# Volume 73

## SUBJECT INDEX

First and last page numbers of papers to which entries refer are given. Page numbers marked with an asterisk refer to Editorial Reviews.

- Absorption, intestinal  
  calcium, influence of citrate 117-121  
  peptides 61-68  
  preparations *in vitro* 53-59  
  probe molecules 189-196
- Acid-base balance, hypertension 211-215
- Acidosis, metabolic, hypertension 211-215
- Acute phase response, colon, liver, sialic acid 165-169
- Acyl-CoA hydrolases, liver 3-10
- Adenosine 3':5'-cyclic monophosphate,  $\alpha_2$ -adrenoceptors, ageing 507-513
- Adenosine triphosphatase, Na,K<sup>+</sup>-dependent  
  blood pressure, glucose tolerance 109-116  
  chronic bile duct ligation, jaundice 593-599  
  ethanol, erythrocytes, leucocytes 387-393  
  inhibitor, dopamine receptors 183-188  
  inhibitors, dehydration 87-92
- Adenosine triphosphate, chronic bile duct ligation, jaundice 593-599
- Adenylate cyclase,  $\beta$ -adrenoceptors, cystic fibrosis 407-410
- Adrenal cortex, dopamine, dietary sodium 93-97
- Adrenaline  
  blood pressure, hospitalization 135-141  
  ethanol 411-416  
  haemostasis 240  
  platelet function 99-103
- $\alpha_2$ -Adrenoceptors, ageing, platelet aggregation 507-513
- $\beta$ -Adrenoceptors, adenylate cyclase, cystic fibrosis 407-410
- Adriamycin, nephropathy, renal failure 33-39
- Affinity chromatography, glycoprotein, autoantibodies 479-487
- Age  
   $\alpha_2$ -adrenoceptors, platelet aggregation 507-513  
  free D-amino acids 105-108
- Airways disease  
  bronchial hyper-responsiveness 561-572\*
- <sup>99m</sup>Tc-Albumin  
  nasal lavage, nasal secretion 217-222
- Alcohol withdrawal  
  blood pressure, prostanoids 277-283  
  hypomagnesaemia, sympathetic nervous system 447
- Alcoholism, skeletal muscle myopathy, cortisol 601-603
- Aldosterone  
  ethanol 411-416
- plasmapheresis 337-341  
  secretion, dopamine 93-97
- Aluminium, osteomalacia, dialysis 227-234
- Alveolar gas, diffusion, ventilation distribution 351-359
- Amiloride, lithium clearance 645-652
- Amino acids  
  D-forms, ageing, nephropathy 105-108  
  flux between organs, surgery, trauma 129-133\*  
  metabolism, continuous ambulatory peritoneal dialysis 471-478  
  turnover, continuous ambulatory peritoneal dialysis 463-469
- $\gamma$ -Aminobutyric acid, liver disease, encephalopathy
- Ammonium chloride, benzodiazepine receptors, [<sup>3</sup>H]diazepam binding 669-671
- Amyloidosis, haemodialysis,  $\beta_2$ -microglobulin, globin chains 515-518
- Angiotensin II, blood pressure 271-275
- Antidiuretic hormone, diurnal rhythm, atrial natriuretic peptide 489-495
- Arachidonic acid  
  inflammatory bowel disease, phospholipids 361-364  
  platelets, selenium 525-529
- Arginine vasopressin, cardiovascular reflex activity 589-592
- Arrhythmia, coronary blood flow 437-444
- Ascorbic acid, lymphocytes, plasma, exercise 501-505
- Asthma, exercise, metabolic response 81-86
- Atrial fibrillation, coronary blood flow 437-444
- Atrial natriuretic peptide  
  diurnal rhythm, sodium balance 489-495  
  frusemide 143-150  
  inhibition of release, cardiac pacing 459-462  
  mineralocorticoid escape 431-436  
  receptor binding 573-579  
  sodium excretion, saline infusion 285-289
- Autoantibodies, glycoprotein 479-487
- Autonomic neuropathy  
  bronchial provocation tests 401-405  
  nocturia, diurnal sodium excretion 259-265
