</table>
Acetylcholine
endothelium-dependent relaxation, resistance arteries 273–278
Acute metabolic acidosis
lithium 23–27
Acute renal failure
platelet-activating factor, glycerol 551–558
Acute-phase protein response
interleukin-6 161–165
Adenosine
cardiac output, regional circulation 131–138
Adipose tissue
postprandial substrate deposition 339–348
Adrenaline
oxygen 155–159
Adriamycin nephrosis
dietary protein restriction, xanthine oxidase 647–656
Affinity constant
sodium pump, erythrocytes 625–630
Ageing
blood mononuclear cells, cyclic phosphodiesterase 467–470
orthostatic hypotension, postural changes 73–79
Airway smooth muscle contractility
sodium-transport inhibitors 315–323
Aldosterone
angiotensin II, atrial natriuretic factor 57–65
Alkaline phosphatase
zinc, gastrointestinal neoplasms 247–252
Amitriptyline
airway smooth muscle contractility 315–323
brachial reactivity, histamine 325–330
Amino acid kinetics
skeletal muscle, branched-chain amino acids 457–466
Amino acids
muscle, glucocorticoids 139–147
muscle and plasma, dietary protein 331–337
renal function, isolated kidney 381–386
Amiodarone
erthrocyte membrane 387–391
Angiotensin II
aldosterone, atrial natriuretic factor 57–65
hypertrophy, hypertension 523–530
pregnancy-induced hypertension 505–511
sodium handling, nephrotic syndrome 559–574
Angiotensin II binding
platelets, pregnancy 403–408
Angiotensin-converting enzyme inhibitors
kidney, kininases 29–35
regional haemodynamics 393–401
l-Arabinose excretion
intestinal permeability, lactase deficiency 175–183
l-Arginine
endothelium-derived relaxing factor, cyclosporin A derivatives 149–154
renal function, isolated kidney 381–386
Arterial blood flow pattern
atherosclerosis, isosorbide dinitrate 215–220
Aspirin infusion
platelet aggregation, thromboxane 37–42
Asthma
blood flow, cold challenge 307–313
distress, quality of life 17–21
Atherosclerosis
arterial blood flow pattern, isosorbide dinitrate 215–220
Atrial natriuretic peptide
bronchomotor tone 51–55
cardiac tamponade 377–380
renin–angiotensin system, sodium depletion 57–65
sodium excretion, diurnal variation 371–376
sodium handling, nephrotic syndrome 559–574
sodium retention, cirrhosis 67–71
Atrial stretch
atrial natriuretic peptide 377–380
Autologous serum
sodium–proton exchange, leucocytes 357–364
Autonomic function
postprandial blood pressure 517–522
Bias
primed infusion, Steele equation 201–213
Biocompatibility
membrane attack complex, haemodialysis 471–476
Blood flow
cold challenge, asthma 307–313
skeletal muscle, chronic renal failure 239–245
Blood gases
catheterization, femoral vessels 81–87
Blood mononuclear cells
cyclic phosphodiesterase, ageing 467–470
Blood pressure
calcium regulation, cell membrane abnormalities 415–423*
Cushing reflex 543–550*
  hypertrophy, renin–angiotensin system 523–530
  ventricular arrhythmia, working heart model 499–504
Blood pressure determination
  postural changes, ageing 73–79
Blood-pressure micropuncture
capillary, hypertension 5–8
Brain
  somatostatin receptors, ethanol 451–456
Branched-chain amino acids
  proteolysis, skeletal muscle 457–466
Bronchial reactivity
  histamine, sodium-transport inhibitors 325–330
Bronchomotor tone
  atrial natriuretic peptide 51–55
Calcitriol receptor
  pseudo-vitamin D deficiency rickets type I 409–414
