COMMENT

High-fat diets: healthy or unhealthy?

M. C. Guldstrand and C. L. Simberg (see accompanying paper pp. 417–425)

397–399

Published as Immediate Publication 23 August 2007, doi:10.1042/CS20070263

PAPERS

Management of initial orthostatic hypotension: lower body muscle tensing attenuates the transient arterial blood pressure decrease upon standing from squatting

C. T. P. Krediet, I. K. Go-Schön, Y.-S. Kim, M. Linzer, J. J. Van Lieshout and W. Wieling

401–407

Published as Immediate Publication 12 June 2007, doi:10.1042/CS20070064

Maternal fish oil supplementation in pregnancy modifies neonatal leukotriene production by cord-blood-derived neutrophils

S. L. Prescott, A. E. Barden, T. A. Mori and J. A. Dunstan

409–416

Published as Immediate Publication 28 June 2007, doi:10.1042/CS20070111

Increasing the fat-to-carbohydrate ratio in a high-fat diet prevents the development of obesity but not a prediabetic state in rats

N. Sinitskaya, S. Gourmelen, C. Schuster-Klein, B. Guardiola-Lemaitre, P. Pévet and E. Challet

417–425

Published as Immediate Publication 4 July 2007, doi:10.1042/CS20070182