- Autonomic regulation, bronchial hyper-responsiveness, smooth muscle 299-303
- Baroreflex, atrial natriuretic peptide release 459-462
- Benzodiazepine receptors, ammonia, mercaptans, short-chain fatty acids 669-671
- Bicarbonate, hypertension, acid-base balance 211-215

- Bile acids  
 binding, protein 343-350  
 thyroid disease, thyroid hormone 425-429
- Bile duct ligation, jaundice, cardiac and renal function 593-599
- Bilirubin, glucuronosyltransferase, substrate induction 371-375
- Blood fuel metabolites, exercise, asthma 81-86
- Blood pressure  
 alcohol withdrawal, prostanoids 277-283  
 chronic bile duct ligation, jaundice 593-599  
 diurnal variation, angiotensin II 271-275  
 ethanol 411-416  
 posture, vasopressin 589-592  
 puerperal 239
- Body weight  
 colonic neoplasms, lipids 497-500  
 muscle contraction, ethnic groups 541-546
- Bone histomorphometry, osteomalacia, deferoxamine 227-234
- Breathlessness  
 exercise, lung mechanics 311-318  
 exercise, respiratory resistive loading 627-634  
 exercise, sensory scaling 519-523
- Bronchial hyper-responsiveness  
 airways disease, pathogenesis, significance 561-572\*  
 methacholine, heart-lung transplantation 299-303
- Bronchial provocation tests  
 diabetic autonomic neuropathy 401-405
- Bumetanide  
 glycoproteins, loop of Henle 305-310
- Calcium  
 atrial natriuretic peptide, receptor 573-579  
 intestinal absorption, citrate 117-121  
 ionized, hypertension 211-215
- Calcium antagonist, hypertension, sympathetic nervous system, vasopressin 253-258
- Calcium metabolism disorders, vitamin D deficiency 659-664
- Calf blood flow, carotid baroreceptors, neck suction 635-640
- Carbidopa, dopamine, frusemide, indomethacin 151-157
- Carbon dioxide  
 end-tidal, ventilation 333-335  
 sensitivity, exercise 177-182
- Carbon monoxide, cigarettes, inhaled smoke 553-555
- Cardiac function, chronic bile duct ligation, jaundice 593-599
- Cardiac output, water immersion, Doppler ultrasound 613-616
- Cardiac pacing, atrial natriuretic peptide release 459-462
- Cardiovascular reflexes, diabetic autonomic neuropathy 401-405
- Carnitine acyltransferases, liver 3-10
- Carotid baroreceptors, calf and finger blood flow, vascular resistance 635-640
- Catalase, glomerular injury, puromycin aminonucleoside 329-332
- Catecholamines, ethanol 387-393
- Cation transport, erythrocytes, menstrual cycle 223-226
- Cell injury, collecting duct, post-obstructive concentration defect 395-399
- Chlorpropamide alcohol flush, diabetic and normal subjects 77-80
- Cigarette smoking, carbon monoxide, inhaled smoke 553-555
- Cisplatin, renal function, vasopressin 377-381
- Citrate, intestinal absorption of calcium 117-121  
*Clinical Science*, history of 1-2\*
- Cobalamin, homeostasis, skeletal muscle 581-587
- Colitis, phospholipids, arachidonic acid 361-364
- Collecting duct, post-obstructive concentration defect, prostaglandin E<sub>2</sub> 395-399
- Colon  
 acute phase response, sialic acid, glycoconjugates 165-169  
 inflammatory bowel disease, phospholipids 361-364  
 Colonic neoplasms, lipids 497-500
- Continuous ambulatory peritoneal dialysis  
 amino acid turnover, nutritional status 463-469  
 osmotic agents, amino acid metabolism 471-478
- Coronary blood flow, atrial fibrillation, arrhythmia 437-444
- Cortisol  
 alcoholism, skeletal muscle myopathy 601-603  
 ethanol 411-416
