### REVIEWS

**Is liver fat detrimental to vessels?: intersections in the pathogenesis of NAFLD and atherosclerosis**

P. Loria, A. Lonardo and G. Targher

1–12

*Published on the Internet 2 June 2008, doi:10.1042/CS20070311*

**Visfatin/PBEF/Nampt: structure, regulation and potential function of a novel adipokine**

G. Sommer, A. Garten, S. Petzold, A. G. Beck-Sickinger, M. Blüher, M. Stumvoll and M. Fasshauer

13–23

*Published on the Internet 2 June 2008, doi:10.1042/CS20070226*

### PAPERS

**Anti-(apolipoprotein A-I) IgGs are associated with high levels of oxidized low-density lipoprotein in acute coronary syndrome**

N. Vuilleumier, E. Charbonney, L. Fontao, M. Alvarez, N. Turck, J.-C. Sanchez, P. R. Burkhard, N. Mensi, M. Righini, G. Reber, R. James, F. Mach, J.-C. Chevrolet, J.-M. Dayer, J. Frostegard and P. Roux-Lombard

25–33

*Published as Immediate Publication 19 December 2007, doi:10.1042/CS20070325*

**Gender-specific regulation of pancreatic islet blood flow, insulin levels and glycaemia in spontaneously diabetic Goto–Kakizaki rats**

Z. Huang, L. Jansson and Å. Sjöholm

35–42

*Published as Immediate Publication 21 January 2008, doi:10.1042/CS20070386*
