

Unprecedented versatility in automatic Beta/Gamma Spectrometry with the NE8312

- * Liquid scintillation and gamma counting
- * 400 samples
- * Automatic selection of all counting parameters
- * External gamma-source standardization using two independent channels
- * Three counting channels in each of two independent groups
- * Independent computation
- * Room temperature operation

The NE 8312 counts betas by coincidence liquid scintillation counting; gammas are counted in a 3 in radial-hole NaI crystal with dual coincidence photomultipliers, which gives much better energy resolution and discrimination against background than is possible with a well crystal. Data is recorded on a page printer/tape perforator and an on-line desk computer is a cost-effective option. Low-activity rejection and background rate subtraction from all channels independently are provided. Operation is at

room temperature and betas and gammas can even be counted in the same vial. For details of the NE 8312 and the Nuclear Enterprises range of scintillators, write to:—

This new Unicam UV Spectrophotometer has been made to meet your requirements

To meet, in fact, the requirements of every UV spectroscopist—whether engaged in research or in routine applications. And that means that the new Unicam SP8000 Ultraviolet and Visible Recording Spectrophotometer is just about the most versatile instrument available. To start with you get superb presentation and reproducibility of spectra on the integral flat-bed recorder. You get dual absorbance scales of 0-1.0A and 0-0.2A with back-off. You get exceptional scale expansion. There is a large sample compartment and a unique second sample position. There is a whole range of modular

accessories for automation. If you want digital print out, results in concentration units, automatic wavelength selection, programme control, automatic sample changing of up to 50 samples—you name it and the likelihood is that the Unicam SP8000 system can do it. The Unicam SP8000 is the latest addition to an outstanding range of UV instruments which includes the SP500 Series 2, the SP700, the SP800 and the award-winning SP3000. To learn more about any of these write to us today.

CONTENTS

- A. SHENKIN, G. NUKI, R.M. LINDSAY, K. WHALEY, W.W. DOWNIE AND W.C. DICK: The lysine-vasopressin test: an evaluation of two methods of administration in non-corticosteroid-treated and corticosteroid-treated patients with rheumatoid arthritis
- T. MORI, Y. YOSHIDA, T. NISHIMURA, T. KONO, S. YAMADA AND S. TATSUMI: Clinical and biochemical studies of a patient with a hilus cell tumour
- A.L.C. WALLACE AND J.M. BASSETT: Plasma growth hormone concentrations in sheep measured by radioimmunoassay
- PH. RICHARD: An electrophysiological study in the ewe of the tracts which transmit impulses from the mammary glands to the pituitary stalk
- PH. RICHARD, I. URBAN AND R. DENAMUR: The role of the dorsal tracts of the spinal cord and of the mesencephalic and thalamic lemniscal system in the milk-ejection reflex during milking in the ewe
- H.L.J. MAKIN: The gas-liquid chromatography of steroid formates; an application in congenital adrenal hyperplasia
- M. WINTER, E. MORAVA, G. SIMON AND J. SÓS: The role of the parathyroid glands in the absorption of calcium from the small intestine
- M.D. HELLIER: The effects of prolonged starvation and refeeding on 24-hr. urinary insulin levels in obese subjects
- B.P. SETCHELL AND G.M.H. WAITES: Changes in the permeability of the testicular capillaries and of the 'blood-testis barrier' after injection of cadmium chloride in the rat
- ANNE MCLAREN: The fate of very small litters produced by egg transfer in mice
- F. MASSARA AND E. STRUMIA: Increase in plasma growth hormone concentration in man after infusion of adrenaline-propranolol
- D. ZAMBRANO AND R.P. DEIS: The adeno-hypophysis of female rats after hypothalamic oestradiol implants: an electron microscopic study
- N.I. GERMINO, M. MICUCCI, V. GRAU, F. RAMA AND M.A. CASTELLANO: Location of L-idoitol: NAD oxidoreductase (D-sorbitol tetrazolium reductase of ketose-reductase) in the genital tract of the bull
- W.H. PRICE AND H.J. VAN DER MOLEN: Plasma testosterone levels in males with the 47-XXY karyotype
- M. PEAKER, J.G. PHILLIPS AND A. WRIGHT: The effect of prolactin on the secretory activity of the nasal salt-gland of the domestic duck (*Anas platyrhynchos*)

Short Communications

- R.P. DEIS AND NIA. ALONSO: Diuretic effect of dopamine in the rat
- I.P. CALLARD AND H. ZEIGLER, JR.: Inhibitory effects of prolactin upon gonadotrophin-stimulated ovarian growth in the iguanid lizard, *Dipsosaurus dorsalis*
- R.J. HEITZMANN, T.C. ADAMS AND G.D. HUNTER: The assay of corticosteroids in plasma of the dairy cow
- S.H. HASAN: The clearance of vasopressin and deaminavasopressin from the circulation of normal and hypercalcaemic rabbits
- A. LEV-RAN, J. LOAR, M. VINS AND E. SIMON: Effect of intravenous infusion of D-mannoheptulose on blood glucose and insulin levels in man
