Volume 88

AUTHOR INDEX

Abdel-Halim, S.M. 301-306
Abe, Y. 581-585
Adams, L. 453-461
Aderka, D. 365-369
Akaoka, I. 203-210
Albert, A. 149-157
Alexander, G.J.M. 263-268
Alexander, S.L. 4-7
Anderson, S.E. 235-242
Andersson, K. 479-484
Appleyard, C.B. 713-717
Arrhenius-Nyberg, V. 285-292
Bäcker, A. 39-45
Baker, F.E. 405-412
Balbi, A. 331-336
Ballmer, P.E. 235-242
Barlet-Bas, C. 293-299
Barnes, P.J. 135-139
Beasley, R. 14-17
Beattie, A.D. 727-732
Bee, D. 325-330
Belcher, P.R. 269-275
Benard, D.C. 173-178
Benbow, S.J. 191-196
Bennetrit, G. 453-461
Berenson, C.S. 491-499
Beresford, A. 149-157
Berglund, H. 165-172
Bernardi, L. 103-109, 733
Bernheim, J. 623-628
Besler, H.T. 59-66
Bessis, M. 285-292
Bevegard, N. 637-641
Bishay, S.J. 25-27
Boomsma, F. 675-679
Borch-Johnsen, K. 629-633
Borzi, R.M. 371
Boultin, R.A. 119-130
Bouquet, T.D. 173-178
Brook, J. 235-242
Broudy, D. 405-412
Brouwer, A. 211-217
Brown, M.J. 571-580
Brummer, H.G. 533-542
Brummer, H.R. 607-610
Bryson, P. 395
Büller, H.R. 587-594
Bülow, J. 543-550
Burgess, C. 14-17
Burnier, M. 607-610
Burrell, L.M. 671-674
Cargill, R.I. 81-86
Carlens, P. 439-446
Carney, S.L. 197-201
Cerutti, C. 651-655
Chambers, S.T. 25-27
Chang, C.-J. 701-706
Cheng, P.-E. 701-706
Cheval, L. 293-299
Chinery, R. 401-403
Chou, L. 657-663
Chow, N.-H. 701-706
Chowienczyk, P.J. 111-117
Clarkson, P.B.M. 159-164
Cockcroft, J.R. 111-117
Cohen, E. 453-461
Connell, J.M.C. 563-570
Connor, J.M. 665-670
Constant, I. 95-102
Cooper, G.J.S. 7-12
Cortova, Z. 285-292
Coutie, W. 159-164
Crane, J. 14-17
Crofton, R.J. 727-732
Crotty, B. 51-57
Cuisinard, G. 651-655
Cummings, M.H. 225-233
Cundy, T.F. 12-14
Curry, G. 727-732
D'Inca, R. 727-732
Dallegri, F. 331-336
Dapino, P. 331-336
Davies, D.L. 665-670
De Bono, D.P. 635-641
De Hoyos, A. 173-178
De Leeuw, P.W. 421-426
De Quay, N. 607-610
De Roos, R. 351-358
Delacréty, E. 607-610
Deng, L.-Y. 611-622
Derks, F.H.M. 675-679
Diaz, M. 345-350
Donald, R.A. 4-7
Dotan, I. 365-369
Doucet, A. 293-299
Drossos, G.E. 269-275
Duch, M. 651-655
Durrington, P.N. 311-318
Dyerberg, J. 375-392
Eastell, R. 243-244
Eberhard, M. 557-562
Ebihara, I. 29-37
Edlund, A. 165-172
Eisenhofer, G. 533-542
El-Sayed, H. 463-470
Elghozzi, J.-L. 87-93, 95-102
Elia, M. 319-324
Ellis, M.J. 4-7
Emery, C.J. 325-330
Erne, P. 557-562
Erlt, R.F. 337-344
Espiner, E.A. 4-7, 18-21
Evans, M.J. 4-7
Fabbri, M. 371
Facchinetti, A. 371
Fasano, L. 371
Fauvel, J.P. 651-655
Favre, H. 293-299
Feldt-Rasmussen, B. 629-633
Fell, G.S. 727-732
Féralle, E. 293-299
Fisher, J.T. 345-350
Fotherby, M.D. 185-190
Foy, C.J.W. 665-670
Author Index

