RAPID COMMUNICATION

Patients' perception of distress due to symptoms and effects of asthma on daily living and an investigation of possible influential factors by F. H. Quirk and P. W. Jones 17–21

Renal acidification defect induced by lithium in control and acidotic rats by M. MacLaughin and M. Mello Aires 23–27

Cutaneous vascular responses evoked in the hand by the cold pressor test and by mental arithmetic by I. Marriott, J. M. Marshall and E. J. Johns 43–50

Role of atrial natriuretic factor in changes in the responsiveness of aldosterone to angiotensin II secondary to sodium loading and depletion in man by H. Tuchelt, G. Eschenhagen, V. Bahr, G. Schwietzer, H. M. Thiede and W. Oelkers 57–65

Impaired natriuretic response to atrial natriuretic peptide in the isolated kidney or rats with experimental cirrhosis by M. Z. Panos, C. Gove, J. D. Firth, A. E. G. Raele, J. G. G. Ledingham, D. Westaby and R. Williams 67–71

Orthostatic circulatory control in the elderly evaluated by non-invasive continuous blood pressure measurement by B. P. M. Imholz, J. H. A. Dambrink, J. M. Karemaker and W. Wieling 73–79

Comparison of dye-dilution and plethysmographic blood flow measurements: an evaluation of the influence of invasive techniques on blood flow and on arterial and femoral venous substrate variables in man by L. Jorfeldt and H. Rutberg 81–87

Substrate utilization during exercise in chronic cardiac failure by M. Riley, J. S. Elborn, N. Bell, C. F. Stanford and D. P. Nicholls 89–95

EDITORIAL REVIEW

Neutrophil kinetics in the lungs by W. MacNee and C. Selby 97–107

RAPID COMMUNICATION

Distal lithium reabsorption in the sodium-restricted rat is not dependent on the urinary sodium to lithium concentration ratio by M. Shalmi, J. S. Petersen, K. Thomsen and S. Christensen 109–112
Glycosaminoglycan content, oxalate self-exchange and protein phosphorylation in
erythrocytes of patients with 'idiopathic' calcium oxalate nephrolithiasis by
B. Baggio, G. Marzaro, G. Gambaro, F. Marchini, H. E. Williams and
A. Borsatti

Active and inactive urinary kallikrein in man: effects of diuresis and antidiuresis by

Sodium and water excretion in nephrotic patients: effects of changes in renal
haemodynamics by M. Allon, C. B. Pasque and M. Rodriguez

Haemodynamic and metabolic effects of infused adenosine in man by A. Edlund,
A. Sollevi and B. Linde

Glutamine metabolism in skeletal muscle of glucocorticoid-treated rats by M. S. M.
Ardawi and Y. S. Jamal

Direct vascular effects in the rat of the vehicles used for the intravenous and oral
administration of cyclosporin A by C. Amorena, A. Castro, A. Moller and M. F.
Villamil

Effects of oxygen withdrawal on catecholamine release in patients on home oxygen
therapy by M. S. Balter, K. R. Chapman, M. R. Maleki-Yazdi, F. H. H. Leenen and
A. S. Rebuck

Response of serum interleukin-6 in patients undergoing elective surgery of varying
severity by A. M. Cruickshank, W. D. Fraser, H. J. G. Burns, J. Van Damme and
A. Shenkin

Physiological levels of plasma non-esterified fatty acids impair forearm glucose
uptake in normal man by M. Walker, G. R. Fulcher, C. Catalano, G. Petranyi,
H. Orskov and K. G. M. M. Alberti

Simultaneous assessment of intestinal permeability and lactose tolerance with orally
administered raffinose, lactose and L-arabinose by R. W. Lobley, P. C. Burrows,
R. Warwick, D. J. Dawson and R. Holmes

Effects of lead and a low-molecular-weight endogenous plasma inhibitor on the
kinetics of sodium-potassium-activated adenosine triphosphatase and potassium-
activated p-nitrophenylphosphatase by E. Weiler, F. Khalil-Manesh and H. C.
Gonick

EDITORIAL REVIEW
The primary role of the kidney and salt intake in the aetiology of essential hyper-
tension: part I by H. E. de Wardener

Errors inherent in the primed infusion method for the measurement of the rate of
glucose appearance in man when uptake is not forced by glucose or insulin infusion
by D. F. Heath

Effects of isosorbide dinitrate on the pattern of arterial blood flow in healthy human
subjects by C. G. Caro, P. J. Fish, D. E. Goss, J. Halls, M. J. Lever,
K. H. Parker and A. S. Clear

Effect of endothelin on the function of the isolated perfused working rat heart by
J. D. Firth, A. F. C. Roberts and A. E. G. Raine

