Winter Meeting at the Royal College of Physicians,
London, on 5 and 6 November 1992
The articles in this Supplement have been reproduced directly from typescripts provided by the authors. The Editorial Board of Clinical Science accepts no responsibility for their scientific content.
Editorial Review: Dopamine and the kidney: ten years on
M. R. Lee

Changes in sodium transport during the human menstrual cycle and pregnancy
G. D. Webb et al.

Somatostatin as a modulator of distal nephron water permeability
C. Ray et al.

Treatment of anaemia in haemodialysis patients with erythropoietin: long-term effects on exercise capacity
P. Bárány et al.

Effects of oral alcohol on superior mesenteric artery blood flow in normal man, supine and tilted
S. Maule et al.

Elevation of serum triacylglycerol concentration in association with hepatic microsomal enzyme induction after treatment with phenylbutazone and diclofenac sodium in rats
M. M. Farag and A. T. Hassib

Long-term insulin treatment of vascular smooth muscle cells from rat aorta attenuates the synergistic effect of insulin on angiotensin II- and epidermal factor-induced DNA synthesis
Y. Ko et al.

Effect of posture and acute glycaemic control on the excretion of retinol-binding protein in normoalbuminuric insulin-dependent diabetic patients
C. Catalano et al.

Enzymuria in non-insulin-dependent diabetic patients: signs of tubular dysfunction
H. Ikenaga et al.

Noradrenaline kinetics and coronary haemodynamics during acute β1-adrenoceptor blockade in man
A. J. McCance and J. C. Forfar

Glucose-dependent uptake of chromium in human and rat insulin-sensitive tissues
B. W. Morris et al.

Endothelium-dependent modulation of responses to endothelin-1 in human veins
W. G. Haynes and D. J. Webb

Antibodies to human recombinant lipocortin-1 in inflammatory bowel disease
T. R. J. Stevens et al.

Ultrastructural characterization of platelet-activating factor-stimulated human eosinophils from patients with asthma
C. Krogel et al.

Assessment of glomerular charge selectivity in man by differential clearance of isoamylases
J. G. Fox et al.