Fransen, R. 351–358

</table>
Absorption
   jejunum, polyunsaturated fat 219–224
Acetaldehyde adducts
   immunoblotting, alcoholic heart muscle disease 263–268
Acetylcholine
   resistance artery, diabetes 519–524
Acute gastric erosions
   cat, human pepsins 47–50
Acute myocardial ischaemia
   natriuretic peptides, exercise 551–556
Acute renal failure
   bile duct ligation, glomerular thromboxane A₂ synthesis 39–45
S-Adenosylcysteine
   brain, vitamin B₁₂ 471–477
S-Adenosylhomocysteine
   methylation ratio, brain 73–79
S-Adenosylmethionine
   brain, vitamin B₁₂ 471–477
   methylation ratio, brain 73–79
Adrenal glands
   metadrenaline 533–542
Adrenalectomy
   metadrenaline 533–542
Adrenaline
   bronchoconstriction 439–446
   platelet aggregation, cardiopulmonary bypass 269–275
α₂-Adrenoceptors
   vascular reactivity, diabetic nephropathy 421–426
β-Adrenoceptors
   G-protein α- and β-subunits, atrium 571–580
   Adrenocorticotropic hormone
      regulation of secretion 4–7
Ageing
   Kupffer cells, endotoxin 211–217
β-Agonists
   angiotensin-converting enzyme 433–437
   ‘New Zealand asthma mortality epidemic’ 14–17
Airway epithelial cells
   neutrophil chemotaxis, cigarette smoke 377–344
Airways resistance
   capsaicin, fenspiride 325–330
Alanine
   catabolism, growth factors 285–292
Albumin
   glomerular filtration rate, diabetes 413–419
   Albumin synthesis
      feeding, stable isotopes 235–242
Albinuria
   blood pressure, elderly 185–190
Alcoholic heart muscle disease
   acetaldehyde adducts, immunoblotting 263–268
Alkali-soluble protein
   skeletal muscle, weight loss 479–484
Allopurinol
   ischaemia, kidney 359–364
Amiloride
   platelet aggregation, endothelin 277–283
Amino acid requirements
   protein turnover 597–606*
Amino acids
  McArdle's disease 687–693
Amylin
  roles in physiology, pathology and therapeutics 7–12
Anaplerosis
  McArdle's disease 687–693
Angina pectoris
  natriuretic peptides, exercise 551–556
Angiotensin
  $\beta_2$-agonists 433–437
  DNA and RNA synthesis, fibroblasts 557–562
  lithium, tubular reabsorption 351–358
Angiotensin-converting enzyme
  $\beta_2$-agonists 433–437
1,5-Anhydroglucitol
  total parenteral nutrition, renal tubular function 203–210
Anti-inflamatory drugs
  $\alpha_1$-antitrypsin, neutrophils 331–336
Antibodies
  acetaldehyde adducts, alcoholic heart muscle disease 263–268
Antidiuretic hormone
  hepatocytes, diabetes 671–674
  urine concentration, parathyroid hormone 197–201
Antioxidant defences
  cigarette smoking 485–489
  $\alpha_1$-Antitrypsin
    neutrophils, sulphonamides 331–336
Apolipoprotein B-100
  renal tract, betaines 25–27
  Bile duct ligation
    renal tract, betaines 25–27
  Blood flow
    venous occlusion plethysmography 643–649
  Blood pressure
    albuminuria, elderly 185–190
    head-down tilt, spectral analysis 87–93
    insulin resistance, dietary fructose 719–725
    hypotension 463–470
  Blood volume
    carotid baroreceptors, orthostatic hypotension 463–470
  Body composition
    dual-energy X-ray absorptiometry 319–324
  Bone density
    research in Auckland 12–14
  Bradykinin
    resistance artery, diabetes 519–524
  Brain
    hypomethylation, vitamin $B_{12}$ 471–477
    methyltransferases, vitamin $B_{12}$ 73–79
  Brain natriuretic peptide
    angina pectoris, exercise 551–556
    left ventricular filling, Doppler echocardiography 159–164
    studies in New Zealand 18–21
  Atrial natriuretic peptide
    angina pectoris, exercise 551–556
    glomerular filtration rate, diabetes 413–419
    haemodynamics, cardiac pacing 165–172
    studies in New Zealand 18–21
  Atrium
    G-protein $\alpha$- and $\beta$-subunits, $\beta$-adrenoceptor blockade 571–580
    Autonomic nervous system
      heart rate variability, spectral analysis 103–109
      heart transplantation, spectral analysis 95–102
      Autoregulation
        microcirculation, heart failure 501–508*
    Bacteria
      renal tract, betaines 25–27
      Baroreflex sensitivity
        heart rate variability, spectral analysis 103–109
        power spectral analysis, heart rate 1–2
        statistical dependence 651–655
    Betaines
      bacteria, renal tract 25–27
    Breathlessness
      morphine inhalation, exercise 447–452
    5-Bromodeoxyuridine
      cell cycle, cell proliferation 119–130*
      Bronchoconstriction
        sympathetic nervous system 439–446
Subject Index

n-Butyrate

gangliosides, colonic cancer 491-499

Calcium

endothelin, protein kinase C 277-283
parathyroid hormone, urine concentration 197-201