Calcium
  platelets, shear stress, hypertension 613–618
  oxalate crystallization urate 9–15
  regulation
    cell membrane abnormalities, hypertension 415–423*
Calcium-channel blockers
  renal haemodynamics, cyclosporin A 259–266
Calcium-entry blocker
  isolated perfused heart, endothelin 221–226
Capillary
  blood-pressure micropuncture, hypertension 5–8
Captopril
  regional haemodynamics 393–401
  sodium excretion, nephrotic syndrome 123–129
Cardiac output
  adenosine 131–138
  endothelin, calcium-entry blocker 221–226
Cardiac tamponade
  atrial natriuretic peptide 377–380
Cardiovascular system
  eicosanoids, inheritance and environmental factors 639–645
Catecholamines
  adenosine 131–138
  dopamine infusion 605–611
  hypoglycaemia, glucose-clamp technique 279–285
  oxygen 155–159
  postprandial blood pressure 517–522
Catheterization
  leg blood flow, substrate exchange 81–87
Cholesterol
  erythrocyte membrane, amiodarone 387–391
Cholesteryl ester transfer protein
  restriction fragment length polymorphism, high-density lipoprotein cholesterol 575–581
Chromatography
  endothelin, Gram-negative bacteraemia 619–623
Chronic heart failure
  skeletal muscle, metabolism 583–589
  substrate utilization, exercise 89–95
Chronic renal failure
  blood flow, skeletal muscle 239–245
  pruritus, histamine 477–482
Chylomicrons
  forearm muscle, adipose tissue 339–348
Chyme
  lipolysis, enzyme inhibitors 349–355
Cirrhosis
  sodium retention, atrial natriuretic peptide 67–71
Coeliac disease
  excretion of raffinose, lactose and L-arabinose 175–183
Cold challenge
  blood flow, asthma 307–313
Colonic permeability
  urea 253–258
Colostomy
  urea metabolism and hydrolysis 253–258
Complement
  haemodialysis 471–476
Congestive heart failure
  noradrenaline 429–435
Coronary vasoconstriction
  endothelin, calcium-entry blocker 221–226
C-reactive protein
  surgery, interleukin-6 161–165
Cremophor
  endothelium-derived relaxing factor 149–154
Crohn's disease
  excretion of raffinose, lactose and L-arabinose 175–183
Cushing reflex
  a reappraisal 543–550*
Cyclic phosphodiesterase
  blood mononuclear cells, ageing 467–470
Cyclosporin A
  renal haemodynamics, nifedipine 259–266
  vehicles, endothelium-derived relaxing factor 149–154
Cystic fibrosis
  essential fatty acid deficiency, renal function 299–305
Defence response
  emotional stress, skin blood flow 43–50
Defunctioned colon
  urea metabolism and hydrolysis 253–258
Desaminoo-δ-arginine-vasopressin
  kallikrein, urine 117–121
Diabetes
  aldose reductase, lens 599–603
  primed infusion, glucose 201–213
Dietary fat
  prostaglandin E2, tumour necrosis factor-α 657–662
Dietary protein
  adriamycin nephrosis, xanthine oxidase 647–656
  muscle and plasma amino acids 331–337
Digestion
  fatty acids, enzyme inhibitors 349–355
Digoxin
  bronchial reactivity, histamine 325–330
1,25-Dihydroxyvitamin D₃, pseudo-vitamin D deficiency rickets type I 409–414
Discretionary salt intake
  lithium-marker technique, population studies 227–231
Distress
  asthma, quality of life 17–21
Diuretics
  sodium handling, nephrotic syndrome 559–574
Diurnal variation
  sodium excretion, atrial natriuretic peptide 371–376
Dopamine infusion
  metabolic effects 605–611
Dye dilution
  leg blood flow 81–87

