 (GLP-1), Type 2 diabetes 345–351
- Blood pressure
flow-mediated dilation (FMD), isometric exercise 403–409
orthostatic hypotension, syncope 157–165
- Blood–brain barrier
(peri)vascular cell, pro-inflammatory cytokine 1–25
- Bone
osteoporosis, remodelling 77–91
- Bone resorption
enzymatic regulation, osteoclast 567–575
- Brachial artery diameter
coronary artery calcium, vasodilation 175–182
- Brain natriuretic peptide (BNP)
cardiac function, extracorporeal circulation 315–324
- C**alcium signalling
bile duct ligation, platelet 167–174
- Cancer
nitric oxide, post-operative response 527–532
- Cannabinoid receptor
cirrhosis, eicosanoid 533–542
- Cardiac fibrosis
glucocorticoid, mineralocorticoid receptor 467–475
- Cardiac function
brain natriuretic peptide (BNP), extracorporeal circulation 315–324
- Cardiac myocyte
cytochrome c, mitochondrial cGMP 113–121
- Cardioprotection
growth-hormone-releasing peptide 6 (GHRP6), myocardial infarction 241–250
- Cardiovascular disease
angiotensin II type I receptor (AT₁ receptor), signal transduction 417–428
exercise, inflammation 543–555
- Cardiovascular risk prediction
atherosclerosis, non-invasive measurement 507–516
- Cellular adhesion molecular
coronary artery disease, gene polymorphism 291–298
- Central nervous system
dopamine, hypertension 583–597
- Cirrhosis
eicosanoid, cannabinoid receptor 533–542
hepatitis C virus (HCV), immunopathogenesis 141–155
- Clinical research
drug target, translational medicine 217–227
- Conjugated equine oestrogen (CEE)
hot flush, medroxyprogesterone (MPA) 517–525
- Coronary artery calcium
brachial artery diameter, vasodilation 175–182
- Coronary artery disease
C-reactive protein (CRP), vagal heart rate control 449–456

- galectin-2 gene (*LGALS2*),
 lymphotoxin- α gene (*LTA*)
 291–298
 left ventricular hypertrophy,
 lipoprotein lipase gene
 617–624
 Cotransporter
 hypertension, with no lysine kinase
 (*WNK*) 203–216
 C-reactive protein (*CRP*)
 coronary artery disease, vagal
 heart rate control
 449–456
 Cytochrome *c*
 cardiac myocyte, mitochondrial
 cGMP 113–121
- D**
- Diabetes**
 diet, obesity 93–111
 hypertension, inflammation
 375–384
 Diet
 diabetes, obesity 93–111
 DNA damage
 antioxidant, Type 2 diabetes
 599–606
 Dopamine
 central nervous system,
 hypertension 583–597
 Drug target
 translational medicine, clinical
 research 217–227
- E**
- Eicosanoid**
 cannabinoid receptor, cirrhosis
 533–542
 Endothelial dysfunction
 hypertension, phytoestrogen
 183–191
 Endothelial function
 glucose loading, overweight
 children 493–498
 Endothelial nitric oxide synthase
 (eNOS)
 NADPH oxidase, phytoestrogen
 183–191
 Enzymatic regulation
 bone resorption, osteoclast
 567–575
 Exercise
 cardiovascular disease,
 inflammation 543–555
 Extracellular matrix
 matrix metalloproteinase
 (*MMP*), varicose vein
 229–239
- Extracorporeal circulation
 brain natriuretic peptide
 (BNP), cardiac function
 315–324
- F**
- Familial combined hyperlipidaemia**
 (FCH)
 aging, obesity 131–139
 fatty liver, visceral adiposity
 123–130
 Fas/Fas ligand
 β -blocker, left ventricular function
 299–304
 Fatty liver
 familial combined hyperlipidaemia
 (FCH), visceral adiposity
 123–130
 Flow mediated dilation (FMD)
 angiotensin II type I receptor
 (AT₁ receptor), nitric oxide
 synthase (NOS)
 393–401
 blood pressure, isometric exercise
 403–409
- G**
- Galectin-2 gene (*LGALS2*)**
 coronary artery disease,
 lymphotoxin- α gene (*LTA*)
 291–298
 Gender
 autonomic nervous system, muscle
 sympathetic nerve activity
 353–361
 inflammatory cytokine, self-rated
 health 363–373
 Genetic algorithm
 insulin sensitivity, minimal model
 257–263
 Glomerular filtration barrier
 podocyte, slit diaphragm complex