Calcium absorption

intestine, stable strontrium 243-244

Calcium pump

membrane fluidity, hyperlipidaemia 307-310

Calphostin C

platelet aggregation, endothelin 277-283

Cancer

alkali-soluble protein, skeletal muscle 479-484
colon, gangliosides 491-499

Capillary

haemodynamics, heart failure 501-508*

Capsaicin

airways resistance, fenspiride 325-330

Carbohydrate metabolism

regulation, amylin 7-12

Cardiac pacing

haemodynamics, atrial natriuretic peptide 165-172

Cardiomyopathy

acetaldehyde adducts, immunoblotting 263-268

Cardiopulmonary bypass

platelet aggregation, adrenaline 269-275

Cardiopulmonary receptors

head-down tilt, spectral analysis 87-93

Carotid baroreceptors

plasma volume, orthostatic hypotension 463-470

Catabolism

total parenteral nutrition, growth factors 285-292

Catechol-o-methyltransferase

metadrenaline 533-542

Cell cycle

assessment of cell proliferation 119-130*

Cell lineage

myocytes, retrovirus 257-262

Cell proliferation

methods of assessment 119-130*

Chemokines

infection 393-400

Cholesterol esterification

pregnancy 311-318

Cholinesterase

nitric oxide, endothelium 111-117

Chronic obstructive pulmonary disease

fenspiride 325-330
motor control, tracking task 453-461

Cigarette smoking

cytokines, antioxidant defences 485-489
neutrophil chemotaxis, airway epithelial cells 337-344

Cirrhosis

venous responsiveness, noradrenaline 525-531

Citrate

McArdle’s disease 687-693

Clinical research

progress in New Zealand 3-27

Clonidine

vascular reactivity, diabetic nephropathy 421-426

Collecting tubule

rubidium uptake, insulin resistance 293-299

Colon

ion transport, platelet-activating factor 51-57

Colonic cancer

gangliosides, n-butyrate 491-499

Confocal microscopy

connexin, gap junctions 257-262

Congestive heart failure

continuous positive airway pressure, haemodynamics 173-178

Connexin

gap junctions, confocal microscopy 257-262

Continuous ambulatory peritoneal dialysis

diabetes, insulin action 427-432

Continuous positive airway pressure

haemodynamics, congestive heart failure 173-178
respiratory efforts 707-712

Contractile properties

skeletal muscle, growth hormone deficiency 67-71

Control of breathing

altitude, newborn infants 345-350
tracking task, chronic obstructive pulmonary disease 453-461

Copper stable isotopes

kinetic studies, Wilson’s disease 727-732

Coproporphyria

uroporphyrin, haem arginate 365-369

Coronary artery flow

exercise, nitrates 635-641

Corticotrophin

regulation of secretion 4-7

Cyclic GMP

glomerular filtration rate, atrial natriuretic peptide 413-419

Cyclo-oxygenase

endothelium, hypertension 611-622

Cytokines

cigarette smoking 485-489
protein synthesis, dietary fats 59-66
sepsis, plasminogen activator 587-594
Daltroban
- bile duct ligation, acute renal failure 39–45
- proteinuria, blood pressure 623–627

Danish Nutrition Council
- trans fatty acids 375–392

Decompression illness
- cardiorespiratory abnormalities 595–596

Diabetes
- endothelin, resistance artery 519–524
- endothelium 245–255*
- glomerular filtration rate, atrial natriuretic peptide 413–419
- glycosylated haemoglobin, semi-carbazide-sensitive amine oxidase 675–679
- insulin action, continuous ambulatory peritoneal dialysis 427–432
- islet amyloid 7–12
- neuropathy, flow motion 191–196
- vascular reactivity, clonidine 421–426
- vasopressin receptor, hepatocytes 671–674

Dietary fats
- protein synthesis, cytokines 59–66

Dietary fructose
- insulin resistance, blood pressure 719–725

Dihydroxyphenylglycol
- metadrenaline 533–542

Direct analysis
- fat mass, dual-energy X-ray absorptiometry 319–324

Disseminated intravascular coagulation
- vascular smooth muscle, thrombin 149–157

Diurnal cycling
- amino acid requirements 597–606*

DNA
- skeletal muscle, weight loss 479–484

DNA synthesis
- fibroblasts, angiotensin IV 557–562

Doppler echocardiography
- left ventricular filling, brain natriuretic peptide 159–164