Emotional stress
  skin blood flow, laser Doppler flowmetry 43–50
Enalaprilat
  regional haemodynamics 393–401
Endogenous sodium–potassium adenosine triphosphatase inhibitor enzyme kinetics 185–192
Endothelin
  Gram-negative bacteraemia, tumour necrosis factor-α 619–623
  isolated perfused heart 221–226
  sodium handling, nephrotic syndrome 559–574
Endothelium-dependent relaxation
  resistance arteries, N°-monomethyl-L-arginine 273–278
Endothelin-derived relaxing factor
cyclosporin A vehicles 149–154
Endotoxin
  endotoxin, tumour necrosis factor-α 619–623
  prostaglandin E₂, dietary fats 657–662
Energy expenditure
  surgical stress, insulin resistance 443–450
Environmental factors
  prostacyclin, platelet activity 639–645
Enzyme kinetics
  lead, endogenous sodium–potassium adenosine triphosphatase inhibitor 185–192
Enzymes
  intestinal mucosa, uraemia 663–668
Epidermal growth factor
  mucus, gastric mucus 425–427
Erythrocyte membrane cholesterol, amiodarone 387–391
Erythrocytes
  deformability, amiodarone 387–391
  sodium–lithium countertransport, sodium affinity 365–369
  sodium pump 625–630
  sodium pump, pregnancy 631–638
Escherichia coli
  endothelin, tumour necrosis factor-α 619–623
Essential fatty acid deficiency
  cystic fibrosis, renal function 299–305
Essential hypertension
  kidney, salt intake 193–200, 289–297*
  sodium–lithium countertransport, sodium affinity 365–369
Ethanol
  brain, somatostatin receptors 451–456
Exercise
  skeletal muscle, chronic heart failure 583–589
  sodium–proton antiport, hypertension 491–497
  substrate utilization, chronic heart failure 89–95
Fats
  prostaglandin E₂, tumour necrosis factor-α 657–662
  fatty acid production lipase, enzyme inhibitors 349–355
  Femoral artery
catheterization, substrate exchange 81–87
  Femoral vein
catheterization, substrate exchange 81–87
  Fluoride
  osteoporosis, parathyroid hormone 233–238
Forearm metabolism
  insulin sensitivity, non-esterified fatty acids 167–174
Forearm muscle
  postprandial substrate deposition 339–348
  Free fatty acids
catheterization, femoral vessels 81–87
  forearm muscle, adipose tissue 339–348
  substrate utilization, chronic heart failure 89–95
Frontoparietal cortex
  somatostatin receptors, ethanol 451–456
Functioning colon
  urea metabolism and hydrolysis 253–258
Galactosaemia
  aldose reductase, lens 599–603
Gastric mucosa
  mucus, epidermal growth factor 425–427
Gastrointestinal neoplasms
  leucocyte and muscle zinc, alkaline phosphatase 247–252
Glomerular filtration rate
  essential fatty acid deficiency, cystic fibrosis 299–305
  isolated kidney, amino acids 381–386
  platelet-activating factor, acute renal failure 551–558
Glomeruli
  platelet-activating factor, acute renal failure 551–558
  Glomerulotubular balance
  sodium excretion, nephrotic syndrome 123–129
  Glucocorticoids
  glutamine metabolism, muscle 139–147
  Gluconeogenesis
  kidney, sepsis 483–490
Glucose
  catheterization, femoral vessels 81–87
  dopamine infusion 605–611
  forearm muscle, adipose tissue 339–348
  plasminogen activator inhibitor-1 513–516
  primed infusion, bias 201–213

