### CONTENTS

**Vol. 79, No. 1**

**July 1990**

#### RAPID COMMUNICATION

Patients' perception of distress due to symptoms and effects of asthma on daily living and an investigation of possible influential factors by F. H. Quirke and P. W. Jones 17–21

Renal acidification defect induced by lithium in control and acidicotic rats by M. MacLaughlin and M. Mello Aires 23–27

Cutaneous vascular responses evoked in the hand by the cold pressor test and by mental arithmetic by I. Marriott, J. M. Marshall and E. J. Johns 43–50

Role of atrial natriuretic factor in changes in the responsiveness of aldosterone to angiotensin II secondary to sodium loading and depletion in man by H. Tuchelt, G. Eschenhagen, V. Bahr, G. Schwietzer, H. M. Theide and W. Oelkers 57–65

Impaired natriuretic response to atrial natriuretic peptide in the isolated kidney or rats with experimental cirrhosis by M. Z. Panos, C. Gove, J. D. Firth, A. E. G. Rainie, J. G. G. LEDINGHAM, D. Westaby and R. Williams 67–71

Orthostatic circulatory control in the elderly evaluated by non-invasive continuous blood pressure measurement by B. P. M. Imholz, J. H. A. Dambrink, J. M. Karemaker and W. Wieling 73–79

Comparison of dye-dilution and plethysmographic blood flow measurements: an evaluation of the influence of invasive techniques on blood flow and on arterial and femoral venous substrate variables in man by L. Jorfeldt and H. Rutberg 81–87

Substrate utilization during exercise in chronic cardiac failure by M. Riley, J. S. Elborn, N. Bell, C. F. Stanford and D. P. Nicholls 89–95

**Vol. 79, No. 2**

**August 1990**

#### EDITORIAL REVIEW

Neutrophil kinetics in the lungs by W. MacNee and C. Selby 97–107

#### RAPID COMMUNICATION

Distal lithium reabsorption in the sodium-restricted rat is not dependent on the urinary sodium to lithium concentration ratio by M. Shalmi, J. S. Petersen, K. Thomsen and S. Christensen 109–112
Contents

Glycosaminoglycan content, oxalate self-exchange and protein phosphorylation in erythrocytes of patients with 'idiopathic' calcium oxalate nephrolithiasis by B. BAGGIO, G. MARZARO, G. GAMBARO, F. MARCHINI, H. E. WILLIAMS and A. BORSATTI 113-116

Active and inactive urinary kallikrein in man: effects of diuresis and antidiuresis by D. G. WALLER, S. S. BHATIA, S. K. CAMPBELL, J. D. M. ALBANO and J. G. B. MILLAR 117-121

Sodium and water excretion in nephrotic patients: effects of changes in renal haemodynamics by M. ALLON, C. B. PASQUE and M. RODRIGUEZ 123-129

Haemodynamic and metabolic effects of infused adenosine in man by A. EDLUND, A. SOLLEVI and B. LINDE 131-138

Glutamine metabolism in skeletal muscle of glucocorticoid-treated rats by M. S. M. VILLAMIL 139-147

Direct vascular effects in the rat of the vehicles used for the intravenous and oral administration of cyclosporin A by C. AMORENA, A. CASTRO, A. MOLLER and M. F. VILLAMIL 149-154

Physiological levels of plasma non-esterified fatty acids impair forearm glucose uptake in normal man by M. WALKER, G. R. FULCHER, C. CATALANO, G. PETRANYI, H. ORSKOV and K. G. M. M. ALBERTI 167-174

Simultaneous assessment of intestinal permeability and lactose tolerance with orally administered raffinose, lactose and l-arabinose by R. W. LOBLEY, P. C. BURROWS, R. WARWICK, D. J. DAWSON and R. HOLMES 175-183

Effects of lead and a low-molecular-weight endogenous plasma inhibitor on the kinetics of sodium-potassium-activated adenosine triphosphatase and potassium-activated p-nitrophenylphosphatase by E. WEILER, F. KHALIL-MANESH and H. C. GONICK 185-192

EDITORIAL REVIEW

The primary role of the kidney and salt intake in the aetiology of essential hypertension: part I by H. E. DE WARDENER 193-200

Errors inherent in the primed infusion method for the measurement of the rate of glucose appearance in man when uptake is not forced by glucose or insulin infusion by D. F. HEATH 201-213

