EDITORIAL REVIEW

The biochemical defect in cystic fibrosis  
M. A. McPherson and M. C. Goodchild  337–345

Why does vasodilatation occur during syncope?  
B. J. Robinson and R. H. Johnson  347–350

Relative efficacy of oral verapamil and digoxin alone and in combination for the treatment of patients with chronic atrial fibrillation  
S. M. Pomfret, C. R. W. Beasley, V. Challenor and S. T. Holgate  351–357

Low dose infusion of atrial natriuretic peptide causes salt and water excretion in normal man  
A. Morice, J. Pepeke-Zaba, E. Løysen, R. Lapworth, M. Ashley, T. Higenbottam and M. Brown  359–363

Antihypertensive and renal effects of cilazapril and their reversal by angiotensin in renovascular hypertensive rats  

Effects of pH and osmolarity on aerosol-induced cough in normal volunteers  
R. H. Lowry, A. M. Wood and T. W. Higenbottam  373–376

Caffeine clearance and biotransformation in patients with chronic liver disease  

Renal transplantation: HLA-linked, non-cytotoxic antibodies develop after blood transfusion  
A. M. MacLeod, K. N. Stewart, S. Urbaniak and G. R. D. Catto  385–388

Cyclosporin A prevents sensitization after blood transfusion in multiparous rats  
M. C. Jones, D. A. Power, K. N. Stewart and G. R. D. Catto  389–392

Increased levels of platelet-activating factor (1-O-alkyl-2-acetylglycerophosphocholine) in blood after reversal of renal clip hypertension in the rat  
H. M. McGowan, R. Vandongen, L. D. Kelly and K. J. Hill  393–396

Rapid changes in plasma potassium during a game of squash  
A. D. Struthers, C. Quigley and M. J. Brown  397–401

Regulation of lactate uptake and lactate production in liver from 48-h-starved rats: effects of pH, flow and glucose concentration  
L. Sestoft and M. O. Marshall  403–406

Hepatic cholesterol synthesis and esterification in rats after chronic ethanol feeding  
S. Venkatesan, K. J. Simpson and T. J. Peters  407–412

Haemodynamic effects of intravenous human calcitonin-gene-related peptide in man  
C. W. Howden, L. Logue, K. Gavin, L. Collie and P. C. Rubin  413–418

Effects of angiotensin II and atrial natriuretic peptide alone and in combination on urinary water and electrolyte excretion in man  
J. McMurray and A. D. Struthers  419–425

Changes in jejunal permeability and passive permeation of sugars in intestinal biopsies in coeliac disease and Crohn's disease  

Effects of nitroglycerin on forearm haemodynamics in patients with cirrhosis  

$^{31}$P nuclear magnetic resonance study of steady-state adenosine 5'-triphosphate levels during graded hypoxia in the isolated perfused rat kidney