- Crohn's disease, phospholipids, arachidonic acid 361-364
- Cyclic AMP *see* Adenosine 3':5'-cyclic monophosphate
- Cystic fibrosis,  $\beta$ -adrenoceptors, adenylate cyclase 407-410
- Dead space  
 alveolar gas, ventilation distribution 351-359  
 measurement 239-240
- Deferoxamine, osteomalacia, aluminium 227-234
- Dehydration, Na<sup>+</sup>, K<sup>+</sup>-adenosine triphosphatase inhibitors 87-92
- Dextrans, glomerular permeability, frusemide 365-370
- Diabetes mellitus  
 bronchial provocation tests, cardiovascular reflexes 401-405  
 chlorpropamide alcohol flush 77-80  
 energy expenditure 41-45  
 nocturia, diurnal sodium excretion 259-265
- Dialysis  
 osteomalacia, deferoxamine 227-234  
 uraemia, potassium transport 247-252
- Dietary salt, lithium clearance 645-652
- Dihydroxymandelic acid, noradrenaline infusion 123-125
- Dihydroxyphenylglycol, noradrenaline infusion 123-125
- Dimethyldisulphide, benzodiazepine receptors, [<sup>3</sup>H]diazepam binding 669-671

- Diurnal excretion, sodium, potassium and water, diabetes mellitus<sup>1</sup> 259–265
- Dopamine  
aldosterone secretion 93–97  
frusemide, indomethacin, carbidopa 151–157
- Dopamine receptors, sodium pump inhibitor, vascular reactivity 183–188
- Doppler ultrasound, cardiac output, water immersion 613–616
- Eicosanoids, chronic bile duct ligation, jaundice 593–599
- Emphysema, neutrophil elastase 19–28
- Encephalopathy,  $\gamma$ -aminobutyric acid, gas–liquid chromatography and radioreceptor assay 531–534
- Endogenous digoxin-like immunoreactivity, sodium transport, leucocytes, neonate 291–297
- Endothelium-derived relaxing factor, vascular smooth muscle 547–552
- Energy expenditure, diabetes mellitus 41–45
- Erythrocytes  
cation flux, ethanol 387–393  
cation transport, menstrual cycle 223–226  
hypertension, phosphoinositides 29–32  
magnesium, hypertension, insulin 535–539  
potassium flux, pseudohyperkalaemia 557–560
- Erythropoietin, verapamil, secondary polycythaemia 665–667
- Ethacrynic acid, glycoproteins, loop of Henle 305–310
- Ethanol  
blood pressure, heart rate, metabolic and endocrine changes 411–416  
cation flux, erythrocytes, leucocytes 387–393  
lipogenesis, triacylglycerol 159–163
- Ethnic groups, muscle contraction, vitamin D 541–546
- <sup>51</sup>Cr-Ethylenediaminetetra-acetate, intestinal permeability 197–204
- Exercise  
ascorbic acid, lymphocytes and plasma 501–505  
breathlessness, hyperventilation 519–523  
breathlessness, lung mechanics 311–318  
carbon dioxide sensitivity, ventilation 177–182  
metabolic response, asthma 81–86  
metabolic and ventilatory responses 417–424  
muscle adaptation 383–386  
respiratory restive loading, breathlessness 627–634  
ventilation, arterial pH 617–625
- Fatty acids  
inflammatory bowel disease 361–364  
sodium transport, leucocytes 445–446
- Fatty acid synthase, ethanol, fatty liver 159–163
- Feeding, protein synthesis, indomethacin 69–75
- Ferritin, lymphocyte, phytohaemagglutinin 605–611
- Finger blood flow, carotid baroreceptors, neck suction 635–640
- Fludrocortisone acetate, mineralocorticoid escape 431–436
- Focal glomerular sclerosis, protein restriction 33–39
- Forearm, protein metabolism, stable isotope study 241–246
- Frusemide  
dopamine, indomethacin, carbidopa 151–157  
glomerular permeability, prostaglandins 365–370  
glycoproteins, loop of Henle 305–310  
lithium clearance 645–652  