Doppler ultrasound
- coronary artery flow, nitrates 635–641

Dual-energy X-ray absorptiometry
- body composition 319–324

Edrophonium
- nitric oxide, endothelium 111–117

Eicosanoids
- endothelium, hypertension 611–622

Elderly
- albuminuria, blood pressure 185–190

Electrolytes
- blood pressure, genetics 665–670
- Endothelial cells
- nitric oxide, L-arginine 135–139

Endothelium
- blood pressure 509–517
- focal glomerular sclerosis, low-protein diet 29–37
- hypertension 509–517
- platelet aggregation, protein kinase C 277–283

Endothelin receptors
- focal glomerular sclerosis, low-protein diet 29–37

Endothelin
- cholinesterase, nitric oxide 111–117
- insulin-dependent diabetes mellitus 245–255*
- microcirculation, heart failure 501–508*
- resistance arteries, hypertension 611–622
- resistance artery, diabetes 519–524
- vascular permeability factor, atherosclerosis 141–147

Endothelin-derived relaxing factor
- pregnancy 607–610
- resistance arteries, hypertension 611–622

Endotoxin
- cytokines, dietary fats 59–66
- Kupffer cells, ageing 211–217

Energy expenditure
- glucose-induced thermogenesis 543–550

Epidermal growth factor
- mucosal healing 401–403

Erythrocytes
- membrane function, hyperlipidaemia 307–310
- metabolic acidosis, inorganic phosphate 405–412

Exercise
- breathlessness, morphine inhalation 447–452
- coronary artery flow, Doppler ultrasound 635–641
- natriuretic peptides, angina pectoris 551–556

Family studies
- kidney, hypertension 665–670

Fat mass
- dual-energy X-ray absorptiometry, direct analysis 319–324

Feeding
- albumin synthesis, stable isotopes 235–242

Fenspiride
- airway resistance, capsaicin 325–330

Ferritin
- urological disease 701–706

Fetus
- lipoprotein metabolism 311–318

Fibrinolysis
- sepsis, plasminogen activator 587–594

Flow cytometry
- assessment of cell proliferation 119–130*
Flow motion
neuropathy, diabetes 191–196
Focal glomerular sclerosis
endothelin, low-protein diet 29–37
Folate
methyltransferases, brain 73–79
Free fatty acids
kinetics, insulin 681–686
Fructose
insulin resistance, blood pressure 719–725
Frusemide
renin secretion, nitric oxide 657–663
Fumarate
McArdle’s disease 687–693

