

CONTENTS

VOL. 52, No. 1

JANUARY 1977

Guidance for Authors	i-xi
Editorial Review: Hypercalciuria. B. E. C. NORDIN	1-8
The origin and fate of salivary urea and ammonia in man. J. KOPSTEIN and O. M. WRONG	9-17
Blood pressure control in end-stage renal disease in man: indirect evidence of a complex pathogenic mechanism besides renin or blood volume. G. CANNELLA, A. CASTELLANI, G. MIONI, M. USBERTI, U. GUERRA, A. ALBERTINI and R. MAIORCA	19-21
Natriuresis in rats acutely depleted of chloride. R. G. LUKE, B. T. KHANH, R. D. SCHMIDT and J. H. GALLA	23-31
Oestrogen-associated disease of the renal microcirculation. K. JONES, P. F. NAISH and G. M. ABER (Correction, page 636)	33-42
Increased renal function in patients with acute left ventricular failure: a possible homeostatic mechanism. E. D. BENNETT, N. H. BROOKS, J. KEDDIE, Y. LIS and A. WILSON	43-50
Evidence for renal control of urinary excretion of bile acids and bile acid sulphates in the cholestatic syndrome. J. A. SUMMERFIELD, JULIA CULLEN, S. BARNES and BARBARA H. BILLING	51-65
Acid-base and respiratory changes after prolonged exposure to 1% carbon dioxide. B. J. W. PINGREE	67-74
Molecular exclusion electrophoresis of human serum lipoproteins: patterns in control and ischaemic heart-disease populations. J. GREEN and S. CARNEY	75-82
Biosynthesis of folate polyglutamate in the rat with different tracers. B. REED, D. G. WEIR and J. M. SCOTT	83-86
Binding of transferrin and uptake of iron by rat erythroid cells <i>in vitro</i> . N. J. VERHOEF and P. J. NOORDELOOS	87-96
The analysis of decay curves. H. H. LAFFERTY, A. E. B. GIDDINGS and D. MANGNALL	97-101

SHORT COMMUNICATIONS

Release by vasopressin of E-type prostaglandins from the rat kidney. C. BELL and M. K. K. MYA	103-106
Effect of propranolol on blood pressure and renin in renal hypertension in the rat. M. FERNANDES, G. ONESTI, R. FIORENTINI, A. B. GOULD, K. E. KIM and C. SWARTZ	107-109

VOL. 52, No. 2

FEBRUARY 1977

Editorial: Controversy in clinical science. High arterial pressure versus humoral factors in the pathogenesis of the vascular lesions of malignant hypertension. L. J. BEILIN, F. S. GOLDBY and J. MÖHRING	111-117
Lack of dependence of urine PCO_2 upon reduction of glomerular filtration rate in alkalotic dogs. B. J. STINEBAUGH, T. H. HOSTETTER, R. A. PERAINO, F. X. SCHLOEDER and W. N. SUKI	119-123
Effects of metabolic alkalosis, metabolic acidosis and uraemia on whole-body intracellular pH in man. A. TIZIANELLO, G. DE FERRARI, G. GURRERI and N. ACQUARONE	125-135
Effect of pentobarbitone sodium on serum creatine kinase of normal and dystrophic hamsters. J. S. NEERUNJUN and V. DUBOWITZ	137-142
Epitaxial relationships in urolithiasis: the brushite-whewellite system. J. L. MEYER, J. H. BERGERT and L. H. SMITH	143-148
Inhibition of frusemide-induced natriuresis by indomethacin in patients with the nephrotic syndrome. R. G. W. L. TIGGELER, R. A. P. KOENE and P. G. A. B. WIJDEVELD	149-151