Kallikrein-kinin system
angiotensin-converting enzyme inhibitors, kidney 29–35

Kidney
angiotensin-converting enzyme inhibitors, kininases 29–35
essential hypertension, salt intake 193–200*, 289–297*
regulation of gluconeogenesis, sepsis 483–490
Kidney failure
small intestine, enzymes 663–668
Kidney function
amino acids 381–386
sodium retention, atrial natriuretic peptide 67–71
Kinetics
neutrophils, lungs 97–107*
peptides, jejunum 267–272
renal tubular acidification, lithium 23–27
sodium–proton antiporter, lymphocytes 531–536
Kininases
kidney, angiotensin converting enzyme inhibitors 29–35

Labrafil
endothelium-derived relaxing factor 149–154
Lactate deficiency
excretion of raffinose, lactose and L-arabinose 175–183
Lactate catheterization, femoral vessels 81–87
Lactose excretion
intestinal permeability, lactase deficiency 175–183
Laser Doppler flowmetry
skin blood flow, emotional stress 43–50
Lead
enzyme kinetics 185–192
Leg blood flow
dye dilution, strain-gauge plethysmography 81–87
Lens
aldose reductase, diabetes 599–603
Leucine
renal function, isolated kidney
skeletal muscle, branched-chain amino acids 457–466
Leucocytes
sodium–proton antiport, hypertension 491–497
sodium–proton exchange, autologous serum 357–364
zinc, gastrointestinal neoplasms 247–252
Linkage disequilibrium
idiopathic nephrotic syndrome, susceptibility determinants 669–670
Lipase
fatty acids, enzyme inhibitors 349–355
Lipolysis
dopamine infusion 605–611
enzyme inhibitors, chyme 349–355
Lipopolysaccharide
endothelin, tumour necrosis factor-α 619–623
Lisinopril
regional haemodynamics 393–401
Lithium
renal tubular acidification, kinetics 23–27
urinary excretion, discretionary salt intake 227–231
Lithium reabsorption
sodium restriction, water loading 109–112
Lung
neutrophil kinetics 97–107*
Lymphocytes
sodium–proton antiporter, kinetics 531–536
Magnesium
ventricular arrhythmia, blood pressure 499–504
Maximal enzyme activities
renal gluconeogenesis, sepsis 483–490
Maximum velocity
sodium pump, erythrocytes 625–630
Melatonin
pineal gland, hypertension 437–442
Membrane abnormalities
calcium regulation, hypertension 415–423*
Membrane attack complex
biocompatibility, haemodialysis 471–476
Metabolism
skeletal muscle, chronic heart failure 583–589
Microcirculation
hypertension 5–8
N-Monomethyl-L-arginine
endothelium-dependent relaxation, resistance arteries 273–278
Mucus
gastric mucosa, epidermal growth factor 425–427
Muscarinic activity
pineal gland, hypertension 437–442
Muscle
amino acids, dietary protein 331–337
blood flow, chronic renal failure 239–245
glutamine metabolism, glucocorticoids 139–147
zinc, gastrointestinal neoplasms 247–252
Myocardial wall stress
ventricular arrhythmia, working heart model 499–504
Nephrolithiasis
oxalate, glycosaminoglycans 113–116
Nephrotic syndrome
glomerulotubular balance, sodium excretion 123–129
polycations, isolated perfused kidney 591–598
sodium handling, isolated perfused kidney 559–574
Neutrophils
kinetics, lung 97–107*
Nicardipine
isolated perfused heart, endothelium 221–226
Nifedipine
renal haemodynamics, cyclosporin A 259–266
Nitrogen
urea hydrolysis, functioning and defunctioned colon 253–258
Non-esterified fatty acids
  forearm metabolism, insulin sensitivity  167–174
Noradrenaline
  congestive heart failure  429–435
  oxygen  155–159
  sodium handling, nephrotic syndrome  559–574
  substrate utilization, chronic heart failure  89–95
Nuclear magnetic resonance spectroscopy
  intracellular pH, human brain in vivo  1–3
  skeletal muscle, metabolism  583–589
  sodium–proton antiport, skeletal muscle  491–497
Orthostatic hypotension
  postural changes, ageing  73–79
Osteoporosis
Ouabain
Oxalate
Oxygen
  oxygen consumption
  dopamine infusion  605–611
Parathyroid hormone
  osteoporosis, fluoride  233–238
Pearson product-moment correlation
  limitations  287
Peptide hydrodases
  intestinal mucosa, uraemia  663–668
Peptides
  kinetics of influx, jejunum  267–272
Pharmacokinetics
  tobramycin, essential fatty acid deficiency  299–305
Pineal gland
  muscarinic activity, hypertension  437–442
Plasma
  amino acids, dietary protein  331–337
  plasminogen activator inhibitor-1
  insulin, triacylglycerol  513–516
Platelet activity
  inheritance and environmental factors  639–645
Platelet aggregation
  aspirin infusions, thromboxane  37–42
Platelet membrane glycoproteins
  angiotensin II, pregnancy  403–408
Platelet-activation factor
  acute renal failure, glycerol  551–558
Platelets
  cytosolic free calcium concentration, shear stress  613–618
Polycations
  isolated perfused kidney, nephrotic syndrome  591–598
Poly-L-lysine
  isolated perfused kidney, nephrotic syndrome  591–598
Polyoxyethylated derivatives
  endothelium-derived relaxing factor  149–154
Postprandial blood pressure
  autonomic function, insulin  517–522
Postural
  orthostatic hypotension, ageing  73–79
  sodium excretion, atrial natriuretic peptide  371–376
Potassium
  ventricular arrhythmia, blood pressure  499–504
Potassium-activated p-nitrophenylphosphatase
