# Volume 69

## SUBJECT INDEX

First and last page numbers of papers to which entries refer are given. Page numbers marked with an asterisk refer to Editorial Reviews.

- Acetylsalicylic acid, vasopressin antidiuresis 601-606
- Acidosis, metabolic  
  glutamine synthesis 701-708  
  skeletal muscle 505-510
- Acid secretion, stomach 37-40
- Adenosine cyclic 3',5'-monophosphate, idiopathic calcium stone-formers 109-110
- Adenosine triphosphatase, Na<sup>+</sup>,K<sup>+</sup>-dependent  
  high salt diet 441-447  
  noradrenaline 737-744
- Adipose tissue  
  brown fat energetic potential 343-348  
  subcutaneous, blood flow 273-277
- Adrenaline  
  cold-pressor test 365-368  
  mental stress 483-492  
  peripheral blood flow 215-222  
  platelets 1-6\*
- Adrenergic mechanisms, thyrotoxicosis 459-463
- Adrenoceptors  
  noradrenaline, myocardium 737-744  
  responsiveness 51-56
- $\alpha$ -Adrenoceptors, platelets, oestrogen 235-238
- $\beta$ -Adrenoceptor  
  hypertriglyceridaemia 713-720  
  responsiveness, mental stress 483-492  
  *d*-sotalol blockade 631-636
- Aerosols, anaesthetic, dyspnoea 29-36
- Ageing  
  blood pressure 465-470  
  body temperature 465-470, 525-532  
  postural blood pressure 337-341  
  short term exercise capacity 197-205  
  thermoregulation, undernutrition 525-532
- Airflow obstruction, chronic, autonomic nervous system 251-258
- Alanine, forearm release 123-133
- Albumin  
  proteinuria 321-326  
  transcapillary escape rate 273-277
- Alcohol *see* Ethanol
- Alcoholic fatty liver  
  hepatic lipases 517-523  
  vitamin D metabolism 561-570
- Alcoholism, sleep apnoea 655-662
- Aldosterone excretion, sodium deprivation 299-308
- Alveolar deposition, aerosols 29-36
- Amino acids  
  forearm release, exercise 123-133  
  metabolism, chronic renal failure 143-151
- $\delta$ -Aminolaevulinic synthase, hepatocyte 581-586
- Ammonia, metabolism, chronic renal failure 143-151
- Ammoniogenesis, metabolic acidosis 701-708
- d*-Amphetamine, (Na<sup>+</sup>,K<sup>+</sup>)-ATPase 441-447
- Anaesthetic aerosols, dyspnoea 29-36
- Angiotensin II, vascular responses, pre-eclampsia 477-482
- Anoxia, erythropoietin 413-422
- Anti-allergic drugs, allergen-induced asthma 63-69
- Anti-arrhythmic agents 631-636
- Antidiuresis, vasopressin 601-606
- Antidiuretic hormone, water immersion 493-496
- Antigens, wheat gluten peptides 97-104
- Anti-histamines, allergen-induced asthma 63-69
- Antikaliuresis, vasopressin 601-606
- Aorta, prostacyclin regulating factor 383-393
- Apnoea, sleep, alcoholic patients 655-662
- Apolipoprotein B, hypertriglyceridaemia 713-720
- Artery, peripheral, insufficiency 153-164
- Asthma, allergen-induced 63-69
- Atelectasis, serotonin and propranolol pulmonary extraction 279-286
- Atenolol, hypertriglyceridaemia 713-720
- Atrial natriuretic factor  
  blood pressure 721-726  
  cyclic GMP excretion 721-726  
  sodium-potassium co-transport 223-226
- Autonomic nervous system  
  dysfunction, uraemia 81-86  
  nocturnal bronchial obstruction 251-258
- Baroreflexes, arterial  
  sensitivity, uraemia 637-640  
  test responses 533-540  
  uraemia 81-86, 637-640
- Betamethasone, calcium and phosphate absorption 549-552

