EDITORIAL COMMENTS

The proceedings of the Fourth Meeting of the International Society of Hypertension, held in Sydney, 24–26 February 1976, are published in this special Supplement of *Clinical Science and Molecular Medicine*. The Society is indebted to the Editorial Board of the Journal for their cooperation and help in producing the Supplement, which is the third in the series.

The relatively short delay between the meeting and the publication of this Supplement has been made possible by the cooperation of authors in providing manuscripts at the time of the meeting, and perhaps even more importantly by the skill and devotion of the editorial secretary, Mrs Ilse Rand of Melbourne. It is a pleasure also to acknowledge the contributions of numerous colleagues who cheerfully allowed us to coerce them into assisting with the final preparation of the manuscripts.

The large attendance at the Sydney meeting, despite the distance and expense involved, seems to indicate that the Society is truly International. The success of the meeting owes much to the sponsorship of the National Heart Foundation of Australia and of Merck Sharp and Dohme (Australia) Pty Ltd. It is a particular pleasure to record the efforts of Mr Cowap of Canberra, Mr McGregor of Sydney and Dr Gaston Bauer of Sydney whose work did so much to make the meeting run smoothly.

Finally, a special word of thanks to Merck Sharp and Dohme International, whose financial support has enabled us to make the proceedings of this Symposium available to all regular subscribers to *Clinical Science and Molecular Medicine*. The contents, of course, represent independent thinking and opinion of the presenting authors, to whom all credit must be accorded.

The next meeting of the Society will be held in Paris in the spring of 1978. We can confidently expect a pleasant and successful reunion.

Owing to the special nature of this Supplement to *Clinical Science and Molecular Medicine* the use of S.I. units has not been adhered to throughout its contents.
