Volume 67

SUBJECT INDEX

First and last page numbers of papers to which entries refer are given. Page numbers marked with an asterisk refer to Editorial Reviews.

- Absorption, intestinal 105-110, 117-120, 131-138, 591-599
- Absorption, renal tubular 307-312
- Absorption kinetics, jejunum 541-549
- Acetaldehyde, metabolism, sex differences 397-401
- Acetylsalicylic acid, diuresis 579-583
- Acid-base balance, muscle 461-464
- Activation analysis 73-82
- Acute renal failure, cationized albumin 19-33, 35-43
- Adenoids, histamine content 557-560
- Adenosine triphosphatase
cardiac myofibrils 259-267
cardiac sarcolemma 535-540
- Adenylate cyclase, erythrocyte 111-115
- Adipocytes, insulin binding 139-142
- Adrenaline
muscle pH and electrolytes 461-464
sex differences 347-352
splanchnic extraction, cirrhosis 45-49
- β -Adrenoceptor
blockade, heart myofibrils 259-267
Goldblatt hypertension 51-59
- Aerobic metabolism, endurance training 229-236
- Age, gastric emptying 213-218
- Airways obstruction, exercise 515-519
- L-Alanyl-L-alanine, jejunal absorption 541-549
- Albumin
cationized 19-33, 35-43
metabolism 35-43
- Alcohol *see* Ethanol
- Alcoholism, fatty liver 337-345
- Aldosterone
arginine vasopressin 353-358
frusemide, potassium balance 195-203
glucocorticoid inhibition 329-335
- Alkaline phosphodiesterase I, experimental biliary obstruction 647-652
- Altitude acclimatization, angiotensin converting enzyme 453-456
- Alveolar macrophages, dexamethasone 653-656
- γ -Aminobutyric acid, fulminant hepatic failure 167-175
- Anaerobic threshold, endurance training 229-236
- Angina pectoris, patient tests 601-611
- Angiotensin, uraemic plasma 365-368
- Angiotensin converting enzyme
hypoxia 453-456
inhibitor binding assay 237-241
- Antidepressant binding sites, brain 369-373*
- Antidiuretic hormone
cardiovascular control 473-481*
frusemide 195-203
potassium balance 195-203
renal excretion 307-312
- Apnoea, sleep 465-471*
- Arginine vasopressin, cardiovascular control 473-481*
- Arrhythmias, within-breath 225-227
- Arterial compliance 69-72
- Arterioles, verapamil and calcium 613-618
- Artery
compliance 69-72
occlusive disease 89-95
pulse wave velocity 69-72
- Arthrogenous muscle weakness 7-14*
- Asthma, glucocorticoid resistance 639-645
- Atenolol, myocardial proteins 259-267
- Atrial natriuretic factor, erythrocyte sodium transport 403-405
- Atrial pacing, angina pectoris 601-611
- Atrial peptides 403-405
- Autoimmunity, liver disease 569-578*
- Autonomic nervous system, reflex extrasystoles 225-227
- Baroreceptor reflexes
blood pressure, posture 321-327
exercise in hypertension 97-103
- Basement membrane, acidic glycosaminoglycans clearance 205-212
- Benzodiazepine receptors, hepatic encephalopathy 167-175
- Bicuculline methiodide, benzodiazepine receptors 167-175
- Bile
acids 61-68, 439-444
alkaline phosphodiesterase I 647-652
antigens 569-578*
bilirubin 61-68, 499-504
cholestyramine 439-444
salts 61-68, 177-183

- Bile acids**
 biliary excretion 61-68
 cholestyramine 439-444
Bile salts
 hypotension 177-183
 obstructive jaundice 177-183
Bilirubin, biliary excretion 61-68, 499-504
Blood clotting, factor VIII 561-567*
Blood flow
 foot, nocturnal 89-95
 kidney 313-319
 myocardium 601-611
 peripheral, thermoregulation 445-452
Blood pressure
 catecholamines 347-352
 exercise 97-103
 lymphocyte sodium 407-411
 posture 321-327
Blood vessels
 prostacyclin 511-514
 verapamil 613-618
Body composition, wasting 73-82
Body temperature
 fasting and graded coding 445-452
 thyrotrophin 433-437
Bone, exchangeable calcium 591-599
Bowman's space, renal clearance, micropuncture 205-212
Brain, antidepressant binding sites 369-373*
Brain stem, renin and haemorrhage 269-272
Breathing control, sleep 465-471*
2-Bromoethylamine hydrobromide, renal medullectomy 521-528

