CONTENTS

A reversible vascular abnormality associated with diabetic ketosis
N. J. Christensen 539–548

Inhibitors of the fibrinolytic enzyme system in renal disease
N. B. Bennett and D. Ogston 549–557

The value of plasma renin concentration per se, and in relation to plasma and extracellular fluid volume in diagnosis and prognosis of human renovascular hypertension

Protein turnover in skeletal muscle. I. The measurement of rates of synthesis and catabolism of skeletal muscle protein using $[^{14}C]Na_2CO_3$ to label protein
D. J. Millward 577–590

Protein turnover in skeletal muscle. II. The effect of starvation and a protein-free diet on the synthesis and catabolism of skeletal muscle proteins in comparison to liver
D. J. Millward 591–603

The relative importance of urinary pH and urinary content of citrate, magnesium and calcium in the production of nephrocalcinosis by diet and acetazolamide in the rat

Interrelation between restitution time-constant and alternating myocardial contractility in dogs
Y. Mahler and S. Rogel 625–639

The effects of prolonged administration of vasopressin and oxytocin on renin, aldosterone and sodium balance in normal man
F. J. Goodwin, J. G. G. Ledingham and J. H. Laragh 641–651

Factors determining the ventilatory response to carbon dioxide in chronic obstructive airways disease
T. K. C. King and D. Yu 653–662

The effect of hypoglycaemia on oral glucose tolerance in normal subjects and patients with pituitary and adrenal disorders
N. W. Oakley, H. S. Jacobs, R. C. Turner, J. Williams, C. dos S. Aquino and J. D. N. Nabarro 663–674

Exercise tolerance breathing a low density gas mixture, 35% oxygen and air in patients with chronic obstructive bronchitis

Effect of vasopressin on the renal phosphate in man
A. J. Eisinger, N. F. Jones, M. A. Barraclough and R. R. McSwiney 687–692
