

Sephadex® 

Sephadex ion exchangers in bead form

combine the advantages
of cellulose and
resin ion exchangers

- High capacity by virtue of a three-dimensional cross-linked network of dextran chains which allow introduction of a large number of charged groups without significant loss of rigidity.
- Low non-specific adsorption is exhibited by the dextran gel used as a stationary phase.
- Superior reproducibility.

The bead form ensures high flow rates, high mechanical stability and optimal hydrodynamic flow characteristics.

New!

QAE-Sephadex, a fully quaternized strongly basic anion exchanger for chromatography of proteins and other labile biological substances.

Type	Description	Ionic form	Capacity meq/g	Approx. haemoglobin capacity g/g at pH
DEAE-Sephadex A-25 A-50	Weakly basic anion exchanger Functional groups: diethylaminoethyl	Cl ⁻	3.5 ± 0.5	0.5; 8.8 3; 8.8
QAE-Sephadex A-25 A-50	Strongly basic anion exchanger Functional groups: diethyl-(2-hydroxypropyl) aminoethyl	Cl ⁻	3.0 ± 0.4	0.3; 8.0 6; 8.0
CM-Sephadex C-25 C-50	Weakly acidic cation exchanger Functional groups: carboxymethyl	Na ⁺	4.5 ± 0.5	0.4; 6.5 7; 6.5
SE-Sephadex C-25 C-50	Strongly acidic cation exchanger Functional groups: sulphoethyl	Na ⁺	2.3 ± 0.3	0.2; 6.5 3; 6.5

From January 1970

FRENCH JOURNAL OF CLINICAL AND BIOLOGICAL RESEARCH

will become

EUROPEAN JOURNAL OF CLINICAL AND BIOLOGICAL RESEARCH

This journal will publish as before biomedical research papers in English and in French which will be divided into the following items:

Editorial tribune
Original papers
Short communications
General review
Technical notes

Short communications, articles of 4 to 6 type-written pages will be published within *two months* of being accepted by the Editorial board.

Editor: GEORGES MATHÉ,
Institut de Cancérologie et d'Immuno-génétique,
Hôpital Paul Brousse, 94. VILLEJUIF, France

EDITIONS MEDICALES FLAMMARION
20, rue de Vaugirard, PARIS-6e, France

NEW BOOKS FROM BLACKWELLS

A Companion to Medical Studies

Editors-in-chief: R. PASSMORE and J. S. ROBSON
Vol. 2. Pharmacology, Microbiology, General Pathology and Related Subjects. 836 pages, 420 illustrations, 30 plates (14 colour) Cloth £6, Limp 90s

'This work represents a notable advance in the writing of textbooks for pre-clinical students. There are some books that the student comes to loathe, and others that he comes to love. This is likely to be one of the latter.'—*The Lancet* (on Volume 1).

Clues to Diagnosis in Congenital Heart Disease

ALDEN S. GOOCH M.D., VLADIR MARANHÃO M.D. and HARRY GOLDBERG M.D. 336 pages, 500 illustrations. £7 10s

This book will prove valuable to cardiologists, paediatricians and general practitioners; it illustrates by numerous photographs and line drawings the various clues to the diagnosis of congenital heart disease.

Cardiovascular Clinics

Edited by A. N. BREST M.D.
1/1. *Hypertensive Cardiovascular Disease.* 1969. 346 pages, 92 illustrations. 75s
1/2. *Coronary Heart Disease.* February. 340 pages, 100 illustrations. 75s
1/3. *Cardiovascular Therapy.* April. 320 pages, 112 illustrations. 75s

This important new series features articles written on invitation by outstanding authorities. Each issue will be, in effect a monograph dealing with one of the major cardiovascular disorders, or important clinical problems in cardiovascular disease.

Handbook of Psychiatry

Edited by P. SOLOMON M.D. and V. D. PATCH M.D. 550 pages. 67s

The well-known Lange handbooks already cover many fields of medicine and this new title follows the same practical layout in dealing with psychiatry. Its aim is to crystallise the basic principles of psychiatry for both physicians and students.

JANUARY 1970

NUMBER 1

The Journal of Clinical Investigation

EDITED FOR
THE AMERICAN SOCIETY FOR CLINICAL INVESTIGATION, INC.