natriuresis, atrial natriuretic peptide 143–150
- Gas exchange, exercise 417–424
- Globin chains, amyloidosis,  $\beta_2$ -microglobulin 515–518
- Glomerular filtration rate  
atrial natriuretic peptide, frusemide 143–150  
blood pressure, hospitalization 135–141
- Glomerular permeability, frusemide, prostaglandins 365–370
- Glucose tolerance, blood pressure, Na<sup>+</sup>, K<sup>+</sup>-dependent adenosine triphosphatase 109–116
- Glucuronosyltransferase, bilirubin, substrate induction 371–375
- Glutathione, hyperthyroidism, sulphobromophthalein 235–237
- Glutathione peroxidase, platelets, selenium 525–529
- Glycoconjugates, acute phase response, colon 165–169
- Glycoproteins  
autoantibodies, enzyme-linked immunosorbent assay 479–487  
diuretics, loop of Henle 305–310
- 5-Guanylylimidodiphosphate, atrial natriuretic peptide, receptor 573–579
- Haemodialysis, amyloidosis, globin chains,  $\beta_2$ -microglobulin 515–518
- Haemodynamics, water immersion, Doppler ultrasound 613–616
- Haemorrhage, vitamin B<sub>12</sub> homoeostasis, skeletal muscle 581–587
- Haemostasis, adrenaline, vasopressin 240
- Heart–lung transplantation, bronchial hyper-responsiveness, autonomic regulation 299–303
- Heart rate, ethanol 411–416
- Helium, inert gas wash-in, alveolar gas mixing 351–359
- Histamine, bronchial provocation tests, diabetic autonomic neuropathy 401–405
- 25-Hydroxyvitamin D, metabolic clearance rate, hyperparathyroidism 659–664
- 1,25-Hydroxyvitamin D, hyperparathyroidism 659–664
- Hypercapnia, breathlessness, ventilation 311–318
- Hyperparathyroidism  
osteomalacia, aluminium 227–234  
vitamin D, metabolic inactivation 659–664
- Hypertension  
acid–base balance 211–215  
angiotensin II 271–275  
carotid baroreceptors, calf and finger blood flow 635–640  
erythrocyte magnesium level, insulin 535–539

- hospitalization, multivariate analysis 135–141  
 nifedipine, sympathetic nervous system, vasopressin 253–258  
 phosphoinositides, erythrocytes 29–32  
 pregnancy, venous tone, posture 267–269  
 Hyperthyroidism, glutathione, sulphobromophthalein 235–237  
 Hyperventilation, exercise, breathlessness 519–523  
 Hypomagnesaemia, alcohol withdrawal, sympathetic nervous system 447  
 Hypoxia, secondary polycythaemia, verapamil 665–667  
 Indomethacin  
   dopamine, frusemide, carbidopa 151–157  
   glomerular permeability, frusemide 365–370  
   polyuria, cisplatin 377–381  
   post-obstructive concentration defect, prostaglandin E<sub>2</sub> 395–399  
   protein synthesis, feeding 69–75  
 Inflammation, acute phase response, colon 165–169  
 Inflammatory bowel disease, phospholipids, arachidonic acid 361–364  
 Insulin  
   erythrocyte magnesium level, hypertension 535–539  
   ethanol 411–416  
   plasmapheresis 337–341  
 Intestine, permeability 189–196, 197–204, 205–210  
 Intestine, large, potassium transport, uraemia 247–252  
 Intestine, small  
   peptide absorption, sodium 61–68  
   permeability, probe molecules 189–196  
   preparation *in vitro*, histology 53–59  
 Ischaemia  
   acute renal failure 11–17  
 Jaundice, chronic bile duct ligation, cardiac and renal function 593–597  
 Kallikrein  
   diabetes mellitus, urinary volume and sodium 259–265  
 Kidney  
   acute renal failure, ischaemia 11–17  
   failure, protein restriction 33–39  
   lithium clearance 645–652  
   vitamin B<sub>12</sub> homoeostasis 581–587  