Gangliosides
colonic cancer, n-butyrate 491–499
Gap junctions
connexin, confocal microscopy 257–262
Gas chromatography–mass spectrometry
very-low-density lipoprotein apolipoprotein B-100, density 225–233
Gas chromotography-mass spectrometry
colonic cancer, n-butyrate 491–499
connexin, confocal microscopy 257–262
very-low-density lipoprotein apolipoprotein B-100, density 225–233
Gastrointestinal ulceration
intestinal trefoil factor, epidermal growth factor 401–403
Genetics
blood pressure, kidney 665–670
Glomerular filtration rate
atrial natriuretic peptide, diabetes 413–419
parathyroid hormone, urine concentration 197–201
Glomerular thromboxane A₂ synthesis
bile duct ligation, acute renal failure 39–45
Glucose
atrial natriuretic peptide, glomerular filtration rate 413–419
thermogenesis, splanchnic and leg tissue 543–550
Glucose intolerance
glucose transport, skeletal muscle 301–306
Glucose metabolism
insulin action, continuous ambulatory peritoneal dialysis 427–432
Glucose transport
skeletal muscle, glucose intolerance 301–306
Glycerol
insulin 681–686
Glycogenolysis
McArdle’s disease 687–693
Glycolysis
inorganic phosphate, metabolic acidosis 405–412
Glycosylated haemoglobin
diabetes, semi-carbazide-sensitive amine oxidase 675–679
Goto–Kakizaki rat
glucose transport, skeletal muscle 301–306
G-protein
α- and β-subunits, atrium 571–580
Growth hormone
alanine, catabolism 285–292
Growth hormone deficiency
skeletal muscle, contractile properties 67–71
GTPase-activating protein
neurofibrin, neurofibromatosis 581–585
Haem arginate
uroporphyrin, coproporphyria 365–369
Haemodynamics
cardiac pacing, atrial natriuretic peptide 165–172
continuous positive airway pressure, congestive heart failure 173–178
head-down tilt, spectral analysis 87–93
microcirculation, heart failure 501–508*
Haemostasis
cardiopulmonary bypass, adrenaline 269–275
Head-down tilt
haemodynamics, spectral analysis 87–93
Heart
gap junctions, connexin 257–262
Heart failure
heart rate variability, spectral analysis 103–109
metadrenaline 533–542
microcirculation, haemodynamics 501–508*
Heart rate
head-down tilt, spectral analysis 87–93
heart transplantation, spectral analysis 95–102
power spectral analysis, autonomic nervous system 1–2
Heart rate variability
spectral analysis, baroreflex sensitivity 103–109
Heart transplantation
blood pressure, spectral analysis 95–102
Heat shock protein
infection 393–400
Heparin
vascular smooth muscle, thrombin 149–157
Hepatocytes
vasopressin receptor, diabetes 671–674
Hering–Breuer reflexes
altitude, newborn infants 345–350
Hirudin
platelet aggregation, adrenaline 269–275
vascular smooth muscle, thrombin 149–157
Human pepsins
acute gastric erosions, cat 47–50
Hyperaldosteronism
  hypertension, hereditary 563–570
Hyperalimentation
  1,5-anhydroglucitol, renal tubular function 203–210
Hyperlipidaemia
  calcium pump, membrane fluidity 307–310
Hyperphosphataemia
  metabolic acidosis, uraemia 405–412
Hypertension
  albuminuria, elderly 185–190
  endothelin 509–517
  hereditary, hyperaldosteronism 563–570
  kidney, genetics 665–670
  metadrenaline 533–542
  resistance arteries, endothelium 611–622
  rubidium uptake, nephron 293–299
Hypomethylation
  brain, vitamin B₁₂ 73–79, 471–477
Hypoxia
  vagal reflexes, newborn infants 345–350
Idiopathic pulmonary fibrosis
  superoxide dismutase 371
Infarct artery patency
  thrombolytic therapy 21–24
Infection
  chemokines 393–400
Inflammation
  urinary ferritin 701–706
  inflammatory bowel disease
    platelet-activating factor, synthesis de novo 713–717
Inhalation
  morphine, breathlessness 447–452
Inorganic phosphate
  metabolic acidosis, uraemia 405–412
Insulin
  free fatty acids, kinetics 681–686
  action
    diabetes, continuous ambulatory peritoneal dialysis 427–432
Insulin resistance
  blood pressure, dietary fructose 719–725
  glucose transport, skeletal muscle 301–306
  obesity and hypertension, amylin 7–12
  rubidium uptake, nephron 293–299
  very-low-density lipoprotein apolipoprotein B-100, obesity 225–233
Insulin sensitivity
  insulin action, continuous ambulatory peritoneal dialysis 427–432
Insulin-like growth factor-I
  alanine, catabolism 285–292
  free fatty acids, kinetics 681–686
  muscle strength, growth hormone deficiency 67–71
Interleukin-1
  Kupffer cells, endotoxin 211–217
Interleukin-6
  cigarette smoking 485–489
  fibrinolysis, sepsis 587–594
  Kupffer cells, endotoxin 211–217
Interleukin-8
  infection 393–400
Internal mammary graft
  exercise, nitrates 635–641
Intestinal trefoil factor
  mucosal healing 401–403
Intestine
  calcium absorption, stable strontium 243–244
  intraperitoneal insulin
    metabolic effects, continuous ambulatory peritoneal dialysis 427–432
  ion transport
    platelet-activating factor, distal colon 51–57
  ischaemia
    kidney, allopurinol 359–364
Jejunum
  absorption, polyunsaturated fat 219–224
Ki-67
  cell cycle, cell proliferation 119–130*
Kidney
  blood pressure, genetics 665–670
  ischaemia, allopurinol 359–364
  ⁸¹mKr
    ventilation–perfusion inequality 179–184
  Kupffer cells
    endotoxin, ageing 211–217
Laser Doppler flowmetry
  neuropathy, diabetes 191–196
Lean mass
  dual-energy X-ray absorptiometry, direct analysis 319–324
Left ventricular filling
  Doppler echocardiography, brain natriuretic peptide 159–164
Leucocytes
  sodium–potassium-dependent adenosine triphosphatase, potassium 695–700
Leukotrienes
  Kupffer cells, endotoxin 211–217
Lipoproteins
  pregnancy 311–318
Lithium
  tubular reabsorption, angiotensin II 351–358
Low-protein diet
don't mention any gene expression, focal glomerular
sclerosis 29–37
Lymphocytes
sodium–potassium-dependent adenosine
triphosphatase, potassium 695–700