- Bile, lipid secretion 71-79  
 Bile acids, obesity and gallstones 71-79  
 Biliary cirrhosis, primary, vitamin D metabolism 561-570  
 Bilitranslocase, sulphobromophthalein uptake 587-593  
 Bisphosphonates, bone cell prostaglandin 403-411  
 Blood flow  
   adrenaline 215-222  
   subcutaneous adipose tissue 273-277  
 Blood pressure  
   adrenaline 215-222  
   age, cold environment 465-470  
   alcohol 423-428  
   atrial natriuretic factor 721-726  
   baroreflexes 533-540, 637-640  
   bromocriptine 51-56  
   chlorothiazide 511-515  
   dietary lipids 165-175  
   homoeostasis, ageing 337-341  
   indomethacin 327-336  
   sulindac 327-336  
   uraemia 637-640  
 Body size, maximal short term exercise capacity 197-205  
 Body temperature  
   ageing 465-470  
   undernutrition, elderly 525-532  
 Body weight, orthostatic hypotension 337-341  
 Bone, post-menopausal oestrogen therapy 265-271  
 Bone cell, prostaglandin synthesis, bisphosphonates 403-411  
 Breathlessness  
   anaesthetic aerosols 29-36  
   hypercapnia 663-672  
   hypoxia 663-672  
   oral high-frequency oscillation 349-359  
   scaling techniques 7-16  
 Bromocriptine, haemodialysis hypertension 51-56  
 Bronchial obstruction, autonomic nervous system 251-258  
 Bronchial provocation test 63-69  
 Bronchoalveolar lavage, extracellular elastolytic activity 17-27  
 Bronchoconstriction, hyperventilatory, verapamil 361-364  
 Brown fat, energetic potential 343-348  
 Buffer capacity, skeletal muscle 505-510  
 Bumetamide, erythrocyte  $\text{Na}^+\text{-K}^+$  co-transport kinetics 607-612  
 Calcifediol, vitamin D-dependent rickets type I 541-548  
 Calcitonin  
   ethinyloestradiol 265-271  
   norethisterone 265-271  
 Calcitriol, vitamin D-dependent rickets type I 541-548, 549-552  
 Calcium  
   channel blocking drugs 581-586  
   intestinal absorption, glucocorticoids 553-559  
   neutrophil stores, hypertension 227-230  
   oestrogen therapy 265-271  
   stone-formers 109-110  
   vitamin D-dependent rickets type I 541-548, 549-552  
 Calcium-binding protein, vitamin D-dependent rickets type I 541-548  
 Calmodulin, psoriasis, epidermis 681-686  
 Capacitance vessels, essential hypertension 497-504  
 Capillary recruitment 279-286  
 Carbimazole, thyrotoxic tremor 459-463  
 Carbohydrate metabolism, uraemia 449-457  
 Carbon dioxide  
   hyperventilatory bronchoconstriction 361-364  
   production, metabolic rate 135-141  
 Cardiac output, Doppler technique 377-382  
 Catecholamines  
   bronchial obstruction 251-258  
   cold-pressor test 365-368  
   hypoglycaemia 273-277  
   mental stress 483-492  
   platelets 1-6\*  
 Chemotactic activity, neutrophils 63-69  
 Chenodeoxycholic acid, obesity and gallstones 71-79  
 Chlorothiazide, blood pressure 511-515  
 Cholecystokinin, pancreatic and biliary responses 259-263  
 Cholesterol saturation, bile 71-79  
 Chronic airflow obstruction, oral high-frequency oscillation 349-359  
 Chronobiology, clinical medicine 369-376\*  
 Chronopharmacology 369-376\*  
 Chylomicrons, hypertriglyceridaemia 713-720  
 Cigarette smoking, bronchoalveolar lavage elastolytic activity 17-27  
 Circadian rhythm, proteinuria, nephrosis 395-401  
 Circadian variation 369-376\*, 395-401  
 Citrate synthase, muscle mitochondria 153-164  
 Clotting, pre-thrombotic state 641-646\*  
 Cobalamin, methionine synthetase 287-292  
 Coeliac disease, wheat gluten peptide antigens 97-104  
 Cold, blood pressure and age 465-470  
 Cold pressor test  
   bromocriptine 51-56  
   cardiovascular reflexes 533-540  
   naloxone 365-368  
 Colour vision, hypoglycaemia 673-680

