Contents

Renin-suppressive potency of various beta-adrenergic blocking agents at supine rest and during upright exercise. F. R. BÜHLER, G. MARBET, U. PATEL and F. BURKART 61s

Long-term propranolol treatment of resistant arterial hypertension in haemodialysed patients. Q. MAGGIORE, M. BIAGINI, C. ZOCCALI and M. MISEFARI 73s

Changes in plasma renin activity and blood pressure after acute and chronic administration of β-adrenergic receptor-blocking drugs. T. MORGAN, S. CARNEY and R. ROBERTS 81s

Effect of oxprenolol on catecholamines and plasma renin activity: acute response to frusemide in hypertensive patients. G. MUIESAN, C. ALICANDRI, E. AGABITI ROSEI, M. MOTOLESE and C. VALORI 85s

Beta-adrenergic receptors and renin release: studies with beta-adrenoreceptor-blocking agents in the conscious rabbit. M. A. WEBER, HELEN F. OATES and G. S. STOKES 89s

Anti-hypertensive adrenergic-blocking agents: effects on sodium balance, the renin-angiotensin system and haemodynamics. M. E. SAFAR, Y. A. WEISS, P. L. CORVOL, J. E. MENARD, G. M. LONDON and P. L. MILLIEZ 93s

Effect of propranolol on blood pressure in normal and hypertensive rats. J. CONWAY, K. DARWIN, A. HILDITCH, B. LOVEDAY and M. REEVES 101s

Beta-blocking drugs and renin secretion in the anaesthetized dog. J. L. IMBS, J. KRAETZ, M. SCHMIDT, E. DESAULLES and J. SCHWARTZ 105s

II. Report on Round Table on renin suppression and the hypotensive action of beta-adrenergic-blocking drugs 109s
Contents

III. Report on Round Table on renin as a risk factor in hypertension 117s

Plasma renin activity and cardiovascular disease. R. B. Hickler, D. P. Lauler, R. E. Gleason and R. Christlieb 131s

IV. An international collaborative study of renin assay: establishment of the international reference preparation of human renin 135s

V. New aspects of therapy

Pathogenesis and prevention of stroke in spontaneously hypertensive rats. K. Okamoto, F. Hazama, Y. Yamori, H. Haebara and A. Nagaoka 161s

A pilot trial of treatment for mild hypertension; interim report of the Medical Research Council’s trial in Britain. W. E. Miall and P. J. Brennan 165s

Abnormal sodium transport in leucocytes from patients with essential hypertension and the effect of treatment. R. D. Thomas, R. P. S. Edmondson, P. J. Hilton and N. F. Jones 169s

Yoga and biofeedback in the management of ‘stress’ in hypertensive patients. C. Patel 171s

Effect of pyraamline (a tyrosine hydroxylase inhibitor) in essential hypertension. T. Kimura, E. Takahashi, M. Ozawa, S. Uchiyama, S. Maekawa, O. Yashima and M. Sato 175s

Technique for rapid control of hypertension with oral minoxidil. K. O’Malley and J. L. McNay 185s

The use of minoxidil, an experimental arteriolar dilator, in 510 patients with refractory hypertension. W. B. Martin, G. R. Zins and W. A. Freyburger 189s

VI. Sympathetic nervous system and hypertension

Central regulation of arterial blood pressure. A. Philippu 191s

Central sympathetic transmitters and hypertension. M. Henning 195s

Central neurohormonal mechanisms in spontaneously hypertensive rats compared with human essential hypertension. B. Folkow 205s

Neural control of renin release. A. Zanchetti and A. Stella 215s
Contents

Adrenergic mechanisms in human hypertension and in spontaneously hypertensive rats. E. D. FROHLICH and M. A. PFEFFER 225s

 Plasma noradrenaline concentration and blood pressure in essential hypertension, phaeochromocytoma and depression. W. J. LOUIS, A. E. DOYLE and S. N. ANAVEKAR 239s

 Role of the autonomic nervous system in mild human hypertension. S. JULIUS, M. D. ESLER and O. S. RANDALL 243s

 The vasomotor centre and its afferent pathways. M. D. JOY 253s

 Control of high and low blood pressure in the dog by aortic and sinus nerves. D. L. CLEMENT, L. C. PELLETIER and J. T. SHEPHERD 257s

 Spinal sympathetic reflexes in the cat and the pathogenesis of arterial hypertension. A. MALLIANI, F. LOMBARDI, M. PAGANI, G. RECORDATI and P. J. SCHWARTZ 259s

 Carotid baroceptor re-setting in the hypertensive dog. P. SLEIGHT, J. L. ROBINSON, D. E. BROOKS and P. M. REES 261s

 The intrinsic brain iso-renin-angiotensin system in the rat: its possible role in central mechanisms of blood pressure regulation. D. GANTEN, J. S. HUTCHINSON and P. SCHELLING 265s

 The brain as a possible site for the cardiovascular effects of β-adrenoceptor blocking agents in cats. M. D. DAY and A. G. ROACH 269s

 The central hypotensive action of clonidine and BAY 1470 in cats and rats. L. FINCH 273s

 Localization of central noradrenergic mechanisms in cardiovascular regulation in rats. H. STRUYKER BOUDIER, G. SMEETS, G. BROUWER and J. VAN ROSSUM 277s

 Central serotonergic neurons and experimental neurogenic and renal hypertension in the rabbit. J. P. CHALMERS and L. M. H. WING 279s

 Postural changes of plasma renin activity after renal transplantation. A. SALVETTI, F. ARZILLI, P. SASSANO, P. GAZZETTI and P. RINDI 283s

 Relationships between plasma renin activity and urinary and plasma catecholamines. U. WERNER, H. GÜNNEWIG and K. D. BOCK 287s

 Electrical and dynamic responses of the human hyperkinetic heart to sympathetic stimuli. C. BARTORELLI, A. POLESE, C. FIORENTINI, F. MAGRINI, M. T. OLIVARI and M. GUAZZI 291s

 Dopa, catecholamines and their metabolites in essential hypertension. W. JANUSZEWICZ and B. WOCIAL 295s

 Effect of a competitive angiotensin antagonist on the renal haemodynamic changes induced by inhibition of prostaglandin synthesis in rats. A. MIMRAN, D. CASELLAS, M. DUPONT and P. BARJON 299s
Contents

Renal prostaglandin synthesis in experimental renal-clip hypertension in the rat.  
D. PUGSLEY, L. J. BEILIN and R. PETO  303s

Effect of prostaglandins (E₂ and A₂) on the enzymatic reaction of human renin in isolated homologous system and with added normal and hypertensive plasma.  
R. EGGENA, J. BARRETT and M. SAMBHI  307s

Differential effect on prostaglandin A₁ in hypertensive patients with low, normal and high renin. L. R. KRAKOFF, N. VLACHAKIS, M. MENDLowitz and J. STRICKER  311s

Author index  315s