 Kidney function  
   chronic bile duct ligation, jaundice 593–599  
   cisplatin 377–381  
   essential hypertension 135–141  
   thromboxane synthetase inhibition 171–176  
 Lactulose, intestinal permeability 197–204  
 Leucine, metabolism, forearm 241–246  
 Leucocytes  
   cation flux, ethanol 387–393  
   sodium transport, free fatty acids 445–446  
   sodium transport inhibitor, neonate 291–297  
 Lewis, Thomas 1–2\*  
 Lidocaine, erythrocyte magnesium level and micro-viscous, hypertension 535–539  
 Lipids  
   colonic neoplasm 497–500  
   solubilization, bile acid–protein binding 343–350  
 Lipogenesis, ethanol, fatty liver 159–163  
 Lipoxygenase, platelets, selenium 525–529  
 Lithium clearance  
   dietary salt, frusemide, amiloride, 645–652  
   osmotic diuresis 126–127  
 Liver  
   acute phase response, sialic acid, glycoconjugates 165–169  
   acyl-CoA hydrolases 3–10  
   carnitine acyltransferases 3–10  
   ethanol, lipogenesis, triacylglycerol 159–163  
   vitamin B<sub>12</sub> homoeostasis 581–587  
 Liver disease,  $\gamma$ -aminobutyric acid, gas–liquid chromatography and radioreceptor assay 531–534  
 Loop of Henle  
   diuretics, glycoproteins 305–310  
   post-obstructive concentration defect, prostaglandin E<sub>2</sub> 395–399  
 Lung, transmission/emission scanning, [<sup>99m</sup>Tc]-pertechnetate 319–327  
 Lung mechanics, breathlessness, exercise 311–318  
 Lymphocytes  
   ascorbic acid, exercise 501–505  
   ferritin, phytohaemagglutinin 605–611  
 Magnesium  
   erythrocytes, hypertension, insulin 535–539  
   ethanol 411–416  
 Mannitol, intestinal permeability 197–204  
 Mass fragmentation spectrometry, serum bile acids, thyroid disease 425–429  
 Menstrual cycle, cation transport, erythrocytes 223–226  
 Metformin, diabetes mellitus, energy expenditure 41–45  
 Methacholine, bronchial hyper-responsiveness, autonomic regulation 299–303  
 $\beta_2$ -Microglobulin, amyloidosis, globin chains 515–518  
 Microviscosity, erythrocytes, hypertension, insulin 535–539  
 Mineralocorticoid escape, atrial natriuretic peptide 431–436  
 Mitochondrial function, chronic bile duct ligation, jaundice 593–599  
 Muscle  
   adaptation, exercise 383–386  
   efficiency, exercise 417–424  
 Muscle contraction, ethnic groups, vitamin D 541–546  
 Muscle, skeletal  
   chronic alcoholic myopathy, pseudo-Cushing's syndrome 601–603  
   vitamin B<sub>12</sub> homoeostasis, haemorrhage 581–587  
 Muscle, smooth, bronchial hyper-responsiveness, methacholine 299–303  
 Myocardium, ischaemia, atrial fibrillation 437–444

- Nasal lavage, secretion,  $^{99m}\text{Tc}$ -albumin 217-222  
 Nasal secretion, lavage,  $^{99m}\text{Tc}$ -albumin 217-222  
 Natriuresis, mineralocorticoid escape 431-436  
 Neck suction, finger and calf blood flow 635-640  
 Neonate, sodium transport inhibitor, leucocytes 291-297  
 Nephropathy  
   free D-amino acids 105-108  
   puromycin aminonucleoside, catalase, superoxide dismutase 329-332  
 Neutrophil elastase, inhibitor, sputum 19-28  
 Nifedipine, hypertension, sympathetic nervous system, vasopressin 253-258  
 Nocturia, autonomic diabetic neuropathy, kallikrein 259-265  
 Noradrenaline  
   blood pressure, hospitalization 135-141  
   dihydroxyphenylglycol, dihydroxymandelic acid 123-125  
   ethanol 411-416  
   platelet function 99-103  
 Nutritional status, continuous ambulatory peritoneal dialysis 463-469