Cadmium telluride detectors 89-95
Calcium
 absorption 285-290, 591-599
 binding proteins 535-540
 experimental hypercalciuria 131-138
 hypertension, uraemia 161-166
 intestinal absorption 131-138
 verapamil, arterides 613-618
Calmodulin, cardiac adenosine triphosphatase 535-540
Captopril, frusemide, potassium balance 195-203
Carbon monoxide, alveolar 619-631
Cardiac output, essential hypertension 313-319
Cardiovascular control, vasopressin 473-481*
Catecholamines
 blood pressure, posture 321-327
 experimental hypertension 161-166
 opioid peptides 483-491
 sex differences 347-352
 splanchnic extraction, cirrhosis 45-49
Cationic proteins, pathogenicity 19-33, 35-43
Childhood, plasma renin concentration 383-387

Chlorpropamide, alcohol flush 375-381*, 633-638
Cholestasis
 alkaline phosphodiesterase I 647-652
 external bile drainage 61-68
Cholestyramine, bile acid drainage 439-444
Chondroitin sulphate, renal clearance 205-212
Circadian rhythm, thyrotrophin, body temperature 433-437
Cirrhosis, liver 45-49
Clearance, renal, antidiuretic hormone 307-312
Clindamycin, jejunal absorption 117-120
Cobalamin
 dependent enzymes 299-306
 intracellular binding 299-306
Cold pressor test
 angina pectoris 601-611
 catecholamines 347-352
Collagen, body wasting 73-82
Competition, intestinal absorption 541-549
Computer processing, metabolism 229-236
Concanavalin A-Sepharose chromatography, inactive renin separation 421-425
Connective tissue, proteoglycans 205-212
Corticosterone, aldosterone inhibition 329-335
Cretinism, foetal thyroxine 359-363
Crystalluria, 1,25-dihydroxyvitamin D 131-138
Cyclo-oxygenase, diuresis 579-583

Dead space volume 493-497
Dexamethasone, alveolar and peritoneal macrophages 653-656
Diabetes mellitus
 chlorpropamide alcohol flush 375-381*, 633-638
 exercise therapy 279-283*
 platelet reactivity 551-555
Dialysis, peritoneal, glycerol 121-130
[³H]Diazepam binding, brain synaptic membranes 167-175
[³H]Dihydroalprenolol, β -adrenoceptors 51-59
1 α ,25-Dihydroxycholecalciferol receptor, jejunum 285-290
1,25-Dihydroxyvitamin D, dietary oxalate absorption 131-138
Disseminated intravascular coagulation 19-33, 35-43
Diuresis, acetylsalicylic acid and indomethacin 579-583
Diuretics, potassium balance 195-203
Diurnal rhythm, thyrotrophin, body temperature 433-437
Dopamine
 anterior pituitary hormone secretion 219-223
 excretion, dietary sodium 83-88
Dyspnoea, exercise 515-519

- Electrolytes
 adrenaline, muscle 461-464
 adrenocorticoids 329-335
 intestinal absorption 117-120
 muscle, hypocaloric diet 185-194
Endurance training, metabolism 229-236
Enzyme inhibitor binding assay, angiotensin converting enzyme 237-241
Enzymes, muscle, hypocaloric diet 185-194
Epidermis, glycogen metabolism 219-298
Epoprostenol *see* Prostacyclin
Erythrocyte
 membrane adenylate cyclase 111-115
 sodium transport 403-405
Essential hypertension
 dopamine excretion 83-88
 haemodynamics 313-319
 lymphocyte sodium 407-411
 nadolol 243-248
 propranolol 243-248
 receptor-cyclase coupling protein 111-115
 renal blood flow 313-319
Ethacrynic acid, renal glycoprotein 529-534
Ethanol
 chlorpropamide 375-381*
 metabolism, sex differences 397-401
Exercise
 blood pressure 97-103
 diabetes mellitus 279-283*
 hormones 483-491
 isometric, catecholamines 347-352
 metabolism 229-236
 opioid peptides 483-491
 plasma potassium 427-431
 ventilation 389-396, 515-519
Expired gas analysis 493-497
External bile drainage, biliary excretion 61-68
Extrasystoles, within-breath modulation 225-227

