VOLUME 4

# ESSAYS IN MEDICAL BIOCHEMISTRY

Edited by V. MARKS and C. N. HALES

129 pp. £4.50 (US \$10.00) by surface mail to overseas addresses

In this latest volume of *Essays in Medical Biochemistry* articles are included on the influences of amino acids on brain mechanisms, on the biochemical significance of hormonal control mechanisms for normal bone and in cancer, and on the structure and variations of  $\alpha_1$ -antitrypsin, all topics of increasing interest and relevance for the research worker and the clinician.

List of Contents and Authors:

*The Role of Amino Acids in the Brain*

By J. H. Quastel

*Biochemical Regulators of Bone Resorption and the Significance in Cancer*

By T. J. Martin and D. Atkins

*$\alpha_1$ -Antitrypsin: Structure, Variation and Disease*

By R. W. Carrell and M. C. Owen

Still Available:

**VOLUME 1 131 pp. £2.00 (US \$5.00)**

**VOLUME 2 187 pp. £4.00 (US \$8.00)**

**VOLUME 3 152 pp. £4.50 (US \$9.00)**

Order From:

P.O. BOX 32,  
COMMERCE WAY, COLCHESTER CO2 8HP, ENGLAND**  
(or through your bookseller)

SPECIAL PUBLICATION No. 5

# *Safety in Biological Laboratories*

Edited by E.F. HARTREE and V.H. BOOTH

68 pp + xii

ISBN 0904498 05 0

£1.60 (U.S. \$ 3.00)

A concise, easily readable guide for workers in Life-Science Laboratories. Emphasis is on **SAFETY** rather than **DANGER**, on avoidance of risks, elimination of hazards, and on the need for safety consciousness for the benefit of others as well as the worker's own person. Among topics discussed are radiation, animals, pathogens, carcinogens and other dangerous substances, vacuum distillation, fire and electricity as well as such simple operations as emptying autoclaves and connecting plastic tubing to glass tubing. The booklet is intended for all who work in laboratories, from the newest assistant to the head of department (who may come to realize that some of their standard practices contain avoidable elements of danger). Generous discounts are offered for bulk purchase: 6-10 copies, less 10%; 11-20 copies, less 20%; 21-50 copies, less 30%; 51 copies or more, less 40%.

The booklet should help every reader to be more likely to survive and to pass on the message:  
**SAFETY IN BIOLOGICAL LABORATORIES**

**CONTENTS:** *Preface, Glossary, Precautions for All Laboratory Workers by Arthur W. Hartley and Vernon Booth, Electrical Hazards, Fire and Explosion by Edward Hartree, The Role of the Safety Officer by Oliver Phillip Edmonds, The Animal House by Donald W. Jolly, Microbiological Hazards by Richard D. Barry, Carcinogens, Mutagens, Teratogens by Donald B. Cater and Edward Hartree, Radiation Hazards by Philip P. Dendy, Subject Index.*

*Obtainable from your bookseller or agent, or direct from*

**THE BIOCHEMICAL SOCIETY BOOK DEPOT**  
P.O. Box 32, Commerce Way, Colchester CO2 8HP, Essex, U.K.

## STEROID REFERENCE COLLECTION

A large collection of steroids for use as reference standards is maintained with support from the U.K. Medical Research Council and the U.S. National Institute of Arthritis and Metabolic Diseases, N.I.H., and many individual donors of samples. Milligram or microgram quantities of steroids, including steroid hormones and their metabolites, are available free of charge for use in clinical or biochemical studies, such as the identification of unknown steroids, the development and standardization of micro-assay techniques, chromatography, mass spectrometry etc. A Collection of bile acids and related compounds is also being established. The Collection's team of chemists offers advice and assistance, where possible, in chemical problems involving steroids, and an N.M.R. service ( $^1\text{H}$  and  $^{13}\text{C}$ ) to help in the identification of steroids.

Enquiries, requests for detailed information and a list of available steroids, or offers of samples for the Collection, should be addressed to:

**Professor D. N. Kirk,**  
Curator of the Steroid Reference Collection,  
Chemistry Department,  
Westfield College,  
Hampstead,  
London, NW3 7ST

Workers in the U.S.A., however, are asked to address enquiries or requests to Dr. D. F. Johnson, Building 4, Room 141, National Institutes of Health, Bethesda, Maryland 20014, U.S.A.