Effect of endothelin on the function of the isolated perfused working rat heart by J. D. FIRTH, A. F. C. ROBERTS and A. E. G. Raine 221-226

Simplifying the lithium-marker technique used to assess the dietary intake of discretionary sodium in population studies by C. LECLERQ, V. AVALLE, L. RANALDI, E. TOTTI and A. FERRO-LUZZI 227-231

**EDITORIAL REVIEW**

The primary role of the kidney and salt intake in the aetiology of essential hypertension: part II by H. E. De Wardener 289–297

Renal function in rats with essential fatty acid deficiency by L. Hjelte, M. Larsson, A. Alvestrand, A.-S. Malmborg and B. Strandvik 299–305

Effect of a test meal, without and with protein, on muscle and plasma free amino acids by J. Bergström, P. Forst and E. Vinnars 331–337

Increased erythrocyte sodium-lithium countertransport activity in essential hypertension is due to an increased affinity for extracellular sodium by P. A. Rutherford, T. H. Thomas and R. Wilkinson 365–369

Diurnal and postural variations in plasma atrial natriuretic factor, plasma guanosine 3':5'-cyclic monophosphate and sodium excretion by G. M. Bell, S. A. Atlas, M. Pecker, J. E. Sealey, G. James and J. H. Laragh 371–376

Effect of cardiac tamponade on atrial natriuretic peptide concentrations: influence of stretch and pressure by J. Au, J. E. Brown, M. R. Lee and N. A. Boon 377–380
Differential effects of amino acids on the isolated perfused rat kidney by A. A. EL SAYED, J. HAYLOR and A. M. EL NAHAS 381–386

Effect of amiodarone on erythrocyte shape and membrane properties by W. H. REINHART and F. ROHRER 387–391

Regional haemodynamic effects of captopril, enalaprilat and lisinopril in conscious water-replete and water-deprived Brattleboro rats by A. F. MULLER, S. M. GARDNER, A. M. COMPTON and T. BENNETT 393–401

Platelet angiotensin II binding and plasma renin concentration, plasma renin substrate and plasma angiotensin II in human pregnancy by P. N. BAKER, F. BROUGHTON PIPKIN and E. M. SYMONDS 403–408

Studies of the porcine intestinal calcitriol receptor in pseudo-vitamin D deficiency rickets type I by B. SCHRODER, R. KAUNE and J. HARMeyer 409–414

Supplement 23: Medical Research Society Communications 1p–30p

**EDITORIAL REVIEW**

Reappraisal of the Cushing reflex: the most powerful neural blood pressure stabilizing system by C. J. Dickinson

499-504

505-511

Effect of natriuretic agents, vasoactive agents and of the inhibition of metabolism on sodium handling in the isolated perfused kidney of the nephrotic rat by J. D. Firth and J. G. G. Ledingham

513-516

Polymorphisms in the gene coding for cholesteryl ester transfer protein are related to plasma high-density lipoprotein cholesterol and transfer protein activity by D. J. Freiman, C. J. Packard, J. Shepherd and D. Gaffney

517-522

523-530

Effect of polycations on the function of the isolated perfused rat kidney by J. D. Firth

531-536

Aldose reductase messenger RNA in the lens epithelium in vivo: effects of diabetes mellitus and galactosaemia by S. Lightman, C. Bondy, S. Lightman and P. Kador

537-542

549-558

Dynamic association between artery shear flow condition and platelet cytosolic free Ca²⁺ concentration and human hypertension by J. Levenson, M. A. Devynck, I. Pittois-Merli, K. H. Le Quan Sang, V. Fillit and A. Simon

559-564

Endothelin immunoreactivity in mice with Gram-negative bacteraemia: relationship to tumour necrosis factor-α by K. Takahashi, A. Silva, J. Cohen, H.-C. Lam, M. A. Ghatei and S. R. Bloom

565-570

Relationship between the maximum velocity and sodium affinity of the erythrocyte sodium pump and its rate constant in blood by T. H. Thomas, S. Macphail, V. Mott and R. Wilkinson

571-575

Tumour necrosis factor-α and endotoxin induce less prostaglandin E₂ production from hypothalami of rats fed coconut oil than from hypothalami of rats fed maize oil by D. C. Bibby and R. F. Grimble 657–662

CORRESPONDENCE SECTION

Linkage disequilibrium prevents precise definition of susceptibility determinants for idiopathic nephrotic syndrome by D. Jenkins 669–670