- Obstructive airways disease, exercise, lung mechanics 311-318  
 Occlusion method, renal ischaemia 11-17  
 Octanoic acid, benzodiazepine receptors, [ $^3\text{H}$ ]diazepam binding 669-671  
 Osmotic agents, continuous ambulatory peritoneal dialysis 471-478  
 Osmotic diuresis, lithium clearance 126-127  
 Osteomalacia, dialysis, deferoxamine 227-234
- Parenteral feeding, colonic neoplasms, lipids 497-500  
 Peptides, intestinal absorption, sodium 61-68  
 Pergolide, sodium pump inhibitor, vascular reactivity 183-188  
 Permeability  
   intestinal 189-196, 197-204  
   intestinal, starvation 205-210  
 [ $^{99m}\text{Tc}$ ]Pertechnate, lung, scanning 319-327  
 pH, arterial, exercise 617-625  
 Pharmacodynamics, propranolol, pregnancy 47-52  
 Pharmacokinetics, propranolol, pregnancy 47-52  
 Phosphoinositides, erythrocytes, hypertension 29-32  
 Phospholipids, inflammatory bowel disease, arachidonic acid 361-364  
 Plasmapheresis, hormonal changes 337-341  
 Platelet aggregation  
   ageing,  $\alpha_2$ -adrenoceptors 507-513  
   catecholamines 99-103  
 Platelets, lipoxygenase, selenium 525-529  
 Polycythaemia, hypoxia, verapamil 665-667  
 Posture  
   blood pressure, vasopressin 589-592  
   venous tone, pregnancy-induced hypertension 267-269
- Potassium  
   diurnal excretion, diabetes mellitus 259-265  
   ethanol 411-416  
 Potassium flux, erythrocytes 557-560  
 Potassium transport  
   ethanol 387-393  
   uraemia, dialysis 247-252  
 Pregnancy, propranolol, pharmacodynamics, pharmacokinetics 47-52  
 Propranolol, pregnancy, pharmacokinetics 47-52  
 Prostacyclin  
   blood pressure, alcohol withdrawal 277-283  
   platelet sensitivity, noradrenaline 99-103  
   vascular disorders, surgery 127  
 Prostaglandin E, blood pressure, alcohol withdrawal 277-283  
 Prostaglandin E<sub>2</sub>  
   post-obstructive concentration defect, collecting duct 395-399  
   sodium loading 653-657  
 Prostaglandin F<sub>2a</sub>, sodium loading 653-657  
 Prostaglandins  
   excretion, cisplatin  
   glomerular permeability, frusemide 365-370  
 Protein, dietary, bile acid binding 343-350  
 Protein metabolism, forearm, stable isotope study 241-246  
 Protein restriction, nephropathy 33-39  
 Protein synthesis, feeding, indomethacin 69-75  
 $\alpha_1$ -Proteinase inhibitor deficiency, neutrophil elastase 19-28  
 Proteinuria, glomerular permeability, frusemide 365-370  
 Pseudo-Cushing's syndrome, alcoholism, skeletal muscle myopathy 601-603  
 Pseudohyperkalaemia, erythrocyte potassium flux, quinine 557-560  
 Puerperium, blood pressure 239  
 Puromycin aminonucleoside, glomerular injury, catalase, superoxide dismutase 329-332
- Quinine, erythrocyte potassium flux, pseudohyperkalaemia 557-560
- Radioimmunoassay, prostanoids, urine 277-283  
 Receptors, atrial natriuretic peptide 573-579  
 Renin  
   dopamine, frusemide 151-157  
   ethanol 411-416  
   plasmapheresis 337-341  
 Renin-angiotensin-aldosterone system, diurnal rhythm, atrial natriuretic peptide 489-495  
 Renin-angiotensin system, blood pressure, hospitalization 135-141  
 Respiratory resistive loading, exercise, breathlessness 627-634
- Scaling, visual analogue  
   breathlessness, exercise 311-318  
   exercise, respiratory resistive loading 627-634

- Scanning, lung, [<sup>99m</sup>Tc]pertechnetate 319–327
- Selenium, lipoxygenase, platelets 525–529