Macula densa
renin secretion, nitric oxide 657–663
Malaria
chemokines 393–400
Malate
McArdle's disease 687–693
Membrane cholesterol
erthrocytes, hyperlipidaemia 307–310
Membrane fluidity
calcium pump, hyperlipidaemia 307–310
Messenger RNA
vasopressin receptor, diabetes 671–674
Metabolic acidosis
inorganic phosphate, uraemia 405–412
Metadrenaline
sympathetic nervous system 533–542
Methacholine
nitric oxide, endothelium 111–117
Methionine synthase
methylation ratio, brain 73–79
Methylation ratio
brain, vitamin $B_{12}$ 471–477
methyltransferases, brain 73–79
Methyltransferases
vitamin $B_{12}$, brain 73–79
Mevalonic acid
very-low-density lipoprotein apolipoprotein
B-100, obesity 225–233
Microalbuminuria
diabetes, vascular reactivity 421–426
transvascular albumin leakage 629–633
Microcirculation
haemodynamics, heart failure 501–508
Monoamine oxidase
metadrenaline 533–542
Monocyte chemotactic protein
infection 393–400
Morphine
inhalation, breathlessness 447–452
Motor control
tracking task, chronic obstructive pulmonary
disease 453–461
Mucosal healing
intestinal trefoil factor, epidermal growth
factor 401–403
Muscarinic receptors
nitric oxide, endothelium 111–117
Muscle contraction
tricarboxylic acid cycle, McArdle's
disease 687–693
Muscle strength
insulin-like growth factor-I, growth hormone
deficiency 67–71
Myocardial infarction
thrombolytic therapy, left ventricular
function 21–24
Myocytes
connexin, gap junctions 257–262
Natriuretic peptides
studies in New Zealand 18–21
Near-infrared spectroscopy
ischaemia, kidney 359–364
Neonatal respiration
vagal reflexes, altitude 345–350
Nephron
rubidium uptake, insulin resistance 293–299
Neurofibroma
neurofibrin, GTPase-activating protein 581–585
Neurofibromatosis
neurofibrin, GTPase-activating protein 581–585
Neurofibromin
GTPase-activating protein,
neurofibromatosis 581–585
Neuropathy
diabetes, flow motion 191–196
Neuropeptide Y
bronchoconstriction 439–446
Neutrophil chemotaxis
airway epithelial cells, cigarette
smoking 337–344
Neutrophils
$\alpha_{1}$-antitrypsin, sulphonamides 331–336
New Zealand
progress in clinical research 3–27
'New Zealand asthma mortality epidemic'
$\beta$-agonists 14–17
Newborn infants
vagal reflexes, altitude 345–350
Nitrites
coronary artery flow, Doppler
ultrasound 635–641
Nitric oxide
cholinesterase, endothelium 111–117
endothelial cells, L-arginine 135–139
dendotoxin shock, thrombin 149–157
insulin-dependent diabetes mellitus 245–255
pregnancy 607–610
renin secretion, macula densa 657–663
resistance arteries, hypertension 611–622
resistance artery, diabetes 519–524
septic shock 131–133
Nitric oxide synthase
don endothelial cells, L-arginine 135-139
septic shock 131-133
N^{G}-Nitro-L-arginine methyl ester
don renin secretion, macula densa 657-663
Nitrogen balance
don amino acid requirements 597-606*
Nitrous oxide
don methylation ratio, brain 73-79
Noradrenaline
don bronchoconstriction 439-446
vascular reactivity, diabetic nephropathy 421-426
venous responsiveness, cirrhosis 525-531
Normetadrenaline
don sympathetic nervous system 533-542
Norrie disease
don metadrenaline 533-542
Obesity
don very-low-density lipoprotein apolipoprotein B-100, insulin resistance 225-233
Oedema
don microcirculation, heart failure 501-508*
Orthophosphate
don metabolic acidosis, uraemia 405-412
Orthostatic hypotension
don carotid baroreceptors, plasma volume 463-470
Osteoporosis
don research in Auckland 12-14
Ouabain
don sodium-potassium-dependent adenosine triphosphatase, lymphocytes 695-700
Oxidative metabolism
don McArdle's disease 687-693
Oxygen uptake
don glucose-induced thermogenesis 543-550
Parathyroid hormone
don urine concentration, arginine vasopressin 197-201
Patent foramen ovale
don decompression illness 595-596
Pepsins
don acute gastric erosions, cat 47-50
Permeability
don distal colon, platelet-activating factor 51-57
Phaeochromocytoma
don metadrenaline 533-542
Phenylephrine
don vascular reactivity, diabetic nephropathy 421-426
Plasma volume
don carotid baroreceptors, orthostatic hypotension 463-470
Plasminogen activator
don fibrinolysis, sepsis 587-594
Plasminogen activator inhibitor 1
don fibrinolysis, sepsis 587-594
Platelet aggregation
don cardiopulmonary bypass, adrenaline 269-275
endothelin, protein kinase C 277-283
Platelet-activating factor
don ion transport, distal colon 51-57
synthesis de novo, inflammatory bowel disease 713-717
Platelet-derived growth factor
don endothelium, atherosclerosis 141-147
Polyamine
don cell cycle, cell proliferation 119-130*
Polyol
don total parenteral nutrition, renal tubular function 203-210
Polyunsaturated fat
don jejunal function 219-224
Porphobilinogen deaminase
don uroporphyrin, haem arginate 365-369
Postmenopausal osteoporosis
don research in Auckland 12-14
Potassium
don sodium-potassium-dependent adenosine triphosphatase, lymphocytes 695-700
Potassium channels
don endothelium, hypertension 611-622
Power spectral analysis
don heart rate, blood pressure 1-2
Pre-ascitic cirrhosis
don venous responsiveness, noradrenaline 525-531
Pre-eclampsia
don nitric oxide 607-610
Pregnancy
don lipoprotein metabolism 311-318
nitric oxide 607-610
Proliferating cell nuclear antigen
don cell cycle, cell proliferation 119-130*
Prostaglandins
don Kupffer cells, endotoxin 211-217
Protein
don hypomethylation, vitamin B_{12} 471-477
Protein kinase C
don endothelin, platelet aggregation 277-283
Protein synthesis
don cytokines, dietary fats 59-66
Protein turnover
don amino acid requirements 596-606*
Proteinuria
don blood pressure, thromboxane receptor antagonists 623-627
Proximal convoluted tubule
don rubidium uptake, insulin resistance 293-299
Pulmonary artery pressure
fenspiride 325–330