- Compliance, venous, essential hypertension 497-504
- Conga drumming pigmenturia 105-108
- Contraction force, skeletal muscle 505-510
- Cortisol, insulin hypoglycaemia 37-40
- Countercurrent mechanism, renal 293-298
- Crohn's disease, phagocytes 241-249\*
- Cyclic guanosine 3',5'-phosphate, atrial natriuretic factor 721-726
- Cyclo-oxygenase  
inhibitors, ulcerative colitis 177-184  
prostacyclin regulating plasma factor 383-393
- Cytochrome oxidase, brown fat 343-348
- Cytosolic free calcium, hypertension 227-230
- Dexamethasone hypertension, dietary fish oil** 691-700
- Dextran clearance, proteinuria 321-326
- Diacetylbenzene nephropathy 57-62
- Dialysis, peritoneal, uraemia 449-457
- Diaphragm function assessment 91-96
- Diastolic function, spontaneous hypertension 571-579
- Diet  
fish oil 691-700  
polyunsaturated fats, blood pressure 165-175
- 3,4-Dihydroxyphenylethylene glycol, acute alcohol 423-428
- 1,25-Dihydroxyvitamin D  
glucocorticoids 553-559  
metabolism, liver disease 561-570  
vitamin D-dependent rickets type I 549-552
- Diltiazem, hepatocyte 581-586
- Diuresis  
natriuresis 721-726  
sodium depletion 299-308  
water immersion 493-496
- Diurnal rhythms, metabolism, uraemia 449-457
- Dopamine,  $\gamma$ -L-glutamyl-L-dopa 207-214
- Dopaminergic system 51-56
- Duodenal ulcer, blood cortisol and gastric acid output, insulin hypoglycaemia 37-40
- Dyspnoea  
anaesthetic aerosols 29-36  
sensory scaling techniques 7-16
- Eicosapentaenoic acid, experimental hypertension 691-700
- Elastase, lung 17-27
- Electroencephalography, hypoglycaemia 673-680
- Electrolyte excretion, sodium restriction 299-308
- Enhancing antibodies, renal allograft survival 41-49
- Epidermis calmodulin, psoriasis 681-686
- Erythrapheresis, erythropoietin 413-422
- Erythrocyte  
antibody rosette inhibiting antibodies 41-49  
atrial natriuretic peptide,  $\text{Na}^+$ - $\text{K}^+$  co-transport 223-226  
bumetanide  $\text{Na}^+$ - $\text{K}^+$  co-transport 607-612  
lithium 709-712  
orthophosphate 429-434, 435-440  
sodium leak 613-624  
sodium transport 709-712
- Erythrocyte membrane  
cation transport, xerocytosis 309-319  
conga drumming haemoglobinuria 105-108  
transport 607-612, 613-624, 709-712
- Erythropoietin, hypoxic lung disease 413-422
- Essential hypertension *see* Hypertension, essential
- Ethanol  
fatty liver 517-523, 561-570  
hepatic lipases 517-523  
plasma catechols 423-428  
sleep apnoea 655-662  
withdrawal, hypertension 239-240
- Ethinylloestradiol, post-menopausal therapy and calcium metabolism 265-271
- Exercise  
ageing, maximal short term capacity 197-205  
cardiac output, Doppler technique 377-382  
forearm amino acids release 123-133  
isometric, cardiovascular regulation 533-540  
muscle mitochondria 153-164
- Extracellular fluid volume  
erythrocyte sodium transport 709-712  
primary hyperoxaluria 87-90
- Factor VIII, plasma vasopressin 471-476
- Fatigue, age and maximal short term exercise capacity 197-205
- Fatty liver, hepatic lipases 517-523
- Fibrinogen, pre-thrombotic state 641-646\*
- Fibrinolysis, plasma vasopressin 471-476
- Fibrinopeptide A  
pre-thrombotic state 641-646\*  
plasma vasopressin 471-476
- Gallbladder, cholecystokinin octapeptide 259-260
- Gall-stones, obesity 71-79
- Gastric acid secretion 37-40
- Gastrointestinal hormones, sodium restriction 299-308
- Gibbs-Donnan equilibrium, erythrocyte orthophosphate 429-434
- Glomerular polyanions 57-62
- Glomerulonephritis, sialic acid 57-62
- Glomerulus, charge barrier, proteinuria 321-326
- Glucose  
forearm exercise 123-133  
homeostasis 449-457  
intestinal absorption, glucocorticoids 553-559

- Glutamine, forearm release 123-133  
 $\gamma$ -L-Glutamyl-L-dopa, dopamine excretion 207-214  
 Glutathione, prostacyclin regulating factor 383-393  
 Gluten, peptide antigens, coeliac disease 97-104  
 Glycollic aciduria, primary hyperoxaluria 87-90  
 Graves' disease, thyroid stimulating immunoglobulins 113-121\*
- Haemodialysis, hypertension 51-56  
 Haemodynamics, test responses 533-540  
 Haemoglobinuria  
   conga drumming 105-108  
   march 105-108  
 Haemolysis, hereditary xerocytosis 309-319  
 Haemostasis, pre-thrombotic state 641-646\*
- Heart  
   adrenaline 215-222  
   arrhythmia 631-636  
   atrial natriuretic factor 721-726  
   cardiac output, Doppler technique 377-382  
   left ventricular diastolic function 571-579
