Roles of NF- κ B in health and disease: mechanisms and therapeutic potential

E. T. Wong and V. Tergaonkar

451–465

Published on the Internet 12 February 2009, doi:10.1042/CS20080502

Role of the renin–angiotensin–aldosterone system and inflammatory processes in the development and progression of diastolic dysfunction

S. Sciarretta, F. Paneni, F. Palano, D. Chin, G. Tocci, S. Rubattu and M. Volpe

467–477

Published on the Internet 12 February 2009, doi:10.1042/CS20080390

Pathogenic perspectives for the role of inflammation in diabetic nephropathy

A. Rivero, C. Mora, M. Muros, J. García, H. Herrera and J. F. Navarro-González

479–492

Published on the Internet 12 February 2009, doi:10.1042/CS20080394

COMMENT

Role of pravastatin in pulmonary hypertension in chronic obstructive pulmonary disease

T. J. Corte and S. J. Wort (see accompanying paper pp. 497–505)

493–495

Published as Immediate Publication 27 November 2008, doi:10.1042/CS20080590

PAPERS

Effects of pravastatin on functional capacity in patients with chronic obstructive pulmonary disease and pulmonary hypertension

T.-M. Lee, C.-C. Chen, H.-N. Shen and N.-C. Chang

Published as Immediate Publication 3 October 2008, doi:10.1042/CS20080241

497–505

IGF-I/IGFBP-3 ratio: a mechanistic insight into the metabolic syndrome

J. Sierra-Johnson, A. Romero-Corral, V. K. Somers, F. Lopez-Jimenez, A. Mälarstig, K. Brismar, A. Hamsten, R. M. Fisher and M.-L. Hellénus

507–512

Published as Immediate Publication 24 September 2008, doi:10.1042/CS20080382

Reliability of dynamic cerebral autoregulation measurement using spontaneous fluctuations in blood pressure

F. G. Brodie, E. R. Atkins, T. G. Robinson and R. B. Panerai

513–520

Published as Immediate Publication 22 October 2008, doi:10.1042/CS20080236

Left ventricular systolic and diastolic dyssynchrony in coronary artery disease with preserved ejection fraction

P.-W. Lee, Q. Zhang, G. W.-K. Yip, L. Wu, Y.-y. Lam, E. B. Wu and C.-M. Yu

521–529

Published as Immediate Publication 6 August 2008, doi:10.1042/CS20080100

The *DGAT2* gene is a candidate for the dissociation between fatty liver and insulin resistance in humans

K. Kantartzis, F. Machicao, J. Machann, F. Schick, A. Fritsche, H.-U. Häring and N. Stefan

531–537

Published as Immediate Publication 3 November 2008, doi:10.1042/CS20080306