Renal tract
bacteria, betaines 25–27
Renal tubular function
total parenteral nutrition, 1,5-anhydroglucitol 203–210
Renin–angiotensin system
β2-agonists 433–437
natriuretic peptides 81–86
Renin secretion
macula densa, nitric oxide 657–663
Resistance arteries
endothelium, diabetes 519–524
endothelium, hypertension 611–622
Respiratory efforts
upper airway pressure 707–712
Retrovirus
cell lineage, myocytes 257–262
RNA
skeletal muscle, weight loss 479–484
RNA synthesis
fibroblasts, angiotensin IV 557–562
Rubidium uptake
nephron, insulin resistance 293–299

Secretion
jejunum, polyunsaturated fat 219–224
Semi-carbazide-sensitive amine oxidase
diabetes, glycosylated haemoglobin 675–679
Sepsis
chemokines 393–400
fibrinolysis, plasminogen activator 587–594
nitric oxide synthase 131–133
Serum lipids
insulin action, continuous ambulatory peritoneal dialysis 427–432
Sialic acid
colonic cancer, n-butyrate 491–499
Skeletal muscle
alkali-soluble protein, weight loss 479–484
catabolism, growth factors 285–292
contractile properties, growth hormone deficiency 67–71
glucose transport, glucose intolerance 301–306
glucose-induced thermogenesis 543–550
Sleep apnoea–hypopnoea
respiratory efforts 707–712
Sodium
nephron, insulin resistance 293–299
venous responsiveness, noradrenaline 525–531
Sodium–potassium-dependent adenosine triphosphatase
nephron, insulin resistance 293–299
potassium, lymphocytes 695–700
Spectral analysis
blood pressure, heart transplantation 95–102
haemodynamics, head-down tilt 87–93
heart rate variability, baroreflex sensitivity 103–109
Splanchnic tissues
glucose-induced thermogenesis 543–550
Stable isotopes
albumin synthesis, feeding 235–242
very-low-density lipoprotein B-100, hepatic secretion 225–233
Statistical dependence
baroreflex sensitivity 651–655
Staurosporine
platelet aggregation, endothelin 277–283
Steroid osteoporosis
research in Auckland 12–14
Strontium
calcium absorption, intestine 243–244
Subacute combined degeneration
hypomethylation, vitamine B12 471–477
Subcutaneous insulin
metabolic effects, continuous ambulatory peritoneal dialysis 427–432
Sulphonamides
α1-antitrypsin, neutrophils 331–336
Superoxide dismutase
idiopathic pulmonary fibrosis 371
Surgery
alkali-soluble protein, skeletal muscle 479–484
Sympathetic nervous system
bronchoconstriction 439–446
metadrenaline 533–542
Tachycardia
cardiac pacing, atrial natriuretic peptide 165–172
99mTc
ventilation–perfusion inequality 179–184
Thermogenesis
glucose, splanchnic and leg tissue 543–550
Thick ascending limb of Henle
rubidium uptake, insulin resistance 293–299
Thrombin
platelet aggregation, endothelin 277–283
vascular smooth muscle, endotoxic shock 149–157
Thrombolytic therapy
left ventricular function, myocardial infarction 21–24
Thromboxane A2
glomerular synthesis, acute renal failure 39–45
Thromboxane A₂/prostaglandin H₂ receptor antagonism
  bile duct ligation, acute renal failure 39–45
Thromboxane receptor antagonists
  proteinuria, blood pressure 623–627
Thymidine
  cell cycle, cell proliferation 119–130*
Thymidine incorporation
  fibroblasts, angiotensin IV 557–562
Tilt
  blood pressure, heart transplantation 95–102
Tissue factor
  fibrinolysis, sepsis 587–594
Tissue-type plasminogen activator
  fibrinolysis, sepsis 587–594
Total enteral nutrition
  1,5-anhydroglucitol, renal tubular function 203–210
Total parenteral nutrition
  1,5-anhydroglucitol, renal tubular function 203–210
catabolism, growth factors 285–292
Toxoplasmosis
  chemokines 393–400
Tracking task
  motor control, obstructive pulmonary disease 453–461
*trans Fatty acids
  influence on health 373–384, 375–392
Transfer function analysis
  haemodynamics, head-down tilt 87–93
Transitional cell carcinoma
  urinary ferritin 701–706
Transvascular albumin leakage
  microalbuminuria, atherosclerosis 629–633
Triacylglycerol
  membrane function, hyperlipidaemia 307–310
Tricarboxylic acid cycle
  McArdle's disease 687–693
Tuberculosis
  chemokines 393–400
Tubular reabsorption
  lithium, angiotensin II 351–358
Tumour necrosis factor
  cigarette smoking 485–489
fibrinolysis, sepsis 587–594
  Kupffer cells, endotoxin 211–217
Tumour-infiltrating lymphocytes
  urinary ferritin 701–706