Resolution of hypoxic changes in the heart and pulmonary arterioles of rats during intermittent correction of hypoxia. ENID LEACH, P. HOWARD and GWENDA R. BARER	153-162
The course of arterial pressure and the effect of Sar ¹ -Thr ⁸ -angiotensin II in a new model of two-kidney hypertension in conscious dogs. Z. MASAKI, C. M. FERRARIO, F. M. BUMPUS, E. L. BRAVO and M. C. KHOSLA	163-170
Comparison of the effect of two groups of diuretics on renin secretion in the anaesthetized dog. J. L. IMBS, M. SCHMIDT, J. VELLY and J. SCHWARTZ	171-182
The development of a radioimmunoassay procedure for the estimation of Tamm-Horsfall glycoprotein in human serum. P. J. G. AVIS	183-191
Metabolism of intravenously administered dipeptides in rats: effects on amino acid pools, glucose concentration and insulin and glucagon secretion. S. A. ADIBI, B. A. KRZYSIK and A. L. DRASH	193-204
Effect of nephrectomy and enterectomy on plasma clearance of intravenously administered dipeptides in rats. A. S. ADIBI and B. A. KRZYSIK	205-213
SHORT COMMUNICATIONS	
The forms of vitamin B ₁₂ on the transcobalamins. CAROLINE M. L. A. MACDONALD, J. FARQUHARSON, R. G. BESSENT and J. F. ADAMS	215-218
Accentuation of ethanol-induced fatty liver by phenobarbitone. A. R. MARSH, H. S. FRASER, A. BRECKENRIDGE, B. LEWIS and G. R. THOMPSON	219-222
MEDICAL RESEARCH SOCIETY (Annual General Meeting on 10 and 11 December 1976)	
Symposium: Control of Circulation to the Tissues	1P
Communications	1P-33p
VOL. 52, No. 3	MARCH 1977
Editorial Review: The molecular basis for abnormal gene action: recent lessons from the thalassaemia model. D. J. WEATHERALL	223-227
Enzyme activities in human liver biopsies: assay methods and activities of some lysosomal and membrane-bound enzymes in control tissue and serum. CAROL A. SEYMOUR and T. J. PETERS	229-239
Lysosomal changes in liver tissue from patients with the Dubin-Johnson-Sprinz syndrome. CAROL A. SEYMOUR, G. NEALE and T. J. PETERS	241-248
The relative transfer rates for sodium and xenon from gut lumen to plasma in man. A. H. G. LOVE, L. C. CHEN, J. REEVE and N. VEALL	249-254
Concentrations of prostaglandin A-, E- and F-like substances in gastric mucosa of normal subjects and of patients with various gastric diseases. W. SCHLEGEL, K. WENK, H. C. DOLLINGER and S. RAPTIS	255-258
Amino acid concentrations in portal venous plasma during absorption from the small intestine of the guinea pig of an amino acid mixture simulating casein and a partial enzymic hydrolysate of casein. M. H. SLEISENGER, D. PELLING, D. BURSTON and D. M. MATTHEWS	259-267
Interaction of mental factors with hypercapnic ventilatory drive in man. J. R. A. RIGG, E. M. INMAN, N. A. SAUNDERS, S. R. LEEDER and N. L. JONES	269-275
Oxygen affinity <i>in vivo</i> and <i>in vitro</i> in chronic ventilatory failure. P. M. TWEEDDALE, R. J. E. LEGGETT and D. C. FLENLEY	277-281
Human skeletal muscle function: description of tests and normal values. R. H. T. EDWARDS, A. YOUNG, G. P. HOSKING and D. A. JONES	283-290
A study of the contractility, biochemistry and morphology of an isolated preparation of human skeletal muscle. R. F. W. MOULDS, A. YOUNG, D. A. JONES and R. H. T. EDWARDS	291-297
Blood pressure response of nephrectomized hypertensive rats to converting enzyme inhibition: evidence for persistent vascular renin activity. H. THURSTON and J. D. SWALES	299-304

- The role of the false neurotransmitter octopamine in the hypotension of fulminant hepatic failure. P. N. TREWBY, R. A. CHASE, M. DAVIS and R. WILLIAMS 305-310
- Plasma glucose, non-esterified fatty acids and amino acids in Huntington's chorea. O. T. PHILLIPSON and E. D. BIRD 311-318
- The urinary excretion of catecholamines and their derivatives in primary hypertension in man. R. F. BING, J. HARLOW, A. J. SMITH and M. M. TOWNSHEND 319-323