 325–335
 Glucagon-like peptide-1 (GLP-1)
 blood perfusion, Type 2 diabetes
 345–351
 Glucocorticoid
 cardiac fibrosis, mineralocorticoid
 receptor 467–475
 Glucose loading
 endothelial function, overweight
 children 493–498
 Glucose uptake
 insulin, muscle 457–466
 Growth hormone (GH)
 myocardial infarction, ventricular
 arrhythmia 385–391
- Growth-hormone-releasing peptide 6
 (GHRP6)
 cardioprotection, myocardial
 infarction 241–250
- H**
- Hepatitis C virus (HCV)**
 cirrhosis, immunopathogenesis
 141–155
 Hot flush
 conjugated equine oestrogen (CEE),
 medroxyprogesterone (MPA)
 517–525
 Hypertension
 cotransporter, with no lysine kinase
 (*WNK*) 203–216
 diabetes, inflammation 375–384
 dopamine, central nervous system
 583–597
 endothelial dysfunction,
 phytoestrogen 183–191
 Hypertrophic cardiomyopathy
 left ventricular hypertrophy,
 negative T wave 577–582
 Hypotension
 neurohumoral response, urocortin
 485–491
- I**
- Immunopathogenesis**
 cirrhosis, hepatitis C virus (HCV)
 141–155
 Inflammation
 cardiovascular disease, exercise
 543–555
 diabetes, hypertension 375–384
 liver fibrosis, myofibroblast
 265–280
 Inflammatory biomarker
 musculoskeletal disorder, overuse
 305–314
 Inflammatory cytokine
 gender, self-rated health 363–373
 Insulin
 glucose uptake, muscle 457–466
 Insulin resistance
 adiponectin, weight loss 557–565
 Insulin sensitivity
 genetic algorithm, minimal model
 257–263
 Intrauterine growth restriction
 (IUGR)
 angiogenic factor, pregnancy
 51–57
 Ischaemia
 aging, necrosis 429–440
 angiogenesis, prostacyclin agonist
 (ONO-1301) 607–616

- Isometric exercise
arterial stiffness, muscle
metaboreflex 441–447
blood pressure, flow-mediated
dilation (FMD) 403–409
- L**eft ventricular function
 β -blocker, Fas/Fas ligand 299–304
- Left ventricular hypertrophy
coronary heart disease, lipoprotein
lipase gene 617–624
hypertrophic cardiomyopathy,
negative T wave 577–582
- Leg vascular conductance
orthostatic intolerance, physical
counter-manoevre 193–201
- Leukotriene
arachidonate
5-lipoxygenase-activating protein,
myocardial infarction 411–416
- Lipoprotein lipase gene
coronary heart disease, left
ventricular hypertrophy 617–624
- Liver fibrosis
inflammation, myofibroblast
265–280
- Lymphocyte
apoptosis, starvation 59–67
- Lymphotoxin- α gene (*LTA*)
coronary artery disease, galectin-2
gene (*LGALS2*) 291–298
- M**atrix metalloproteinase (MMP)
extracellular matrix, varicose vein
229–239
myocardial infarction, statin 43–49
- Medroxyprogesterone (MPA)
conjugated equine oestrogen (CEE),
hot flush 517–525
- Metabolism
non-esterified fatty acid, pancreatic
 β -cell 27–42
- Microvascular perfusion
aging, ischaemic tolerance
429–440
- Mineralocorticoid receptor
cardiac fibrosis, glucocorticoid
467–475
- Minimal model
genetic algorithm, insulin sensitivity
257–263
- Mitochondrial cGMP
cardiac myocyte, cytochrome c
113–121
- Muscle
glucose uptake, insulin 457–466
- Muscle metaboreflex
arterial stiffness, isometric exercise
441–447
- Muscle sympathetic nerve activity
autonomic nervous system, gender
353–361
- Musculoskeletal disorder
inflammatory biomarker, overuse
305–314
- Myocardial infarction
arachidonate
5-lipoxygenase-activating protein,
leukotriene 411–416
cardioprotection, growth-hormone-
releasing peptide 6 (GHRP6)
241–250
growth hormone (GH), ventricular
arrhythmia 385–391
matrix metalloproteinase (MMP),
statin 43–49
oxygen-related protein 150
(ORP150), prognosis 477–484
- Myofibroblast
inflammation, liver fibrosis 265–280
- Myotrophin
acute coronary syndrome,
N-terminal pro-B-type
natriuretic peptide 251–256
- N**ecrosis
aging, ischaemia 429–440
- Negative T wave
hypertrophic cardiomyopathy, left