Upper airway pressure
  respiratory efforts 707–712
Uraemia
  metabolic acidosis, inorganic phosphate 405–412

Uridine incorporation
  fibroblasts, angiotensin IV 557–562
Urinary albumin excretion
  transvascular albumin leakage, atherosclerosis 629–633
Urine concentration
  parathyroid hormone, arginine vasopressin 197–201
Urological disease
  ferritin 701–706
Uroporphyrin
  coproporphyrin, haem arginate 365–369

Vagal reflexes
  altitude, newborn infants 345–350
Variability
  blood pressure, heart transplantation 95–102
Vascular conductance
  venous occlusion plethysmography 643–649
Vascular permeability factor
  endothelium, atherosclerosis 141–147
Vascular reactivity
  diabetic nephropathy, clonidine 421–426
Vascular smooth muscle
  endotoxic shock 149–157
  vascular permeability factor, atherosclerosis 141–147
Vasoconstriction
  endothelin, hypertension 509–517
Vasodilatation
  resistance artery, diabetes 519–524
  venous occlusion plethysmography 643–649
Vasomotion
  neuropathy, diabetes 191–196
Vasopressin
  haemodynamics, cardiac pacing 165–172
Vasopressin receptor
  hepatocytes, diabetes 671–674
Venous occlusion plethysmography
  blood flow 643–649
Venous responsiveness
  noradrenaline, pre-ascitic cirrhosis 525–531
Ventilation
  fenspiride 325–330
Ventilation–perfusion inequality
  ⁸¹mKr, ⁹⁹mTc 179–184
Very-low-density lipoprotein apolipoprotein B-100
  hepatic secretion, obesity 225–233
Vitamin B₁₂
  hypomethylation, brain 471–477
  methyltransferases, brain 73–79

Weight loss
  alkali-soluble protein, skeletal muscle 479–484
Wilson's disease
  copper stable isotopes, kinetic studies 727–732
Biosynthesis of platelet-activating factor in normal and inflamed human colon mucosa: evidence for the involvement of the pathway of platelet-activating factor synthesis de novo in inflammatory bowel disease by C. B. Appleyard and K. Hillier

Long-term fructose versus corn starch feeding in the spontaneously hypertensive rat by M. R. van der Schaaf, J. A. Joles, A. van Tol and H. A. Koomans

CORRECTION

Physiology and pathophysiology of heart rate and blood pressure variability in humans: is power spectral analysis largely an index of baroreflex gain? by P. Sleight, M. T. La Rovere, A. Mortara, G. Pinna, R. Maestri, S. Leuzzi, B. Bianchini, L. Tavazzi and L. Bernardi,
