

This new Unicam UV Spectrophotometer has been made to meet your requirements

To meet, in fact, the requirements of every UV spectroscopist—whether engaged in research or in routine applications. And that means that the new Unicam SP8000 Ultraviolet and Visible Recording Spectrophotometer is just about the most versatile instrument available. To start with you get superb presentation and reproducibility of spectra on the integral flat-bed recorder. You get dual absorbance scales of 0-1.0A and 0-0.2A with back-off. You get exceptional scale expansion. There is a large sample compartment and a unique second sample position. There is a whole range of modular

accessories for automation. If you want digital print out, results in concentration units, automatic wavelength selection, programme control, automatic sample changing of up to 50 samples—you name it and the likelihood is that the Unicam SP8000 system can do it. The Unicam SP8000 is the latest addition to an outstanding range of UV instruments which includes the SP500 Series 2, the SP700, the SP800 and the award-winning SP3000. To learn more about any of these write to us today.

RECENT RESEARCH ON THE RETINA

SCIENTIFIC EDITOR: *E. S. Perkins*

Introduction *Norman Ashton*
 Retinal angiogenesis in the human embryo
Norman Ashton
 Deep-sea fish retinas *N. A. Locket*
 Centrifugal fibres to the avian retina *W. M. Cowan*
 Retinal ultrastructure and pattern recognition logic
C. M. H. Pedler & D. A. Young
 Receptor potentials *G. B. Arden*
 Metabolic survival of the isolated retina
Clive N. Graymore
 Optical properties of photoreceptors *R. A. Weale*
 Pathology of diabetic retinopathy *Alec Garner*

Pathophysiology of retinal cotton-wool spots
Norman Ashton
 Experimentally induced retinopathies in relation to the
 problem of diabetes *H. Heath*
 Laser irradiation of retinal tissue
John Marshall & John Mellerio
 Fluorescein angiography in fundus diagnosis
David W. Hill
 Fluorescein angiography of the fundus in diabetic
 retinopathy *E. M. Kohner & C. T. Dollery*
 Retrolental fibroplasia: management of oxygen therapy
J. D. Baum & J. P. M. Tizard
 Some recent work on visual pigments *H. J. A. Darinall*
 Pigments in anomalous colour vision *W. A. H. Rushton*