ventricular hypertrophy 577–582
- Neurohumoral response
hypotension, urocortin 485–491
- Night sweats
hot flush, surgical menopause
517–525
- Nitric oxide synthase (NOS)
angiotensin II type I receptor (AT₁
receptor), flow-mediated dilation
(FMD) 393–401
- Non-esterified fatty acid
metabolism, pancreatic β -cell
27–42
- Non-invasive measurement
atherosclerosis, cardiovascular risk
prediction 507–516
- Normal pressure glaucoma
arterial hypotension, sodium
handling 337–344
- N-terminal pro-B-type natriuretic
peptide (NTproBNP)
acute coronary syndrome,
myotrophin 251–256
- O**besity
aging, familial combined
hyperlipidaemia (FCH) 131–139
diabetes, diet 93–111
- Orthostatic hypotension
blood pressure, syncope 157–165
- Orthostatic intolerance
leg vascular conductance, physical
counter-manoevre 193–201
- Osteoclast
bone resorption, enzymatic
regulation 567–575
- Osteoporosis
bone, remodelling 77–91
- Overuse
inflammatory biomarker,
musculoskeletal disorder
305–314
- Overweight children
endothelial function, glucose
loading 493–498
- Oxygen-related protein 150
(ORP150)
myocardial infarction, prognosis
477–484
- P**ancreatic islet
blood flow, vasoactive drug 69–76
- Pancreatic β -cell
metabolism, non-esterified fatty
acid 27–42
- (Peri)vascular cell
blood–brain barrier,
pro-inflammatory cytokine 1–25
- Physical counter-manoevre
leg vascular conductance,
orthostatic intolerance 193–201
- Phytoestrogen
endothelial dysfunction,
hypertension 183–191
- Platelet
bile duct ligation, calcium signalling
167–174
- Podocyte
glomerular filtration barrier, slit
diaphragm complex 325–335
- Post-operative response
arginine, tumour 527–532
- Pregnancy
angiogenic factor, intrauterine
growth restriction (IUGR)
51–57
- Prognosis
myocardial infarction,
oxygen-related protein 150
(ORP150) 477–484

- Pro-inflammatory cytokine
blood–brain barrier, (peri)vascular
cell 1–25
- Prostacyclin agonist (ONO-1301)
angiogenesis, ischaemia
607–616
- Proteasome
sepsis, skeletal muscle
499–506
- R**emodelling
bone, osteoporosis 77–91
- S**aphenous vein
skin, varicose vein 229–239
- Sarcoidosis
steroid resistance, tumour
necrosis factor- α (TNF- α)
281–289
- Self-rated health
gender, inflammatory cytokine
363–373
- Sepsis
proteasome, skeletal muscle
499–506
- Signal transduction
angiotensin II type I receptor (AT₁
receptor), cardiovascular disease
417–428
- Skeletal muscle
proteasome, sepsis 499–506
- Slit diaphragm complex
glomerular filtration barrier,
podocyte 325–335
- Sodium handling
arterial hypotension, normal
pressure glaucoma 337–344
- Starvation
apoptosis, lymphocyte 59–67
- Statin
matrix metalloproteinase (MMP),
myocardial infarction 43–49
- Steroid resistance
sarcoidosis, tumour necrosis
factor- α (TNF- α) 281–289
- Syncope
blood pressure, orthostatic
hypotension 157–165
- T**ranslational medicine
clinical research, drug target
217–227
- Tumour
arginine, post-operative response
527–532
- Tumour necrosis factor- α (TNF- α)
sarcoidosis, steroid resistance
281–289
- Type 2 diabetes
antioxidant, DNA damage 599–606
blood perfusion, glucagon-like
peptide-I (GLP-I) 345–351
- U**rocortin
hypotension, neurohumoral
response 485–491
- V**agal heart rate control
coronary artery disease,
C-reactive protein (CRP)
449–456
- Varicose vein
extracellular matrix, matrix
metalloproteinase (MMP)
229–239
- Vasoactive drug
blood flow, pancreatic islet
69–76
- Vasodilation
brachial artery diameter, coronary
artery calcium 175–182
- Ventricular arrhythmia
growth hormone (GH), myocardial
infarction 385–391
- Visceral adiposity
familial combined hyperlipidaemia
(FCH), fatty liver 123–130
- W**eight loss
adiponectin, insulin resistance
557–565
- With no lysine kinase (WNK)
cotransporter, hypertension
203–216