Factor VIII 561-567*
Familial hyperuricaemic nephropathy, purine synthesis 249-258
Fasting
 gastrocnemius metabolism 185-194
 thermoregulatory responses 445-452
Fatty liver, alcoholism 337-345
Filtration fraction, essential hypertension 313-319
Foetus, thyroxine 359-363
Foot blood flow, nocturnal 89-95
Forearm resistance vessels, verapamil and calcium 613-618
Frusemide
 lymphocyte sodium efflux 407-411
 potassium balance 195-203
 renal glycoprotein 529-534
 sodium-potassium transport 403-405
Galactosamine, fulminant hepatic failure 167-175
Gastric emptying, age 213-218
Gastrocnemius, fasting and hypocaloric diet 185-194
Gastro-oesophageal reflux 145-151
Glomerular filtration rate, essential hypertension 243-248
Glucocorticoid, asthma 639-649
Glucose
 intestinal absorption 105-110
 peritoneal dialysis 121-130
Glycerol, peritoneal dialysis 121-130
Glycogen, epidermal metabolism 291-298
Glycoprotein, Tamm-Horsfall 529-534
Glycosaminoglycans, renal clearance 205-212
Glycylglycine, jejunal absorption 541-549
Glycylsarcosine, jejunal absorption 541-549
Goldblatt hypertension, β -adrenoceptors 51-59
Gout, purine synthesis 249-258
Growth hormone, dopamine 219-223

Haemolytic-uraemic syndrome 19-33
Haemophilia A, factor VIII 561-567*
Haemorrhage, renin 269-272
Head-up tilt, blood pressure 321-327
Heart
 adenosine triphosphatase 535-540
 left ventricular hypertrophy 51-59
 muscle, β -adrenoceptor blockade 259-267
 rate, posture 321-327
Heparin, renal clearance 205-212
Hepatic encephalopathy, experimental 167-175
Histamine, secretory otitis media 557-560
Histocompatibility antigen 569-578*
Hodgkin's disease, lung function, exercise 389-396
Hormones, exercise 483-491
Hydrocortisone, intestinal absorption 105-110
Hydrogen ions, muscle 461-464
3-Hydroxy-3-methylglutaric acid, hyperlipidaemia 439-444
Hypercholesterolaemia, 3-hydroxy-3-methylglutaric acid 439-444
Hyperparathyroidism, experimental hypertension 161-166
Hypertension
 borderline 313-319
 cardiac adenosine triphosphatase 535-540
 catecholamines 161-166
 exercise 97-103
 Goldblatt 51-59, 521-528

- Hypertension** *continued*
 lymphocyte sodium efflux 407-411
 pulmonary 1-5*
 receptor-cyclase coupling protein 111-115
 renal 51-59
 renal haemodynamics 243-248
 vasopressin 473-481*
- Hyperthyroidism, hepatic lipogenesis** 457-460
Hypolipidaemia, cholestyramine 439-444
Hypotension, obstructive jaundice 177-183
Hypoxaemia
 breathlessness 515-519
 sleep 465-471*
- Hypoxia, angiotensin converting enzyme** 453-456
- Inactive renins, plasma separation** 421-425
Indomethacin, diuresis 579-583
Infancy, plasma renin concentration 383-387
Insulin
 binding 139-142
 muscle pH and electrolytes 461-464
 subcutaneous infusion 551-555
- Intestine, small**
 calcium absorption 591-599
 $1\alpha,25$ -dihydroxycholecalciferol receptors 285-290
 jejunal absorption 541-549
 water absorption 117-120
- Iodine, foetal deficiency** 359-363
Iron, transferrin 273-278*
Ischaemia, myocardial 601-611
Isoprenaline, renovascular hypertension 51-59
- Jejunum**
 absorption 105-110, 117-120
 $1\alpha,25$ -dihydroxycholecalciferol receptors 285-290
- Kidney**
 antidiuretic hormone 307-312
 blood flow 313-319
 cationized proteins 19-33, 35-43
 cobalamin metabolism 299-306
 cortex glycoprotein 529-534
 dopamine excretion 83-88
 medullary vasopressor 521-528
 plasma flow 243-248
 sodium excretion 83-88
- Lesch-Nyhan syndrome, purine synthesis** 249-258
- Leukotrienes**
 lung 153-160*, 653-656
 peritoneal macrophages 653-656
- Lipids, liver** 337-345
- Lipogenesis, hyperthyroidism** 457-460
Lipoproteins, liver 337-345
- Liver**
 alkaline phosphodiesterase I 647-652
 cobalamin metabolism 299-306
 hyperthyroidism, lipogenesis 457-460
 lipids 337-345
- Liver disease**
 acetaldehyde metabolism 397-401
 alcoholism 337-345, 397-401
 autoimmunity 569-578*
 cirrhosis 45-49
 encephalopathy 167-175
- Lung**
 biopsy in pulmonary hypertension 1-5*
 dead space volume 493-497
 leukotrienes 153-160*, 653-656
 radiotherapy 389-396
 thromboxane B₂ 653-656
 volumes, Hodgkin's disease 389-396
- Luteinizing hormone, dopamine** 219-223
- Lymphocytes**
 autoimmunity 569-578*
 purine synthesis 249-258
 sodium, hypertension 407-411
- Mason-type diabetes** 375-381*
- Mental arithmetic, catecholamines** 347-352
- Metabolic rate, fasting, graded cooling** 445-452
- Methylprednisolone, mononuclear cells** 639-645
- Monocytes, insulin binding** 139-142
- Mononuclear cells**
 methylprednisolone 639-645
 purine synthesis 249-258
- Mountain sickness, angiotensin converting enzyme** 453-456
- Muscle, skeletal**
 acid-base balance 461-464
 arthrogenous atrophy 7-14*
 hypocaloric diet 185-194
- Muscle, smooth, verapamil** 613-618
- Myocardium, β -adrenoceptor blockade** 259-267
- Myofibrillar proteins, heart** 259-267
- Myopathy, nuclear magnetic resonance spectroscopy** 505-509
- Nadolol, essential hypertension** 243-248
- Nasal ventilation, smoking** 619-631
- Natriuresis**
 arginine vasopressin 353-358
 atrial natriuretic factor 403-405
- Nephrotoxicity, cationized proteins** 19-33, 35-43
- Nicotine, smoking behaviour** 619-631
- Nitrogen, protein, body wasting** 73-82
- Nitroprusside, forearm resistance vessels** 613-618