SHORT COMMUNICATIONS

- Leucocyte intracellular pH in patients with the metabolic acidosis of renal failure. G. E. LEVIN and D. N. BARON 325-328
- Plasma calcitonin in Paget's disease of bone. J. A. KANIS, G. HEYDEN and R. J. WALTON 329-332

VOL. 52, No. 4

APRIL 1977

- Editorial Review: Cortisol and catabolism: a new perspective. K. G. M. M. ALBERTI and D. G. JOHNSTON 333-336
- Functional and structural changes after disuse of human muscle. A. J. SARGEANT, C. T. M. DAVIES, R. H. T. EDWARDS, C. MAUNDER and A. YOUNG 337-342
- Comparison of the effects of water immersion and saline infusion on central haemodynamics in man. R. LEVINSON, M. EPSTEIN, M. A. SACKNER and R. BEGIN 343-350
- Failure of selected endocrine organ ablation to modify the natriuresis of blood volume expansion in the dog. G. J. KALOYANIDES, LOREN COHEN and G. F. DIBONA 351-356
- Suppression of plasma renin activity by intravenous infusion of antidiuretic hormone in man. B. HESSE and I. NIELSEN 357-360
- Non-steady-state studies of low-density-lipoprotein turnover in familial hypercholesterolaemia. G. R. THOMPSON, T. SPINKS, A. RANICAR and N. B. MYANT 361-369
- Sodium restriction and inhibition of the renin-angiotensin system in renovascular hypertension in the rat. J. D. SWALES and H. THURSTON 371-375
- A new open-circuit method for estimating carbon dioxide tension in mixed venous blood. REIAH AL-DULYMI and R. HAINSWORTH 377-382
- The binding of plasma proteins to human placental cell membranes. A. H. BALFOUR and E. A. JONES 383-394
- Muscle metabolism in patients with chronic obstructive lung disease and acute respiratory failure. INGRID GERTZ, GÖRAN HEDENSTIERNA, GÖRAN HELLERS and J. WAHREN 395-403
- Haemodynamic characteristics of low-renin hypertension. M. A. D. H. SCHALEKAMP, W. H. BIRKENHÄGER, G. A. ZAAL and G. KOLSTERS 405-412
- Erythrocyte adenosine triphosphate and 2,3-diphosphoglycerate after human renal transplantation: dissociation from hypophosphataemia. C. G. BARCENAS, P. PAEZ, K. UYEDA, P. C. PETERS and A. R. HULL 413-422
- Bronchial provocation in the study of sensations associated with disordered breathing. A. R. RUBINFELD and M. C. F. PAIN 423-428
- Analytical subcellular fractionation of human granulocytes with special reference to the localization of enzymes involved in microbicidal mechanisms. A. W. SEGAL and T. J. PETERS 429-442

VOL. 52, No. 5

MAY 1977

- Editorial Review: Claude Bernard's (extended) *milieu interieur* revisited: autoregulation of cell and subcell integrity. E. R. ROBIN 443-448
- Factors affecting angiotensin II concentrations in the human infant at birth. FIONA BROUGHTON PIPKIN and E. M. SYMONDS 449-456
- Catabolic rate of α_1 -antitrypsin of Pi type M and Z in man. C.-B. LAURELL, B. NOSSLIN and J.-O. JEPSSON 457-461
- Porphyryns in erythrocytes and blood plasma: preliminary studies with qualitative thin-layer chromatography. T. K. WITH 463-467