Simplifying the lithium-marker technique used to assess the dietary intake of
discretionary sodium in population studies by C. Leclercq, V. Avalle, L. Ranaldi,
E. Totti and A. Ferro-Luzzi

Fluoride therapy and parathyroid hormone activity in osteoporosis by T. C. B. Stamp,
P. W. Saphier, N. Loveridge, C. R. Kelsey, A. J. Goldstein, M. Katakity,
M. V. Jenkins and G. A. Rose

Metabolism of \( ^{15} \text{N} \)-labelled urea in the functioning and defunctioned human colon by B. J. Moran and A. A. Jackson 253–258

Kinetics of influx of peptides and amino acids into hamster jejunum in vitro: physiological and theoretical implications by D. Burstont and D. M. Matthews 267–272

Effect of \( ^{15} \text{N} \)-monomethyl-L-arginine on endothelium-dependent relaxation of human subcutaneous resistance arteries by R. G. Woolfson and L. Poston 273–278

Effects of blood glucose concentration on thermogenesis and glucose disposal during hyperinsulinaemia by I. W. Gallen and I. A. Macdonald 279–285

CORRESPONDENCE SECTION

Limitations of the Pearson product-moment correlation by S. W. Coppack 287
Differential effects of amino acids on the isolated perfused rat kidney by A. A. EL SAYED, J. HAYLOR and A. M. EL NAHAS

Effect of amiodarone on erythrocyte shape and membrane properties by W. H. REINHART and F. ROHNER

Regional haemodynamic effects of captopril, enalaprilat and lisinopril in conscious water-replete and water-deprived Brattleboro rats by A. F. MULLER, S. M. GARDINER, A. M. COMPTON and T. BENNETT

Platelet angiotensin II binding and plasma renin concentration, plasma renin substrate and plasma angiotensin II in human pregnancy by P. N. BAKER, F. BROUGHTON, PIPKIN and E. M. SYMONDS

Studies of the porcine intestinal calcitriol receptor in pseudo-vitamin D deficiency rickets type I by B. SCHRÖDER, R. KAUNE and J. HARMENEY

Supplement 23: Medical Research Society Communications
Systolic wall stress and ventricular arrhythmia: the role of acute change in blood pressure in the isolated working rat heart by M. A. James and J. V. Jones 499–504

Stimulation of active renin release in normal and hypertensive pregnancy by M. A. Brown, V. C. Zammit and D. Adsett 505–511

Short-term infusions of insulin, triacylglycerol and glucose do not cause acute increases in plasminogen activator inhibitor-1 concentrations in man by P. J. Grant, E. K. O. Kruthoff, C. P. Felley, J. P. Felber and F. Bachmann 513–516

Vascular hypertrophy, renin and blood pressure in the young spontaneously hypertensive rat by J. J. Morton, E. C. Beattie, S. A. Griffin, F. MacPherson, F. Lyall and D. Russo 523–530

Kinetics of the human lymphocyte Na⁺–H⁺ exchanger by P. Strazzullo and M. Canessa 531–536

Protein turnover in uraemia in the rat by S. B. Ireland and P. M. Stewart 537–542

---

EDITORIAL REVIEW

Reappraisal of the Cushing reflex: the most powerful neural blood pressure stabilizing system by C. J. Dickinson 543–550

Effect of natriuretic agents, vasoactive agents and of the inhibition of metabolism on sodium handling in the isolated perfused kidney of the nephrotic rat by J. D. Firth and J. G. G. Ledingham 559–574

Polymorphisms in the gene coding for cholesteryl ester transfer protein are related to plasma high-density lipoprotein cholesterol and transfer protein activity by D. J. Freiman, C. J. Packard, J. Shepherd and D. Gaffney 575–581

Effect of polycations on the function of the isolated perfused rat kidney by J. D. Firth 591–598

Aldose reductase messenger RNA in the lens epithelium in vivo: effects of diabetes mellitus and galactosaemia by S. Lightman, C. Bondy, S. Lightman and P. Kador 599–603

Dynamic association between artery shear flow condition and platelet cytosolic free Ca²⁺ concentration in human hypertension by J. Levenson, M.-A. Devynck, J. Pithois-Merli, K. H. Le Quan Sang, V. Filitti and A. Simon 613–618

Relationship between the maximum velocity and sodium affinity of the erythrocyte sodium pump and its rate constant in blood by T. H. Thomas, S. MacPhail, V. Mott and R. Wilkinson 625–630

Tumour necrosis factor-α and endotoxin induce less prostaglandin E2 production from hypothalami of rats fed coconut oil than from hypothalami of rats fed maize oil by D. C. Bibby and R. F. Grimble 657–662

CORRESPONDENCE SECTION
Linkage disequilibrium prevents precise definition of susceptibility determinants for idiopathic nephrotic syndrome by D. Jenkins 669–670