- Noradrenaline
 arginine vasopressin 353-358
 bile salts 177-183
 fasting, thermoregulation 445-452
 sex differences 347-352
 splanchnic extraction, cirrhosis 45-49
 vascular hypersensitivity, uraemia 161-166
- Noradrenergic pathways, renin, haemorrhage 269-272
- N protein, erythrocytes 111-115
- Nuclear magnetic resonance spectroscopy 505-509
- Obstructive airways disease, leukotrienes 153-160*
- Obstructive jaundice, bile salts, hypotension 177-183
- Oesophagus, motility 145-151*
- Opioid peptides, exercise 483-491
- Osmotic pressure, dialysis fluid 121-130
- Osteomalacia, hypophosphataemic 505-509
- Ouabain
 adenosine triphosphatase, calmodulin 535-540
 atrial natriuretic factor 403-405
 lymphocyte sodium efflux 407-411
- Oxalate absorption, 1,25-dihydroxyvitamin D 131-138
- Oxygen consumption, essential hypertension 313-319
- Oxygen uptake, endurance training 229-236
- Parathyroid hormone, intestinal calcium absorption 591-599
- Peptides, intestinal absorption 541-549
- Peritoneal dialysis, glycerol 121-130
- Peritoneal macrophages, dexamethasone 653-656
- 2-Phenylpyrazolo[4,3-c]quinolin-3(5*H*)-one, benzodiazepine antagonist 167-175
- Phosphate, myopathy 505-509
- Phospholipid
 biliary secretion 499-504
 liver 337-345
- Pickering, Sir George (1904-1982) 15-18
- Pituitary gland, dopamine 219-223
- Placenta, thyroxine transport 359-363
- Plasma renin activity
 adrenocorticoids 329-335
 arginine vasopressin 353-358
 uraemia 365-368
- Plasma volume, arginine vasopressin 353-358
- Platelets
 diabetes mellitus 551-555
 vasoconstriction 511-514
- Plethysmography, forearm arterial compliance 69-72
- Plexogenic pulmonary hypertension 1-5*
- Posture, arterial blood pressure 321-327
- Potassium
 body wasting 73-82
 continuous plasma measurement 427-431
 exercise 427-431
 frusemide 195-203
- Pregnancy, foetal thyroid hormones 359-363
- Prolactin, dopamine 219-223
- Propranolol
 essential hypertension 243-248
 exercise, potassium 427-431
- Prorenin
 plasma concentration 383-387
 separation 421-425
- Prostacyclin
 non-insulin dependent diabetes 633-638
 platelets, vasoconstriction 511-514
- Prostaglandin E₂
 chemical renal medullectomy 521-528
 urinary excretion 413-420, 579-583
- Protein
 body wasting 73-82
 cationized, pathogenicity 19-33
 myofibrillar, heart 259-267
- Psoriasis, epidermal glycogen 291-298
- Puff profile, smoking behaviour 619-631
- Pulmonary hypertension 1-5*