Intrarenal distribution of plasma flow in cirrhosis as measured by transit renography: relationship with plasma renin activity, and sodium and water excretion. S. P. WILKINSON, I. K. SMITH, M. CLARKE, V. ARROYO, J. RICHARDSON, H. MOODIE and R. WILLIAMS	469-475
Plasma noradrenaline concentrations in experimental renovascular hypertension in the rat. H. J. DARGIE, S. S. FRANKLIN and J. L. REID	477-483
Protein metabolism in human neonates: nitrogen-balance studies, estimated obligatory losses of nitrogen and whole-body turnover of nitrogen. P. B. PENCHARZ, W. P. STEFFEE, W. COCHRAN, N. S. SCRIMSHAW, W. M. RAND and V. R. YOUNG	485-498
The effect of 25-hydroxy vitamin D ₃ in the osteomalacia of chronic renal failure. J. B. EASTWOOD, T. C. B. STAMP, H. E. DE WARDENER, P. J. BORDIER and C. D. ARNAUD	499-508
Human hepatic δ -aminolaevulinate synthase: requirement of an exogenous system for succinyl-coenzyme A generation to demonstrate increased activity in cirrhotic and anticonvulsant-treated subjects. H. L. BONKOWSKY and JOANNE S. POMEROY	509-521
Bone necrosis and urinary hydroxyproline excretion in rabbits. C. R. WEATHERLEY, G. DALE, J. MCGURK and D. N. WALDER	523-526
Muscle-protein catabolism after injury in man, as measured by urinary excretion of 3-methylhistidine. D. H. WILLIAMSON, ROSE FARRELL, ALISON KERR and R. SMITH	527-533
Proline and hydroxyproline excretion and vitamin C status in elderly human subjects. C. J. BATES	535-543
SHORT COMMUNICATION	
Intrarenal role of angiotensin II in controlling sodium excretion during dehydration in dogs. N. C. TRIPPODO, J. E. HALL, T. E. LOHMEIER and A. C. GUYTON	545-548
VOL. 52, No. 6	JUNE 1977
Editorial Review: The chemical control of the cerebral circulation. I. R. CAMERON	549-554
Studies on the kinetics of unconjugated [¹⁴ C]bilirubin metabolism in normal subjects and patients with compensated cirrhosis. D. OWENS, E. A. JONES and E. R. CARSON	555-570
The effect of dietary sodium intake on the blood pressure and cardiac output responses to angiotensin II in unanaesthetized rats. BARBARA L. SLACK and J. M. LEDINGHAM	571-576
Plasma calcitonin in chronic renal failure: relation to other factors of importance in bivalent ion metabolism. R. SHAINKIN-KESTENBAUM, R. LERMAN, A. REUBEN and G. M. BERLYNE	577-583
Enzyme activities of cells of different types isolated from livers of normal and cholestatic rats. A. M. WOOTTON, G. NEALE and D. W. MOSS	585-590
Plasma renin levels and systemic haemodynamics in essential hypertension. R. FAGARD, A. AMERY, T. REYBROUCK, P. LUNEN, L. BILLIET and J. V. JOOSSENS	591-597
Mitochondrial functions and content of microsomal and mitochondrial cytochromes in human cirrhosis. J. DÍAZ GIL, I. ROSSI, P. ESCARTÍN, J. M. SEGOVIA and M. GOSÁLVEZ	599-606
Intestinal absorption of glycine and glycyl-L-proline in the rat. R. C. HEADING, H. P. SCHEDL, L. D. STEGINK and D. L. MILLER	607-614
Prostaglandin activity in sustained inflammation of human skin before and after aspirin. N. A. PLUMMER, C. N. HENSBY, A. KOBZA BLACK and M. W. GREAVES	615-620
Effect of warfarin on the metabolism of phylloquinone (vitamin K ₁): dose-response relationships in man. M. J. SHEARER, A. MCBURNEY, A. M. BRECKENRIDGE and P. BARKHAN	621-630
SHORT COMMUNICATION	
The effect of chronic frusemide administration on intracellular potassium, sodium and pH of cardiac and skeletal muscle. R. J. C. HALL and I. R. CAMERON	631-634
CORRESPONDENCE SECTION	
A competitive protein-binding assay for 25-hydroxyvitamin D. G. N. HENDY, E. DOLEV, M. A. PREECE, J. M. PETTIFOR, F. P. ROSS and J. WANG	635-636