  lead, endogenous sodium–potassium adenosine triphosphatase inhibitor  185–192
Pregnancy
  platelet angiotensin II binding, renin–angiotensin system  403–408
  sodium pump, erythrocytes  631–638
Pregnancy-induced hypertension
  renin  505–511
Primed infusion
  glucose, bias  201–213
Prostacyclin
  inheritance and environmental factors  639–645
Prostaglandin E2
  tumour necrosis factor-α, dietary fats  657–662
Protamine
  isolated perfused rat kidney, nephrotic syndrome  591–598
Protein degradation
  uraemia  537–542
Protein intake
  muscle and plasma amino acids  331–337
Protein synthesis
  uraemia  537–542
Proteinuria
  dietary protein restriction, xanthine oxidase  647–656
Proteolysis
  skeletal muscle, branched-chain amino acids  457–466
Protons
  skeletal muscle, hypertension  491–497
Pruritus
  histamine, haemodialysis  477–482
Pseudo-vitamin D deficiency rickets type I
  calcitriol receptor  409–414
Purine nucleoside phosphorylase
  dietary protein restriction, adriamycin nephrosis  647–656
Puromycin aminonucleoside
  sodium handling, isolated perfused rat kidney  559–574
Quality of life
  asthma, distress  17–21
Raffinose excretion
  intestinal permeability, lactase deficiency  175–183
Rate constant
  sodium pump, erythrocytes  625–630
Regional haemodynamics
  adenosine  131–138
  angiotensin-converting enzyme inhibitors  393–401
Renal blood flow
platelet-activating factor, acute renal failure 551–558
Renal gluconeogenesis
maximal enzyme activities, sepsis 483–490
Renal haemodynamics
nifedipine, cyclosporin A 259–266
sodium excretion, nephrotic syndrome 123–129
Renal tubular acidification
kinetics, lithium 23–27
Renal tubules
regulation of gluconeogenesis, sepsis 483–490
Renin
hypertrophy, hypertension 523–530
pregnancy-induced hypertension 505–511
sodium excretion, atrial natriuretic peptide 371–376
Renin–angiotensin system
atrial natriuretic peptide, sodium depletion 57–65
platelet angiotensin II binding, pregnancy 403–408
Resistance arteries
endothelium-dependent relaxation NG-monomonoarginine 273–278
Restriction fragment length polymorphism
cholesteryl ester transfer protein, high-density lipoprotein cholesterol 575–581
Salt intake
essential hypertension, kidney 193–200*, 289–297*
Sepsis
regulation of renal gluconeogenesis 483–490
Shear rate
platelet cytosolic free calcium concentration, hypertension 613–618
Shear stress
platelet cytosolic free calcium concentration, hypertension 613–618
Skeletal muscle
blood flow, chronic renal failure 239–245
metabolism, chronic heart failure 583–589
proteolysis, branched-chain amino acids 457–466
sodium–proton antiport, hypertension 491–497
Skin blood flow
emotional stress, laser Doppler flowmetry 43–50
Small intestine
enzymes, uraemia 663–668
Sodium
skeletal muscle, hypertension 491–497
Sodium affinity
sodium–lithium countertransport, essential hypertension 365–369
Sodium depletion
renin–angiotensin system, atrial natriuretic peptide 57–65
Sodium excretion
diurnal variation, atrial natriuretic peptide 371–376
glomerulotubular balance, nephrotic syndrome 123–129
Sodium handling
nephrotic syndrome, isolated perfused kidney 559–574
Sodium intake
lithium-marker technique, population studies 227–231
Sodium–lithium countertransport
sodium affinity, essential hypertension 365–369
Sodium–potassium-activated adenosine triphosphatase
lead, endogenous sodium–potassium adenosine triphosphatase inhibitor 185–192
Sodium–proton antiporter
kinetics, lymphocyte 531–536
leucocytes, autologous serum 357–364
skeletal muscle, hypertension 491–497
Sodium pump
affinity constant, maximum velocity, rate constant 625–630, 631–638
Sodium resorption
lithium, renal tubular acidification 23–27
Sodium restriction
tubular lithium reabsorption, water loading 109–112
Sodium retention
cirrhosis, atrial natriuretic peptide 67–71
Sodium-transport inhibitors
airway smooth muscle contractility 315–323
Somatostatin receptors
brain, ethanol 451–456
Specific airway conductance
atrial natriuretic peptide 51–55
Steele equation
primed infusion, bias 201–213
Strain-gauge plethysmography
leg blood flow 81–87
Stress
skin blood flow, laser Doppler flowmetry 43–50
Substrate oxidation
non-esterified fatty acids 167–174
Substrate utilization
exercise, chronic heart failure 89–95
Surgery
insulin resistance, glucose clamp 443–450
interleukin-6, C-reactive protein 161–165
leucocyte and muscle zinc, alkaline phosphatase 247–252
Susceptibility determinants
idiopathic nephrotic syndrome, linkage disequilibrium 669–670
Terminal complement complex
haemodialysis 471–476
Thermal conductivity
cold challenge, asthma 307–313
Thermogenesis
hypoglycaemia, glucose-clamp technique 279–285
Thermoregulation
skin blood flow, laser Doppler flowmetry 43–50
Thromboxane
inheritance and environmental factors 639–645
platelet aggregation, aspirin infusions 37–42
Tobramycin
pharmacokinetics, essential fatty acid deficiency 299–305
Triacylglycerol
- forearm muscle, adipose tissue 339–348
- plasminogen activator inhibitor-1 513–516