- Sialic acid, acute phase response, colon, liver 165–169
- Smoking *see* Cigarette smoking
- Smooth muscle, *see* Muscle, smooth
- Sodium
- blood pressure, glucose tolerance 109–116
  - dependence, small intestinal peptide uptake 61–68
  - dietary, dopamine 93–97
  - distal delivery, atrial natriuretic peptide, frusemide 143–150
  - diurnal excretion, diabetes mellitus 259–265
  - dopamine, frusemide 151–157
  - ethanol 411–416
  - excretion, atrial natriuretic peptide 285–289
  - Na<sup>+</sup>, K<sup>+</sup>-adenosine triphosphatase inhibitors 87–92
  - prostanoid synthesis 653–657
- Sodium balance, diurnal rhythm, atrial natriuretic peptide 489–495
- Sodium transport
- ethanol 387–393
  - free fatty acids, leucocytes 445–446
  - inhibitor, leucocytes, neonate 291–297
- Stable isotopes, protein and leucine metabolism, forearm 241–246
- Starvation, intestinal permeability 205–210
- Substrate induction, glucuronosyltransferase, bilirubin 371–375
- Sulphobromophthalein, hyperthyroidism, glutathione 235–237
- Sulphonylurea, diabetes mellitus, energy expenditure 41–45
- Sulphur hexafluoride, inert gas wash-in, alveolar gas mixing 351–359
- Superoxide dismutase, glomerular injury, puromycin aminonucleoside 329–332
- Surgery
- interorgan amino acid flux 129–133\*
  - vascular disorders, prostacyclin 127
- Sympathetic nervous system
- alcohol withdrawal, hypomagnesaemia 447
  - hypertension, nifedipine 253–258
- Tamm–Horsfall glycoprotein, autoantibodies 479–487
- Technetium, scanning, lung 319–327
- Thromboxane, inhibition of synthesis, renal function 171–176
- Thromboxane A<sub>2</sub>, blood pressure, alcohol withdrawal 277–283
- Thromboxane B<sub>2</sub>, sodium loading 653–657
- Thromboxane synthetase inhibitor, renal function 171–176
- Thyroid disease, serum bile acids, thyroid hormone 425–429
- Thyroid hormone, serum bile acids, thyroid disease 425–429
- Thyrotrophin-releasing hormone, clinical applications 449–457\*
- Trauma, interorgan amino acid flux 129–133\*
- Triacylglycerol, ethanol, fatty liver 159–163
- Ulcerative colitis, phospholipids, arachidonic acid 361–364
- Uraemia, potassium transport, large intestine 247–252
- Uric acid, blood pressure, sodium 109–116
- Urine volume, kallikrein, diabetes mellitus 259–265
- Vascular reactivity, sodium pump inhibitor, dopamine receptors 183–188
- Vascular resistance, calf and finger blood flow, neck suction 635–640
- Vascular smooth muscle, endothelium-derived relaxing factor 547–552
- Vasopressin
- cardiovascular reflex activity 589–592
  - haemostasis 240
  - hypertension, nifedipine 253–258
  - plasmapheresis 337–341
  - polyuria, cisplatin 377–381
- Venous tone, pregnancy-induced hypertension, posture 267–269
- Ventilation
- arterial pH, exercise 617–625
  - carbon dioxide 333–335
  - exercise, breathlessness 311–318
  - exercise, carbon dioxide sensitivity 177–182
- Ventilation distribution, alveolar gas, dead space 351–359
- Ventilatory equivalents, exercise 417–424
- Ventilatory stimulation, exercise 519–523
- Verapamil, secondary polycythaemia, erythropoietin 665–667
- Vitamin B<sub>12</sub>, homeostasis, skeletal muscle 581–587
- Vitamin D, metabolic inactivation, primary hyperparathyroidism 659–664
- Vitamin D deficiency, muscle contraction, ethnic groups 541–546
- Water
- diurnal excretion, diabetes mellitus 259–265
- Water immersion
- haemodynamics 613–616