- Renal tubular protein absorption in the rat. MARSHALL A. CORTNEY, LINDA L. SAWIN, and DENNIS D. WEISS
 Disposal of plasma heme in normal man and patients with intravascular hemolysis. DAVID A. SEARS
 The hyperviscosity syndrome. I. In IgG myeloma. The role of protein concentration and molecular shape. MALCOLM R. MACKENZIE, H. HUGH FUDENBERG, and ROBERT A. O'REILLY
 Water, acidosis, and experimental pyelonephritis. VINCENT T. ANDRIOLE
 Studies on testosterone metabolism in subjects with testicular feminization syndrome. P. MAUVAIS-JARVIS, J. P. BERCOVICI, O. CREPY, and F. GAUTHIER
 Electrophysiological aspects of human sphincter function. THOMAS J. USTACH, FABIO TOBON, TERRY HAM-BRECHT, D. DAVID BASS, and MARVIN M. SCHUSTER
 Immunoglobulin synthesis by salivary gland lymphoid cells in Sjögren's syndrome. NORMAN TALAL, RICHARD ASOFSKY, and PHILIP LIGHTBODY
 Experimental myocardial infarction. II. Acute depression and subsequent recovery of left ventricular function: serial measurements in intact conscious dogs. RAJ KUMAR, WILLIAM B. HOOD, JR., JULIO JOISON, JOHN C. NORMAN, and WALTER H. ABELMANN
 Effect of lidocaine on the electrophysiological properties of ventricular muscle and Purkinje fibers. J. THOMAS BIGGER, JR., and WILLIAM J. MANDEL
 Inhibition by iodine of the release of thyroxine from the thyroid glands of patients with thyrotoxicosis. LEONARD WARTOFSKY, BERNARD J. RANSIL, and SIDNEY H. INGBAR
 The significance of erythrocyte antigen site density. I. Hemagglutination. LEON W. HOYER and NORMA C. TRABOLD
 Intestinal transport of sugars and amino acids in diabetic rats. WARD A. OLSEN and IRWIN H. ROSENBERG
 Respiratory mechanics and dust exposure in byssinosis. A. BOUHUYS and K. P. VAN DE WOESTIJNE
 Energy substrate metabolism in fresh and stored human platelets. PHIN COHEN and BENJAMIN WITTELS
 Pathways of fatty acid metabolism in human platelets. PHIN COHEN, ARIE DERKSON and HENDRIK VAN DEN BOSCH
 Glycogenesis and glyconeogenesis in human platelets. Incorporation of glucose, pyruvate, and citrate into platelet glycogen; glycogen synthetase and fructose-1,6-diphosphatase activity. SIMON KARPATKIN, ARTHUR CHARMATZ, and RICHARD M. LANGER
 Biosynthesis of low molecular weight (7S) and high molecular weight (19S) immunoglobulin M. ALAN SOLOMON and CARLA L. MCLAUGHLIN
 DNA polymerase activity as an index of lymphocyte stimulation: studies in Down's syndrome. S. S. AGARWAL, BARUCH S. BLUMBERG, BETTY JANE S. GERTSLEY, W. THOMAS LONDON, ALTON I. SUTNICK, and LAWRENCE A. LOEB
 Determinants of pulmonary blood volume. MILENA L. LEWIS, JULIAN GNOJ, VINCENT J. FISHER, and LYNN C. CHRISTIANSON
 Intestinal fluid and electrolyte transport in human cholera. JOHN G. BANWELL, NATHANIEL F. PIERCE, RUPAK C. MITRA, KENNETH L. BRIGHAM, GEORGE J. CARANASOS, ROBERT I. KEIMOWITZ, DAVID S. FEDSON, JACOB THOMAS, SHERWOOD L. GORBACH, R. BRADLEY SACK, and ARABINDO MONDAL

Yearly subscription rates: \$30.00 payable in U.S. funds

The Journal of Endocrinology

Volume 45, Number 4, December 1969

CONTENTS

- J. MOLL, E. MARTENS AND H.G. JANSEN: Development of goitre after methylthiouracil treatment of mice with hypothalamic lesions
- P.W. NATHANIELSZ: The effect of free fatty acids on resin uptake of tri-iodothyronine from human, rat, rabbit and guinea-pig serum and human serum albumin
- T.E.T. WEST, J.L.H. O'RIORDAN AND A.D. CARE: The clearance of homologous calcitonin
- B.G. ENGLAND, W.C. FOOTE, D.H. MATTHEWS, A.G. CARDOZA AND S. RIERA: Ovulation and corpus luteum function in the llama (*Lama glama*)
- G.C. LIGGINS: Premature delivery of foetal lambs infused with glucocorticoids
- A. PEYROT, V. MAZZI, C. VELLANO AND G. LODI: Prolactin activity of short-term and long-term autografted pituitaries of the hypophysectomized crested newt
- W.I.P. MAINWARING: A soluble androgen receptor in the cytoplasm of rat prostate
- B.M. BINDON: The incorporation of ¹³¹Iodinated human serum albumin in the ovary and uterus before implantation in the mouse
- D.R. LINDSAY AND R.J. SCARAMUZZI: Oestrogenic and antioestrogenic activities of a number of steroids in behavioural oestrus and vaginal smear assays in the ewe
- P.M. COTES, M.V. MUSSET, I. BERRYMAN, R. EKINS, S. GLOVER, N. HALES, W.M. HUNTER, C. LOWY, R.W.J. NEVILLE, E. SAMOLS AND P.M. WOODWARD: Collaborative study of estimates by radio-immunoassay of insulin concentrations in plasma samples examined in groups of five or six laboratories
- N. DESHPANDE, V. JENSEN, P. CARSON, R.D. BULBROOK AND A.A. LEWIS: Some aspects of the measurement of cortisol production in patients with breast cancer
- D.V. SINGH AND H.A. BERN: Interaction between prolactin and thyroxine in mouse mammary gland lobulo-alveolar development *in vitro*
- D.W. LINCOLN: Effects of progesterone on the electrical activity of the forebrain
- B.T. PICKERING AND H. HELLER: Oxytoxin as a neurohypophysial hormone in the holocephalian elasmobranch fish, *Hydrolagus collei*

(Monthly 3 volumes a year)

Annual subscription £24 (\$84 in USA)

Single parts £2.10.0 (\$8.50 in USA)