Tubular lithium reabsorption
- sodium restriction, water loading 109–112

Tumour necrosis factor-α
- Gram-negative bacteraemia, endothelin 619–623
- prostaglandin E₂, dietary fats 657–662

Uraemia
- protein turnover 537–542
- small intestine, enzymes 663–668

Uraemic pruritus
- haemodialysis, histamine 477–482

Urate
- calcium oxalate crystallization 9–15

Urea
- essential fatty acid deficiency, cystic fibrosis 299–305

Urea hydrolysis
- functioning and defunctioned colon 253–258

Urea metabolism
- functioning and defunctioned colon 253–258

Urinary excretion
- lithium, discretionary salt intake 227–231

Urinary excretion
- calcium oxalate crystallization, urate 9–15
- kallikrein, desamino-D-arginine-vasopressin 117–121

Urolithiasis
- hyperuricosuria 9–15

Vascular conductance
- angiotensin-converting enzyme inhibitors 393–401

Vascular reactivity
- cold challenge, asthma 307–313
- angiotensin-converting enzyme inhibitors 393–401

Vasodilatation
- isolated kidney, amino acids 381–386
- isolated perfused heart, endothelin 221–226
- cold challenge, asthma 307–313

Vasopressin
- kallikrein, urine 117–121

Ventricular arrhythmia
- blood pressure, working heart model 499–504
- isolated perfused heart, endothelin 221–226
- cold challenge, asthma 307–313

Water loading
- tubular lithium reabsorption, sodium restriction 109–112
- working heart model 221–226

Working heart model
- ventricular arrhythmia, blood pressure 499–504

Xanthine oxidase
- dietary protein restriction, adriamycin nephrosis 647–656

Zinc
- gastrointestinal neoplasms, surgery 247–252
